 acid by, 25, 285—Electric, effect on
 rate of thinning of a liquid film, 80,
 323—Electric, experiments, 71, 88—
 Electric, in analytical chemistry, 41,
 213—Electric, in a spherical solenoid,
 induction produced by the variation
 of intensity of, 48, 213—Electric,

- measuring, 50, 22—Electric, measuring intensity in absolute units, 49, 277—Electric, metallic iron obtained by, 21, 274—Electric, molecular groups decomposed by, 21, 59—Electric, oxidation of metallic arsenides with, 65, 54, 66—Electric, oxidation of sulphides by, 62, 206—Electric, oxidations by, 59, 293—Electric, peculiar properties of, 52, 11—Electric, photography with, 63, 131—Electric, produced by light, 44, 295—Electric, regulator, 39, 92—Electric, rendering paper sensitive to, 26, 60—Electric, result of irritation of the liver by, 42, 186—Electric, using the resistance of a conductor heated by, an alternating, as a measure of the current, 91, 242—Galvanic, action on lactic and succinic acids, 1, 264—Galvanic, action on the organ of sensation, 32, 20, 40—Galvanic, constant, 17, 37—Galvanic, energy of, 24, 240—Galvanic, separation of metals from each other by, 24, 311—Galvanic, theory of division of, to decomposable conductors, 35, 53—High tension continuous, use of electric valves for production, 91, 241—Hydro-electric, and thermo-electric, co-efficients of, 24, 240—Regulator, automatic, 39, 9—Repulsion of two consecutive portions of the same, 49, 316—Voltaic, intermittence of, 28, 314
- Currents, adjusted, measurement of, 52, 35—Alternating, and voltages, obtaining in same phase for fictitious loads, 82, 242—Alternating, electrochemical means of observing, 69, 217—Alternating, hot-wire ammeter for measuring very small, 89, 178—Alternating, instruments for measurement of large and small, 89, 248—Alternating, interference with, 63, 140; 65, 8—Alternating, measurement, 73, 290—Alternating, of dynamo-machines, electrolysis by, 58, 12—Alternating, potentiometer for, 68, 304—Alternating, production of small variable frequency, suitable for telephonic and other measurements, 97, 285—Alternating, use for electrolysis, 89, 130—Alternating, use in chemistry, 89, 286—Battery, determination of simple bodies by action in voltameter 30, 8—Blaze, in animal and vegetable tissues, 88, 22—Circular, cylindrical and helical, magnetic field and inductance coefficients of, 95, 53—Constant, measuring resistances with, 47, 128—Convection, influence of pressure on, 95, 225—Earth, at Kew Observatory, 93, 139—Earth-air, resistance of vertical, 72, 304—Electric, 21, 214, 238, 274—Electric, calorific coefficients of, 24, 246—Electric, constant, distribution of, 40, 191—Electric, construction and use of oscillation valves for rectifying high frequency, 93, 165—Electric, direct measurement of, 73, 255—Electric, for telegraphic purposes, 5, 208—Electric, growth in an inductive circuit, 85, 189—Electric, liquid conductors of, 22, 191—Electric, maintenance without use of permanent magnets, 15, 144—Electric, measurement through air of different densities, 75, 175—Electric, obtained by bending metals, 25, 69—Electric, of Bell's telephone, intensity of, 38, 175—Electric, of high tension, researches on phenomena produced in liquids by, 31, 250—Electric, passage in mixed solutions of electrolytes, 77, 190—Electric, passage through incandescent gases, 17, 32—Electric, physiological action of, 21, 299—Electric, produced by contact of metals and water, 21, 225—Electric, speed of, 40, 57—Electric, transmission by derivation across a river, 33, 221—Electric, variable state of, 21, 57—Electric-capillary, in bones, nerves, and brains, 21, 118—Induction (*see* Induction)—Interrupted, 20, 180—Rotatory, 64, 308—Secondary, and their applications, 28, 156—Small, voltmeter for, 84, 240—Telluric, (*see* Telluric)—Terrestrial, 51, 118—Thermo-electric, 15, 54—Thermo-electric, from one metal, 4, 222—Thermo-electric, in wires subjected to strain, 37, 118—Transmitted through imperfect contacts, intensity according to the pressure exerted on them, 38, 100, 149—Voltaic, mutual action, 28, 305—Water, report on theory, 27, 219
- Currie, E. G., Electrolytic separation of iron and zinc, 91, 247

- Cuyper, C. de (*see* de Cuyper, C.)
- Cyameline, 75, 69; 91, 244
- Cyamides, carbamin (*see* Carbamin)
- Cyamine, glyco- (*see* Glycocyamine)—Hyos- (*see* Hyoscyamine)
- Cyanacetate, ethyl methylsodio- (*see* Ethyl)—Ethylic, action of ethylene dibromide and trimethylene dibromide on sodium derivative of, 79, 261—Methyl oxymethylene (*see* Methyl)
- Cyanacetates of sodic propyl, butyl, and amyl, action on diazobenzene chloride, 73, 233
- Cynacetic ether (*see* Ether)—Ethers (*see* Ethers)—Soda ether (*see* Ether)
- Cyanoacetate, ethylic, formation, 55, 92
- Cyanacetone, sulpho- (*see* Sulphocyanacetone)
- Cyanacetophenone, 55, 296—Formation and derivatives of, 56, 269—Preparation, 53, 11
- Cyanacetylureas, synthesis, 38, 70
- Cyanethine, 47, 118
- Cyanaldehyd, 57, 181
- Cyanallyl, 41, 80
- Cyanamide, 29, 165; 42, 36—Action of heat on, 36, 153—Action on bromanile, 77, 116—Action on sulphoncjugated amidised aromatic acids, 55, 272—Addition of, 27, 266; 29, 102—Chlor- (*see* Chlorcyanamide)—Compound as a nitrogenous fertiliser, 94, 150—Compounds of succinic acid, 43, 188—Constitution, 35, 142, 264—Derivatives, 21, 287—Formation, 71, 126—Metallic derivatives and structural formula, 28, 20—Of calcium (*see* Calcium)—Of silver (*see* Silver)—Preparing, 36, 227—Thermic researches on, 74, 222
- Cyanamides, azo- (*see* Azocyanamides)—New process for, 66, 210—Nitrophenyl- (*see* Nitrophenylcyanamides)—Sulphoni- (*see* Sulphonicyanamides)
- Cyan-aniline, 52, 166
- Cyanate, acetyl thio- (*see* Acetyl)—Allyl-sulpho- (*see* Allyl-sulphocyanate)—Chlorothio- (*see* Chlorothiocyanate)—Diphenyl diiso- (*see* Diphenyl)—Ethylsulpho- (*see* Ethylsulphocyanate)—Melaminsulpho- (*see* Melaminsulphocyanate)—Methyl thio- (*see* Methyl)—Morphia hydro- (*see* Morphia)—Of ammonium (*see* Ammonium)—Of calcium (*see* Calcium)—Of lead (*see* Lead)—Of potassium (*see* Potassium)—Of silver (*see* Silver)—Silicon thio- (*see* Silicon)—Silver thio (*see* Silver)—Sulpho (*see* Sulphocyanate)
- Cyanates, acyl thio (*see* Acyl)—Alkyl thio (*see* Alkyl)—And cyanides, simultaneous estimation, 86, 245—Aromatic, 22, 130, 287; 53, 107—Diiso- (*see* Diisocyanates)—Iso- (*see* Isocyanates)—Of alkylammonium (*see* Alkylammonium)—Physiological properties, and metamorphoses undergone by, when introduced into

- human system, 25 70—Sulpho- (*see* Sulphocyanates)—Thio- (*see* Thiocyanates)—Tri- (*see* Triocyanates)—Volumetric estimation, 93, 5, 17
- Cyanbenzene, dinitrosulpho- (*see* Dinitrosulphocyanbenzene)
- Cyanbenzidine, 22, 154
- Cyanbenzol, diazo- (*see* Diazocyanbenzol)
- Cyancarbonic acid ether (*see* Ether)
- Cyanchlorhydrine of ethylglycerine, 22, 299
- Cyancinnamic ether (*see* Ether)
- Cyandiamide, di- (*see* Dicyandiamide)
- Cyandiamidin, di- (*see* Dicyandiamidin)
- Cyanethine, base homologous with, 23, 179—Chemical constitution, 59, 169—Derivatives, 51, 37
- Cyanglutamate, ethyl-methylphenyl- (*see* Ethyl)
- Cyanguanidins, 38, 60
- Cyanhydrate, butylchloral- (*see* Butylchloralcyanhydrate)—Of ammonium (*see* Ammonium)—Of chloral (*see* Chloral)
- Cyanhydric acid (*see* Acid)
- Cyanhydrine of levulose (*see* Levulose)
- Cyanhydrogen, chlor- (*see* Chlorocyanhydrogen)
- Cyanic compounds, new class of, 46, 66—Ether (*see* Ether)—Ether of borneol (*see* Borneol)—Ethers (*see* Ethers)
- Cyanide, action on thiosulphonic acid salts, 98, 281—Alkaline mercuric (*see* Alkaline)—Allyl alcohol (*see* Allyl alcohol)—Argentite, 18, 151—Baths, lixivation in, 75, 310—Baths, extraction of silver from, 36, 90—Baths, recovery of gold from old, 38, 183—Bullion, alleged shortage in, 79, 268—Carboxy- (*see* Carboxycyanide)—Cobalti- (*see* Cobalticyanide)—Cuprous, method of forming, 79, 298—Detection methods, 91, 28—Estimation in presence of a chloride, 84, 107—Ethylsulpho- (*see* Ethylsulphocyanide)—Ferri- (*see* Ferriocyanide)—Ferro- (*see* Ferriocyanide)—Ferriocyanide, ferrocyanide, silver chloride, and sulphocyanide, analysis of a mixture, 58, 232—Mercuric, action of alkaline on, 65, 169—Mercuric, action of phosphine on, 34, 167—Mercuric, and arsine, 34, 167—Mercuric, and chlorides of earthy metals, compounds, 36, 22—Mercuric, and silver nitrate, reaction between, in presence of ammonia, 48, 161—Methyl (*see* Methyl)—Nickelo-potassic, action of reducing agents on, 68, 295; 71, 81—Nitrobenzyl- (*see* Nitrobenzyl)—Of acetyl (*see* Acetyl)—Of allyl (*see* Allyl)—Of ammonium (*see* Ammonium)—Of amyl (*see* Amyl)—Of arsenic (*see* Arsenic)—Of barium (*see* Barium)—Of benzyl (*see* Benzyl)—Of bromine (*see* Bromine)—Of calcium (*see* Calcium)—Of cobalt (*see* Cobalt)—Of copper (*see* Copper)—Of ethyl (*see* Ethyl)—Of ethylene (*see* Ethylene)—Of gold (*see* Gold)—Of hydrogen (*see* hydrogen)—Of iodine (*see* Iodine)—Of manganese (*see* Manganese)—Of mercury (*see* Mercury)—Of naphthyl (*see* Naphthyl)—Of phosphorus (*see* Phosphorus)—Of potassium (*see* Potassium)—Of silver (*see* Silver)—Of strontium (*see* Strontium)—Of thallium (*see* Thallium)—Of zinc (*see* zinc)—Oxyferro- (*see* Oxyferrocyanide)—Pinene isonitroso- (*see* Pinene)—Platino- (*see* Platinoocyanide)—Poisoning, 87, 95—Potassic, determination of copper by means of, 48, 111—Process, chemistry of, 72, 80, 95; 73, 272—Process for gold extraction, 75, 47—Pure, 86, 246—Silver nitro- (*see* Silver)—Silver sulpho- (*see* Silver)—Sodic, action of ethylic chlorocarbonate on, 36, 277—Sodium ferro- (*see* Sodium)—Solutions, recovery of gold from, 8, 13—Solutions, technical analysis of, 72, 286, 298—Sulpho- (*see* Sulphocyanide)—Thallium-platinum (*see* Thallium-platinum)—Thallous, double salts of, 37, 162—Thallous thallic, 37, 62—Tin sulpho- (*see* Tin)—Trichloral- (*see* Trichloralcyanide)
- Cyanide-cyanate of chloral (*see* Chloral)
- Cyanides, 28, 124—Alkaline (*see* Alkaline)—And aldehydes, condensation, 70, 73—And cyanates, simultaneous estimation, 86, 245—Application of wool-stain to preparation of, 21, 71—Carbonylferro- (*see* Carbonylferrocyanides)—Cobalti- (*see* Cobalticyanides)—Analysis of commercial, 75, 268—Complex, and amines of the fatty series, combinations, 86, 305—Complex, electrolytic formation, 91, 2—Complex, new class of, 88, 107—Complex, sulphonyl-substitution in the molecule of, 92, 37—Detection in presence of compound cyanides, 50, 227—Double, 74, 167; 79, 167—Double, analysis by hyposulphite of baryta, 11, 46—Double, behaviour towards ammoniacal solution of silver, 20, 60—Earthy, 4, 213—Electrolysis, 90, 321—Estimation, 22, 204, 216; 37, 129; 65, 299—Estimation of simple, 72, 227—Ferri- (*see* Ferriocyanides)—Ferro- (*see* Ferriocyanides)—Formation heat of, 42, 83—Glaucoferro- (*see* Glaucoferrocyanides)—Hydration of, 60, 59—Hydroseleno- (*see* Hydroselenocyanides)—In gas-works, extraction, 84, 223—In Laming's solution, estimation, 83, 253—Interaction with thiosulphates, 77, 131—Manufacture, 50, 57—Metallic, alcoholisation, 95, 106—Metallic, constitution, 87, 10—Metallic, constitution, as deduced from their synthetic interactions, 85, 161—Metallic, interaction with organic bases, 91, 161—Metallic, interaction with organic halides, 91, 107—Metallic, reactions of phenyl hydrazine with, 98, 34—Nitroso- (*see* Nitrosocyanides)—Obtained from acridine, methylacridine and phenanthridine methiodides, constitution, 93, 243—Of alkaline (*see* Alkaline)—Of copper (*see* Copper)—Of gold (*see* Gold)—Of iridium (*see* Iridium)—Of mercury (*see* Mercury)—Of Osmium (*see* Osmium)—Of platinum metals, 5, 323—Of potassium (*see* Potassium)—Of Rhodium (*see* Rhodium)—Of zinc (*see* Zinc)—Organic acid, 35, 217; 36, 231—Organic, isomerism in, 17, 285—Oxyferro- (*see* Oxyferrocyanides)—Platin- (*see* Platinoocyanides)—Platinid- (*see* Platinoocyanides)—Platino- (*see* Platinoocyanides)—Poisoning with, 21, 130—Preparation of commercial, 51, 127—Production, 69, 186—Rhodi- (*see* Rhodiocyanides)—Rutheno- (*see* Ruthenocyanides)—Seleno- (*see* Selenocyanides)—Sulpho- (*see* Sulphocyanides)
- Cyanine, 7, 7; 15, 267; 20, 47—Hæmo- (*see* Hæmocyanine)—Eneo- (*see* Eneocyanine)—Of phenol (*see* Phenol)—Phyllo- (*see* Phyllocyanin)—Prisms, 83, 107—Pyo- (*see* Pyocyanine)—Uro- (*see* Urocyanine)
- Cyanines, gallo- (*see* Gallocyanines)
- Cyanised camphor (*see* Camphor)
- Cyanite of phenyl (*see* Phenyl)—Reso- (*see* Resocyanite)
- Cyanites, isothio- (*see* Isothiocyanites)
- Cyanmethine, oxy-base of, 50, 104
- Cyanmethyl, sulpho- (*see* Sulphocyanmethyl)
- Cyan-naphthaline, di- (*see* Dicyan-naphthaline)
- Cyanoacetate, ethyl sodio- (*see* Ethyl)—Of ethyl (*see* Ethyl)—Of menthyl (*see* Menthyl)
- γ -Cyanoacetoacetates, ethylic and methylic, hydrolysis of, 79, 9
- Cyanobenzene, iso- (*see* Isocyanobenzene)
- Cyanobenzyl chloride, action of sulphhydrate of potassium on, 80, 24
- Cyanobromide, polymeric, 19, 274
- Cyanocamphacetic acid (*see* Acid)
- Cyanocampho- α -isobutyric acid (*see* Acid)
- Cyanocampho- α -propionic acid (*see* Acid)
- Cyanocamphor, 60, 62; 91, 47—Derivatives, 81, 297
- Cyanocamphors, acyl- (*see* Acylcyanocamphors)
- Cyanocarbonate, ethyl- (*see* Ethylcyanocarbonate)
- Cyanocarvomenthone derivatives, 94, 264
- Cyanocyclopentane, 1-imino-2- (*see* 1-imino-2-cyanocyclopentane)
- Cyanodiamid, di- (*see* Dicyanodiamid)
- Cyanodihydrocarvone, 93, 291—Amyl nitrite and sodium ethoxide, interaction, 95, 249; 96, 278—Derivatives, 94, 264
- Cyanoforn, 24, 157
- Cyanogen, 6, 277; 34, 67; 58, 60—Action of electric current on, 94, 83—Action on albumen, 36, 224; 39, 206—Action on amidobenzoic acid, 39, 171—Action on anthranilic acid, 20, 202; 21, 6—Action on orthodiamines, 50, 116—Action on potassium cyanide, 90, 56—Action on toluidines, 49, 116—Addition to sodium salt of malonic acid, 77, 166—Analogy to oxygen, 33, 141—And hydrogen and metals, combination, 40, 88—And hydrogen combination, 27, 256—And titanium, detection, 63, 24—Arseno- (*see* Arsenocyanogen)—Chlorine compounds of, 15, 133—Combustion, 53, 164—Compounds, 36, 238, 251—Compounds, absorption spectra of, 83, 274—Compounds, classification, 33, 223, 234—Compounds, constitution, 50, 115—Compounds, detection, 65, 12—Compounds, double, 21, 46—Compounds, formation of graphite by decomposition of, 4, 73; 41, 283—Compounds in alkali making, 38, 130, 137, 162, 177—Compounds of magnesium, 64, 26; 65, 227—Compounds of manganese, 15, 201—Decomposition, 23, 227—Derivatives of camphor, 38, 281—Derivatives of marsh-gas, 13, 281—Derivatives of acetone, 26, 229—Detection, 50, 270; 63, 24—Determination of equivalent of, 78, 261—Detonation, 44, 260—Estimation in impure solutions, 71, 274—Estimation, volumetric, 89, 229—Explosion, 73, 138—Ferro- (*see* Ferrocyanogen)—Flame, 3, 263—Flame, chemistry of, 69, 248—Flame, colour, 47, 140—Flame, structure, 69, 248—Fluid, 22, 130—Formation, 11, 255—Formation, heat attending, 39, 244—Formation, heat of, 41, 251—Gas from, apparently identical with argon, 81, 231—In bromine, 28, 51—In soda-lyes, 39, 25—Lectures on, 13, 305—Liquification of, 22, 113—Liquid, solvent and dissociating properties, 87, 82—Liquid, solvent power of, 24, 303—Manufacture from refuse gluten, 8, 95—Mixed with other gases, determination, 51, 284—Oxamide from, 18, 131—Para- (*see* Paracyanogen)—Persulpho- (*see* Persulphocyanogen)—Phospho- (*see* Phosphocyanogen)—Preparation, 51, 213—Pseudosulpho- (*see* Pseudosulphocyanogen)—Radicle, experiments on, 66, 98—Series, 24, 144—Solubility and polymerisation, 90, 56—Solution and polymerisation, 90, 82—Spectrum, 84, 10—Spectrum, reversal of, 44, 253—Steel, 3, 290—Sulpho- (*see* Sulphocyanogen)—Transformation of paracyanogen into, 17, 211, 238, 251
- Cyanogen acetate, 5, 210
- Cyanogen chlorhydrate, 22, 191
- Cyanogen chloride, action on benzylic alcohol, 22, 59—Action on ethyl acetonediacarbonate, 81, 312—Action on soda-camphor, 85, 251—Action on zinc ethyl, 47, 57
- Cyanogen hydride, solid, 40, 100
- Cyanogen iodide, 58, 97; 87, 185—Action on oil of turpentine, 22, 107
- Cyanogen iron compounds, 36, 266
- Cyanogenesis in plants, 85, 301; 88, 15
- Cyanogenetic glucoside (*see* Glucoside)—Glucosides (*see* Glucosides)
- Cyanohydrin, d -benzaldehyde- (*see* d -Benzaldehydecyanohydrin)—Cinnamaldehyde- (*see* Cinnamaldehydecyanohydrin)

- Cyanohydrins, condensation, **99**, 177 —
— Regarded as complex acids, **90**, 231
Cyanomacrlurin, **90**, 32—Formula of, **91**, 232
Cyanomalonie ethers (*see* Ethers)
Cyanometallic derivatives, reactions of, **83**, 239
Cyanonitride of titanium (*see* Titanium)
Cyanophenol, constitution and cryoscopic constants, **80**, 199
Cyanophenylacetate, ethyl-*a* (*see* Ethyl-*a*-cyano- γ -phenyl-acetoacetate)
Cyanosuccinate of ethyl (*see* Ethyl)
Cyanosuccinic ethers (*see* Ethers)
Cyanosulphides, **79**, 179
Cyanosulphite of potassium (*see* Potassium)
Cyanoxycarbonic ether (*see* Ether)
Cyanophenyl, iso- (*see* Isocyanophenyl)
Cyanpropionine, sulpho- (*see* Sulphocyanpropionine)
Cyanrosaniline, hydro- (*see* Hydrocyanrosaniline)
Cyanurate, **25**, 198 — Ethyl- (*see* Ethylcyanurate) — Of oxamethan (*see* Oxamethan)—Of potassium (*see* Potassium)—Of sodium (*see* Sodium)
Cyanuration of barium (*see* Barium)
Cyanures, **46**, 104
Cyanuric acid (*see* Acid)—Acid ether (*see* Ether)—Chloride (*see* Chloride)—Ether (*see* Ether) — Ethers (*see* Ethers)
Cyandene, **22**, 71
Cyclamin, **3**, 143 — Resolution into glucose and mannite, **38**, 112
Cyclanose, **53**, 232; **54**, 319
Cyclic acids (*see* Acids)—Alcohols (*see* Alcohols) — Aldehydes (*see* Aldehydes) — Amines (*see* Amines) — Bodies, rotatory power of, **67**, 25—Compounds, action of low temperatures on, **81**, 190 — Compounds in geranic series, mechanism of formation, **97**, 310—Compounds obtained by synthesis, action of fuming nitric acid on, **80**, 115—Compounds, ultraviolet fluorescence in, **98**, 233 — Diketones (*see* Diketones)—Ketone (*see* Ketone)—Ketones (*see* Ketones)—Nitriles (*see* Nitriles)—Polycarbon groups (*see* Polycarbon) — Radicles (*see* Radicles)—Thiohydantoines (*see* Thiohydantoines)
Cyclisation of ketone acids, **100**, 24
Cyclobutane, di- (*see* Dicyclobutane)
Cycloheptene, pheno- (*see* Phenocycloheptene)
Cyclohexadiene, 1:1-Dimethyl- Δ -2:5- (*see* 1:1-Dimethyl- Δ -2:5-cyclohexadiene)
Cyclohexane and its chlorised derivatives, **89**, 298—Bromo- (*see* Bromocyclohexane)—1-Bromo-1-methyl- (*see* 4-Bromo-1-methylcyclohexane) — Derivatives, **92**, 212 — Paramethyl- (*see* Paramethylcyclohexane)
Cyclohexane-1:1,4-dimethyl-, synthesis of derivatives of, **95**, 71
Cyclohexanediol, ortho- (*see* Orthocyclohexanediol)
Cyclohexanediol-1,2-ethylene oxide and its derivatives, **88**, 79
Cyclohexanerosanilines and carbinol salts, **90**, 221—Tetraoxy- (*see* Tetraoxycyclohexanerosanilines)
Cyclohexanol, methyl- (*see* Methylcyclohexanol)—1-Methyl-4-dibenzyl- (*see* 1-Methyl-4-dibenzylcyclohexanol) — Preparation from phenol, **89**, 33 — Synthesis of tertiary alcohols from, **90**, 10
Cyclohexanols, dimethyl- (*see* Dimethylcyclohexanols)—1-Methyl-4-benzyl- (*see* 1-Methyl-4-benzylcyclohexanol)
Cyclohexanone, benzylidene metamethyl- (*see* Benzylidene) — α -Chloro- (*see* α -Chlorocyclohexanone) — Derivatives, formation from olefinic compounds, **99**, 199 — Isopropylidene- (*see* Isopropylidene) — Methyl- (*see* Methylcyclohexanone)—Preparation from phenol, **89**, 33 — Trimethyl- (*see* Trimethylcyclohexanone)
Cyclohexanone-3-carboxylic acid (*see* Acid)
Cyclohexanones, β -Methyl- β -alcoyl- (*see* β -Methyl- β -alcoylcyclohexanones)
Cyclohexene, addition products of, **87**, 16
Cyclohexenone, dimethyl- (*see* Dimethylcyclohexenone)—Methyl- (*see* Methylcyclohexenone)
Cyclohexylacetone, **93**, 116
Cyclohexylamine and two other amines, **89**, 155
Cyclohexylmethane, tri- (*see* Tricyclohexylmethane)
Cycloid hydrocarbons (*see* Hydrocarbons)
Cycloids, nomenclature of, **66**, 31
Cyclones, determining direction and force of, **28**, 314—Solar, **27**, 295; **29**, 35, 101, 299—Terrestrial, **29**, 25, 101
Cyclopentadiene, di- (*see* Dicyclopentadiene)
Cyclopentane derivatives, formation from α -dicyano derivatives of butane, **99**, 177—Derivatives, synthesis of, **81**, 118—1-Imino-2-cyano- (*see* 1-Imino-2-cyanocyclopentane) — 1:3:5-Triphenyl-2:4-dimethyl- (*see* 1:3:5-Triphenyl-2:4-dimethylcyclopentane)
Cyclopentane-3:4-dione-2:5-dicarboxylate, methyl-1:1-dimethyl- (*see* Methyl)
Cyclopropane nitrile, **81**, 164
Cyclopropanols, formation, **95**, 252
Cyclopropene derivatives, **92**, 233
Cyder, effervescing, **22**, 34
Cygnus, Wolf and Rayet's bright-line stars in, **63**, 27, 39
Cylinder, Cyprite (*see* Cyprite)—Gas (*see* Gas)—Iron, effect of magnetisation in increasing interior capacity of, **27**, 250, 272
Cylinders, solid and hollow, longitudinal vibrations in, **78**, 301—With overflow vessels, **66**, 161
Cylindrical lenses (*see* Lenses)—Surface, refraction at, **87**, 177
Cymbals, manufacture, **21**, 46; **22**, 107
Cymen as a constituent of, and derivative from, oil of turpentine, **29**, 41—Benzylated, **39**, 207—Derivatives, **36**, 41, 175—Examination of terpenes for, **41**, 291—From various sources, **27**, 180, 317—Halogen derivatives from substituted nitro-camphanes, **84**, 8—Meta- (*see* Meta-cymene)—Of camphor (*see* Camphor)—Of cuminic alcohol, **41**, 36—Ortho- (*see* Ortho-cymene)—Oxidation, **92**, 67—Production by hydrate of oil of turpentine, **25**, 81, 286
Cymencarbonic acid (*see* Acid)
Cymidine, metaiso- (*see* Metaisocymidine)
Cymol, **13**, 14 — Constitution, **64**, 262—Contributions to history of, **22**, 47—Conversion of oil of turpentine into, **25**, 131—Derivatives, **25**, 191; **28**, 99—From camphor, **17**, 57; **19**, 261—From oil of turpentine and from essential oil of lemons, **26**, 60—Hydroxyl derivative, **19**, 261—In light resin oil, **43**, 280—Of camphor (*see* Camphor)—Oxy- (*see* Oxycymol)—Production from cuminic alcohol, **37**, 263—Sulphur derivatives of, **27**, 303—Synthetic, obtained from normal bromide of propyl and crystalline bromtoluol, **29**, 265—Thio (*see* Thiocymol)
Cymols, **30**, 167; **43**, 258
Cymometer, **91**, 240; **92**, 264—Application to measurement of coefficients of coupling of oscillation transformers, **91**, 151—Use for determination of resonance curves, **93**, 155
Cynanol, **37**, 263
Cynool, **87**, 152
Cynotoxin, **91**, 142
Cyon, E. de (*see* de Cyon, E.)
Cyprite cylinder-seals, material of, **87**, 19
Cypripedium virginicum oil (*see* Oil)
Cyrias, F., detection of bone-cuttings among rasped hardshorn, **21**, 100
Cyrias, Eva R., and Holland Crompton (*see* Crompton, H.)
Cyrtilite, **92**, 43
Cystinate of iron (*see* Iron)
Cystine in contaminated waters, **82**, 255 — Reaction, **88**, 95
Cyticin, **11**, 226; **20**, 36, 323 — And ulexine, identity, **67**, 253
Czarnowski, M., and Kelbe Werner, action of bromine and water on α -metaisocymolsulph acid, **54**, 226
Czechetka, G., Kjeldahl's method for determining nitrogen, **54**, 37
Czubata, H., nutritive value of acorns, **42**, 95
Czudnowicz, M., Salts of protoxide of cerium and lanthanum, **2**, 203
Czumpelik, E., Contributions to history of α -cymol, **22**, 47—Cumonitramine, **19**, 297—Derivatives of cuminic acid, **22**, 47—Nitrobenzylcyanide and amidified benzylcyanide, **22**, 47

D

- Diabase, **27**, 34.
- Diabetes, bread for, **19**, 252, 263—Melilitus, chemistry of, **33**, 183.
- Diabetic acetoneuria (see Acetoneuria)—Patient, blood of, **56**, 24—Sugar (see Sugar)—Urine (see Urine)
- Diabolo experiment, **96**, 279.
- Diacetamide, **83**, 105.
- Diacetanilide, formation, **76**, 77—Transformation into aceto-p-amino acetophenone, **86**, 45.
- Diacetate of methylene (see Methylene)
- Diacetaminin, methyl- (see Methyl-diacetaminin)
- Diacetone, aromatic, **49**, 136—Lævulose (see Lævulose)
- Diacetonehydroxylamine, **79**, 203.
- Diacyl, **59**, 305—Derivatives, **76**, 282.
- Dilacetylacetone, action of acetyl chloride on sodium salts of, **90**, 191—Action of ethyl iodide and propyl iodide on disodium derivatives of, **94**, 44—Action of ethylene dibromide and of propylene dibromide on disodium derivative of, **95**, 140.
- Dimethyl- (see Dimethyldiacyl-acetone)—Orcinol derivatives from, **82**, 22.
- Diacylbenzoylthane, **85**, 228.
- Diacylmethane, dimitrophenyl- (see Dimitrophenyldiacylmethane)
- Diacylorthoaminophenol, nitration, **82**, 213.

- Diamyl, **35**, 271
 Diamylene, **22**, 130—Constitution, **23**, 155
 Diamylene of butanediol (*see* Butanediol)—Of pentanediol (*see* Pentanediol)
 Dianisidine, bisdiazioic chlorides of (*see* Bisdiazioic)
 Danium or niobium, **5**, 41
 D-anthranel-tetramethyldiamide, tetramethyldiamidodiphenyl (*see* Tetramethyldiamidodiphenyldianthranal-tetramethyldiamide)
 Diantipyrinemethane, compounds of, **82**, 176, 304
 Diaphanometer of Savalle, **38**, 36—To determine transparency, **19**, 287
 Diaphragm, electrolysis of barium sulphide with, **87**, 311—Graduating, **21**, 212—Part played by, in the electrolysis of saline solutions, **90**, 329—Telephones without, **39**, 162
 Diapson, electro (*see* Electrodiapson)
 Diaptones, colouring-matter of, **61**, 120
 Diarrhoea, endemic, of Cochin-China, **40**, 89—Origin, **12**, 19
 Diarylmethylenediamines, **85**, 69
 Diaschowitz, discovery of diamond at, **21**, 57, 119
 Diastase, **38**, 274; **41**, 35; **54**, 298; **62**, 13—Action of heat on, **56**, 13—Action on cold starch-paste, **71**, 213—Action on starch, **71**, 71; **72**, 45; **75**, 126—Action on starch granules of raw and malted barley, **88**, 108—Action on starch, non-crystalline products of, **53**, 37—Action on starch, non-crystallisable products of, **51**, 308—Action on starch-paste, **41**, 92—And influence of foreign bodies on its efficacy, **44**, 37—And maltin, active matter in, **41**, 25—And pytaline, action of, **41**, 160—And pytaline, researches on, **41**, 22—And yeast, combined action on starch-granules, **84**, 21—Barley (*see* Barley)—Characters of debilitation experienced by, **55**, 140—Chemical conditions of action of, **67**, 158—Chemical nature, **77**, 225—Extracted from koji-japonais, reducing, **87**, 38—Extraction on and properties of, **77**, 155—From barley, testing for, **77**, 12—Group, ferments belonging to, **26**, 82—Hydrolysis of starch by, **89**, 247—Identity in living beings, **51**, 191—Malt (*see* Malt)—New body anal gous to, **17**, 120—Preparation, **62**, 227—Production during germination of barley on malting floors, **99**, 130—Saccharification by, **59**, 144—Source of error during researches on, **85**, 133—Taka- (*see* Taka diastase)
 Diastases and starch, researches on, **63**, 50—Property of, **94**, 147
 Diastatic action, **65**, 296—Action, influence of carbonic acid on, **87**, 309—Ferment, (*see* Ferment)—Ferments (*see* Ferments)—Fungi (*see* Fungi)—Hydrogenation (*see* Hydrogenation)—Substances, testing, **77**, 173
 Diathermanous character of metals and paper, **35**, 95—Plates, inclined, passage of heat waves through, **26**, 268
 Diatomaceous deposits from the peat of Aberdeenshire, **52**, 253
 Diatomic acetones (*see* Acetones)—Alcohol (*see* Alcohol)—Alcohols (*see* Alcohols)—Metals (*see* Metals)
 Diatoms, classification, **4**, 330—Striae of, **4**, 128
 Diazides, orthobenzoquinone (*see* Orthobenzoquinonediazides)
 Diazine, ortho- (*see* Orthodiazine)
 "Diazio," inspiration, **84**, 59
 Diazoacetate of ethyl (*see* Ethyl)
 Diazoacetic ester (*see* Ester)
 Diazoamides, mixed, **73**, 129
 Diazoamidised compounds (*see* Compounds)
 Diazoamide compounds, **54**, 319—Compounds, ethylene derivatives, **65**, 307—Compounds, fatty aromatic, **90**, 83—Compounds, transformation into aminoazo compounds, **86**, 46
 Diazoamidobenzene, **67**, 120—Compounds, metallic, **82**, 59—Salt, cuprous, **82**, 11
 Diazoamidobenzenes, dinitro- (*see* Dinitrodiazoamidobenzenes)
 Diazoamidobenzol, preparation, **14**, 107
 Diazoamidonaphthol, **13**, 202
 Diazoamines, and aminoazo-compounds, influence of substitution on formation, **91**, 276; **94**, 9; **95**, 900—Diphenylamine (*see* Diphenylamine)—Influence of substitution on formation, **84**, 297; **86**, 253—Secondary, **91**, 222
 Diazoaminobenzene, diphenylbi- (*see* Diphenylbidiazoaminobenzene)—Phenyl- (*see* Phenylbidiazoaminobenzene)
 Diazoaminofuchsin, **91**, 164
 Diazoaminorosaniline, **91**, 164
 Diazobenzene and aniline, union, **91**, 70—And phenol, limit of union, **89**, 312—Compounds, constitution, **73**, 107—Derivatives, **36**, 214—*s*-Tribromo (*see* *s*-Tribromodiazoaminobenzene)
 Diazobenzene anilide, relation to aminoazobenzenes, **55**, 92
 Diazobenzene chloride, action of cyanacetic ethers containing substituted radicals on, **82**, 84—Action on diphenylamine, **89**, 275—Action on oxy-fumaric ethers, **90**, 71
 Diazobenzene perbromides, bromination experiments with, **98**, 198
 Diazobenzene picrate, action of ammonia and amines on, **93**, 65
 Diazobenzenesulphonate of sodium (*see* Sodium)
 Diazobenzenes, chlorobromo- (*see* Chlorobromodiazoobenzenes)
 Diazobenzochloride, action, **69**, 241
 Diazobenzonitrate, **43**, 279; **46**, 35
 Diazochlorides, action upon chlorinated acetochloric esters, **96**, 96
 Diazo-colours, with more than two sulpho-groups, **42**, 60, 72, 197
 Diazo-compounds, **40**, 157; **54**, 189—Action of alkaline bisulphides on, **25**, 106—Action of hydrocyanic acid on, **40**, 301—Action of sulphurous and sulphuric acids on, **36**, 214—Action on primary aliphatic amines, **92**, 105—Aromatic, our present knowledge of, **86**, 189, 204, 213, 225—Behaviour with alkaline sulphites, **24**, 217—Colouring matters derived from, **39**, 90—Constitution, **42**, 237; **53**, 309; **95**, 306—Constitution and colour of, **92**, 298—Decomposition by water, **65**, 156—New type of, **95**, 312—Of fatty series, **39**, 42—Of phenylenediamine, **72**, 166—Rate of decomposition, **68**, 26; **86**, 253; **87**, 18, 150—Researches on, **35**, 164; **53**, 276; **98**, 60—Stable, **93**, 75—Ultra-violet absorption-spectra in relation to constitution, **91**, 127
 Diazoeyanbenzol, **20**, 170
 Diazo-derivatives, constitution, **55**, 183; **57**, 217; **59**, 92—Of benzenesulphonic acids (*see* Acids)—Of benzenesulphonylbenzidine, **96**, 232—Of benzenesulphonylphenylenediamines, **91**, 54—Of mixed aliphatic aromatic ω -benzenesulphonylaminobenzylamines, **94**, 8—Of monosubstituted aromatic paradiamines, **91**, 276—Of nitrobenzylcyanide, **46**, 300—Of symmetric tribramaniline, **47**, 223
 Diazo-group, colouring-matters of, **48**, 173
 Diazo-hydroxylamino-compounds, **99**, 140, 247
 Diazoic chlorides (*see* Chlorides)—Chlorides, bis- (*see* Bis-diazoic)—Compounds, action of hypophosphorous acid on, **87**, 96—Salts (*see* Salts)
 Diazoics, diamine (*see* Diamine)
 Diazoimide, phenyl- (*see* Phenyl diazoimide)
 Diazoimides, arylsulphonyl-*p*- (*see* Arylsulphonyl-*p*-diazoimides)—Para- (*see* Paradiazoimides)
 Diazoiminobenzene, para- (*see* Paradiazoiminobenzene)
 Diazomethane, action on aromatic nitroso-bases, **77**, 226—Action on nitramines, and on aromatic nitro-derivatives, **79**, 203—Action on modifications of isonitrosocamphor, **97**, 68—Action on nitrosophenol, **77**, 226—And mercuric acetate, action of, **97**, 109
 Diazonitrobenzols, transformation into nitrophenols, **29**, 264
 Diazonium bromides, preparing, **97**, 236
 Diazonium hydrate, **79**, 234—In aqueous solution, **78**, 107
 Diazonium perbromides, **99**, 234—Constitution, **98**, 21
 Diazonium salts, **79**, 231—Colour and constitution, **100**, 33—Conversion of aromatic hydrazines into, **97**, 176—Decomposition by water, **99**, 183—Reaction with mono- and di-hydric phenols and with naphthols, **97**, 260
 Diazophenols, **45**, 87
 Diazopyridine, **80**, 12
 Diazo-reaction in diphenyl series, **87**, 249; **91**, 5; **97**, 128
 Diazo-reactions, action of light on, **94**, 302—Influence of light on, **91**, 266
 Diazo-salts, action of water on, **92**, 8; **93**, 3—Derived from benzoyl-1:4-naphthylendiamine, **96**, 9
 Diazo- ψ -semicarbazino-camphor, benzene- (*see* Benzenediazo- ψ -semicarbazino-camphor)
 Diazo solutions, decomposition of, **99**, 14
 Diazotisation, elimination of a nitro-group on, **86**, 32—Of safranin (*see* Safranin)
 Dibbitts, H. C., "De Spectral Analyse" (review), **9**, 46—Decomposition of calcium chloride by water, **39**, 184—Solubility and dissociation of bicarbonates of potash, soda, and ammonia, **32**, 9—Spectra of flames of various gases, **10**, 17
 Dibdin, C. J., T. W. Barber, E. T. Hennell, Clayton Beadle, and D. Urquhart (*see* Barber, T. W.)
 Dibdin, W. J., "Chemical Technology" (review), **87**, 167—"Practical Photography" (review), **60**, 232—"Purification of Sewage and Water" (review), **88**, 279—"Recent Improvements in Methods for the Biological Treatment of Sewage" (review), **96**, 173—Soap tests for hardness of water, **44**, 303
 Dibenzacconine, **72**, 279
 Dibasic acids (*see* Acids)
 Dibenzalacetone, oxy- (*see* Oxydibenzalacetone)
 Dibenzamide, **28**, 294
 Dibenzanilide, **62**, 281—Isomeric change into benzoyl- α -amino and benzoyl- β -amino-benzophenones, **87**, 139—Isomerism of, **91**, 164
 Dibenzhydroxamic acid (*see* Acid)
 Dibenzonate, action of fatty amines on, **86**, 317—Of methylene (*see* Methylene)
 Dibenzoyl, **22**, 167
 Dibenzoylbenzene, Ortho- (*see* Orthodibenzoylbenzene)
 Dibenzoylchloroimide, **89**, 93
 Dibenzoyldiphenylbutadiene, reduction, **84**, 19
 Dibenzoylhydrazobenzene, **86**, 36
 Dibenzoylmesitylene derivatives, **86**, 43
 α - ω -Dibenzoylpentane and α - ω -diacetylpentane, **59**, 237
 Dibenzoylpropane, reduction, **84**, 19
 Dibenzoyltoluidines, transformation into isomeric benzoylaminomethylbenzophenones, **89**, 176
 Dibenzyl, behaviour at high temperature, **22**, 35—Brominated products of, substitution of, **20**, 179—Bromo- (*see* Bromodibenzyl)—Formation, **50**, 61—Paradinitro- (*see* Paradinitrodibenzyl)
 Dibenzylamarine, reactions, **80**, 301
 Dibenzylamide, mal- (*see* Maldibenzylamide)
 Dibenzylcyclohexanol, 1-methyl-4- (*see* 1-Methyl-4-dibenzylcyclohexanol)
 Dibenzylselenide, **97**, 273
 Dibenzylsulphide, **96**, 291
 Dibenzylketone, **64**, 20—Action of light and oxygen on, **80**, 239—And benzal-toluidine, nitrobenzaniline, and benzalnitraniline, additive compounds of, **85**, 137—Condensation of

- benzil with, **84**, 264—Derivatives, **80**, 230
- Dibenzylketone benzaldehydes and deoxybenzoin benzaldehydes, isomeric, **82**, 240
- Dibenzylmethylene, derivatives, **79**, 62
- Dibenzylsilicone, **97**, 62
- D-benzyltartrate and dibutyl tartrate, comparative rotatory powers of, **74**, 270
- Dibromacetic aldehyde (see Aldehyde)
- Dibromacetylene, **88**, 75—Preparation and properties, **35**, 29
- Dibromanthracene, 180 (see Isodibromanthracene)
- Dibromanthraquinones, **41**, 45
- Dibromatol butane (see Butane)—Ethylene (see Ethylene)
- Dibrominated, **22**, 214—Derivatives, **26**, 29, 175
- β -Dibromobenzol, **26**, 228
- Dibromobenzols, constitution, **29**, 198—Dinitropara (see Dinitropara-dibromobenzols)
- Dibromomethylen, transformation into a ketone with four atoms of carbon by means of hypobromous acid, **33**, 73
- Dibromomethylenes, isomeric, **75**, 309
- Dibromohydrate of cadinine (see Cadinine)
- Dibromohydrine, epi- (see Epidibromohydrine)
- Dibromide, cinnamic acid, and its esters, action of caustic alkalis on, **87**, 201—Ethersoxonium (see Ethersoxonium)
- Dibromide, hexamethylene (see Hexamethylenedibromide)—Methoethenylbenzene (see Methoethenylbenzene)—Of acetic acid, **37**, 173—Of cholesterol (see Cholesterol)—Of ethylene (see Ethylene)—Of propylene (see Propylene)—Of trimethylene (see Trimethylene)
- Dibromides, action of zinc powder on, **85**, 200— $\text{C}_{12}\text{H}_{10}\text{Br}_2$, reaction of sodium malonate of ethyl on, **86**, 19—Of phenol allyl ethers, **95**, 252
- Dibromomethan, **30**, 64
- Dibromonaphthol, action on amines, **47**, 27
- Dibromonaphthalene, **88**, 11
- Dibromosaminobenzene, **95**, 307
- Dibromobenzenes, chloro- (see Chlorodibromobenzenes)
- Dibromobenzoic acids (see Acids)
- α - β -Dibromobenzoylacetophenone, stereoisomeric modifications of, **100**, 287
- Dibromobutanetetracarboxylate, ethyl- (see Ethyldibromobutanetetracarboxylate)
- Dibromocamphor, acids derived from, **81**, 200—Acids derived from, constitution of, **83**, 203—Action of fuming nitric acid on, **81**, 56—Action of hydrolytic agents on, **80**, 265—Action of silver compounds on, **80**, 9—Derivative, **71**, 7; **72**, 313
- Dibromochromic chloride (see Chloride)
- Dibromodinitrotoluenes and behaviour on reduction, **85**, 261
- Dibromogallamide and its trimethylene ether, **69**, 144, 313—Blue lakes derived from, **69**, 253
- Dibromolapachone, **67**, 63
- Dibromonitrosophenol, preparation and properties, **83**, 207
- Dibromonitrotoluenes, and behaviour on reduction, **85**, 261
- Dibromopentanes, **90**, 17
- Dibromophenolsulphonic acids (see Acids)
- Dibromopropanetetracarboxylate, ethyl (see Ethyl)
- Dibromosuccinimide, **75**, 20
- Dibromopropylthiocarbimide, chemistry of, **73**, 9
- Dibromosuccinimide, **25**, 71
- Dibromotetrachlorethane, preparation, **78**, 47
- Dibromotoluals, isomeric, **21**, 263; **41**, 102
- 1:5-Dibromopentane, characterisation of primary, secondary, and tertiary bases with, **98**, 35—Diargyresium compound of, **96**, 35
- Dibutyl alcohol (see Alcohol)
- Dicalcic phosphate (see Phosphate)
- Dicalcium sulphate, caesium (see Caesium)
- Diamphene hydride, crystallised, **77**, 110
- Diamphic alcohol (see Alcohol)
- Diamphic alcohols (see Alcohols)
- Diamphicurethylendiamines, **99**, 141
- Diacarbols, **43**, 270
- Diacarbonate, ethyl acetone (see Ethyl)
- Diacarbonates of alkaline (see Alkaline)
- Diacarbonic dihydrophenylaphthoquinoleinic ether (see Ether)
- Diacarbonyl group, condensations of compounds which contain, with aldehyds and ammonia, **48**, 204
- Diacarboxyaconitate, methyl (see Methyl-dicarboxyaconitate)
- Diacarboxylate, acetone (see Acetone)—Acetylene (see Acetylenedicarboxylate)—Ethyl 6-methyl-2-pyrone-3:5 (see Ethyl)—Methyl 1:1-dimethyl-cyclopentane 3:4-dione-2:5 (see Methyl)
- Diacarboxyl-lutaeonate, ethylic hydrolysis of, **74**, 278
- Diacarboxyl-lutaeonate ester (see Ester)
- Diacarboxylic acids (see Acids)
- Diacetotetrahydronaphthalene, 2:4-tetrachloro-1:3 (see 2:4-Tetrachloro-1:3-diacetotetrahydronaphthalene)
- Dichloracetanilide, **36**, 39
- Dichloracetate, ethyl- (see Ethyldichloracetate)
- Dichloracetone, conversion into lactic acid, **24**, 145
- Dichloracetyl groups, effect on rotatory power of methylic and ethylic glycerates and tartrates, **77**, 80
- Dichloraldehyde, **20**, 95
- Dichloranilines, **37**, 173
- Dichloranthraquinones, dialcylamidodichloranthraquinones (see Dialcylamidodichloranthraquinones)
- Dichlorated camphor (see Camphor)—Naphthalin (see Naphthalin)
- Dichlorazophenol, **39**, 171
- Dichlorglycid, **29**, 73
- Dichlorhydrate of cadinine (see Cadinine)
- Dichlorhydrine, **25**, 100—Action of ammonia on, **28**, 83—Action of aniline on, **32**, 51—Action of bromine on, **21**, 286; **22**, 28, 107—Boiling at 174°C, conversion into that boiling at 182°C, **24**, 97—Chromic, action of nitric oxide on, **80**, 292—Obtained from epichlorhydrine and glycerine, identity of, **20**, 275—Preparation of, **28**, 83—Products of oxidation of, **24**, 157
- Dichloride, metaiodotoluene (see Metaiodotoluene)—Of benzyl (see Benzyl)—Of chromyl (see Chromyl)—Of copper (see Copper)—Of ethylene (see Ethylene)—Of iodobenzene (see Iodobenzene)—Of methylene (see Methylene)—Of sulphur (see Sulphur)—Orthoiodotoluene (see Orthoiodotoluene)—Paraiodoacetanilide (see Paraiodoacetanilide)—Paraiodoacetophenone (see Paraiodoacetophenone)—Paraiodotoluene (see Paraiodotoluene)—aa-Dichlorisopropyl alcohol (see Alcohol)
- Dichlorobenzene, meta- (see Metadichlorobenzene)
- Dichlorobenzenes, nitration products of the isomeric, **89**, 207
- Dichlorobromobenzenes, **84**, 265
- Dichlorobromohydrine, and its decomposition by hydrate of baryta, **20**, 287; **21**, 82
- Dichlorochloramide, preparation, **93**, 141
- Dichlorochromic bromide (see Bromide)—Chloride (see Chloride)
- Dichloromethene dioxypropylbenzene, **89**, 142
- Dichloronaphthalene, conversion of, 1:1' into 1:4', by hydrogen chloride, **76**, 69
- Dichloronaphthalenes, constitution, **55**, 204—Homoe, and isomeric heteroe, **53**, 280—Ten isomeric, and sulphonic acids and trichloronaphthalenes derived therefrom, **61**, 273
- Dichloronitrophenol, decomposition by heat, **29**, 283
- 3:5-Dichloro-ortho-xylene and 3:5-dichloroorthophthalic acid, **86**, 264
- Dichlorophenol, orthonitro- (see Ortho-nitrodichlorophenol)
- Dichlorophenolsulphonic acids (see Acids)
- Dichlorophthalic anhydride (see Anhydride)
- Dichloropropionitrile, **35**, 103; **36**, 52
- aa-Dichloropyrene, action of sodium on, **93**, 289
- Dichloropyridine formation, **81**, 70
- 3:5-Dichloropyridine, preparation and orientation, **98**, 266
- Dichlorothoxylenes, **84**, 72
- Dichlorotoluene, oxidation, **89**, 80
- Dichlorotoluenes and their sulphonic acids, **72**, 58—Chlorination in presence of the aluminium-mercury couple, **86**, 253—Constitution, **83**, 223; **86**, 253—Nitro-, and dinitro-derivatives of, coagulation, **86**, 253—Oxidation, **89**, 80
- Dichlorourea, production, **98**, 285—Reactions of, **98**, 166
- Dichlorophenol, **13**, 10
- Dichloropropionic ether (see Ether)
- Dichlorosulphbenzid, **17**, 143
- Dichloromethane (see Octane)
- Dichromate of ammonium (see Ammonium)—Of potassium (see Potassium)—Of silver (see Silver)—Of soda (see Soda)—Of sodium (see Sodium)—Potassic, and binoxide of chromium, combination, **26**, 36

 Dihydroxydicarboxylic acids (see Acids)
 Dihydroxybenzoic acids (see Acids)
 Dihydroxydiaciduodiamminochromic salts (see Salts)
 Dihydroxydinicotinate, ethylic, formation, 77, 115
 Dihydroxydiphenyl, halogen derivatives, 89, 18
 Dihydroxyheptamethylene, dimethyl- (see Dimethyl dihydroxyheptamethylene)
 Dihydroxyamine derivatives, 81, 120
 Dihydroxylamine dihydrobromide, ethylene (see Ethylene)
 Dihydroxylates, 82, 11
 Dihydroxymaleic acid (see Acid)
 Dihydroxynaphthalene, 55, 136
 Dihydroxypyridine, benzyl- (see Benzyl-dihydroxypyridine)
 $\alpha\alpha'$ -Dihydroxypyridine, formation, 77, 162
 Dihydroxytetraminoplatinum compounds, 96, 281
 Diimide, silicodiphenyl- (see Silicodiphenyldiimide)
 Diimidonaphthol, diphenyl- (see Diphenyldiimidonaphthol)
 Diindigotin, 86, 277
 Diiodated butane (see Butane) — Phenol (see Phenol)
 Diiodhydrin, 28, 83
 Diiodide, heptanediol-1:7- (see Heptanediol-7-diiodides) — Of arsenic (see Arsenic) — Of lead (see Lead) — Of mercury (see Mercury) — Of methylene (see Methylene) — Tolan- (see Tolan-diiodide)
 Diiodo addition products of higher fatty acids of series $C_{17}H_{35}O_2$, 100, 183
 Diiodo camphor, 95, 236
 Diiododecane diiodide, 83, 222
 Diiodohydrine of glycerin (see Glycerin)
 Diiodo- α -methylspermin, action of acids on, 99, 36
 Diiodopentane, 90, 45
 Diiodophenol, 87, 274
 Diiodopropylic alcohol (see Alcohol)
 Diisobutyl derivatives, 39, 400 — Vapour pressures, specific volumes, and critical constants, 82, 238
 Diisobutyl, 35, 29
 Diisocyanate, diphenyl (see Diphenyl)
 Diisocyanates, action on amido-compounds, 77, 162; 78, 13
 Diisoeugenol, dehydro- (see Dehydroisoeugenol)
 Diisopropyl in ether of Baku petroleum, 79, 227 — Of petroleum (see Petroleum) — Preparation, 27, 34 — Vapour pressures, specific volumes, and critical constants, 82, 238
 Diisopropylacetone, 31, 109
 Diisopropylsuccinic acids (see Acids)
 Dijk, P. Van (see Van Dijk, P.)
 Dika bread (see Bread)
 Diketobutyrate, methyl- (see Methyl diketobutyrate)
 $\alpha\beta$ -Diketobutyric ethers (see Ethers)
 Diketodiphenylpyrrolone and its analogues, 100, 241
 2:6-Diko-4-isopropylhexamethylene, preparation and properties, 84, 9
 Diketones, addition and condensation compounds with ketones, 50, 254 — Condensations of, 58, 289 — Cyclic, 82, 158 — Direct hydrogenation of, 95, 285 — Hydrocyanides of, hydrolysis, 54, 270 — Interaction with primary amines, 70, 302 — Of tetrahydroxyazul derivatives of the phenylurethanes of certain oxy-acids, 78, 11 — Ortho- (see Orthodiketones) — Preparation, 99, 180 — Quinone- (see Quinonediketones) — Reduction, 61, 129
 α -Diketones, 93, 89 — Dihydrazides of, formation, 57, 60 — Hydrazones of, and reducing sugars, thermochemistry of, 93, 166 — Monohydrazides of, 57, 59 — Osazones of, 96, 28 — Osazones of, and reducing sugars, thermochemistry of, 93, 166 — Phenylhydrazones and osazones of, 96, 28
 α - γ -Diketones, relation between chemical constitution and optical properties of, 99, 82
 β -Diketones, 86, 71; 89, 140 — Action of benzamides on olefinic, 88, 291
 γ -Diketones, action of hydrazine on unsaturated, 91, 230
 Diketonic ethers (see Ethers)
 Dilactide, dextro- (see Dextrodilactide)
 Dilactylic acid (see Acid)
 Dilatation due to electricity, 30, 263 — Electro- (see Electro-dilatation) — Of gases (see Gases) — Of pupil in cataract, iritis, etc., preparation for, 2, 210
 Dilatometer, 89, 127

 Dilthey, W., Diphenyl silicon oxide and benzyl silicon compounds, 93, 57
 Dilthey, W., and H. Moissan, researches on calcium silicide, 85, 154
 Dilute acids (see Acids)
 Dilution, inversion-points, 84, 231 — Law of, 52, 119 — Law of, universal applicability, 177, 189 — Thermal effect of, 79, 56
 Dilutions, homoeopathic (see Homoeopathic)
 Diluvial clay (see Clay) — Soil (see Soil)
 Dimercurammonium bromide, 100, 160
 Dimercurammonium chlorides, ammoniacal, 97, 263
 Dimercurammonium iodide, anhydrous, 81, 144
 Dimercurammonium nitrate and its haloid derivatives, 85, 224
 Dimercurammonium salts, 83, 225
 Dimercurammonium series, sulphate and phosphate of, 91, 5
 Dimethoxybenzoin, ortho- (see Orthodimethoxybenzoin) — Reduction products of ortho- and para-, 95, 128
 Dimethoxydiphenylmethane and derivatives, 73, 268
 Dimethoxyheptane-1:7, 95, 312
 2:3-Dimethoxy-4:5-methylenedioxy-1-allylbenzene in essence of sea samphire, 100, 183
 Dimethoxypropionic acid (see Acid)
 Dimethoxysuccinates, ethereal, influence of solvents on optical rotation, 83, 208
 Dimethoxytartrates, ethereal, influence of solvents on optical rotation, 83, 208
 Dimethyl, 17, 247; 19, 33 — Cyclohexane-3:3- (see Cyclohexane-3:3-dimethyl-
 Diethyl- (see Diethylidimethyl-
 Heat formation of, 42, 93
 Dimethylacetal and methylalcohol, 34, 271
 Dimethylacetoacetate, methyl (see Methyl)
 Dimethylacetylacetic ether (see Ether)
 Dimethylacetylene, 63, 249
 Dimethylacrylate, ethyl (see Ethyl)
 $\alpha\alpha$ -Dimethyladipic acid (see Acid)
 $\beta\beta$ -Dimethyladipic acid (see Acid)
 Dimethylallyl ammonium, phenyl- (see Phenyldimethylallyl ammonium)
 Dimethylamidobenzene, ethyl- (see Ethyldimethylamidobenzene)
 Dimethylamidodimethylamidoorthobenzoic and orthobenzoic acids, 78, 1
 Dimethylamin, aqueous, reactions produced by, on metallic solutions, 41, 173
 Dimethylaminobenzaldehyde, condensation with 8-naphthol, 86, 252
 Dimethylammoniocadmium chloride, formation, 87, 223
 $\alpha\beta$ -Dimethylanthracetonebenzil, reduction products, 90, 277
 Dimethylaniline, 37, 173 — Acid sulphate of, 58, 268 — Action of chloride of nitrogen on, 77, 225; 78, 267 — Action of nitrous acid on, 30, 109 — Brom- (see Bromdimethylaniline) — Carboxylated derivatives, 68, 257 — Carboxylic derivatives, 69, 24 — Condensation of tetramethyldimido-phenyloxanthranol with, 88, 256 — Derivatives, 35, 216; 62, 321; 73, 53 — Dinitro- (see Dinitridimethylaniline) — Monobenzoyl (see Monobenzoyldimethylaniline) — Nitro-derivatives, 35, 240 — Oxidation products, 63, 153 — Oxalyl derivatives, 63, 119, 285 — Parantroso- (see Parantrosodimethylaniline) — Paratoluene-azo- (see Paratolueneazodimethylaniline) — Reactions, 36, 41; 60, 121 — Salicine of, 35, 241 — Substitution products, 26, 252 — Synthesis of ketones derived from, 35, 40
 Dimethylantracene, 26, 94 — And anthracene, synthesis, 28, 294 — Constitution of 2:7-, 92, 116 — Simultaneous production of 1:6-, and 2:7-, 97, 119, 152
 Dimethylantracenes, constitutional formula of, 94, 267 — Obtained from action of methylene chloride and aluminium chloride on toluene, 91, 58
 Dimethylbenzene and derivatives, 66, 278
 Dimethylbenzol and xylol derivatives, 17, 59 — Para- (see Paradimethylbenzol)
 Dimethylbutanetricarboxylate, ethyl (see Ethyl)
 3:3-Dimethylbutyrolactone, 92, 81
 Dimethylcampholic acid (see Acid)
 Dimethylcamphor and dimethylcampholio acid, 100, 84
 $\alpha\beta$ -Dimethylcarbimide, decomposition, 91, 195
 Dimethylcarbinol, ethyl- (see Ethyldimethylcarbinol)
 Dimethylchloropyridine, oxidation products, 75, 213
 Dimethylcoumarin, benzeneazo- (see Benzeneazodimethylcoumarin)
 Dimethylcyanotricarballylic ether (see Ether)
 1:1-Dimethyl- Δ -2:5-cyclohexadiene of Harries and Antoni, 99, 246
 Dimethylcyclohexanols, synthesis of three secondary, 93, 166 — Synthesis of three tertiary, and corresponding hydrocarbides, 92, 57
 Dimethylcyclohexenone, 83, 118
 Dimethylcyclopentane, 1:3:5-triphenyl-2:4- (see 1:3:5-Triphenyl-2:4-dimethylcyclopentane)
 1:1-Dimethylcyclopentan-3:4-dione-2:5-dicarboxylate, methyl (see Methyl)
 Dimethylcyanotinamin, 40, 43
 Dimethyldiacetylacetone, 82, 22
 Dimethyldiacetylpentane, reduction products, 66, 312

- as(4)- (see 5-Bromo-as(4)-dimethyl-2,4-diaminotoluene)

- Dinitrofurfuran, 86, 209; 88, 172
- Dinitroheptylic acid (see Acid)
- Dinitrohydroazobenzene, 85, 300
- Dinitronaphthalene, peri- (see Peridinitronaphthalene)—And potassium cyanide, 15, 227
- Dinitronaphthalin, 20, 46— α - and β -derivatives of, 34, 270—Product of new colouring matters by decomposition of, 5, 73
- Dinitronaphthol, 18, 20
- Dinitronaphthylamine, preparation, 67, 81
- Dinitroorcin, 35, 35
- Dinitroorthoanisidine, 84, 263
- Dinitroparadiisobenzols and their derivatives, 34, 88
- Dinitroparatoluidine, 42, 108
- Dinitrophenol derivatives, 26, 307; 29, 288—Monochlor- (see Monochlor-dinitrophenol)
- Dinitrophenols, 25, 71, 155
- Dinitrophenyldiacetylmethane, 76, 314
- Dinitroquinone monohydrate, 46, 93
- Dinitrosamines of ethylene aniline, the ethylene toluidines, 75, 176
- Dinitrosanaphthalene, 53, 271
- Dinitrosoorcin, 35, 35
- Dinitrosilbenedisulphonic acid (see Acid)
- Dinitrosulphocyanbenzene, 54, 59
- Dinitrothymol, 35, 184
- Dinitrotoluene, chloro- (see Chlorodinitrotoluene)
- 6-Dinitrotoluene, reduction with hydrogen sulphide, 89, 177
- Dinitrotoluenes, constitution, 86, 253—Dibromo- (see Dibromodinitrotoluenes)
- Dinitrotoluenesulphonic acids (see Acids)
- Dinklage, K., and A. Werner, Nitropentachlorosulfates, and constitution of osmic acid, 86, 294
- Dioxide of nitrogen (see Nitrogen)
- Diocletian edict against alchemy, 94, 2
- Dioctanthylic alcohol (see Alcohol)
- Diol, orthocyclohexane- (see Orthocyclohexanediol)—Tetraphenylbutane- (see Tetraphenylbutanediol)

- Diol-1: 6, hexane- (see Hexaned-ol-1: 6)
 Diol-1: 7, diiodide, heptane- (see Heptaned-ol-1: 7 diiodide)
 Diol-1: 6 heptamethylene glycol, hexane- (see Hexaned-ol-1: 6 heptamethylene glycol)
 Dione, 8-Naphthane (see 8-Naphthane)
 Don, M., Fossil phosphates of lime in province of Oran, 76, 146
 Dione-2: 3 dicarboxylate, methyl 1: 1-dimethylcyclopentan-3: 4 (see Methyl)
 Diones, aromatic, direct hydrogenation, 97, 34
 Dionine, 85, 122, 156
 Dionneau, R., Asymmetric derivatives of hexanediol-1,6 diethyl ether and heptanediol-1,7 diiodide, 93
 Asymmetric derivatives of hexanediol-1: 6 heptamethylene, 96, 63
 Diopase, localities of, 24, 99—Occurrence on chrysocolla from Peru, 37, 223
 I. IV. Diorthonitroanthraquinone, i. iv. diorthoamidoanthraquinone, 48, 214
 Dioscorea adulis, tubers of, composition, 36, 142
 Diostomic researches, 26, 240
 Diotallevi, D., and H. Cantoni (see Cantoni, H.)
 Doxadecimic ether (see Ether)
 Dioxethylenamines, methylated, 41, 77: 42, 97
 Dioxethylic acetone (see Acetone)
 Dioxide of barium (see Barium)—Of calcium (see Calcium)—Of carbon (see Carbon)—Of chromium (see Chromium)—Of hydrogen (see Hydrogen)—Of iodine (see Iodine)—Of iridium (see Iridium)—Of manganese (see Manganese)—Of molybdenum (see Molybdenum)—Of nitrogen (see Nitrogen)—Of selenium (see Selenium)—Of silver (see Silver)—Of sodium (see Sodium)—Of strontium (see Strontium)—Of sulphur (see Sulphur)—Of tellurium (see Tellurium)—Of tungsten (see Tungsten)—Of zirconium (see Zirconium)—Precipitation of manganese as, 39, 201
 Dioxides, hydrates of combination of certain solid, with acids, salts and alkalies, 44, 72
 Dioximes, cobaltic, 96, 221—Of camphorquinone (see Camphorquinone)
 Dioximidoctyrate, ethyl (see Ethyl)
 Dioximidosuccinate, ethyl (see Ethyl)
 Dioximidosuccinic acids (see Acids)
 Dioximines, cobaltic, 94, 242
 Dioxycetone, colour reaction of, 99, 108—New reactions of, 99, 118—Properties in relation to degree of molecular association, 80, 124—Synthesis of, 78, 71—Tetramethyl (see Tetramethyl)
 Dioxy-1-allylbenzene, 2: 3-dimethoxy-4: 5-methylene- (see 2: 3-Dimethoxy-4: 5-methylenedioxy-1-allylbenzene)
 Dioxybenzenes, carbonates of, 79, 144
 Dioxybenzoic acid (see Acid)
 Dioxybenzophenone, 43, 257—From phenolphthalcin, 38, 254
 Dioxy-3,4-butyric acid (see Acid)
 Dioxydiphenylmethane, 36, 242
 Dioxyethylmethylen, 50, 75—Reclamation of priority, 53, 119
 Dioxyhydrates, solid, and acids, salts, and alkalies, compounds, 44, 72, 107
 Dioxyisopropylhypophosphorous acid (see Acid)
 Dioxymaleic acid (see Acid)
 Dioxymethylene and methylic aldehyd, probable identity, 18, 21
 Dioxyphosphinic acid (see Acid)—Acids (see Acids)
 Dioxypropylbenzene, dichloromethane- (see Dichloromethanedioxypropylbenzene)
 2: 6-Dioxypridine, alkyl derivatives of, 92, 28
 Dioxystearic acid (see Acid)
 Dioxytartaric acid (see Acid)
 Dioxytartaric acid (see Acid)
 Diparaditylolethane, d symmetric, constitution, 92, 116
 Diparatorylguanidine, action of nitric acid on, 41, 290
 Diparaxylylketone, 54, 109
 Dipentene, synthesis, 89, 223
 Dipeptides, formation by hydrolysis of proteins, 94, 164
 Diphenane, composition, 25, 100
 Diphenol, ether function of, 96, 12—Ethyl- (see Ethyldiphenol)
 Diphenol-4: 4-dihydroxydiphenol, new derivatives of, 94, 230
 Diphenoguinone, tetrabromo- (see Tetrabromodiphenoguinone)
 Diphenoxyhexane, 87, 70
 Diphenyl, 20, 165; 22, 60; 26, 94; 30, 275—Action of organic chlorides on, 54, 73—Azo-dyes from, 53, 178—Bases, 39, 74—Bromo-derivatives, 52—Compounds, 67, 101—Derivatives, 29, 155, 197—Derivatives, halogen, 89, 18—Derivatives, sulphuretted, 42, 110
 Dihydroxy- (see Dihydroxydiphenyl)—Diphenylmethane and diphenylethane series, benzidination in, 100, 207—Magnesium (see Magnesium)—Mercurio- (see Mercuriodiphenyl)—Nitrotetramethyl- (see Nitrotetramethyldiphenyl)—Paradinitro- (see Paradinitrodiphenyl)—Preparing, 33, 75, 199; 39, 268—Series, diazo reaction in, 87, 249; 91, 5; 97, 128—Series, nitrosoacetylamino-derivatives of, 99, 235—Tellurium- (see Tellurium-diphenyl)
 Diphenylacetic acid (see Acid)
 1: 3-Diphenylalloxan, dynamic isomerism among the coloured hydrazones of, 96, 8
 Diphenylamine, 17, 37; 25, 178, 191—Acid sulphate of, 58, 268—Action of diazobenzene chloride on, 89, 275—Action on nitric acid, 91, 190—And diphenylnitrosamin, azo derivatives, 40, 33—As reagent for nitrates, nitrates, chlorates and use when mixed with resorcin and β -naphthol, 91, 155—Colouring matter from, 26, 158—Derivatives, 88, 95—Formation, 25, 275—In quantitative analysis, 50, 31—Methyl- (see Methyl-diphenylamine)—Nitro-derivatives of, 36, 52—Parahydroxy- (see Parahydroxydiphenylamine)
 Diphenylamine diazoamines, 91, 189
 Diphenylamine sulphoxides, intramolecular rearrangement of, 99, 141
 Diphenylamines, preparation, 86, 313
 Diphenylanthracene, 89, 310
 Diphenylanthracene anhydride, symmetric, 89, 310
 Diphenylanthrone, 72, 61
 Diphenylanthrones, tetraacetyldiamido- (see Tetraacetyldiamidodiphenylanthrones)
 1: 3-Diphenylbarbituric acid (see Acid)
 Diphenylbenzene, meta- (see Metadiphenylbenzene)
 Diphenylbenzol, 27, 283
 Diphenylbisdiazomethanebenzene, 93, 166
 Diphenylbutadiene, benzoyl- (see Dibenzoyldiphenylbutadiene)
 Diphenylcamphoromethane, isomer of, 97, 263
 Diphenylcarbamides, dinitro- (see Dinitrodiphenylcarbamides)
 Diphenylcarbazide, action of chromic acid on, 91, 32—As sensitive reaction for metallic compounds, 82, 107—Chromised violet colouring matters from, 85, 166—Use for the detection of chromic acid in cotton dyed with chrome yellow, 85, 167
 Diphenylcarbazone compounds, cuprous and mercurous organo-metallic, 82, 112—Compounds, metallic, 81, 312
 Diphenylcarbinols, 86, 220
 Diphenylcarbodiimine, 83, 131
 Diphenylcarbonic ether (see Ether)—Ethers (see Ethers)
 Diphenylchloride, tetrazo- (see Tetrazodiphenyl)
 Diphenyldiamin, ethenyl- (see Ethenyldiphenyldiamin)—Mono- (see Monodiphenyldiamin)
 Diphenyldiamines, action of phenyl carbamide on, 83, 45—And diphenylethylenediamines, 81, 296
 Diphenyldianthranaltetramethyldiamide, tetramethyldiamido- (see Tetramethyldiamidodiphenyldianthranaltetramethyldiamide)
 Diphenyldiimide, silico- (see Silico-diphenyldiimide)
 Diphenyldimidonaphthol, 41, 251
 Diphenyldisocyanate, action on amido-compounds, 73, 37
 Diphenyldinitroethylene, 83, 198
 Diphenyldisazoaminobenzene, 93, 166
 Diphenyldiselenide, oxidation, 94, 150
 Diphenylen disulphide, 33, 19—Isomer of, 76, 59
 Diphenylen-glycollic acid (see Acid)
 Diphenylenketone and phenylbenzoic acid, 38, 113—From anthraquinone, 38, 220
 Diphenylene-ketone oxide, derivatives of, 47, 92—Preparation on, 48, 214
 Diphenylenmethan, 38, 113
 Diphenylen oxide, 24, 145
 Diphenylenphenylmethane, coloured derivatives, synthesis, 84, 35—Tetramethyldiamidodiphenylenphenylmethane
 Diphenylen sulphide, and diphenylen disulphide, 29, 155
 Diphenylethan, 29, 146—Derived from ethylidene chloride, synthesis of, 50, 57—Diamido- (see Diamidodiphenylethane)—Leucobases and colouring matters derived from, 100, 280—Series, benzidination in, 100, 207—Tetramethyldiamido- (see Tetramethyldiamidodiphenylethane)
 Diphenylethylenediamines, 81, 296
 Diphenylfurfuran, 60, 302
 Diphenylglycolic acid (see Acid)
 Diphenylglyoxazol and its derivatives, 76, 35—Phenylhydrazine (see Phenylhydrazine)
 Diphenylguanidin, action of phenylated oil of mustard on, 40, 109
 Diphenylhexatriene and allied hydrocarbon, refractive power of, 96, 318
 Diphenylhydantoin, synthesis, 78, 304
 Diphenylhydrazines, triethylene (see Triethylene)
 Diphenylic bases, 63, 142
 Diphenylimid, amido- (see Amidodiphenylimid)—Carbo- (see Carbidiphenylimid)
 Diphenyldionium and thallium nitrates, isomorphism of, 74, 217
 Diphenylised pyrones (see Pyrones)
 Diphenylketone, synthesis, 25, 311
 Diphenylmethane, action of bromine on, 42, 72—Azo- (see Azodiphenylmethane)—Bromo- (see Bromodiphenylmethane)—Derivatives, 26, 230—Derivatives, constitution, 98, 47—Dimethoxy- (see Dimethoxydiphenylmethane)—Dinitro- (see Dinitrodiphenylmethane)—Dioxy- (see Dioxydiphenylmethane)—Monobromated, action on ammonia, 42, 283—Orthonitro- (see Orthonitrodiphenylmethane)—Series, attempted reduction in, 93, 116—Sulphonation, 77, 210
 Diphenylmethanol oxide, 82, 107
 Diphenylmethylacetic acid (see Acid)
 Diphenylnitrosamine, action of primary amines on, 36, 52
 Diphenyloctatetrene, white and yellow, light reactions of, 99, 191
 Diphenyloxide, 22, 214—Compounds with acids and salts, 95, 249
 Diphenyloxytriazoline, synthesis, 72, 278
 Diphenylpropane, synthesis, 40, 203
 Diphenylpyrones, symmetric, reaction by which they are produced, 87, 262
 Diphenylpyrrolone, diketo- (see Diketo-diphenylpyrrolone)
 Diphenylsilicon oxide and benzyl silicon compounds, 93, 57
 Diphenylsulphocarbamide, desulphuration, 20, 282; 21, 70, 251
 Diphenylsulphurea, action of ethoxalylchloride upon, 50, 116
 1: 3-Diphenyl-2-thiobarbituric acid (see Acid)
 Diphenylurea and diphenylguanidine, preparation, 48, 58
 Diphenylurea chloride as a reagent for phenols, 95, 298
 Diphtalyl, 26, 229
 Diplatonitrides and platonitrites, 34, 270; 37, 31

- Diselenide, dibenzyl- (*see* Dibenzyldiselenide)—Nitrobenzyl (*see* Nitrobenzyl)—Of benzyl (*see* Benzyl)
- Diselenides, preparation, **97**, 273
- Dishes, enamelled steel, **59**, 220—Nickel as a material for, **54**, 326—Platinised aluminium, **88**, 269—Porcelain, use in silica determinations, **95**, 9
- Disilicide of molybdenum (*see* Molybdenum)—Of uranium (*see* Uranium)
- Disinfectant, **10**, 288; **23**, 35; **59**, 291—Fogass, **41**, 25—Girondin, **22**, 118—Resorcin, **43**, 235—Sulphurous acid as, **34**, 245, 261—Sueren, activity of, **22**, 107—Typhoid, sulphuric acid as, **84**, 161
- Disinfectants, **2**, 58; **4**, 159; **14**, 275; **23**, 33, 45, 58 — Action of phenic acid, **23**, 130—Application in arresting spread of cattle plague, **13**, 242, 254, 268, 277, 291—At Tørling, **17**, 280—Carbolic, **60**, 68—Cheap, **26**, 196—Comparative energy of, **23**, 21—Estimation of phenols in, **79**, 182—Experiments on, **25**, 306—Explanation, **66**, 304, 317, 328—Physico-chemical method for comparing antiseptic value of, **99**, 44—Right use of, **30**, 174—Standardisation of, **94**, 289; **100**, 315
- Disinfecting agents, **13**, 123—And antiseptic power of iodate of calcium, **28**, 297—And preserving fluid for cure of disease among cattle, chemical mixture to be used as, **14**, 263—Powder, **33**, 149—Soap, **20**, 59
- Disinfection, **13**, 36; **14**, 70, 264—And collection of faecal matters, **26**, 205—And preservation for agricultural purposes, **42**, 24—And the cholera, **14**, 133, 169—By burning sulphur, **62**, 155—Electrolytic, **100**, 12—In connection with cattle plague, **13**, 250—Of alcohols of bad flavour by electrolysis, **48**, 203—Of animal matters, etc., **42**, 330—Of sewage, **4**, 201—Of sewage with phenic acid, **4**, 50—Of streets and confined places, **18**, 124—Practice of, **14**, 267—Processes, **12**, 48—Results on the battle-fields of France, **26**, 5—Stoves, **55**, 225—With formic aldehyd, **75**, 251, 268
- Disinfective preparations, phenol in, **74**, 197
- Disodic arrhenal (*see* Arrhenal)—Methylarsenate (*see* Methylarsenate)—Sulphide (*see* Sulphide)
- Disodioethanetetracarboxylate of ethyl (*see* Ethyl)
- Disodium erythrate, **63**, 261
- Disodium tetralanthanate, **89**, 198
- Dispersion, equivalents, **55**, 300—Figures (*see* Figures)—Formulae of, examination, **55**, 70 — Of gases (*see* Gases)—Rotatory (*see* Rotatory)
- Displacement, discussion on, **3**, 27
- Dissociation, **16**, 12; **19**, 84; **29**, 141—And contact action, **54**, 179, 212, 236; **58**, 153—And equilibrium, lecture experi-
- ments to illustrate, **82**, 212—Chemical, and electrical conductivity, **90**, 21—Constants (*see* Constants)—Crystalline, **24**, 288; **25**, 266, 274; **26**, 192, 28, 194, 262, 293; **29**, 196, 246—Curves, **88**, 23—Degree of, heat of solution, and solubility, relationship between, **77**, 189—Double, of quaternary ammonium compounds, **98**, 48—Electrolytic, and osmotic pressure, **75**, 270—Electrolytic, of water, measuring, **100**, 213—Electrolytic, theory of, **89**, 82; **90**, 292—Electrolytic, thermochemistry of the theory of, **89**, 31, 37, 202—Equilibria in solutions, investigating, **99**, 237—Hydrolytic, determination, **83**, 284—In dilute solutions, **92**, 91—Into ions and its consequences, **63**, 102—Laws of, **39**, 250—Of bones (*see* Bones)—Of compounds at very low temperatures, **29**, 256—Of electrolytes (*see* Electrolytes)—Of matter under influence of light and heat, **94**, 255—Phenomena, use of diffusion method in study of, **40**, 93—Phenomenon, **70**, 223—Problem of, **36**, 64—Spectra (*see* Spectra)—Speed of, **55**, 81—Temperature of ammonia and carbon monoxide, **98**, 197—Theory of, **29**, 254; **44**, 168; **45**, 204—Velocity of, **54**, 285
- Dissolution and solution, **70**, 12—Electro- (*see* Electro-dissolution)—Laws of, **55**, 153—Of various substances in different liquids, heat of, **58**, 240—Retarded, effects of, **61**, 183
- Dissolved gases (*see* Gases)
- Dissolver, **80**, 274
- Dissymmetric forces (*see* Forces)
- Distillate of spirit distilleries, **24**, 133
- Distillation, **6**, 203; **17**, 165—Apparatus, **81**, 16—By cold, **27**, 268—Destructive, considered in reference to modern industrial arts, **7**, 282, 295; **8**, 56, 78—Flask, **88**, 16—Fractional, **25**, 22, 132, 143, 156, 167; **40**, 285—Fractional, apparatus for, **37**, 183—Fractional, as a method of quantitative analysis, **85**, 233—Fractional, by means of steam, **96**, 211—Fractional, in a current of steam, **51**, 189—Fractional, purification of water by continuous, **89**, 141—Fractional, separator for, **89**, 239—Fractional, theory of, **39**, 260, 262—Fractionated, **50**, 189; **52**, 320; **74**, 25—Fractionated, apparatus for, **74**, 25—Fractionated, separation of three liquids by, **74**, 258—In vacuo, **82**, 231—In vacuo in quartz vessels, **91**, 23—In vacuum, **26**, 157; **47**, 167 — Of alloys of silver and copper, of silver and tin, of silver and lead, **95**, 46—Of chromium (*see* Chromium) — Of coal (*see* Coal)—Of coal-tar (*see* Coal-tar)—Of colophonium (*see* Colophonium)—Of copper (*see* Copper)—Of gold (*see* Gold) — Of grease (*see* Grease) — Of hydrocarbons (*see* Hydrocarbons)—Of iron (*see* Iron)—Of manganese (*see* Manganese)—Of mixtures of ethylic alcohol and water, **75**, 277—Of molybdenum (*see* Molybdenum)—Of nickel (*see* Nickel)—Of solid and liquid combustible matters, **5**, 355 — Of tungsten (*see* Tungsten)—Of uranium (*see* Uranium)—Separation of three liquids by, **74**, 258 — Simultaneous, of two non-miscible substances, **86**, 95—Treatment of products of, **1**, 263—Vacuum, apparatus, **59**, 249—Vacuum, manometer for, **97**, 128—Without bumping, **81**, 263, 286, 299, 311; **82**, 47
- Distillations, fractional, **14**, 194 — Fractional, pressure regulator for, **89**, 239—Fractionated, apparatus for, **71**, 228—From a test-glass, refrigerator for, **74**, 257
- Distillatory apparatus (*see* Apparatus)
- Distilled liquors (*see* Liquors)—Water (*see* Water)—Waters (*see* Waters)
- Distilleries, agricultural, report of M. Aime Girard on control of, **74**, 74—Tar, accidents in, **89**, 35—Tar, extinguishing fires in, **39**, 190—Tar, insur-

- ance of, **39**, 196—Tar, pitch house explosions in, **43**, 222
- Distillery residues, **87**, 9
- Distilling and boiling, vessel for, **67**, 39
- And rectifying, and apparatus employed therein, **4**, 251—Oil (see Oil) —Operations, **87**, 278—Tar (see Tar)
- Distyrol, a polymer of styrol, **12**, 70
- Disubstituted derivatives of benzene (see Benzene)
- Disuccinic acid (see Acid)
- Disulphates, irido- (see Iridodisulphates)
- Of quinine (see Quinine)
- Disulphide, carbonic, hydrate of, **16**, 12—Dibenzyl- (see Dibenzyliddisulphide)—Diethyl- (see Diethyliddisulphide)—Ethyl- (see Ethyliddisulphide)—Of carbon (see Carbon)—Of diphenyl (see Diphenylid)—Of phosphorus (see Phosphorus)
- Disulphides, dialkyl- (see Dialkyliddisulphides)—Electrolytic preparation, **96**, 291—Nitrobenzyl (see Nitrobenzyl)—Preparation, **98**, 34, 229, 242; **99**, 105, 207; **100**, 230, 253
- Disulphoanthracenic acid (see Acid)
- Disulphobenzoic acid (see Acid)
- Disulphobenzolic acid (see Acid)
- Disulphonates, hydroxylamine- $\alpha\beta$ (see Hydroxylamine- $\alpha\beta$ -disulphonates)
- Disulphones, **51**, 130
- α -Disulphones, aromatic, **98**, 231
- Disulphonic acid (see Acid)—Acids (see Acids)—Anhydride (see Anhydride)
- Disulphopersulphate of sodium (see Sodium)
- Disulphophenanthrenic acid (see Acid)
- Disulphoresoric acid (see Acid)
- Disulphoxide of benzol (see Benzol)—Of toluol (see Toluol)
- Disulphoxides, constitution, **99**, 60—Preparation and constitution, **98**, 233
- Disulphuric acid (see Acid)
- Dita bark (see Bark)
- Ditartaric acid (see Acid)
- Diterbenthyle, **56**, 239
- Dithienyl, phenyl (see Phenyl)
- Dithioacetylacetone, action of ammonia on, **68**, 35
- Dithioazolic derivatives, **73**, 48
- Dithiobenzoic acid (see Acid)
- Dithiobenzoylacetone, action of hydroxylamine and phenylhydrazine on, **81**, 226
- Dithiocarbamate of ammonium (see Ammonium)
- Dithiocarbimides, phthalyl (see Phthalyl)—Succinyl (see Succinyl)
- Dithionate of soda (see Soda)
- Dithionates, analysis, **94**, 223 — Electrolytic formation, **88**, 3
- Dithionic acid (see Acid)
- Dithiourethane, benzyl- (see Benzyl-dithiourethane)
- Dithioxanthoxalanil, **95**, 33
- Dithiocyanic acid (see Acid)
- Dithymol, action of bromine on, **97**, 143—Action of chlorine on, **97**, 239—Preparation, **97**, 143
- Dithymyltrichlorethane, derivatives, **35**, 17
- Ditolanazotide, conversion into diphenantylbenzenozotide, **54**, 257
- Ditolylglycerates, methylic and ethylic, comparative rotatory powers, **79**, 223
- Ditolyl tartrate and dibenzoyl tartrate, comparative rotatory powers of, **74**, 279
- Ditolyl, bromo-derivatives, **52**, 6—Mercurio- (see Mercurioditolyl)—Oxidation, **36**, 211
- Ditolylethane, dipara- (see Diparaditolylethane)
- Dithylphthalide, preparation, **50**, 156
- Ditte, Alfred, Action exerted upon alkaline haloid salts by the acids present, **75**, 35—Action exerted upon solutions of alkaline haloid salts by the bases which they contain, **75**, 47—Action of acid solutions upon stannous oxide, **45**, 152—Action of alkaline sulphides upon stannous sulphide, **45**, 263 —Action of antimony sulphide on potassium sulphide, **53**, 72—Action of carbonic acid upon certain alkaloids, **58**, 189—Action of chlorine and hydrochloric acid upon lead chloride, **42**, 294—Action of hydrazine on mercury sulphate, **38**, 287—Action of hydrazine on selenious acid, **34**, 51, 72—Action of hydrochloric acid on lead chlorides, **43**, 195—Action of hydrochloric acid on metallic chlorides, **43**, 36, 94—Action of hydrochloric acid on stannous sulphide, **48**, 34—Action of hydrogen acids on vanadic acid, **53**, 311—Action of lead protoxide on alkaline iodides, **44**, 60—Action of mercuric iodide on sulphuric acid and mercury sulphates, **91**, 256—Action of metallic nitrates on monohydrated nitric acid, **40**, 190, 214; **41**, 23 —Action of nitric acid on aluminium, **61**, 216—Action of potassa on lead oxide, **45**, 243—Action of potassium sulphide upon mercury sulphide, **49**, 277—Action of reducing agents on vanadic acid, **53**, 35—Action of saline solutions on stannous oxide, **45**, 163—Action of sulphate of lime on alkaline sulphates, **35**, 44—Action of sulphuric acid upon aluminium, **61**, 178—Action of vanadic acid on alkaline fluorides, **57**, 70—Action of vanadic acid on alkaline haloid salts, **54**, 47—Action of vanadic acid on ammoniacal salts, **53**, 252, 274—Action of vanadic acid on potassium fluoride, **56**, 279—Alkaline vanadates, **55**, 188, 224—Ammonium vanadates, **53**, 225; **56**, 47—Apparent volatilisation of selenium and tellurium, **25**, 214—Certain combinations of stannic oxide, **55**, 93—Certain compounds of tin bisulphide and biselenide, **46**, 207—Certain properties of boric acid, **36**, 287—Certain properties of cadmium sulphide, **36**, 109—Certain properties of tin sulphide, selenide, and telluride, **48**, 12—Combinations of vanadic acid with oxygen acids, **53**, 191—Compounds of lead iodide with alkaline iodides, **44**, 36—Compounds of silver nitrate with alkaline nitrates, **52**, 260—Crystallisation of chlorine hydrate, **47**, 9—Crystallisation of chromium sesquioxide, **85**, 119—Crystallisation of gold, **82**, 84—Crystallisation of peroxide of iron, **85**, 122—Decomposition of alkaline aluminates, **67**, 85, 121 —Decomposition of certain salts by water, **30**, 252, 263; **31**, 8—Decomposition of lead salts by alkalis, **45**, 208—Decomposition of salts by liquids, **42**, 223; **43**, 118—Decomposition of salts by matters in fusion, **46**, 10—Determination of boracic acid, **31**, 150—Determination of vanadic acids, **55**, 203—"Etude Générale des Sels" (review), **93**, 105—Fluorescent liquid, **18**, 30—Fluoric apatites, **50**, 269—Fluorine compounds of uranium, **42**, 83—Fluorised compounds of uranium with alkaline metals, **42**, 95—Formation of vanadium ores in nature, **90**, 10—Gold sulphide, **71**, 251—Industrial preparation of alumina, **67**, 145—"Introduction à l'Etude des Métaux" (review), **85**, 190—Iodised apatites, **47**, 236—Metallic vanadates, **56**, 23—Production of certain crystalline borates in the dry way, **28**, 239, 278—Production of certain crystalline stannates, **47**, 164—Production of certain crystalline uranates by the dry way, **46**, 290—Production of brominised apatites and Wagnerites with a calcium base, **47**, 141—Production of bromised apatites and Wagnerites, **42**, 188—Production of crystalline borates by the moist way, **47**, 305—Production of crystalline vanadates in the dry way, **47**, 214—Properties and applications of aluminium, **79**, 47, 105, 190—Properties of calcium chloride, **37**, 10—Properties of iodic acid, **22**, 251—Reactions of stannous salts, **45**, 198—Reciprocal action of alkaline and mercurous haloid salts, **62**, 25—Refrigerant mixtures formed of two crystalline salts, **42**, 13—Refrigerant mixtures formed by an acid and a hydrated salt, **41**, 283—Researches on vanadium, **52**, 224—Separation of iron from chrome and uranium, **36**, 100—Solubility of nitrate of soda, and its combination with water, **31**, 250 —Solution of silver in presence of alkaline iodides, **44**, 191—Study of the cadmium and sal-ammoniac battery, **67**, 277—Study of the Leclanché battery, **67**, 215—Sulphuretted of selenium, **24**, 167—Tellurous acid, **34**, 92, 133

 Electric absorption in crystals, 43, 229 — Accumulator (see Accumulator) — Accumulators (see Accumulators) — Action of a moving dielectric upon, 36, 121 — Action of points, 21, 180 — Action, production of ozone by, 27, 208 — Actino- (see Actino-electric) — Advertisement, 69, 73 — And chemical department of argentic sulphide, 36, 36 — And thermal units, 60, 122 — And thermic conductivities of metals, relation between, 61, 85 — Apparatus (see Apparatus) — Arc (see Arc) — Attraction of quartz, 56, 227 — Automatic whistle (see Whistle) — Balance (see Balance) — Batteries (see Batteries) — Battery (see Battery) — Blast (see Blast) — Bleaches (see Bleaches) — Bleaching (see Bleaching) — Blowpipe (see Blowpipe) — Buoya (see Buoya) — Burner (see Burner) — Cable (see Cable) — Cables (see Cables) — Calamine (see Calamine) — Candle (see Candle) — Capacity of a condenser, 50, 22 — Centrifugal machine for laboratories, 52, 232 — Charge due to deviable radium rays, 81, 154 — Chronographs (see Chronographs) — Clock (see

Clock) — Clockwork (see Clockwork) — Communication between lightships and the shore, 55, 213 — Condensation (see Condensation) — Condensers (see Condensers) — Conditions of high regions of atmosphere, 68, 289 — Conductibility (see Conductibility) — Conducting power of metallic sulphides and oxides, 23, 181 — Conducting power of pure copper, effect of presence of metals and metalloids upon, 2, 217 — Conduction (see Conduction) — Conductivities (see Conductivities) — Conductivity (see Conductivity) — Conductor (see Conductor) — Convection (see Convection) — Cultivation (see Cultivation) — Current (see Current) — Currents (see Currents) — Decomposition, 7, 70 — Deformations of quartz, 46, 260 — Deposition of metallic strata of different colours, 44, 315 — Deposition of metals, 36, 170 — Deposition of nickel, 49, 36 — Dialysis (see Dialysis) — Di- (see Dielectric) — Discharge (see Discharge) — Discharges (see Discharges) — Distribution, transformers for, 55, 258 — Dust figures, 22, 35 — Dynamograph (see Dynamograph) — Effects produced by contact of non-oxidisable metals with acids, neutral and saturated saline solutions, and on capillary affinity, 22, 21 — Effluve (see Effluve) — Energy (see Energy) — Evaporation (see Evaporation) — Experiment, unexplained, 41, 81 — Experiments, 6, 192; 49, 22 — Explorer, 20, 226 — Field, distribution of gas in, 81, 130 — Fields, comparison by means of an oscillating electric needle, 92, 19 — Fields, distribution of active deposits of radium, thorium, and actinium in, 97, 156 — Fields, experiments in, 66, 278 — Fishes (see Fishes) — Flow (see Flow) — Fluid (see Fluid) — Fly (see Fly) — Force (see Force) — Furnace (see Furnace) — Gas-lighting apparatus (see Gas-lighting) — Generator (see Generator) — Harmonium (see Harmonium) — Heater (see Heater) — Heating apparatus (see Apparatus) — Illumination (see Illumination) — Induction (see Induction) — Inertia, 82, 300 — Influence, observations on a recent communication by M. Volpicelli, 31, 130 — Influence machine, 57, 199, 238 — Inscription of words, 39, 250 — Instruments, 65, 176, 249 — Jewels, (see Jewels) — Lamp, 34, 217; 39, 53; 44, 99 — Lamp, E. Reynier's "incandescence," 37, 262; 40, 89 — Lamp, smoke of, 39, 283; 41, 32 — Lamp with oblique circular rheophores, 36, 22 — Lamps charged with marsh-gas and air, 79, 10 — Lamps, exhibit, 57, 201 — Lamps, measurements of Edison's horseshoe, 41, 199 — Lamps, positions of carbons in, 44, 286 — Lantern, (see Lantern) — Light, 2, 167; 3, 254; 17, 253; 20, 118; 38, 217, 232; 39, 250; 40, 277; 44, 316 — Light and phosphorescence in rarefied gases, 19, 247 — Light and tar colours, 40, 47, 53 — Light applied to surgery, 1, 156 — Light, arc and daylight, action on colours, 49, 51 — Light at British Museum, 39, 101; 40, 212 — Light, Brush, 43, 73 — Light, current produced by, 44, 295 — Light, danger in the, 10, 12 — Light, distribution at great distances, 50, 213 — Light, divisibility of, 35, 196; 39, 214 — Light, division of, 40, 265 — Light, Edison's, 41, 182 — Light, effects produced by addition of foreign bodies to carbon in preparation of coke pencils for, 35, 86 — Light, efficiency, 41, 200 — Light, employment, 17, 57 — Light, employment for scenic effects, 9, 155 — Light experiments, 33, 43; 39, 246 — Light, fire-damp indicator, 53, 309 — Light, illumination of conservatories

by, 45, 176 — Light, illumination of lighthouses by, 1, 171 — Light in Buchanan Street, Glasgow, 43, 24 — Light in France, 49, 151 — Light in manufacturing establishments, 43, 37 — Light, influence of nature of the charcoal upon, 41, 70 — Light, influence on plants, 48, 83; 66, 209 — Light, internal hygiene of houses illuminated by, 55, 69 — Light, invisible radiation of, 11, 65 — Light, long spectrum of, 7, 147, 162, 185, 198, 208 — Light, manufacture of carbon conductors for, 35, 106 — Light, mercurial, 2, 157 — Light, new system, 38, 287 — Light, producing and regulating, 31, 119; 38, 295; 39, 8 — Light, reduction of cost, 39, 233 — Light regulator, 6, 104; 21, 238; 39, 206 — Light spectra, 6, 259 — Light spectra in gases, 6, 282 — Light, stratification of, 7, 100; 30, 120, 165 — Light, use to influence chemical change, 53, 177 — Light, useful applications, 22, 119 — Lights, 42, 291 — Lighting, 39, 72, 273; 41, 220; 42, 227, 257; 44, 287; 45, 5; 47, 194 — Lighting apparatus at the Royal Albert Hall, 39, 200 — Lighting by incandescence, 44, 162; 46, 49, 59, 114 — Lighting by incandescence, cost of, 45, 247 — Lighting, domestic, 66, 196 — Lighting, fire risks, 45, 222 — Lighting, fire risks, prevention, 46, 7 — Lighting, preparation of pure carbon for, 47, 179 — Lighting, recent history of, 42, 310 — Liquids (see Liquids) — Machine, 26, 107 — Machine, conversion into a Holtz's machine, 21, 200 — Machine, Holtz's, 22, 72, 155 — Machine, modification, 25, 311 — Machine, poles of, peculiar form of discharge of, 21, 209 — Machine, Toepler's, 24, 265 — Machine, wooden, 13, 142, 225 — Machines, comparison of, 27, 234 — Machines in action, measurement of electro-motive force of, 45, 66 — Machines, variations of resistance of with their speed, 44, 315 — Magnetic machines, 47, 142 — Measurements, 21, 240; 59, 117 — Measurements of Edison's horseshoe lamps, 41, 199 — Measurements, unity of force in absolute, 43, 82 — Measures, units of, 44, 225 — Measuring instruments, shape of movable coils for, 61, 156 — Method for heating gases, 69, 207 — Metronome (see Metronome) — Micrometer (see Micrometer) — Multiplier, 33, 246 — Notes, 35, 72 — Oscillations (see Oscillations) — Osmosis in liquid ammonia, 89, 59 — Osmosis in methyl alcohol, 89, 237, 286 — Ozonisers (see Ozonisers) — Paper (see Paper) — Perforation of glass (see Glass) — Phenomena, 21, 210, 247, 259, 270; 22, 67, 105, 113, 151, 24, 169; 28, 9; 40, 299; 44, 313; 60, 97 — Phenomena, influence of albumenoid substances in, 29, 186 — Phenomena of tourmaline, 43, 130 — Phenomena produced by Röntgen rays, 73, 109 — Phenomenon, 15, 110; 25, 129; 40, 299 — Plant, 52, 177 — Polarisation (see Polarisation) — Power, 24, 11 — Primers, 33, 210 — Properties of bees-wax (see Bees-wax) — Properties of clouds (see Clouds) — Properties of selenium (see Selenium) — Pyrometer (see Pyrometer) — Quantity and intensity, 3, 354, 367 — Radiation (see Radiation) — Regulation of time in Paris, 41, 105 — Repulsion, 35, 10 — Resistance, 42, 70; 59, 117 — Resistance, alteration in, 50, 22 — Resistance, effect of a high frequency oscillatory field on, 84, 10 — Resistance of alcohol (see Alcohol) — Resistance of alloys, 44, 288 — Resistance of badly conducting bodies at very low temperatures, 86, 186 — Resistance of bismuth (see Bismuth) — Resistance of carbon (see Carbon) — Resistance of glass (see Glass) — Resistance of insulating substances,

48, 260.—Resistance of liquid films (*see* Films).—Resistance of liquids (*see* Liquids).—Resistance of mixtures of sulphur and carbon (*see* Sulphur, also Carbon).—Resistance of pure metals and allied matters, temperature variation of, 85, 140.—Resistance of rarefied air (*see* Air).—Resistance of skin (*see* Skin).—Resistance of water (*see* Water).—Resistance, permanence of standards of, 50, 256.—Resistances, 17, 143.—Resistances increased with rise of temperature, 23, 219.—Resistances, method of mounting, 49, 139.—Ropes (*see* Ropes).—Saw (*see* Saw).—Science, researches placed at service of medicine and surgery by, 73, 131.—Selection, 35, 274.—Separation of metals, (*see* Metals).—Shadows and luminescence, 75, 103, 111, 122, 133.—Signalling (*see* Signalling).—Silk loom (*see* Silk).—Smelting (*see* Smelting).—Solutions, internal friction of, 78, 50.—Spark (*see* Spark).—Sparks (*see* Sparks).—Spectra of gallium (*see* Gallium).—Spectrum (*see* Spectrum).—Spectrum of gadolinium chloride (*see* Gadolinium).—Spectrum of rare earths of terbium group (*see* Terbium).—Splashes, 61, 46.—Storage battery (*see* Battery).—Storms, probable cause, 5, 192.—Strata, action of Röntgen rays on double and triple, 73, 223.—Stress, optical demonstration of, 57, 50, 109.—Sugar (*see* Sugar).—Telegraph (*see* Telegraph).—Telegraphs (*see* Telegraphs).—Tensions, contractions and expansions produced by, in hemihedral crystals, 45, 34.—Theorem, 69, 150.—Thermo-currents (*see* Currents).—Thermo-, (*see* Thermo-electric).—Thermometer (*see* Thermometer).—Thermostat (*see* Thermostat).—Touch and molecular changes produced in matter by electric waves, 82, 40, 49, 61, 76.—Tourbillon (*see* Tourbillon).—Tramways (*see* Tramways).—Transmission through the soil, 34, 142; 36, 61.—Transmissions without conducting wires, 33, 230.—Transportation of work to great distances, 47, 128.—Treatment of lubricating oils, 68, 293.—Tuning-forks (*see* Tuning-forks).—Turbine (*see* Turbine).—Units of measurement, 47, 242.—Valves (*see* Valves).—Vibration (*see* Vibration).—Waves, absorption along wires by a terminal bridge, 74, 254.—Waves, attenuation along a line of negligible leakage, 77, 283.—Waves in wires, effect of capacity on stationary, 75, 187.—Waves, reflection and transmission along wires, 81, 58.—Waves, stationary, on spiral wires, apparatus for metrical study of, 89, 245.—Wires (*see* Wires).

Electrical apparatus (*see* Apparatus).—Battery (*see* Battery).—Changes induced by ultra-violet light, 94, 77.—Company, Universal, 41, 252.—Conduction (*see* Conduction).—Conductivity of flames (*see* Flames).—Conductor (*see* Conductor).—Corona (*see* Corona).—Decomposition (*see* Decomposition).—Dialysis (*see* Dialysis).—Exhibition (*see* Exhibition).—Experiments, 6, 192; 49, 22.—Explorer (*see* Explorer).—Fly (*see* Fly).—Force (*see* Force).—Forces (*see* Forces).—Instruments, 65, 176, 249.—Machine, centrifugal, for laboratories, 52, 232.—Machine, Holtz's, 22, 72, 155.—Machine, influence, 57, 199, 238.—Machine, Toepler's, 24, 265.—Machine, wooden, 13, 142, 225.—Measuring instruments (*see* Measuring).—Measuring machine (*see* Measuring).—Oscillations (*see* Oscillations).—Resistance (*see* Resistance).—Resonance of minute metal particles for light waves, 85, 141.

Electrician, 93, 261

Electricians, congress of, 44, 316.

Electrician's Directory and Handbook for 1889, 53, 292.

Electricity, 20, 33, 70; 31, 22.—Action of incandescent substances in the transmission of, 29, 81.—Action on carbida-tion of iron by cementation, 68, 26.—Action on coloured tissues of plants, 24, 84.—Amelioration of wines by, 21, 57, 142.—Analysis of organic bodies by, 61, 38.—And comets, 46, 207.—And heat, 24, 262, 289.—And heat, relation between, 24, 251, 274; 27, 85.—And light, 24, 97.—And magnetism, experimental researches in, 13, 245, 258.—And motions of camphor on water, 36, 191, 215, 285.—And phosphuretted hydrogen, 19, 204.—And radiology, international congress, 100, 244.—Animal, 16, 112.—Apparatus for reproducing at will an invariable quantity of, 53, 179.—Application in metallurgy, 54, 165.—Application to a débroyeur, 26, 119.—Application to explosion of gunpowder, 3, 311.—Application to naval and military purposes, 19, 218, 241.—Applications of, 26, 160.—Applied to explosive purposes, 47, 205.—Applied to registering vibrations, 21, 84.—As a chemical element, 88, 269.—Atmospheric, 5, 175; 42, 95; 51, 214, 219.—Atmospheric, absorption of free nitrogen by proximate principles of vegetables under influence of, 34, 205.—Atmospheric, celestial origin, 24, 21.—Atmospheric, currents produced by, 44, 250.—Atmospheric, in north of Sahara, 42, 210.—Atmospheric, influence on growth, etc., of plants, 40, 190.—Atmospheric, influence on nutrition of plants, 38, 58, 169.—Atmospheric, influence on vegetation, 38, 140.—Atmospheric, laws of variation, 40, 88.—Atmospheric, of Haiti, 21, 71.—Conduction by metallic vapours, 11, 250.—Contact, 80, 241.—Conversion into motion, 26, 36.—Conversion of ordinary phosphorus into the amorphous state by, 30, 253.—Cooking by, 60, 74.—Death by, 17, 195, 216; 50, 187.—Developed by dissolving salts in water, 20, 201.—Development in filtering mercury, 52, 37.—Dilatation due to, 30, 263.—Direct conversion of mechanical work into, 35, 253.—Discharge by heat, 45, 116.—Discharged through rarefied media and the atmosphere, 23, 37.—Discoveries in, 12, 236.—Disengagement by pressure in tourmaline, 43, 82.—Engraving on glass by, 37, 51.—Experiments to show it will not pass through a vacuum, 16, 313.—Figure weaving by, 1, 140.—Flow of, in a plate, 33, 136.—Flow of, in plane bounded surfaces, 33, 92.—For purifying porcelain paste, 44, 368.—Frictional phosphorescence produced by, 24, 288.—Galvanic, liquid conductors of, 22, 35.—Generating, 49, 49.—Generation in the electric chain, 25, 106.—Generator, 25, 240.—Heating by, 74, 258.—Hydro- (*see* Hydro-electricity).—Improving wine by, 20, 284.—In chemical industries, 71, 64.—In chemical manipulations, 61, 4, 24.—In galvanic deposits and chemical decompositions, 35, 188.—In service of life, 42, 73.—In transit, from plenum to vacuum, 63, 55, 68, 77, 89, 98, 112.—Industrial applications, 37, 152.—Influence of cheap, on electrolytic and electro-thermal industries, 99, 45.—Influence of discharge of, on atmospheric air, 77, 102.—Influence on embryo of the fowl, 73, 36.—Influence on evaporation, 37, 142.—Influence on fixation of nitrogen, 60, 161.—International Exhibition of, 73, 268.—Lighting street lamps by, 17, 277.—Loss by air, 29, 175.—Measurement of quantities of, 40, 299.—Measuring tem-

peratures by, 26, 152, 164.—Mechanical theory of, 43, 197.—Molecular theory and doctrine of, 22, 227.—Negative, and the valence of atoms, connection between, 89, 25.—Negative, discharge from hot calcium and from lime, 95, 277.—New source of, 24, 63.—New use for, 43, 60; 69, 156.—Nickelising without, 40, 46.—Objections to theory of, 46, 207.—Obtaining a current of, 6, 214.—Of cats, 61, 59.—Of connecting straps in machinery, 16, 134.—Of metals, effect of X-rays on the contact, 73, 165.—Of mineral springs, 31, 270.—Of steel, 41, 81.—Of storms, origin of, 53, 298.—Of tension, chemical phenomena produced by, 34, 272; 36, 276.—On modern ships, 44, 36.—Passage through gases, 75, 57.—Passage through gaseous mixtures, 100, 9.—Passage through liquids, 94, 91.—Phenomena connected with the discharge of, from pointed conductors, 99, 231.—Photochemical, 63, 49, 105.—Polar, in hemihedral crystals, 42, 209.—Principle of conservation of, 43, 292.—Produced in mechanical actions, 27, 303.—Production by the rays, 40, 142.—Production of sound by, 8, 201.—Propagation in highly rarefied elastic fluids, 14, 139.—Propagation in solution containing several salts, 14, 177.—Pyro- (*see* Pyroelectricity).—Quantity produced by a battery element, 29, 61.—Removal of stoppers by, 71, 305.—Solar, 21, 83.—Source of the force exciting, 41, 230.—Static, 38, 306.—Static, distillation of liquids under, 40, 100, 142.—Static, effect on vibrating plates, 53, 262.—Static, inertia of, 40, 88.—Static, phenomena of, 38, 287; 39, 21.—Thermo- (*see* Thermo-electricity).—Tommasi, 41, 58.—Transmission of motive power by, 39, 55; 48, 169; 52, 250.—Useful application of, 46, 301.—Voltaic, application to detection of aniline, 5, 178.—Voltaic, batteries for producing, 5, 208.—Voltaic, development of, 55, 167.—Voltaic effect on germination, 59, 174.—Voltaic, Fownes on, errors in textbooks, 25, 10.—Voltaic, revolution in, 71, 2, 63, 160.—Will not pass through a vacuum, experiment to show, 16, 313.

Electrics, di- (*see* Dielectrics).

Electrification, 20, 111; 57, 143.—By contact, 88, 221, 243.—Due to contact of gases and liquids, 60, 231, 263.—Of a steam jet, 60, 303.

Electrified ellipsoid (*see* Ellipsoid).

Electrifying atmosphere (*see* Atmosphere).

Electrisation of air (*see* Air).

Electrised bodies, action of X-rays on, 73, 211, 232, 245.—Bodies, discharge by X-rays, 74, 174.—Röntgen rays (*see* Röntgen).—Substances (*see* Substances).—Uranium (*see* Uranium).

Electro, chemical- (*see* Chemical-electro).

Electro-analysis, with stationary electrodes, 99, 292.

Electro-capillary actions, 17, 57, 120, 238; 19, 81; 22, 58; 25, 291.—Currents (*see* Currents).—Phenomena, 13, 30; 36, 89.—Relations, 50, 80.—Thermometer (*see* Thermometer).

Electro-chemical action under pressure, 39, 53.—Affinities, 47, 224.—Amalgamation, extraction of precious metals by, 44, 107.—Analysis (*see* Analysis).—And the thermic coloured rings, comparison between, 50, 163.—Calculations (*see* Calculations).—Colours (*see* Colours).—Decomposition (*see* Decomposition).—Energy (*see* Energy).—Equivalents (*see* Equivalents).—Forces (*see* Forces).—Lines, method for figuration of, 45, 99.—Means of observing alternating currents, 69, 217.—Patents (*see* Patents).—Properties of hydrogen (*see* Hydrogen).—Rings, imita-

- tion of, 49, 178 — Society, 86, 174, 177 — Society, German, 71, 187 — Studies, 2, 73; 52, 112, 53, 57; 59, 74
- Electrochemistry, 20, 213 — In France, 71, 186
- Electro-chemists and Metallurgists, proposed society, 87, 60
- Electro-conductivity of ammonia (*see* Ammonia) — Of aniline (*see* Aniline) — Of boric acid (*see* Acid) — Of distilled water (*see* Water) — Of gases (*see* Gases) — Of ice (*see* Ice) — Of moderate conductors, 32, 168, 169, 204, 239, 259 — Of saline solutions (*see* Saline) — Of vapours (*see* Vapours)
- Electro-crystallisation of metallic copper (*see* Copper)
- Electro-decomposition of alumina (*see* Aluminium)
- Electro-deposited alloys (*see* Alloys) — Antimony (*see* Antimony) — Copper (*see* Copper)
- Electro-deposition, 24, 169, 182 — Of alloys (*see* Alloys) — Of brass (*see* Brass) — Of carbon (*see* Carbon) — Of copper (*see* Copper) — Of iron (*see* Iron) — Of lead (*see* Lead) — Of metals (*see* Metals) — Of platinum (*see* Platinum) — Of silver (*see* Silver)
- Electro-diapason with continuous motion, 27, 204, 295
- Electro-dilatation of coatings of Leyden jars, 40, 10
- Electro-dissolution and its uses, 55, 62; 73, 37
- Electro-dynamic actions, law of, 29, 275 — Actions, theory of, 21, 179; 27, 105 — Effect the induction of static electricity causes in a moving body, 25, 114 — Law, 22, 224, 238 — Paradox, 42, 110 — Phenomena, 39, 83 — Theorem, 43, 46
- Electro-dynamics, experiment in, 27, 295 — Fundamental laws of, 33, 42; 45, 22 — Science of, 23, 129 — Theory of, 35, 162
- Electro-dynamical action, velocity of progress of, 24, 109
- Electro-dynamometer, determining the constant of, 48, 259
- Electro-gilding, use of ferrocyanide in, 37, 52
- Electrode, hydrogen (*see* Hydrogen) — Potential in system of silver-silver acetate, aq., influence of dissolved gases on, 100, 301 — Potential in stationary liquids, measurement of, 90, 231 — Potentials in liquid ammonia, 95, 164 — Rotating, for electrochemical analysis, 93, 283
- Electrodes and cathodic rays in rarefied gases, 75, 191 — Balanced, use of, 92, 33 — Bipolar, use of, 88, 47 — Bipolar, with an insoluble anode, 88, 48 — Bipolar, with soluble anode, 87, 11 — Carbon (*see* Carbon) — Depolarisation by solutions, 38, 33 — For electrolytic analysis, 88, 34 — For electrolytic estimations, 82, 95 — In a solution, concentration at, 82, 218; 83, 11 — Lead, 16, 243 — Metallic, action of cyanide of potassium on, 91, 111 — Metallic sulphides as, 77, 189 — Moist, use of, 49, 149 — New material for, 47, 143 — Of the Holtz machine, movement of plates between, 41, 185 — Platinised, behaviour of, 93, 255 — Platinum, polarisation of, 68, 263 — Polarisation, 16, 155; 45, 233, 243 — Polarisation in water free from air, 33, 52 — Polarised, deformation of, 47, 270 — Positive, of battery, influence on its chemical work, 45, 276 — Rapid electro-analysis with stationary, 99, 202 — Use of, 94, 216 — Working of dropping, 77, 270
- Electrolyser, new, 73, 280
- Electrolysis, 23, 59; 37, 100; 42, 331; 44, 285; 45, 187; 49, 100; 50, 257; 66, 37; 75, 110 — Abnormal, 90, 304 — Absolute measurement of currents by, 44, 105 — Accessory reactions of, 82, 231 — Action on benzol, 42, 95 — Action on terphenyl, 41, 172 — Action on toluene, 43, 247 — Alternating current, 92, 198, 206, 294 — And electro-oxidation, 57, 113 — And electro-synthesis, 50, 104 — And thermo-chemistry, 47, 224 — Application of electron theory to, 95, 28, 57 — Application to manual cure of inorganic products, 70, 229 — Application to qualitative analysis, 68, 188 — Applications to organic chemistry, 76, 95 — Applications to separation of metals from one another, 89, 110, 118, 126 — Applied to analysis of red wine, 50, 143 — By alternating currents, influence of complex ions in, 89, 143 — By alternating currents, influence of frequency on, 90, 23 — By alternating currents of dynamo-machines, 58, 12 — By igneous fusion of aluminium oxide and fluoride, 61, 132 — Chlorine smelting with, 88, 34, 61, 74 — Condensation of gases of, by porous substances, 70, 269 — Decomposition of ammonia by, 54, 106 — Decomposition of salt by, 68, 258 — Disinfection of alcohols of bad flavour by means of, 48, 182, 203 — Experimental contributions to theory of, 33, 213 — Experiments in, 16, 257; 47, 117; 57, 91, 229 — Formation of alums by, 78, 236 — Formation of ozone, oxygenated water, and persulphuric acid during, 37, 82 — Formation of perchlorates of alkalis and of alkaline earths by, 79, 97 — General arrangements for, 72, 246 — Helmholtz's views on, 52, 193 — In bleaching textiles, 84, 156 — In metallurgy, 53, 240 — In organic chemistry, 76, 313 — Initial phase of, 59, 179 — Limits of, 44, 273; 48, 40 — Motion of the ions in a liquid undergoing, 50, 245 — New phenomena of, 49, 215 — Of acetate of potassa (*see* Potassium) — Of alkaline sulphides (*see* Sulphides) — Of alkaline bicarbonates (*see* Alkaline) — Of alkaline carbonates (*see* Alkaline) — Of alkaline chlorides (*see* Alkaline) — Of alkaline fluorides (*see* Alkaline) — Of alkaline salts (*see* Alkaline) — Of alkaline solutions (*see* Alkaline) — Of alkalis (*see* Alkaloids) — Of alloys (*see* Alloys) — Of aluminium fluoride (*see* Aluminium) — Of ammoniacal solution with coke electrodes, 54, 66 — Of aniline derivatives (*see* Aniline) — Of anthraquinone derivatives (*see* Anthraquinone) — Of aqueous solutions of sulphuric acid (*see* Acid) — Of barium chloride (*see* Barium) — Of bismuth (*see* Bismuth) — Of bromides (*see* Bromides) — Of carboxylic acids (*see* Acids) — Of chemical combinations, 23, 22 — Of chemical compounds, 21, 227; 53, 110 — Of coke (*see* Coke) — Of compounds of higher order, 2, 23 — Of copper sulphate (*see* Copper) — Of cyanides (*see* Cyanides) — Of different substances, 62, 42 — Of dilute solutions of acids and alkalis at low potentials, 94, 36 — Of distilled water (*see* Water) — Of fatty acids (*see* Acids) — Of fused salts (*see* Salts) — Of fused zinc chloride (*see* Zinc) — Of hydrides (*see* Hydrides) — Of hydroxylamine (*see* Hydroxylamine) — Of itaconic acid (*see* Acid) — Of malonic acid (*see* Acid) — Of metallic chlorides (*see* Chlorides) — Of metallic formates (*see* Formates) — Of metallic phosphates (*see* Phosphates) — Of metallic sulphocyanides (*see* Sulphocyanides) — Of mixture of alcohol and nitric acid (*see* Alcohol) — Of molybdenum solutions (*see* Molybdenum) — Of naphthylamine derivatives (*see* Naphthylamine) — Of organic alkalis (*see* Alkalis) — Of organic salts (*see* Salts) — Of oxy-acids (*see* Oxy-acids) — Of oxygenated water (*see* Water) — Of phenol derivatives (*see* Phenol) — Of potassium acetate solutions (*see* Potassium) — Of potassium allo-ethylic camphorate (*see* Potassium) — Of potassium ethyl dipropyl malonate (*see* Potassium) — Of potassium trinitride solution (*see* Potassium) — Of salt solutions (*see* Salt) — Of salts, 52, 237; 53, 118 — Of the salts of boron and silicon (*see* Boron) — Of salts of monohydroxy acids (*see* Acids) — Of sodio ethylic camphorate (*see* Camphorate) — Of solid bodies, 76, 24 — Of solutions of chloride of zinc (*see* Zinc) — Of solutions of rare earths (*see* Earths) — Of solutions of thiocyanates (*see* Thiocyanates) — Of sulphuric acid (*see* Acid) — Of sulphurous acid (*see* Acid) — Of tartaric acid (*see* Acid) — Of water (*see* Water) — Oxidation of sodium sulphide and hydrosulphide by, 74, 70, 80 — Oxidation products of charcoal obtained by, 45, 263 — Qualitative detection of manganese in commercial zinc, zinc ash, and calamine, and detection of bismuth in commercial lead by means of, 48, 193 — Quantitative analysis by, 53, 209; 72, 200 — Relation of transfer resistance to, 53, 266 — Secondary, 53, 262 — Sodium in aluminium prepared by, 73, 64 — Theory of, 88, 34, 78, 86; 97, 140, 151, 156 — Thermal, 43, 175 — Thermal researches on, 24, 240, 252, 288, 299 — Thin-film, 89, 165 — Transmission across glass, 2, 68 — Treatment of ores by, 49, 60 — Use in dyeing and printing, 46, 89 — Use of alternating currents for, 89, 130 — Use of zinc-coke elements in, 46, 10, 34 — With the liberation of hydrogen at both poles, 38, 9
- Electrolyte, binary, Hall effect in, 78, 10 — Ice as an, 53, 229
- Electrolytes, amphoteric, influence on amolytic action, 92, 300 — Application of hydrate theory of solutions to, 91, 254 — Conductivity in organic solutions, 78, 95 — Conductivity in pyridine and other solvents, 96, 75 — Determinations of dielectric constants of, 77, 13, 25, 37 — Dissociation, 77, 243 — Dissociation in solution, 66, 104, 114, 141, 152 — Dissociation theory of, 59, 61 — Experiments on mixing, 65, 145 — Galvanic caloric action at the limit of the surface of, 23, 35 — Having a common ion, conductivity of mixtures of, 74, 21, 35, 44 — Hydrates in concentrated aqueous solutions of, 89, 157 — Influence of chemical energy of, 58, 3, 15 — Loss of voltaic energy of, 59, 183 — Molecular heat of good and bad, 92, 35 — Passage of electric currents in mixed solutions of, 77, 190 — Strong, 94, 313 — Thermo-chemistry of, in relation to hydrate theory of ionisation, 96, 32
- Electrolytic action, curious instance of, 8, 18 — Action with evolution of hydrogen at both poles, 35, 39 — Alkali (*see* Alkali) — Analysis (*see* Analysis) — And electrothermal industries, influence of cheap electricity on, 99, 45 — Aniline-black (*see* Aniline-black) — Apparatus (*see* Apparatus) — Calcium (*see* Calcium) — Chlorate (*see* Chlorate) — Chlorination (*see* Chlorination) — Chlorine (*see* Chlorine) — Conduction (*see* Conduction) — Conductivity (*see* Conductivity) — Copper (*see* Copper) — Decomposition (*see* Decomposition) — Deposition of copper (*see* Copper) — Determinations, 48, 119; 50, 211; 78, 58; 81, 220, 231, 244, 271 — Disinfection (*see* Disinfection) — Dissociation (*see* Dissociation) — Dosometer (*see* Dosometer) — Estimations, electrodes for, 82, 95 — Experiments, 21, 238; 40, 226 — Hydrogen (*see* Hydrogen) — Meters (*see* Meters) — Method applied to mercury, 62, 244 — Method of liquefy-

- ing gases, 58, 127—Method of preparing metallic alloys, 56, 153—Oxidation (*see* Oxidation) — Oxygen (*see* Oxygen) — Potentials (*see* Potentials) — Process, hermite, 94, 253 — Reduction, (*see* Reduction) — Results, 43, 61—Separation of copper (*see* Copper) — Separations, 48, 149; 60, 102, 262; 64, 81, 228; 68, 80; 81, 220, 231, 244, 271—Synthesis of di-basic organic acids, 66, 91—Theories, 53, 288 — Zinc-plating (*see* Zinc-plating)
- Electro-machine, diametral conductors of, 22, 95
- Electro-magnet, 16, 158; 41, 150—Action on spectra of rarefied gases traversed by electric discharges, 30, 284—Formula of, 54, 20—Induction, 91, 241—Law of, 52, 259—New system of, 33, 221—Solenoid, 76, 30—With several poles, calorific effects of magnetism in, 29, 217
- Electro-magnets, 30, 263; 38, 34—And transformers, constructing the curves of current in, 69, 238—Design and winding alternate current, 69, 227—For lifting weights, 22, 144—Maximum of force of, 20, 201—Note on best dimensions to give to, 28, 306—Suppressing sparking in, 59, 299—With uncovered wire, new system of, 11, 32
- Electro-magnetic actions, conditions of equilibrium of a liquid plate submitted to, 50, 248—Apparatus (*see* Apparatus) — Behaviour of discontinuous masses of iron, 22, 144—Capacity, determining, 58, 291—Capacity of a condenser, determining, 70, 268—Deposition of nickel, 26, 209—Effect, 72, 20—Effects produced by uncovered wire, considered in relation to the battery, 11, 44—Engine (*see* Engine) — Fields, influence on spark spectra of ruthenium, rhodium, and palladium, 92, 257—Gyroscopic (*see* Gyroscopic) — Induction (*see* Induction) — Machines (*see* Machines) — Nuclei, ratio between diameter and length, 36, 195—Organs, telephone without, 38, 45—Oscillations (*see* Oscillations) — Radiation (*see* Radiation) — Regulator, siren with, 39, 250—Seismograph (*see* Seismograph) — Sparks, prismatic decomposition, 3, 198—System, induced currents resulting from the movements of a coil across an, 39, 123—Theories, 23, 202—Units dimension of, 59, 118—Vibrations, (*see* Vibrations) — Wave (*see* Wave)
- Electro-magnetism, 22, 190—Discovery of, 48, 35—Rational units of, 85, 272
- Electro-metallurgical alloys (*see* Alloys) — Process, 46, 93
- Electro-metallurgy, contributions towards a history of, 7, 105—Of aluminium (*see* Aluminium) — Of cobalt (*see* Cobalt)
- Electrometer, 92, 264—Absolute spherical, 53, 79—Dolezalek, 92, 264—Gold leaf, remarkable observation with, 25, 70—Portable capillary, 86, 314—Quadrant, 39, 113—Quadrant, Sir W. Thomson's, 51, 139 — Quadrant, theory of, 87, 68—Universal portable, 95, 232
- Electrometers, pocket, 64, 22
- Electrometric determination of the final point in volumetry, 73, 270
- Electro-motive force (*see* Force) — Forces (*see* Forces) — Order of certain metals in cyanide of potassium, 35, 224—Power of metallic sulphides, 23, 255
- Electromotor clock, 33, 246—Force (*see* Force)
- Electro-motors, governing, 57, 228—Jacobi's theory of, 23, 88—Organic elements regarded as, 32, 313—Vegetable, 19, 193
- Electro-negative bodies, substitution for metals in salts, 3, 225—Elements (*see* Elements) — Molecules (*see* Molecules) — Radicles (*see* Radicles)
- Electro-optical effects, attempt to detect, 99, 164
- Electro-syntheses, 97, 48
- Electrophor, action of, 22, 288
- Electrophoric machine, 22, 35
- Electrophorus, charge assumed by disc of, 34, 8—Continuous, or electric generator, 14, 237
- Electro-plating, 11, 60—Of paper (*see* Paper) — Or depositing metals, 7, 69—Solution, 3, 356—Solutions, assay of, 76, 199—With iron, 21, 84
- Electro-pseudolysis, 51, 227
- Electro-sanitation, 70, 148
- Electroscope, Gemsbart, 8, 215—Phenomenon, 26, 49—Portable, 89, 128—With three gold leaves, 74, 84
- Electroscopic experiments, cause of error in, 21, 206
- Electro-silicic light, 35, 231
- Electrostatic deflection of the kathode rays, 73, 257—Field produced by varying magnetic induction, 59, 250—Voltmeter (*see* Voltmeter) — Voltmeters (*see* Voltmeters) — Wattmeters, 63, 140
- Electrostatics, certain consequences of the principle of Gauss in, 45, 66—First laws of, 48, 277
- Electro-telegraphic relays based upon a new electro-magnetic principle, 25, 23
- Electrothermal and electrolytic industries, influence of cheap electricity on, 99, 45
- Electro-thermic methods of analysis and synthesis, 23, 94
- Electrothermics of iron (*see* Iron)
- Electro-thermochemical experiments, 24, 103
- Electro-tonic state, 23, 59
- Electrotropism and kindred phenomena, 69, 127
- Electrotype plates, coating with iron, 1, 120
- Electrotypes, iron, 28, 118
- Electrotyping copper, (*see* Copper) — Iron (*see* Iron) — Preparation of non-conducting surfaces for, 2, 323
- Electro-zincing, 2, 275
- Electron theory and radio-activity, 85, 109—Theory, application to electrolysis, 95, 28, 57
- Electrons and chemical affinity, 100, 288—Ejected by α -particle, direction of motion, 100, 325—Phenomena in spark spectrum of yttrium attributable to, 97, 250
- Element associated with thorium, 84, 179, 187, 219—Causes why it often passes from one grade of combination to another without giving rise to intermediate compounds, 92, 185—Change, new method of, 77, 274—Chemical, electricity as, 88, 269 — Definition, 80, 206, 213—Galvanic, constant, with one liquid, 22, 94, 168—Galvanic, newly contrived, 26, 35—Galvanic, theory of, 43, 247—Galvanic, with three fluids, 21, 93—Gaseous, in atmosphere, 70, 87, 109, 120—Gaseous, supposed new, 61, 217—Influence of chemical form under which it is presented to the organism on rapidity of its passage into blood, 89, 24—Leclanché's, improved arrangement of, and a new self-acting commutator, 20, 83—Metallic, 2, 143—New, 55, 202—New, from red French bauxite, 71, 128—New, in rare earths contiguous to samarium, 73, 170—New, lutecium, 96, 271—New metallic, 2, 143—New, of alkali group, 3, 132, 357—New, of calcium group, 3, 116, 120—New, probably of sulphur group, 3, 193—New, spectro analytical demonstration, 61, 39—Radio-active, which emits thorium emanation, 91, 193; 92, 251 — Spectrum of, effect of pressure upon the series in, 76, 21—Voltaic, of aluminium, 43, 131 — Voltaic, single, 40, 22 — Voltaic,
- sulphate of copper, 26, 50—Voltaic, wherein hydrogenium is the active metal, 22, 58—Voltaic, with a constant current, 39, 73—Zn, 91, 22
- Elements, 22, 59—Amorphous, and liquid air, 93, 270—Anatomic, action of oxygen on, 37, 123—And compounds, 89, 220—And compounds, and mixtures, 24, 204, 227, 230—And compounds, atomicity of, 48, 291—And compounds, relations between the atomic weights, etc., of, 39, 281—And meta-elements, 57, 206, 216, 226—And their oxides, densities of, 24, 21—And sulphuric acid, reactions between, 79, 261—Are not they molecules? 27, 183—Argon and helium in the system of, 73, 235—Association of, 88, 280—Atom forms as deduced from the crystalline modifications of, 77, 251—Atomic motion, hypothesis on, 74, 53—Atomic volumes, 20, 82—Atomic volumes, relations between, 42, 171—Atomic weights, 82, 58; 94, 245; 96, 176, 197—Atomic weights and physical properties, relations between, 80, 282, 314; 81, 12, 34, 59—Atomic weights and properties, reciprocal relations between, 41, 283—Atomic weights and spectra, relationship between, 86, 231—Atomic weights, numerical relations in, 73, 203—Atomic weights, relations among, 32, 21; 37, 161, 255; 39, 281; 43, 242; 94, 245; 97, 46—Atomicity of, 9, 157, 200, 277, 283; 48, 291; 57, 194—Boiling-point and genesis of, 72, 299—Calculation of heat of volatilisation and heat and fusion of, 84, linear-spectra of, 61, 145—Chemical, and periodic law, 53, 157, 169, 183, 197—Chemical, atomic weight, 25, 63—Chemical, classification, 71, 271; 93, 214—Chemical, composition of the linear-spectra of, 61, 145—Chemical, compound nature of, 38, 235—Chemical conditions of, 92, 224—Chemical, effect of blows on, 93, 200—Chemical, evolution as applied to, 28, 288; 29, 43, 81—Chemical, experiments on, in relation to heat, 78, 16—Chemical, indexing literature of, 49, 187—Chemical mass of, relations between, 42, 47, 60—Chemical, natural system of arranging, 28, 20; 95, 5—Chemical, nature of, 29, 61, 171—Chemical, nature of, and periodic law, 53, 157, 169, 183, 197—Chemical, of plants, essential, 52, 287—Chemical, periodic law of, 40, 231, 243, 255, 267, 279, 291, 303; 41, 2, 27, 39, 48, 49, 61, 71, 83, 93, 106, 113, 125—Chemical, periodicity, weight and valency, 97, 122—Chemical, refractive indices of, 62, 259—Chemical, relations between atomic weights, atomic volumes and properties of, 2, 61, 74—Chemical, relative abundance of, 61, 31—Chemical, systematic arrangement of, 72, 89—Chemical, tables of, 13, 142—Chemically inactive, 77, 87—Classification, 86, 86, 103; 94, 197—Classification, in relation to their atomicities, 10, 50—Classification, periodic, 74, 31—Classification, place of helium in, 73, 23, 35, 283—Combination value of, 24, 72—Component, relation between the weights, volumes, and specific gravities of, and those of the compound in chemical combinations, 30, 199—Compound nature of, 40, 101; 58, 220—Corpuscular, chemical equivalents compared with, 36, 99—Cyclical law of, 77, 157—Defunct, rise and fall of, 22, 208—Densities and oxides of, 24, 21—Derivation of names of, 4, 253—Dissemination, 75, 129—Dissociation, 39, 65—Divergence of atomic weights of lighter, from whole numbers, 99, 91—Electro-negative, influence on spectra of metals, 12, 243, 255—Evolution of, 94, 85, 107—Forming

chemical compounds, invariableness between the ratios of, 15, 307—Foundations of a new system of, 70, 314—Galvanic, 44, 306—Galvanic theory of, 41, 227—Gaseous, specific heat at very high temperatures, 49, 224—Genesis of, 55, 83, 95; 72, 230, 237, 299—Genesis of, melting-point a clue to, 71, 285—Genesis of, solubility a clue to, 71, 187—Genesis of, thallium in relation to, 73, 304—Halogen (see Halogen)—Heat of volatilisation of, 79, 215—In siderurgical products, double carbides of iron, and other metals, 79, 106—In sun, 28, 175—Inactive, conjectural group of, 77, 120—Inorganic, atomicity of, 57, 194—Iron group (see Iron)—Isomerism of, 22, 47—Line spectra of, 69, 100—Magnetic, found in rocks and minerals, 66, 308—Mathematically harmonising, 99, 148, 167, 241; 100, 120—Melting-points of, 2, 88—Metallic, relation subsisting between atomic weights, specific gravities and hardness of, 27, 215; 28, 142—Method of harmonising, 99, 298—Monad, 21, 93—Nature of, 28, 204; 38, 291; 39, 1, 11—New, 19, 118; 40, 133; 54, 167; 65, 247; 69, 256; 70, 87—New grouping, 72, 126—Non-metallic, in connection with valency and specific gravity, 97, 265—Of alchemists and alchemy, 94, 4—Of carbon group (see Carbon)—Of different luminous sources, measuring relative intensity of, 29, 82—Of low atomic weight, permeability to Röntgen rays, 76, 161—Of nitrogen group (see Nitrogen)—Of sulphur-selenium-tellurium group (see Sulphur-selenium-tellurium)—Of ytterbium group (see Ytterbium)—Organic, 68, 285—Organic, artificial production of forms of, 45, 57—Organic, distribution of, 71, 5, 18—Organic, regarded as electro-motors, 32, 313—Oxides of, 68, 303—Periodic law showing existence of a simple relation among the, 33, 16—Periodic relations of, 65, 3, 19—Periodic, tabulation, 63, 251—Periodical arrangement of, 67, 178—Phosphorescence spectra indicating existence of new, 92, 273—Position of helium, argon, and krypton in scheme of, 78, 25—Position of osmium in list of, 1, 2—Potential energy of, 97, 302; 98, 11, 23, 46, 59, 120, 174; 99, 34, 59, 165, 258—Producing phosphorescence in minerals, 94, 290—Properties of, changes induced in, by viewing them under other external conditions than those common in the laboratory, 90, 189—Properties of, representing graphically by means of characteristic surfaces, 90, 175—Radio-active, and inactive gases, relations between, 100, 37—Radio-active, and Prout's hypothesis, 83, 141, 262—Radio-active, considered as examples of elements undergoing decomposition at ordinary temperatures, 85, 205—Rare, atomic weight, 74, 318—Rare, in common substances, 3, 226—Rare, list of, 91, 280—Rare, minerals containing, 81, 217—Reactions of, 78, 2—Refractive indices of, 90, 272—Relation between chemical grouping and the quantities in which they exist on the earth's surface, 26, 79—Relation between melting-points and coefficients of expansion of, 38, 261—Solid, specific heats and expansion of, 45, 66—Specific refractive energies of, and their compounds, 11, 249—Specific volume and genesis of, 72, 230, 237—Spectra of, and squares of their atomic weights, relationship between, 86, 231—Symbols and equivalents of, 20, 10—System of qualitative analysis for, 95, 89, 99,

113, 126, 148, 157, 170, 184, 201, 211, 220, 243, 257, 269, 279, 294, 304; 38, 6, 16, 32, 41, 55, 71, 81, 92, 107, 160, 171, 181, 194, 208, 219, 228, 240, 251, 294; 273, 291, 300, 311—Table of, 67, 157—Telluric distribution in relation to their atomic weights, 86, 187—Tetravalent, complex compounds of pentavalent vanadium with, 95, 299—Thermal constants of, 76, 234—Trivalent, 21, 80—True relation between weights, volumes, and specific gravities of components, 30, 199—Twin, 74, 211, 224—Ultra-violet emission spectra of certain, 43, 289—Ultra-violet spark-spectra of, 86, 247—Verified and unverified, 89, 109, 121, 135, 150, 162, 170, 186, 194, 210—Volatilisation of, calculation of heat of, 84, 208—Why are some so much more abundant than others? 89, 47, 58, 118—Elephant's milk, analysis, 44, 56—Eliasberg, S., Electrolytic separation of zinc and cadmium, 53, 9—Eliasite, gases from the mineral, 72, 283—Elion, H., Determination of salicylic acid in beer and similar liquids, 65, 192—Eliosoff, M., Determination of iron in grain and other food plants, 39, 136—Eliot, C. W., and F. H. Storer, Amount of lead in silver coins, 3, 318, 343—Chromate of chromium and analogous chromates, and constitution of black oxide of manganese, 6, 121, 136, 145, 157, 169, 182, 184, 207, 217—Difficulty of removing last traces of carbonic acid from large quantities of air, 3, 178—“Manual of Inorganic Chemistry” (review), 17, 81—Eliot, C. W., F. H. Storer, and W. R. Nichols, “Compendious Manual of Qualitative Chemical Analysis” (review), 28, 94—Elixirs, rapid detection of aloe in, 42, 306—Elkington, J., Copper extraction, 21, 264—Ellagic acid (see Acid)—Ellenberger, M., and M. Hofmeister (see Hofmeister, M.)—Eller, M., Naphthol and carbonaphtholic acid, 21, 58—Ellerhausen process for refining iron, 19, 230—Process for treatment of mixed ores of zinc and lead, 83, 98—Ellinger, A., Formation of putrescine from ornithine, 80, 196—Ellinger, H. O. G., Concentration of solutions, 64, 262—Determination of albumen in urine, 64, 262—Elliott, C., Revised nomenclature, 86, 210—Elliott and Sons, Vacuum machinery, 89, 288—Elliott Brothers, Electrical measuring instruments, 92, 264—Elliott, A. G., and H. de Graffigny (see de Graffigny, H.)—Elliott, A. H., American Chemical Society, 42, 21—Anthracene from water-gas tar, 51, 44—Apparatus for rapid gas analysis, 48, 180—Determination of carbon in cast-iron, 19, 152—Determination of sulphur in cast-iron, 23, 61, 143—Estimation of sulphur in cast iron, 25, 11, 35—Process to determine carbon in bone-coal, graphite, anthracite, etc., 25, 271—Rapid analysis of mixtures of gases, 44, 289—“System of Instruction in Chemical Analysis” (review), 67, 11—Elliott, Walter J., Action of chloroform and alkaline hydroxides on nitrobenzoic acids, 77, 58—Action of chloroform and potash on metanido-benzoic acid, 74, 254—Action of chloroform and potassium hydroxide on orthoamidobenzoic acid, 81, 11—Ellipsoid, electrified, steady motion of, 76, 9—Ellipsoidal lenses (see Lenses)

Elliptic polarisation (see Polarisation)—Rays (see Rays)—Ellis, Charles N., Death by electricity, 17, 216—Ellis, Charles Sordes, Teaching of chemistry, 75, 116—Works laboratory burette rack, 81, 29—Ellis, Evan T., Cryolite and its products, 17, 173—Ellis, George E. R., Use of soap solution, 54, 99—Ellis, G. W., and J. A. Gardner, Origin and density of cholesterol in the animal organisms, 100, 263—Ellis, Henry, Improvements in production of compounds of silica and silicated inks and dyes, 14, 69—Metallic vegetation and veins, 11, 119—Properties of silicates, 10, 24—Silicates of thallium and alkalies, 9, 306—Ellis, H. Russell, Formation of graphite by the interaction of magnesium powder and carbonates, 98, 309; 99, 22—Improved Liebig's condenser, 95, 52—Lecture experiments showing formation of nitrides of barium, strontium, calcium, and aluminium, 99, 4—Preparation of titanium tetrachloride from rutile, 95, 122—Reaction between titanium tetrachloride and ether, 95, 241—Silver cyanide, 100, 154—Ellis, H. R., and W. H. Collier, Interaction in solution of ferrous sulphate and copper sulphate, 96, 921—Oxidation of ferrous hydrate in the presence of ammonia, 97, 121—Ellis, H. R., and F. E. Weston (see Weston, F. E.)—Ellis, W. Hodgson, Analysis of pre-carboniferous coals, 76, 186—Ellissen, A., Estimation of sulphur in coal gas, 17, 259—Ellms, J. W., and J. C. Beneker (see Beneker, J. C.)—Ellstone, W., Separation of arsenic and copper, 34, 174—Elsasser, E., Electrolysis with the liberation of hydrogen at both poles, 38, 9—Electrolytic action with evolution of hydrogen at both poles, 35, 39—Galvanic conductivity of metallic alloys, 41, 184—Specific volumes of esters of fatty series, 48, 34—Elsasz during tertiary period, 21, 131—Hops grown in, analysis, 22, 47—Elsner, L., Behaviour of minerals at a high temperature, 15, 134—Detection of ergot in rye flour, 2, 95—Explosion in making phosphoric acid, 4, 83—Green colours, 4, 12—Platinum coating for porcelain crucibles, 4, 13—Preparation of a green colour without arsenic, 9, 182—Volatilisation of iron, 27, 131—Elster, J., and H. Geitel (see Geitel, H.)—Elster, M., Electro-motive force in free jets of water, 40, 214—Elster, S., Photometrical researches on a uniform unit of the measurement of light, 23, 107—Elstrand, A. G., Reten and certain of its derivatives, 35, 96—Elstrand, Belleville, Dirks, Kildal, and Moser, Messrs. (see Dirks, M.)—Eltekoef, A., Structure of the amylen boiling at 25°, 36, 20—Transformation of isocrotic ethers, 35, 241—Eltoft, T., “Combined Note-book and Lecture Notes for Chemical Students” (review), 34, 259—“Systematic Course of Qualitative Analysis” (review), 40, 132—Eltzbacher, F., and R. Anschütz (see Anschütz, R.)—Elworthy, H. S., Modification of Traube's capillarity meter, 56, 236—Ely, J. S., and R. H. Chittenden (see Chittenden, R. H.)—Elytra of *Curculio cupreus*, brown pigment in, 71, 270—Emanation, radio-active, in atmospheric air, 88, 28, 52—Radio-active, produced by thorium compounds, 85, 55

- Substance, **89**, 267—Substance from pitchblende, **87**, 97
- Emanations from gold and platinum, intensification of chemical action by, **88**, 178—Of radium (*see* Radium)
- Emanium, **89**, 267; **90**, 258; **91**, 145; **96**, 73—And actinium, **92**, 92—And actinium emanations, action on sensitive screens, **91**, 241—And actinium emanations, decay constant of, **92**, 49—Giesel's, determination of wavelengths in spectrum of, **92**, 109

Ethylenbenzene oxide, metho- (*see* Methoethylenbenzene)

β -NH-Ethylenyldiaminonaphthalene, **91**, 80

Ethylenyldiphenyldiamin, **30**, 65

Ether, **61**, 205; **74**, 25 — Absence of effects of motion through, in relation to constitution of matter, **89**, 284 — Absolute, **51**, 66, 76, 94, 105 — Acetacetic, action of ammonia upon, **38**, 210 — Acetacetic, addition of bromine to, **48**, 204 — Acetacetic, and condensation of thiourea, **54**, 273 — Acetacetic, condensation with aldehyds, **47**, 294 — Acetylacetic contribution to our knowledge of, **50**, 233 — Acetic, action of sodium on, **21**, 113 — Acetic, action of sulphuric hydrate of potassium on, **10**, 283 — Acetic, action of sulphur chloride on, **38**, 9 — Acetic, and calcium chloride, combinations, **51**, 61 — Acetic, and magnesium chloride, compound, **53**, 118 — Acetic, chloro-derivatives of, **57**, 161 — Acetic, continuous method of preparing, **42**, 72 — Acetic, in urine, **44**, 48 — Acetic, of diacetylcarbinol, **62**, 190 — Acetic, purification, **4**, 70 — Acetic, successive action of sodium and iodide of ethyl on, **21**, 7; **25**, 208, 219, 225, 235 — Acetol (*see* Acetol) — Acetylacetic, **51**, 275 — Acetylacetic, acetylation of, **83**, 228 — Acetylacetic, derivatives, **35**, 243 — Acetylacetic, nitration product of, **84**, 60 — Acetylacetic, synthesising higher homologues of, **82**, 59 — Acetylcyanacetic, preparation, **56**, 67 — Acrylic acid, **26**, 35 — Action of aluminium on, **33**, 256 — Action of bromine on, **20**, 322; **98**, 280 — Action of iodine on, **33**, 256 — Action of light on, **62**, 256; **74**, 252 — Action of tannin on, **1**, 179 — Action on binoxide of copper, **30**, 144 — Action on iodides, **27**, 22 — Adulteration with petroleum ether, **53**, 69 — Allyl (*see* Allyl) — Amyl (*see* Amyl) — And air, explosive mixtures of, **95**, 285 — And alcohol, solubility of organic acids in, **37**, 249 — And alcohol, washing wool with, **39**, 163 — And benzoin, synthesis of ethylbenzoin by means of, **41**, 160 — And ethylic alcohol, osmotic phenomena produced between, **72**, 97 — And hydroferrocyanic acid, heat of formation of compounds of, **88**, 70 — And matter, connection between, **65**, 296 — And phosphoric acid in presence of water, **74**, 121 — And titanium tetrachloride, reaction between, **95**, 241 — And water, mixtures of, **67**, 121 — Anhydrous, action on titanium tetrachloride, **31**, 65 — As an intoxicant, **21**, 92 — Behaviour in contact with other substances, **27**, 43 — Benzoic acid, action of sodium alcoholate on, **25**, 106 — Benzoic, nitration, **81**, 287 — Benzyl (*see* Benzyl) — Benzylie, nitroderivatives of, **16**, 208 — Bichlor- (*see* Bichlorether) — Boric, decomposition, **36**, 247 — Bromacetic, action on nitrite of silver, **87**, 92 — Bromurated, **26**, 287 — Capsules, **50**, 174 — Carbanilidic acid, **22**, 130 — Carbocyanic, **28**, 21 — Carbonic, **22**, 192, 204 — Carbonic acid, and glycolic acid, **22**, 82 — Carbonic, formation, **20**, 258 — Carbonic, of borneol, **45**, 66 — Cetiopic, action of hydrocyanic acid on, **82**, 183 — Cetiopic, condensation with orthodiamine, **85**, 155 — Chemical equivalent of, **26**, 284 — Chloroacetylacetic, **89**, 143 — Chloro-carbonic, action on nitrogenous organic compounds, **50**, 296 — Chloro-fumaric, synthesis effected with, **78**, 83 — α -Chloropropionic, glycidic condensation of aldehydes with, **93**, 93 — Chlorosulphuric, **18**, 187 — Chloro-oxy-carbonic, action on potassium cyanate, **52**, 34 — Chrysammic, **13**, 251 — Cinnamic, action of sodium on, **43**, 245 — Complexes of magnesium organic compounds, **93**, 142 — Compound, process for analysing, **26**, 168,

178 — Condensation products, **48**, 270 — Cyanacetic, **56**, 12, 269 — Cyanacetic, oxymethylene derivatives of, **79**, 311 — Cyanacetic, synthesis by means of, **58**, 48; **62**, 49; **70**, 62; **72**, 192 — Cyancarbonic acid, **26**, 241 — Cyancarbonic acid, derivatives, **27**, 307 — Cyancinnamic, **66**, 329 — Cyanic, of borneol, **44**, 71 — Cyanic, reclamation of priority of discovery, **21**, 274 — Cyanoxy-carbonic, derivatives **28**, 315 — Cyanuric, reclamation of priority of discovery, **21**, 274 — Cyanuric acid, bodies isomeric with, **21**, 227, 237, 288 — Density of, **30**, 168; **96**, 95 — Derivatives of polyatomic alcohols and acids, **22**, 59, 154; **23**, 142 — Detection of water and of alcohol in, **26**, 241 — Determining properties of, **30**, 155 — Diallyl-aceto-acetic, and derivatives, **36**, 254 — Dicarbonicdihydrophenylnaphthoquinoleine, and its derivatives, **94**, 206 — Dichlorpropionic, prepared from glyceric acid, **29**, 73 — Diethyglyoxylic, **21**, 202 — Dimethylacetylacetic, action of sodium on, **79**, 203 — *aa*-Dimethyl- γ -cyanotricarballylic, synthesis, **82**, 57 — Dioxalucenic, products of saponification of, **99**, 108 — Diphenylcarbonic, action of salts and caustic alkalis on, **90**, 83 — Diphenylcarbonic, transformation into orthophenoxybenzoic acid, and into orthophenoxybenzoate of phenyl, **91**, 22 — Estimating aldehyd in, **76**, 7 — Ethyl (*see* Ethylether) — Ethyl-hexyl (*see* Ethylhexyl) — Ethylsulphon acid, specific gravity and expansion of, **22**, 312 — Examination, **68**, 186 — Explosive compound in, **63**, 120 — Filtering syphon for separation of, **45**, 69 — Formation by fermentation, **4**, 111 — Formation of alcohol from, **19**, 10 — Formation of an explosive from, **63**, 101 — Formation, theory of, **13**, 83 — Formic, action of sodium on, **18**, 143 — Freezing-point of, **35**, 217 — Fumaric, **41**, 172 — Function of diphenol, **96**, 12 — Gallic acid, **26**, 12 — Generation of longitudinal waves in, **73**, 112 — Glue (*see* Glue) — Glyceric, constitution, **44**, 192 — Glycolic, **44**, 143 — Haloid, **23**, 22 — Hexanediol-1,6-diethylic, asymmetric derivatives of, **93**, 68 — Homoallantoic, **89**, 130 — Hydriodic, preparation with amorphous, instead of normal phosphorus, **3**, 344 — Hydrobromic, preparation with amorphous, instead of normal phosphorus, **3**, 344 — Hydrochloric, of glycol, **44**, 159 — Hydrochloric, preparation, **43**, 61 — Imponderable, hypothesis of, **30**, 251 — In vinegars, proportion of, **9**, 45 — In water, detection, **43**, 197 — Isobutyl-acetyl acetic, **37**, 237 — Isobutylic, derivatives, **37**, 237 — Isodicyanic, compounds, **23**, 226 — Isothermals of, **69**, 298; **76**, 251 — Luminiferous, **27**, 20 — Luminiferous, as an element, **91**, 16 — Luting and washers for, **35**, 72 — Maleic, **41**, 172 — Malonic, of anthranilic acid, formation of indigo from, **84**, 243 — Methyl- (*see* Methyl-ether) — Methylformic, **40**, 56 — Methylie, action of light on, **74**, 252 — Methylie, and ethylic alcohol, separation, **74**, 110 — Methylie, of acetol, **89**, 251 — Methylie, preparation, **30**, 84 — Methylie, pure, for narcotising, **74**, 81 — Mineral, **13**, 276 — Mixed, **71**, 88 — Mixtures with water and alcohol, **1**, 143 — Monochloracetic, action of cyanate of potash on, **11**, 177 — Monochloracetic, action of ferrocyanide of potassium on, **17**, 304 — Monochloric, reactions of, **11**, 160 — Monochloro-methyl- (*see* Monochloromethylether) — Nitric, preparation, **7**, 179; **21**, 178; **88**, 46 — Nitrohydroquinonedi-methyl- (*see* Nitrohydroquinonedi-methylether) — Nitrous acid, action on benzamide, **25**, 34 — Nitrous, and bicarbonate of potassa, **21**, 144 —

Nitrous, preparation, 88, 46—Nitrous, production by sulphuric acid, 31, 75
 —Nitrous, spirit of, preparation, 15, 70—Of sulphuric acid, synthesis, 18, 77—Of Bakal petroleum, dispropyl in, 79, 257—Of benzidine *(see* Benzidine)—Of boronol *(see* Boronol)—Of chlorine *(see* Chlorine)—Of glycol *(see* Glycol)—Of isopropyl *(see* Isopropyl)—Of petroleum *(see* Petroleum)—Of phenanthrenequinone *(see* Phenanthrenequinone)—Of phenyl *(see* Phenyl)—Of phosgen *(see* Phosgen)—Of phosphenyl *(see* Phosphenyl)—Of phthalyl *(see* Phthalyl)—Of propargyl *(see* Propargyl)—Of pyruvic acid, 27, 23—Of space, 67, 255, 260—Of sulphur acids, 22, 312—Of tungstic acid, 14, 153—Or petroleum, crystals extracted from cast-iron by means of 39, 251—Orthoformic, changes which it undergoes, 19, 262—Orthoformic, products of reduction, 26, 229—Oxalacetic, action of diazoic chlorides in excess in alkaline solution on, 90, 70—Oxalacetic, action on aromatic aldehydes, 90, 117—Oxalacetic, condensation with cyanacetic ether in presence of piperidine, 94, 304—Oxalacetic, product of spontaneous alteration of, 90, 35—Oxalglutaric, 99, 294—Oxalic, action of iodide of allyl and zinc on, 33, 139—Oxalic, action of sodium amalgam on, 2, 194, 24, 34, 132—Oxalic, behaviour with resorcin, 57, 13—Oxalic, preparation, 5, 337—Oxalic, separation of ethyl bases by, 22, 214—Oxygen as antidote for, 2, 72—Oxypicric, 13, 106—Phenacetylmalic, 78, 84—Phenyllic, 24, 145—Phosphoric, and phosphoric acid, reactions between, 74, 121—Picric, 13, 196; 40, 217—Preparation, 76, 11, 35, 83—Propiopyronic, constitution, 57, 12—Pyrogallic, coloured derivatives of, 38, 274—Pyruvic, 68, 26—Pyruvylpyruvic, derivatives, 85, 264; 86, 245—Quinic, 1, 11, 154—Salicylaldehyde methyl, preparing, 83, 222—Salicylic, of glycerin, 36, 242—Salts, action of organo-derivatives on, 83, 142—Salts, catalytic hydrogenation of non-saturated, 95, 106—Salts, condensation of acetylenic carbides with, 85, 60—Salts, fixation of ethero-organomagnesium derivatives on to the liaison of non-saturated, 91, 118—Salts of acids of complex function, reduction, 88, 137—Salts of boronol, variation in rotatory power of left-hand, 85, 166—Salts of cyclic series, preparation, 99, 71—Salts, preparing ethylene hydrocarbons from, 99, 34—Santonin, 33, 242—Silicic, 3, 240—Silicic acid, reduction, 24, 133—Silicic acid, reduction products, 26, 24, 209—Silicic, natural, 77, 204—Soda *(see* Soda)—Sodium acetacetic, constitution, 66, 329; 67, 133—Sodium acetic, derivatives, 30, 64—Solubility in aqueous hydrochloric acid, 35, 67—Solubility in solutions of sugar, 17, 120—Solubility of organic acids in, 37, 249—Stress, Maxwell, motional effects of, 100, 298—Styphnic, 13, 196—Succinic, action of sodium on, 35, 74—Succinylsuccinic, 54, 110—Succinylsuccinic, decomposition products of, 35, 163—Sulphocarbonic acid, 27, 94; 28, 21—Sulphuric, action on bodies, 25, 262—Sulphuric, antiputrescent properties of, 17, 142—Sulphuric, estimation, 10, 110—Sulphuric, preparation of neutral, 42, 13—Sant's motion with respect to, 100, 290—Tartaric, preparation, 43, 280—Tetrachloro *(see* Tetrachloro)—Tetrachlorurated, 26, 145—Thiodiglycolic, 39, 163—Thioglycolic, 39, 163—Thiosulphocarbamic, derivatives of primary amines, 85, 300—Triacetic, of a butyric glycerin, 50, 93—Triethylboric, properties of, 79, 23

—Uvic, preparation, 43, 280—Vapour tensions of solutions made in, 54, 322—Versus chloroform, 12, 289—Vibrations of matter and waves of, in act of condensation, 37, 123—Vibrations of matter and waves of, in chemical combinations, 37, 152—Vibrations of matter and waves of, in light, 37, 121—Vibrations of matter and waves of, in phosphorescence and fluorescence, 37, 102—Vibrations of matter and waves of, in photochemical combinations, 37, 142—Water and carbon disulphide, variation of capillary constant of surface of, 48, 14—Water in, phenylate of potassa as a test for, 21, 166
 Ether hydrate, 37, 184
 Ether oxide, ethyl *(see* Ethyl)—Ortho-nitrobenzyl-methyllic, reduction, 88, 234
 Ether, oxides, 63, 11; 88, 233—Action of acid chlorides on, in presence of chloride of zinc, 83, 263—Action of acid chlorides on, in presence of zinc, 83, 287—Halogen, 89, 251—New class of, 90, 57—Of naphthol, 77, 188—Preparation by means of magnesium compounds and halogen methyllic ethers, 89, 215
 Ether-oxonium dibromide, 99, 312
 Ethers, 63, 166— β -Acetacetic, decomposition by heat, 91, 153—Acetic, of dulcitol, 25, 142, 311—Acetic, of ordinary phenol, paraeresol, and thymol, transformation into benzoic ethers, 81, 276—Acetic, of sugars, 71, 88—Acetoalcoylcyanacetic, isomers of, preparation, 81, 263—Acetylacetic, action of chlorides of acids on soda derivatives of substituted, 87, 215—Acetylacetic, action of chlorides of fatty acids on soda derivatives of, 87, 203—Acetylacetic, acylised derivatives of, and their decomposition, 87, 203, 228—Acetylacetic, and their acylide derivatives, nitration, 84, 36—Acetylcyanacetic, condensation, 67, 193—Acetylenic, condensation products with amines, 94, 241—Acetylenic, condensation with alcohol, 88, 108; 89, 107—Acid, of camphols, 59, 133—Acid sulphuric, of phenols, 82, 227—Acylacetic, and substituted, preparation, 91, 163—Acylacetic, synthesis by means of C-acetylacetylacetic ethers, 87, 215—Acylacetylacetic, mutual isomerizations of, 87, 263—Acylcamphoric, preparation, 95, 105—Acylcyanacetic, 91, 47—Acylcyanacetic, derivatives, 87, 179—Acylcyanacetic, products of condensation of cyanacetic ethers with, 91, 154—Alcoylcamphocarbonic, 87, 226—Alcoylcyanacetic, action on diazoic chlorides, 83, 239—Alcoylcyanomalonic, 83, 130—Alcoylcyanotic, 83, 142—Alcoylmalonic, action on diazoic chlorides, 83, 312—Alcoyloxy-cyanocrotic, preparation, 81, 263— β -Aldehyde, 90, 244—Allylic, of borneol, menthol, methyl-cyclohexanol, and linalol, 90, 56—Amylchloracrylic, 89, 226—Analysing, 26, 134, 192, 239—And amides, action of sodium ethylate on mixtures of, 57, 78—And chloride of titanium, combinations, 28, 8—And nitric acid compounds, 90, 265—And olein, biochemical synthesis of, 89, 130—And terpenic alcohols, use of salicylate of sodium for estimation of mixtures of, 85, 109—Aromatic, action of phosphorus perchloride upon, 50, 295—Aromatic, glycerol of, action of phosphorus trichloride on, 88, 251—Aromatic, of glycerin, action of chlorides of phosphorus on, 84, 264—Aromatic, saponification of, 50, 273—Benzene-cyanacetic, 67, 163—Benzoic, transformation of acetic ethers of ordinary phenol, paraeresol, and thymol into, 81, 276—Benzoylacetic, preparation, 95, 84—Benzyl

alcoylcyanacrylic, and benzyl alcoyloxycyanacrylic, 82, 23—Bibasic acid, action on halogen-magnesium derivatives of primary aromatic amines, 93, 127—Boric, 13, 104—Boric, 12, 219; 36, 230— γ - and δ -Brominated, action on cyanacetic, malonic, and methyl malonic ethers, 96, 71—Bromised, action of metallic sodium on, 85, 156—Bromosuccinic and dibromosuccinic, action of pyridine and quinoline bases on, 90, 328—Butylic, 59, 97—Butylic, of mono- and dichloroacetic acids, 54, 205—Butyryl-acetic, homologues, 91, 163—Caproyl-acetic, homologues, 91, 163—Carbonic, from phenols, action of piperidine on, 77, 36—Carbonic, of phenols and alcohols, preparation of mixed, 82, 243—Chlaurose-phosphorous, 55, 47—Chloracetic, action on halogen-magnesium derivatives of aniline, 92, 21—Chloracetic, action on halogen-magnesium derivatives of orthothioluidine, 92, 81—Chlorated, 74, 12—Chlorised, 53, 214—Chlorofumaric, action on amidoximes, 79, 288—Combustion-heat of, and of acids of fatty series, 51, 35—Compound, action of chloride of lime on, 1, 119—Compound, and alkaline hydrosulphides, behaviour, 53, 131—Compound, nature of, 10, 271—Compound, titration of, 15, 43, 83—Contribution to history of, 16, 156; 42, 210—Cyanacetic, 91, 47—Cyanacetic, condensation of mesoxalic ethers with, 91, 293—Cyanacetic, containing substituted acid radicals, action on diazobenzene and tetrazodiphenyl chloride, 82, 84—Cyanacetic, products of condensation with acylcyanacetic ethers, 91, 154—Cyanic, 12, 169; 14, 260; 71, 38—Cyanic, and nitriles of alcohols, 71, 294—Cyanomalonic, 91, 47—Cyanosuccinic, new derivatives, 69, 304—Cyanuric, isomers of, 22, 34—Decomposition, 3, 63; 9, 301—Di- *(see* Diethers)— α -Diketobutyric, reactions of, 90, 82—Diketonic, preparation, 89, 298—Diphenylcarbonic and monophenylsalicylic, transformation, 87, 274—Ethyl- *(see* Ethyl-ethers)—Ethylic, brominated, 36, 231—Ethylic, of chloric acetic acids, 74, 37—Ethylic, of fumaric acid, 26, 229—Formation, 9, 301; 33, 95—Formation from compounds of benzoic type, 98, 231—Formation, heat of, 42, 275—Formation, limiting plane in, 35, 185—Formation, speed of, 56, 269—Formic, 12, 119, 146; 43, 195—Fumaric, action of sodium alcohols on, 43, 218; 52, 169—Gallic acid, 24, 109; 25, 83—Glyceric, relations of ethers of glycidic with, 2, 238—Glycidic aryl- *(see* Glycidic)—Glycidic, and aldehydes of hexahydroaromatic series, preparation, 93, 186—Glycidic, synthesis of α -substituted, 92, 270—Glycolic, 1, 204—Halogen, of tertiary alcohols, application of Grignard's reaction to, 89, 275—Halogenated, action on ammonium thiosulphocarbonate, 86, 317—Halogenated, action on sulphocarbonic compounds of secondary amines, 85, 184—Homologues, of borneol, isoborneol, and camphocarbonic acid, rotatory power, 87, 94—Hydrates of simple, 62, 74—Hydriodic and hydrobromic, preparation with amorphous instead of normal phosphorus, 3, 344—Hydrobromic and hydrochloric, of binaphthylenglycol, 84, 81—Hydrobromic, brominated, and biiodated hydriodic, of binaphthylenglycol, 85, 84—Hydrochloric, preparation, 59, 218—Imidodithiocarbonic, 84, 11; 86, 71—Imidodithiocarbonic, preparation and properties, 85, 71—Imidodithiocarbonic, 87, 312—Imino- *(see* Iminoethers)—In brandies and vinegars, proportion of, 9, 45—In wines, 8, 71, 82; 22, 216, 228—

Isocaproylacetic, homologues, **91**, 163
 —Isocrotylic, transformation of, **35**,
 241—Isocyanic, **77**, 59—Isomeric, ro-
 tatory power of, **71**, 154—Isotrioso-
 malonic, action of peroxide of
 nitrogen on, **89**, 311—Isotrioso-ma-
 lonic, and transformation into
 mesoxalic ethers, **88**, 107—Isoprop-
 ylic, **25**, 286—Isovalerylacetic,
 homologues, **91**, 163—Ketonic, action
 of nitrous acid in alkaline solution
 on substituted, **86**, 149—Ketonic,
 action of organo-compounds on, **85**,
 221—Ketonic, syntheses, **85**, 60—
 Ketonic, tautomeric forms of, **79**,
 202—Ketonic- α -substituted, action of
 nitrous acid in acid solution on, **86**,
 96—Ketonic- α -substituted, prepara-
 tion of substituted, **86**, 84—Maleic,
 action of sodium alcohols on, **52**,
 169—Malonic, **91**, 47—Malonic, action
 of substituted, on diazo chlorides,
86, 256—Malonic, action on diazoic
 and tetraxoic chlorides, **86**, 257—
 Mesoxalic, condensation with aromatic
 carbides, **99**, 191—Mesoxalic,
 condensation with phenol ethers, **99**,
 216—Mesoxalic, condensation with
 tertiary aromatic amines, **99**, 118—
 Mesoxalic, derivatives, **92**, 57—
 Mesoxalic, preparation and conden-
 sation with cyanacetic ethers, **91**,
 293—Metanitrobenzoylacetic,
 preparation, **83**, 252—Methyl (*see*
 Methyl)—Methylsilicic, **11**, 237—
 Mixed, **16**, 99—Monalkyl, of alizarin
 (*see* Alizarin)—Mono- (*see* Mono-
 ethers)—Monochloroacetic, action on
 sodium acetylacetone, **81**, 252—Mono-
 phenylsalicylic, and diphenylcar-
 bonic, transformation, **87**, 274—
 Monophosphoric, **78**, 12—Nitric,
 constitution, **84**, 242—Nitric,
 decomposition by alkalis, **82**, 169—
 Nitric, of acid alcohols, **88**, 244; **89**,
 35, 59, 227—Nitric, reducing properties,
84, 219—Nitric, saponification,
86, 209—Nitrodimethylacrylic, action
 of reducing agents on isomeric, **83**,
 35—Nitrous and nitric, **16**, 253—
 Nitrous and nitric, action of zinc-
 ethyl on, **17**, 129—Nitrous, prepara-
 tion, **42**, 73—Of aromatic hydroxy-
 aldehydes, action of nitric acid on,
99, 205—Of arsenic (*see* Arsenic)—
 Of arsenic acids (*see* acids)—Of
 benzyl (*see* Benzyl)—Of borneol (*see*
 Borneol)—Of campholic acid (*see*
 Acid)—Of camphoroxime (*see* Cam-
 phoroxime)—Of chlor- and brom-
 acetic acids (*see* Acids)—Of cresol
 (*see* Cresol)—Of dehydromucic acid
 (*see* Acid)—Of dialcylamidobenzoyl-
 benzoic acids (*see* Acids)—Of dulcic
 (*see* Dulcic)—Of essence of lemon-
 grass (*see* Lemon grass)—Of glycerin
 (*see* Glycerin)—Of glycerol (*see*
 Glycerol)—Of glycide (*see* Glycide)—
 Of glycol (*see* Glycol)—Of higher
 homologues of oxalic acid, relative
 speeds of saponification of, **79**, 256—
 Of hydracids (*see* Hydracids)—Of
 hypophosphoric acid (*see* Acid)—Of
 isaldoximes (*see* Isaldoximes)—Of
 isoborneol (*see* Isoborneol)—Of iso-
 nitroacetone (*see* Isositroacetone)—
 Of isopropionic acid (*see* Acid)—
 Of ketonic acids (*see* Acids)—Of
 linalol (*see* Linalol)—Of menthol (*see*
 menthol)—Of methyladipic acid (*see*
 Acid)—Of methylene (*see* Methylene)—
 Of monobasic acids (*see* Acids)—
 Of morphine (*see* Morphine)—Of oxy-
 acids (*see* Oxy-acids)—Of propylic
 alcohol (*see* Alcohol)—Of sodium (*see*
 Sodium)—Of thallium (*see* Thallium)—
 Of tribasic (ortho) and thioformic
 acid (*see* Acid)—Of trichloroacetic
 acid (*see* Acid)—Optical activity, **83**,
 139—Of polyatomic alcohols (*see*
 Alcohols)—Orthonitrobenzoylac-
 etic, preparation, **83**, 252—Oxal-
 acetic, action of diazoic chlorides on,
90, 70—Oxalic, action of chloride of
 zinc on, **17**, 285—Oxalic diethyl,
 action on amidophenol and its ether,

78, 107—Oxalic, condensation with
 tertiary aromatic amines, **95**, 276—
 Oximidocyanacetic, electric conduc-
 tivity, **87**, 202—Oximidocyanacetic,
 identifying, **85**, 143—Oximidocyan-
 acetic, optical properties, **87**, 197—
 8-Oxaloylised ethylenic, synthesis,
91, 133—Oxy- (*see* Oxy-ethers)—
 —Oxyfumaric, action of chlo-
 ride of diazobenzene on the substi-
 tuted, **90**, 71—Paranitrobenzoylac-
 etic, preparation, **83**, 252—Phen-
 yl (*see* Phenol)—Phenol allyl (*see*
 Phenol)—Phenolic, having a pseudo-
 allylic chain, **90**, 82; **92**, 212—Phen-
 olic, sulphination of, **97**, 154—Phen-
 olic, Zeisel reaction in case of
 diortho-substituted, **92**, 235—Phenyl-
 alcoxycyanacrylic, **82**, 23—Phos-
 phalladic and phosphopalladous,
 ammoniacal derivatives of, **74**, 233—
 Phosphoric, **83**, 83—Phosphoric, molec-
 ular conductivity of, **92**, 270—Phos-
 phoric, of allylic alcohol, **72**, 61; **75**,
 59—Phosphoric, of glycerin, **89**, 70—
 Phosphoric, of glycol, **89**, 130—Pre-
 paration of, **62**, 310—Production of,
11, 88—Propionic, action of
 mono-halogenated, on sodium acetyl-
 acetone, **85**, 83—Purity of, testing,
7, 279—Researches on, **11**, 176; **12**,
 261; **15**, 43; **18**, 121; **65**, 132—Saponi-
 fication by means of alkalis, influence
 of formation of salts on, **80**, 183—
 Silicic, catalytic action of aluminium
 chloride on, **67**, 9, 16, 28—Simple and
 mixed, **67**, 286—Sodium acetic and
 malonic, new reactions with, **56**,
 260—Sodium acetonedicarboxylic,
 action of epichlorhydrine on, **85**, 70—
 Sodium benzoylacetic, action of
 epichlorhydrine and epibromhydrine
 on, **84**, 24—Sulphocyanic, decomposi-
 tion, **82**, 188—Sulphocyanic, isom-
 erism of, **83**, 71—Tartaric, **66**, 221;
71, 77—Tartaric, with aromatic
 radicles, **70**, 25—Thioglycolic, and
 thiodiglycolic, **39**, 163—Thiosulpho-
 carbamic, from ammonia, **87**, 312
 Etheral derivatives of acids (*see*
 Acids)—Oils (*see* Oils)—Oxalates (*see*
 Oxalates)—Salts (*see* Salts)
 Etheric force (*see* Force)
 Etherification, **24**, 35; **73**, 127—By means
 of HCl, **37**, 7—By means of hydro-
 chloric acid, **20**, 23—Continuous, **51**,
 110—Heat, measure of, **74**, 37—Limits
 of, **37**, 21—Of glycerin (*see* Glycerin)—
 Of glycol (*see* Glycol)—Of
 hydracids (*see* Hydracids)—Of phe-
 nols (*see* Phenols)—Part played by
 auxiliary acids in, **37**, 273; **38**, 8—
 Williamson's theory, **90**, 23, 44
 Etherion, supposed new gas, **78**, 197,
 221, 277
 Etherised alcohols (*see* Alcohols)
 Ethero-organo-magnesium derivatives,
83, 202—Derivatives, fixation on to
 the ethylenic liaison of the non-
 saturated ether salts, **91**, 118
 Ethics of "abstraction," **67**, 96
 Ethide of zinc (*see* Zinc)—Stannous, ox-
 idised product formed during reduc-
 tion of ethide to, **34**, 203
 Ethine, cyan- (*see* Cyanethine)
 Ethiopian honey, analysis, **39**, 104
 Ethoxalyl chloride, action on derivatives
 of urea and guanidin, **52**, 213
 Ethoxide of lead (*see* Lead)—Of sodium
 (*see* Sodium)
 Ethoxyacetone, **38**, 46, 153
 Ethoxybenzidine, **91**, 5
 Ethoxyethene, trichloro- (*see* Trichloro-
 ethoxyethene)
 Ethoxyl determination, **83**, 288
 Ethoxyphenylurethane, para- (*see* Para-
 ethoxyphenylurethane)
 Ethoxypropionic acid (*see* Acid)
 Ethoxyquinoline, para- (*see* Paraethoxy-
 quinoline)
 Ethoxysuccinic acid (*see* Acid)
 Ethoxythioxan, di- (*see* Diethoxythioxan)
 Ethyl, acetylenated, salts of **20**, 259—
 And diethyl benzol, products of ox-
 idation, **15**, 267—And ethylmethyl-
 acetylcyanacetate, **49**, 168—And

methylacetylcyanacetate of ethyl,
49, 287—And phenyl phosphates,
 mixed, **79**, 47—Bases, preparation by
 means of nitrate of ethyl and their
 separation, **5**, 211—Bases, production,
4, 88—Bases, reaction with hydro-
 fluosilicic acid, **5**, 143—Bases, separa-
 tion, **2**, 307; **4**, 71—Bases, separation
 by oxalic ether, **22**, 214—Brom- (*see*
 Bromethyl)—Chlor- (*see* Chlorethyl)—
 —Combinations of thallium, **21**, 106—
 Compounds of tellurium, **5**, 98—Com-
 pounds, oxygen containing, **25**, 263—
 Mercury di- (*see* Mercury)—Methyl-
 crystallographic determination, **87**,
 94—Of aluminium (*see* Aluminium)—
 Of potassium (*see* Potassium)—Of
 sodium (*see* Sodium)—Of zinc (*see*
 Zinc)—Salts of acids of acetylenic
 series, condensation with ketonic
 compounds, **69**, 20—Salts of maleic
 and citraconic acid, magnetic rota-
 tory power of, **56**, 21—Series, aldehyd
 (*see* Aldehyd)—Series of silicium
 (*see* Silicium)—Stan- (*see* Stannethyl)—
 Stannotri- (*see* Stannotriethyl)—
 Trichlorinated acetal from, **18**, 259
 Ethylacetamide, monochlor- (*see* Mono-
 chlorethylacetamide)
 Ethyl acetate, action of bromine and of
 bromhydric acid on, **8**, 261—Bi-
 primary bichloride, **49**, 10
 Ethyl acetoacetate, **90**, 19—Action of heat
 on sodium salt of, **96**, 267—Action of
 monochloromethyl ethyl on sodium
 derivative of, **100**, 313—Action of
 tribromopropane on sodium deriva-
 tive of, **95**, 235—Additive products of
 benzylidene-aniline with, **89**, 259—
 Isomerism of, **98**, 127—Methyl di- (*see*
 Methyl)—Type, desmotic form of,
 in homogeneous state and dissolved
 in neutral media, **91**, 265
 Ethyl acetonedicarboxylate, action of cyan-
 ogen chloride on, **81**, 312
 Ethyl acetonedicarboxylate, condensa-
 tion, **79**, 284—Preparation, **94**, 59
 Ethyl acetylacetate, action of fuming
 nitric acid on, **87**, 263—Mono-
 chlorated, action on diazoic chlorides,
85, 312
 Ethylacetylacetic acid (*see* Acid)
 Ethylacetylacetone, action on diazoic
 chlorides, **83**, 60
 Ethylacetylen, **28**, 45—Formed synthet-
 ically, its identity with crotonylen,
28, 8
 Ethylacetylenedicarboxylate, action of
 phenol on, **82**, 238—Condensation
 with bases and ketonic esters, **81**,
 294
 Ethylacetylloxamate, **26**, 180
 Ethylacetylacetates, action of fuming
 nitric acid on, **87**, 263
 Ethyladipate and methyladipate, syn-
 theses by means of, **97**, 95, 119
 Ethyl alcohol, action of chloride of lime
 on, **40**, 46—And benzene, **81**, 42—And
 benzil, condensation compounds, **50**,
 282; **75**, 151—And ether, osmotic
 phenomena produced between, **72**, 97
 —And ethyl oxide, thermal proper-
 ties of the mixture, **56**, 18—And
 hydrochloric acid, reaction between,
82, 265—And methyl alcohol, separa-
 tion, **88**, 198—And methylene,
 separating, **71**, 270—And water, boil-
 ing-point curve for mixtures of, **85**,
 185—Assay of commercial wood-spirit
 intended for denaturation of, **44**, 261
 —Bichlorated, **55**, 225—Caproic and
 caprylic fermentation of **18**, 201—
 Conversion of methyl alcohol into,
18, 7—Detection of acetone in, **79**,
 252—Detection of methyl alcohol in,
49, 58—Electrical conductivity of
 solutions of iodine and of platinum
 tetraiodide in, **100**, 150—Estimation,
79, 119—Estimation in essence and
 medicinal preparations, **87**, 82—Esti-
 mation of methyl alcohol in presence
 of, **78**, 267; **89**, 18—Methylation of,
96, 198—Oxidation, **55**, 270—Oxida-
 tion at boiling-point, **90**, 281—Pre-
 paration of pure, **92**, 281; **94**, 106—
 Separation from acetic acid, methyl

- ether, methyl acetate, aldehyde, phenols, etc, **74**, 110—Synthesis, **78**, 308; **79**, 48—Synthesis of propylic alcohol by, **21**, 57—Tests for methyl alcohol in presence of, **12**, 104
- Ethyl alcohols in vegetable kingdom, **32**, 62
- Ethylalcoholate of chloral (*see* Chloral)
- Ethyl aldehyde, action on phenylhydrazine, **77**, 236 — Estimation, **78**, 328; **79**, 23, 110
- Ethylalizarin, **27**, 171
- Ethylallylamin and diethylallylamin, **28**, 215
- Ethylallyl carbinol, **69**, 181
- Ethylamidoorthobenzoyl, dimethylamidodi- (*see* Dimethylamido-diethylamidoorthobenzoyl)
- Ethylamidopropionic acid (*see* Acid)
- Ethylamine, action on acetone, **43**, 131—Action on cesium, **92**, 81—Action on komanic acid, **50**, 117—And diethylamine hydrosulphates, vapour tensions of, **47**, 104—Condensation of dimethyldihydroresorcin with, **99**, 83—Di- (*see* Diethylamine)—Formation, **39**, 195—In production of ice, **6**, 138—Isomer of, **16**, 99—Oxallyldi- (*see* Oxallyldiethylamine)—Oxidation, **42**, 246—Parahydroxyphenyl- (*see* Parahydroxyphenylethylamine) — Phenyl- (*see* Phenylethylamine)—Preparation, **72**, 185—Produced from oxethers, **3**, 35—Reactions of, **5**, 127—Transformation of acetamide into, **80**, 59—Tri- (*see* Triethylamine)—Watery solution of, compressibility, **57**, 13
- Ethylamine anhydrosulphate, vapour tension, **47**, 164
- Ethylamine dextrocamphorsulphonate, dextrolevo- α -phen- (*see* Dextrolevo- α -phenethylamine dextrocamphor sulphonate)
- Ethylamine hydrochlorate, decomposition by heat, **41**, 36
- Ethylamines, action of ethylchloride on, **42**, 95—Oxy- (*see* Oxyethylamines)—Phenyl- (*see* Phenylethylamines)—Preparation on large scale, **21**, 203, 251—Separation, **39**, 63
- Ethylammonium bromide, tetra- (*see* Tetraethylammonium)
- Ethylammonium chloride, di- (*see* Diethylammonium)
- Ethylammonium selenite, **79**, 211
- Ethylammonium sulphite, **79**, 211
- Ethylamyl, **27**, 44, 132
- Ethylanilide phenacyl- (*see* Phenacyl-ethylanilide)
- Ethylaniline, di- (*see* Diethylaniline)—Mono- (*see* Monoethylaniline)—Nitro- (*see* Nitroethylaniline)
- Ethyl barbituric acids (*see* Acids)
- Ethylbenzene, oxidation, **92**, 67
- Ethylbenzene, benzylpenta- (*see* Benzylpentaethylbenzene)—Di- (*see* Diethylbenzene)—Limited oxidation, **41**, 160—Synthesis by means of ether and benzene, **41**, 160
- Ethylbenzenes, chlorised, nitro-derivatives of, **56**, 269
- Ethylbenzene acid (*see* Acid)
- Ethylbenzol, action of bromine on, **21**, 52—Benzyl- (*see* Benzylethylbenzol)
- Ethylbenzyl- (*see* Nitroethylaniline)
- Ethylbenzolsulphonic acid (*see* Acid)—Acids (*see* Acids)
- Ethylbenzoyl, action of bromine on boiling, **27**, 302
- Ethylbenzoylacetate, **100**, 115—Constitution of nitrogen derivatives of, **95**, 155
- Ethylbenzoylglutamate, **95**, 76
- Ethylbenzylammonium iodide, tri- (*see* Triethylbenzylammonium)
- Ethylbenzylaniline, **87**, 180
- Ethyl benzylideneanilineacetate, **88**, 254
- Ethyl benzylketone, isomeric additive products of, with benzylidene aniline, **85**, 310
- Ethyl bromide, **29**, 117—Action of sulphochloride on, **20**, 24 — And silver chromate, interaction, **96**, 77
- Ethyl bromocarbonylglutarate, action on ethyl sodiocarboxylglutarate, **89**, 296
- Ethyl bromoisobutyrate, condensation with ethyl malonates and ethyl cyanacetates, **82**, 44
- Ethyl bromopropionate, **68**, 100
- Ethyl bromotrimethylsuccinate and ethyl sodiocyanacetate, interaction, **84**, 300
- Ethyl carbamate, action on esters of organic acids and mustard oils, **99**, 116—Reaction, **49**, 288—Splitting-up of, **49**, 108
- Ethyl carbinol, methyl- (*see* Methyl-ethylcarbinol)—Tri- (*see* Triethylcarbinol)
- Ethyl carboxyglutamate, formation, **89**, 249
- Ethyl carboxyglutarate, **89**, 259, 296
- Ethyl carboxylamide, compounds with cobaltous, ferrous, and ferric chloride, **96**, 221
- Ethyl carboxylamine, dibromised, **91**, 164
- Ethyl chloride, action on ammonia, **1**, 170—Action on ethylamines, **42**, 95—Mercur- (*see* Mercur-ethyl)
- Ethyl chlorofumarate, action on monoalkylmalonic esters, **86**, 252
- Ethylconia, conia, and diethylconia, iodides of, physiological action of, **19**, 82
- Ethyl crotonate, condensation with ethyl oxalate, **81**, 308
- Ethylcrotonic acid (*see* Acid)
- Ethyl cyanide, preparation, **97**, 47
- Ethyl cyanacetate, **56**, 12—Condensation of ketones and aldehydes with sodium derivatives of, **100**, 266—Condensation with its sodium derivative, **88**, 289; **90**, 301—Constitution, **88**, 289
- Ethyl cyanocarbonate, **26**, 300
- Ethyl- α -cyano- γ -phenylacetate, **96**, 278
- Ethyl cyanosuccinate, organic acids from, **80**, 59
- Ethyl cyanurate, decomposition, **4**, 22
- Ethyl diacetate (*see* Acid)
- Ethyl diacetylpropionate, **83**, 179
- Ethyl diazoacetate, decomposition, **93**, 65
- Ethyl dibromobutanetetra-carboxylate, **80**, 263
- Ethyl dibromopropanetetra-carboxylate, action on disodium derivative of ethyl propanetetra-carboxylate, **91**, 159
- Ethyl dichloracetate, **63**, 175
- Ethyl dichloramine, preparation, **82**, 72
- Ethyl dimethyl, di- (*see* Diethyl dimethyl)
- Ethyl dimethylacrylate, action of fuming nitric acid on, **85**, 180—And nitrated derivatives, constitution, **82**, 267
- Ethyl dimethylamidobenzene, **65**, 165
- Ethyl dimethylbutanetricarboxylate, action of sodium and methyl iodide on, **82**, 34
- Ethyl dimethylcarbinol, **19**, 286
- Ethyl dinitroacetate, **87**, 84
- Ethyl dioximidobutyrate, stereoisomers of, **91**, 122
- Ethyl dioximidosuccinate, **94**, 71
- Ethyl diphenol, **19**, 251
- Ethyl dipropylmalonate, potassium (*see* Potassium)
- Ethyl dipropylsilicane, benzyl- (*see* Benzylethyl dipropylsilicane)
- Ethyl disodioethanetetra-carboxylate, action of ethyl β -iodopropionate on, **89**, 176
- Ethyl disulphide, di- (*see* Diethyldisulphide)—Guthrie's chlorised, constitution, **57**, 152
- Ethylerythric acid (*see* Acid)
- Ethyl ester and methyl ester of di-, o-, m-, and p-nitrobenzoyltartaric acids, **90**, 277—Benzhydroxamic, **34**, 41—Monobromobutyl, action of finely divided silver on, **43**, 12—Succinic, formation, **56**, 100
- Ethyl esters, di- (*see* Diethylesters)—Of acetonylexalic and acetophenylloxalic acids, **94**, 44—Of dibenzoylsuccinic acid, absorption curves of, **81**, 141—Of di-, o-, m-, and p-nitrobenzoyltartaric acids, **90**, 277—Of malonic and cyanoacetic acids, action of mustard oils on, **97**, 120; **99**, 81—Of olefin-di-carboxylic and olefin- β -keto-carboxylic acids, action of ammonia and organic bases on, **87**, 115, 246
- Ethyl ether, **100**, 255—Action of liquid hydriodic acid on, **80**, 15—Alcohol in, **63**, 161—And its chlorinated derivatives, **31**, 245, 264—Carboxamido-benzoic acid, **24**, 264—Chlorocarbonic, action on the phenols, **43**, 48—Decomposition of vapour of, **54**, 189—Of amidophthalic acid, **35**, 84—Oxalic, action on dimethylparaphenylenediamine, **40**, 76—Phosphoric, **12**, 46—Product of slow combustion of, **47**, 260—Uramidobenzoic acid, **24**, 264
- Ethyl ether oxide of $\alpha\alpha$ -dichlorisopropyl alcohol, and dibromacetic aldehyde, **95**, 94
- Ethyl ethers, chlorinated, chemical constitution, **32**, 242, 255—Of pyrogallal acid and the cediret of ethyl series, **38**, 35
- Ethyl ethylene, methyl-di- (*see* Methyl-diethylethylene)
- Ethyl ferri-sulphate, **88**, 107
- Ethyl fluoride, **58**, 72—Analysis of, **59**, 11
- Ethyl formate, saponification of, **97**, 248
- Ethyl gallate, destructive distillation, **87**, 21
- Ethyl glutaconate, condensation, **87**, 179—Methylation, **87**, 179, 287—Preparation, **90**, 10
- Ethyl glycerine, cyanchloridine of, **22**, 299
- Ethyl glyoxylate, action of urethane and urea on, **94**, 71—Characteristic reaction of, **93**, 234
- Ethyl-green and malachite-green, **39**, 173
- Ethyl hexahydrobenzoylacetate, **96**, 96
- Ethylhexyl ether, **14**, 18
- Ethylhomocamphoric acid (*see* Acid)
- Ethylhydantoin, propionic, **72**, 185
- Ethyl hydride and methyl, identity, **10**, 5
- Ethylhyposulphurous acid (*see* Acid)
- Ethyl iodacetate and zinc, condensations with, **87**, 71
- Ethyl iodate, **19**, 10
- Ethyl iodide, **27**, 103—Action of potassium hydride on, **85**, 132—Action of sparteine on, **92**, 57—Action of sulphochloride on, **20**, 24—Action on acid amides, **62**, 49—Action on benzoylacetic ester, dioxybenzoin, and benzyl cyanide, **83**, 189—Action on disodium derivatives of diacetylacetone, **94**, 44—Action on ethylic sulphate, **15**, 227—Action on nitrate of silver, **86**, 24—Action on silver maleate and fumarate, **39**, 42—And mercurous nitrite, interaction, **81**, 10—And sodium, action on acetic ether, **21**, 7—Preparation, **1**, 264
- Ethyl β -iodopropionate, action on ethyldisodioethanetetra-carboxylate, **89**, 176
- Ethylisoamylamines, **75**, 239
- Ethylisopropylketone, **34**, 284
- Ethylketone, di- (*see* Diethylketone)—Methyl- (*see* Methyl-ethylketone)—Phenyl (*see* Phenyl)
- Ethyllactic acid (*see* Acid)
- Ethyllactyllactate, **95**, 131
- Ethyl malonamide, di- (*see* Diethylmalonamide)
- Ethyl malonate, action of bromoacetal on sodium derivative of, **77**, 210—Action of bromocyclohexane and of 4-bromo-1-methylcyclohexane on sodium derivatives of, **100**, 229—Action of tri-bromopropane on sodium derivative of, **93**, 242—Action on oxide of mesityl, **80**, 231—And acetyltetra-bromide, interaction, **79**, 8—And benzil, condensation, **70**, 267—Condensation of formaldehyde with, **81**, 93—Interaction of methylene chloride and sodium derivative of, **95**, 306; **96**, 277—Interaction with its sodium derivative, formation of phloroglucinol by, **88**, 302
- Ethyl malonates, action of bis-diazotic chlorides of benzidine, orthotolidine, and diaminidine on, **79**, 191
- Ethylmalonic acid (*see* Acid)

- Ethyl mandelate, hydrolysis by lipase, 87, 295
- Ethyl-mercaptop, 35, 198
- Ethyl methylacetate, additive products of benzylidene aniline with, 89, 250
- Ethyl methylcamphorcarbonate, crystallographic determination, 87, 94
- Ethylmethylen, dioxy- (see Dioxyethyl-methylen)
- Ethyl methylphenylcyanoglutarate, derivatives, 82, 253
- Ethyl 6-methyl-2-pyrone-3:5-dicarboxylate and derivatives, 97, 274
- Ethyl methylsodiocyanacetate, constitution, 81, 260
- Ethyl-naphthalin, conversion into ace-naphthen, 25, 310
- Ethyl-naphtholsulpho acids (see Acids)
- Ethyl-8-naphthylacetate, 93, 20
- Ethyl-naphthylamine, colourless compound of sodium tetrazotolylsulphite with, 84, 47 — Di- (see Diethyl-naphthylamine)
- Ethyl-8-naphthylamine, methyl- (see Methyl-8-naphthylamine)
- Ethyl nitrate, 5, 158—Preparation, 4, 219; 35, 11—Saponification by water, 86, 36
- Ethyl nitrite, effects of reducing agents on, 4, 230—Preparation, 4, 219
- Ethyl nitroacetate, 82, 267; 83, 252
- Ethyl nitrosopropionate, preparation, 69, 313
- Ethyl orcinotricarboxylate, tri- (see Triethyl)
- Ethylorthotoluidine, 54, 8—Derivatives, 71, 28
- Ethylorthoxyphenylcarbinol, di- (see Diethylorthoxyphenylcarbinol)
- Ethylsulphacetic acid (see Acid)
- Ethyl oxalacetate, action of tetrazoic chlorides on, 87, 143
- Ethyl oxalate, action of Grignard's reagent on, 100, 31—Action on acetanilide and its homologues, 94, 44—Action on thioacetanilide and its homologues, 95, 235—Condensation with ethyl crotonate, 81, 308—Products of condensation of, with dimethylaniline in presence of aluminium chloride, 95, 286
- Ethylloxalic anhydride (see Anhydride)
- Ethyl oxalurate, 29, 146
- Ethylloxalyle, action on mixed organo-magnesium compounds, 87, 299—Action on naphthalene in presence of aluminium chloride, 74, 62
- Ethylloxalyl chloride, action on aromatic hydrocarbons in presence of aluminium chloride, 73, 269—Action on diphenyl, 70, 314—Action on ethyl-naphthol, 76, 314
- Ethylloxamines, tri- (see Triethylloxamines)
- Ethyl oxide, adiabatic relations of, 74, 205—And carbonic acid compounds, 80, 195
- Ethylxybenzoic acid (see Acid)
- Ethylxyoxalylchloride, 26, 300
- Ethylparaphenylenediamine, 53, 227
- Ethylpentanetetra-carboxylate, synthesis with acid of, 63, 176
- Ethyl peroxide, 43, 233
- Ethylphenol, 20, 59, 180; 23, 23—Acids (see Acids)
- Ethylphenolsulphonic acid (see Acid)
- Ethylphenols, 69, 120
- Ethylphenyl, stannum tri- (see Stannum)
- Tin-tri- (see Tin-triethylphenyl)
- Ethylphenylacetylen, 32, 257
- Ethylphenylketone, condensation with benzaldehyde, 83, 284—Halogen derivatives of, 78, 95
- Ethylphenylpropionate, action of phenols on, 82, 255
- Ethyl phosphates and phenyl phosphates, mixed, 79, 47
- Ethylphosphine, oxidation products, 25, 131—Tri- (see Triethylphosphine)
- Oxide, tri- (see Triethyl-phosphine oxide)
- Ethylphosphoric acid (see Acid)
- Ethylphthalide, action of bromine on, 38, 230
- Ethyl piperidine and its methyl derivative, 77, 225
- Ethyl piperonylacetate, 92, 293
- Ethyl propanetetra-carboxylate, disodium derivative of, action of ethyl dibromopropanetetra-carboxylate on, 91, 159
- Ethylpropionylpropionate, 35, 141
- Ethylpropylacetylene, 57, 131
- Ethylpropylpiperidonium iodide, 75, 162
- Ethylpropylsilicane, *dl*-benzylmethyl- (see *dl*-benzylmethyl-ethylpropylsilicane)
- Ethylpropylsilicil oxide, benzyl- (see Benzylethylpropylsilicil oxide)
- Ethylpropyl tin dextrobromocamphorsulphonate, dextromethyl- (see Dextromethyl-ethyl)
- Ethyl-n-propyl tin iodide, dextromethyl (see Dextromethyl)
- Ethylpyrophosphoric acid (see Acid)
- Ethyl pyruvate, action on paratoluidine, 98, 96—Hydrazones, stereo-isomeric, 82, 243
- Ethylsilicene, crystallographic properties, 74, 49
- Ethylsilicilene, crystallographic properties, 87, 47
- Ethyl sec-octyl tartrate and its dibenzoyl and diacetyl derivatives, 84, 293
- Ethyl silicate, 25, 215
- Ethylsilicone, benzyl- (see Benzylethyl-silicone)
- Ethyl sodacetylacetate, action of acid chlorides on, 84, 292
- Ethyl sodiocarboxylglutarate, action of ethyl bromocarboxylglutarate on, 89, 296—Action of halogens on, 89, 259
- Ethyl sodiocyanacetate and ethyl bromotrimethylsulcoate, interaction, 84, 300—Constitution, 81, 260
- Ethyl sodiomethylmalonate and mesityl-oxide, interaction, 81, 202
- Ethyl sodium malonate, reaction on dibromides, $C_6H_5Br_2$, 86, 19
- Ethyl sodium thiosulphate, action of alkalis on, 98, 12
- Ethyl subformiate, 9, 184—Reactions, 7, 158
- Ethyl sulphine salts, tri- (see Triethyl-sulphine)
- Ethylsulphinic acid (see Acid)
- Ethyl sulphocyanate and sulphuric acid, 19, 69
- Ethyl sulphocyanide, action of chlorine on, 51, 73
- Ethylsulphon acid ether (see Ether)
- Ethylsulphuric acid (see Acid)
- Ethyl tartrate in aromatic halogen derivatives, 97, 262—In aliphatic halogen derivatives, 96, 291—In benzaldehyde and in quinoline, 99, 107—In chloroform, 91, 128—Influence of benzene, xylene, toluene, and mesitylene on rotation of, 85, 310—Influence of isobutyl alcohol and secondary octyl alcohol on rotation, 83, 117—Influence of naphthalene on rotation of, 85, 310 — Rotation values at different temperatures, 89, 259
- Ethyl tartrates, optical rotations of, 77, 163
- Ethylthetine dextrobromocamphorsulphonate, methyl- (see Methyl-ethyl-thetine)
- Ethylthetine dextrocarnphorsulphonate, methyl (see Methyl-ethylthetine)
- Ethylthetine menthyl esters, methyl (see Methyl-ethylthetine)
- Ethylthetine platinichloride, methyl- (see Methyl-ethylthetine)
- Ethylthiosulphate of sodium (see Sodium)
- Ethyl toluol, 31, 130
- Ethyltriimidonaphthalene and its acetyl derivative, 79, 192
- α -Ethyltricarballic acid (see Acid)
- Ethyltrimethylformene, 27, 219
- Ethylurea, di- (see Diethylurea)
- Ethylvalerianate, 10, 272
- Ethylvinyl, derivatives, 36, 141—Hydrocarbon of, isomeric with butylen, synthesis of, 20, 263—Synthesis, 19, 200; 20, 130
- Ethyllate, ferric, and colloidal ferric hydrate, 49, 125—Of barium (see Barium)
- Ethyl of baryta (see Baryta)
- Of calcium (see Calcium)
- Of sodium (see Sodium)—Sodic, action on ethylic oxalate and other ethereal salts, 24, 44
- Ethylated benzol (see Benzol)
- Ethylation of aniline (see Aniline)—Of toluidine (see Toluidine)
- Ethylene, action of chromic acid on, 25, 227—Action of heat on, 69, 87, 103, 111, 125; 71, 273, 286, 298—Action of metals on, 82, 94—Action of nickel on, 75, 187; 76, 35—Action on sulphuric oxychloride, 17, 83—And aethane haloid compounds, boiling points of, 47, 224—And benzene vapour, separation, 77, 105—And bromides of iron and platinum, combination, 22, 202—And ethan, substitution-products of, 39, 74—And free hydrogen, combination, 47, 148—And free oxygen, combination, 45, 173—And nitric acid, compound, 20, 131—And other polyamines, mono-character of, 32, 1—And propylen, monobromated iodhydrates and chlorhydrates of, 21, 201; 22, 251—Bases, 25, 190—Bases, manufacture, 24, 73—Behaviour, 66, 289—Bibromated, 22, 21—Brom- (see Bromethylene)—Chemical structure of, 17, 213—Chlorobromated, 32, 61—Combustion, 90, 276—Considered as a link between mineral and organic chemistry, 5, 332—Derivatives, methylation in, 98, 174—Derivatives of diazoamido-compounds, 65, 307—Dibromated, constitution, 40, 288—Diphenyldinitro- (see Diphenyldinitroethylene) — Explosion of, 66, 92—Formation, 36, 182—Formation of tetra-bromated hydruet of, 27, 94—Haloid compounds, behaviour with hydriodic acid, 22, 299 — Haloid compounds, boiling points, 47, 224—Homologues of, reactions, 32, 303—Hydrogenation, 82, 47, 58 — Illuminating power, 48, 245 — Illuminating power, influence of incombustible diluents on, 49, 188 — Lactic acid (see Acid)—Methyl-ethyl- (see Methyl-ethylthylene)—Mono character of, 32, 1—Monochlorated, addition of iodine chloride to, 49, 168—Nitrosodi- (see Nitrosodiethylene) — Perchlorated, preparation, 31, 217—Phenyl- (see Phenylethylene)—Preparation from carbon monoxide and hydrogen, 99, 240—Quadruphenylised, 22, 214—Radial sulphine salts containing, 53, 120—Series, acids of (see Acids)—Tetraphenyl- (see Tetraphenylethylene) — Transformation into ethyl-alcohol, 28, 294—Tribromated, transformation of pyrotartaric acid into hydrobromate of, 35, 196—Tribrom- (see Tribromethylene)
- Ethyleneamines, diox- (see Dioxethyleneamines)
- Ethylene aniline, dinitrosamines of, 75, 161—Thio- and dithio-carbamide derivatives of, 93, 209
- Ethylene biniodide, action of corrosive sublimate on, 19, 176
- Ethylene bromide, action of bromide of aluminium on, 78, 47—Action on ethylic acetosodacetate, 56, 19—Action on pyridine, 3, 367—Decomposition by water, 24, 157—Tetra-nitrated, 45, 198
- Ethylene catechin, 79, 155—Methyl- (see Methyl-ethylene)
- Ethylene chlorhydrate, 28, 196
- Ethylene chlorhydrin, action on bases of pyridin series and on quinoline, 45, 157
- Ethylene chloride, 29, 212—Action of chlorine on, 78, 196; 79, 59—Monochlor- (see Monochlor-ethylenechloride) —Of iron, 79, 275
- Ethylene chlorobromide, derivatives of, 46, 220
- Ethylene chloriodide, action of metallic silver on, 25, 167

- of, determining, **87**, 296—New process, **16**, 18—Of glycerin (*see* Glycerin)—Of plants (*see* Plants)

 Fluorene, **28**, 124; **30**, 284; **49**, 212; **51**, 149—Action of fused potash on, **88**, 137—And acenaphthalene, **73**, 254—And its derivative alcohol, **32**, 88—Derivatives, **47**, 60; **49**, 94; **88**, 168—Detection of small quantities along
 with phenanthren or anthracen, **38**, 220—Oxonium salts of, and its derivatives, **85**, 225—Set free by electrolysis, oxidation by, **88**, 210—Sodium compound of, **98**, 243
 Fluorene hydrides, **62**, 310
 Fluorens, G., Manufacture of sugar-candy, **37**, 30—Saccharification of starchy matter, **61**, 314—"Thenard, Elogie Historique, etc." (review), **1**, 164
 Fluorescein, **67**, 297—And eosin, lakes of, use for preparation of decorative paintings without poison, **37**, 20—Homo- (*see* Homofluorescein)—Nitrobromo-derivatives of, **85**, 297—Nitro-derivatives of, **82**, 253—Singular use of, **38**, 232
 Fluoresceins from 4-hydroxyphthalic, 4-methoxyphthalic, and hemipinic acids, **96**, 242
 Fluorescence, **24**, 291; **26**, 93, 95, 144, 173; **38**, 47; **90**, 95, 208; **92**, 94; **94**, 293—And colour, relationship to constitution, **94**, 227, 265; **95**, 68; **98**, 253—And solvent, colour of, **99**, 216—And violet end of a projected spectrum, **27**, 33—Between chrysen and pyren, relations of, **31**, 219—Change of absorption by, **76**, 5—Of argon (*see* Argon)—Of diamond (*see* Diamond)—Of mercury vapour (*see* Mercury)—Of metallic compounds under influence of Röntgen and Becquerel rays, **81**, 157—Of platino-cyanides (*see* Platino-cyanides)—Of rare earths (*see* Earths)—Of salts of earthy metals (*see* Salts)—Of spinol (*see* Spinol)—Of vitrified matters under action of Röntgen rays, **75**, 107—Ultra-violet, in cyclic compounds, **98**, 233
 Fluorescences, new, **61**, 49, 85—Of bismuth (*see* Bismuth)
 Fluorescens, experimental researches on, **26**, 82
 Fluorescent amber (*see* Amber)—Bodies, **78**, 267—Diamonds (*see* Diamonds)—Liquid (*see* Liquid)—Liquids (*see* Liquids)—Matters, **56**, 24—Relations of basic salts of uranic oxide, **29**, 17—Rose colouring matter, conversion of aniline-black into, **35**, 134—Screens, property of, **78**, 35—Solutions, colour of, **24**, 77, 171—Spectrum of argon, **71**, 212—Substance, **77**, 226—Substance resembling quinine, **13**, 197—Substances, photography of, **33**, 52
 Fluoresceine, dinitro- (*see* Dinitrofluoresceine)
 Fluoric apatites (*see* Apatites)—Gases (*see* Gases)
 Fluoride, boric, action on certain organic matters, **37**, 153—Carbon tetra- (*see* Carbon)—Ethyl- (*see* Ethylfluoride)—Hexa- (*see* Hexafluoride)—Isobutyl- (*see* Isobutylfluoride)—Isopropyl- (*see* Isopropylfluoride)—Manganosomanganic, **18**, 224—Manganous, **81**, 251—Of acetyl (*see* Acetyl)—Of allyl (*see* Allyl)—Of aluminium (*see* Aluminium)—Of ammonium (*see* Ammonium)—Of antimony (*see* Antimony)—Of arsenic (*see* Arsenic)—Of azotyl (*see* Azotyl)—Of barium (*see* Barium)—Of benzoyl (*see* Benzoyl)—Of bismuth (*see* Bismuth)—Of boron (*see* Boron)—Of bromine (*see* Bromine)—Of cadmium (*see* Cadmium)—Of calcium (*see* Calcium)—Of cobalt (*see* Cobalt)—Of gadolinium (*see* Gadolinium)—Of gold (*see* Gold)—Of hydrogen (*see* Hydrogen)—Of indium (*see* Indium)—Of iodine (*see* Iodine)—Of iron (*see* Iron)—Of isobutyl (*see* Isobutyl)—Of isopropyl (*see* Isopropyl)—Of lithium (*see* Lithium)—Of lithium (*see* Lithium)—Of magnesium (*see* Magnesium)—Of mercury (*see* Mercury)—Of methyl (*see* Methyl)—Of neodymium (*see* Neodymium)—Of nickel (*see* Nickel)—Of nitrogen (*see* Nitrogen)—Of phosphorus (*see* Phosphorus)—Of potassium (*see* Potassium)—Of praseodymium (*see*

- Praseodymium. — Of propyl (see Propyl). — Of rubidium (see Rubidium). — Of selenium (see Selenium). — Of silicon (see Silicon). — Of silver (see Silver). — Of sodium (see Sodium). — Of sulphuryl (see Sulphuryl). — Of tellurium (see Tellurium). — Of thallium (see Thallium). — Of thionyl (see Thionyl). — Of thiophosphoryl (see Thiophosphoryl). — Of thorium (see Thorium). — Of zinc (see Zinc). — Phosphoral tri (see Phosphoral). — Silver sub. (see Silver).
- Fluorides, action of silico-chloroform on, 91, 145. — Action on alumina, 56, 12. — Alkaline earthy (see Alkaline). — And silicates, synthesis, 71, 176. — Anhydrous, preparation, 89, 59. — Cæsium-antimonious, 84, 194. — Contributions to history of, 6, 267. — Crystalline, preparation, 89, 59. — Decomposition of silicates by, 19, 270. — Hypionic, 1, 239. — In manufacture of alcohols, use of, 66, 203, 219. — In manufacture of glass, use of, 31, 100. — Influence on growth of yeast, 64, 58. — Metallic, in dissolved state, 87, 124. — Non-metallic, 54, 40. — Of acids, 73, 107. — Of alkaline (see Alkaline). — Of carbon (see Carbon). — Of chromium (see Chromium). — Of copper (see Copper). — Of hexavalent molybdenum (see Molybdenum). — Of iron (see Iron). — Of metals of alkaline earths, effect of pressure on band spectra, 100, 9. — Of phosphorus (see Phosphorus). — Of potassium (see Potassium). — Of zirconium (see Zirconium). — Soluble, action on diastase, 63, 188. — Soluble, combination heat of, 49, 124. — Soluble, estimation, 22, 75. — Some new, 99, 132.
- Fluorine, 4, 215; 16, 142; 33, 244, 253; 60, 305; 64, 126, 185; 89, 173. — Action on argon, 71, 297. — Action on carbon, 61, 120. — Action on chlorides, 94, 194. — Action on glass, 80, 201. — Action on oxides of nitrogen, 92, 21. — Action on selenium, 95, 275. — Action on selenium in presence of glass, 96, 35. — And hydrogen, combination heat of, 60, 97. — And manganese, 54, 96. — And molybdenum and chlorine, compound of, 2, 99. — And oxygen, cause of the analogy between, 89, 49. — And uranium, combinations, 14, 190. — Apparatus for the isolation of the element, 57, 200. — Atomic weight, 63, 189; 93, 55; 99, 69; 100, 278. — Behaviour towards nitrogen, oxygen, and chlorine in the arc and induction spark, 99, 24. — Chemistry of, 55, 153, 309. — Colour and spectrum, 61, 11. — Colour-derivatives of, origin of, 92, 235. — Compounds, antiseptic properties, 56, 132. — Compounds, chemical constitution, 17, 20. — Compounds, isolation of fluorine, 16, 153. — Compounds of uranium, 42, 83; 47, 41. — Compounds of vanadium, 39, 74; 42, 85; 60, 210; 61, 61. — Density of, 89, 202. — Determining, 39, 179; 65, 198. — Equivalent of, 62, 248. — Estimation, 54, 287; 82, 56, 64. — Estimation iodometrically, 94, 273. — Fossil-wood containing, 66, 181, 208. — Free, and fluoplumbates, 70, 197. — Gaseous, refractive index of, 92, 101. — In bones, 69, 241. — In bones, detection, 65, 284. — In combustible gases, determination, 68, 188. — In coprolites, detection, 11, 49. — In gaseous organic fluorides, determination, 70, 225. — In mineral waters, 79, 263, 300; 80, 295. — In mineral waters, estimation, 95, 82. — In mineral waters of Spain and Portugal, 81, 4. — In minerals, detection, 16, 15. — In natural phosphates, detection, 65, 251. — In organism, 59, 241. — In silicates, detection, 49, 202. — In teeth, 69, 241. — In water, 1, 276. — Influence on beer yeasts, 70, 12. — Isolation, 16, 153; 54, 51, 273. — Liquefaction, 75, 277; 76, 71, 197. — Liquid, 76, 259. — Liquid, action of solid methane on, 91, 130. — Liquid, reaction at -187° , 87, 226. — Preparation by electrolysis, 81, 218. — Preparation by electrolysis in copper apparatus, 80, 47. — Reactions and compounds of, 93, 67. — Salts, 4, 225. — Solid, and liquid hydrogen, combination, 87, 178. — Solidification, 87, 178. — Substitution for oxygen in iodolised compounds, 87, 44. — Test for, 54, 301.
- Fluorised blends, roasting, 87, 155. — Compounds of uranium with alkaline metals, 42, 95. — Waters (see Waters). — Wine (see Wine).
- Fluorite, polymorphism of, 77, 116. — Fluoroform, preparation and properties, 61, 192. — Silico (see Silicochloroform).
- Fluoroscopic image, photography of, 76, 158.
- Fluosalts of antimony (see Antimony). — Of arsenic (see Arsenic).
- Fluosilicate of ammonia (see Ammonia). — Of ammonium (see Ammonium). — Of aniline (see Aniline). — Of barium (see Barium). — Of baryta (see Baryta). — Of cobalt (see Cobalt). — Of copper (see Copper). — Of iron (see Iron). — Of lead (see Lead). — Of potassium (see Potassium). — Of rubidium (see Rubidium).
- Fluosilicates, manufacture, 6, 130. — Fluosilicic acid (see Acid). — Fluosulphonic acid (see Acid). — Fluoxyborates, 30, 176. — Fluozirconates, 2, 100, 385.
- Flurschein, Bernard, Chemical affinity and electrons, 100, 288. — Chlorination of paranitroaniline, 98, 255. — Mechanism of reduction of nitrogen and nitrophenols, 99, 90. — Relation between strength of acids and bases and quantitative distribution of affinity in the molecule, 99, 90; 100, 23.

and capillary connecting tube for, 97, 237—Burner, 88, 66—Burner for bending glass tubes, 26, 238—Burner, incandescent, 53, 200—Burner, now, 47, 303—Burner, rotating, 22, 56—Burner, Thomas's, 24, 109—Burner, universal, 47, 59—Burners, 33, 114; 51, 25—Burners for the laboratory, 68, 222—Burners, incandescent, analysis of mantles for, 79, 25—Burners, report on, 47, 110—Burners, rheometric, regulator for, 24, 312—Burners, system of, report by M. Violle, 74, 12—Burners, unburned gases from, 62, 193—Calorimeter, 93, 220, 231; 95, 119—Calorimetry, technical, 100, 255—Carbonic acid, absorption by liquids, verification of law of Henry and Dalton for, 16, 247—Carbonic acid, action of charcoal and iron on, at a red heat, 26, 117—Carbonic acid, decomposition, 51, 309—Carbonic acid, preparing for mineral waters, 17, 238—Carbonic acid, solubility, 60, 49—Carbonic oxide, and hydrogen, 20, 287—Carbonic oxide, poisoning with, 24, 264—Carburetted or naphthalising, 9, 201—Carburation, 4, 122, 292, 299; 6, 283, 292—Carburised in atmosphere, detection of carbonic acid in, 78, 23—Charging with vapours of hydrocarbons, 7, 10—Cheap, what is? 20, 192—Chemical properties, and their refractive power for heat, 23, 179—Chlorine (see Chlorine)—Cleveite, and the solar atmosphere, comparison between spectra of, 72, 14—Cleveite, constituents, 72, 181—Cleveite, new elements of, 74, 238—Cleveite, spectrum of, 71, 151; 72, 267—Coal, 3, 53, 61, 68, 83, 98; 15, 127, 143, 155—Coal, action on caoutchouc, 75, 24—Coal, action on iron pipes, 2, 93—Coal, analysis, 55, 297—Coal and carbon monoxide, 50, 180—Coal, and pyrogenous carbides, 33, 200, 210—Coal, apparatus for showing combustion of air in atmosphere of, 58, 55—Coal, as a labour-saving agent, 49, 74, 86—Coal, as a possible source of contaminating substances to be tested for ammonia, 17, 161—Coal, at Munich, bicarbonate of ammonium in, 21, 227—Coal, behaviour with fatty oils, 1, 167—Coal, benzol in, 35, 155—Coal, carburation, results of experiments on, 11, 126—Coal, combustion, carbonic oxide in products of, 41, 146—Coal, combustion, heat of, 68, 62—Coal, combustion, incomplete, 30, 229—Coal, combustion of air in, 47, 55—Coal, combustion of detonating mixtures formed with, 51, 248—Coal, combustion, production of ozone during, 41, 98—Coal, combustion, products of, 41, 169; 70, 83—Coal, combustion, sulphuric acid a product of, 24, 192—Coal, combustion, sulphurous and sulphuric acids in products of, 74, 24—Coal, composition, 33, 200; 34, 145—Coal, constituents, 18, 37; 27, 106—Coal, detection of bisulphide of carbon in, 2, 166; 3, 14, 128, 330—Coal, detection of sulphur in, 22, 203, 307; 23, 311—Coal, development of light from, 65, 1, 14—Coal, discovery of, 15, 109—Coal, estimation of hydrogen sulphide in, 47, 174—Coal, estimation of naphthalene in, 96, 292—Coal, estimation of sulphur in, 7, 73; 17, 89, 259, 299—Coal, extraction of benzol from, 20, 34, 238—Coal, flames, luminosity of, 65, 79, 92; 66, 295—Coal, flames, property of non-luminous atmosphere, 71, 239—Coal, free nitrogen in purified, 75, 239—Coal, heating and lighting power of, 82, 173—Coal, heating power of, 41, 41; 51, 142—Coal, igniting-point, 6, 2—Coal, influence of caoutchouc tubing on its illuminating power, 26, 229—Coal, influ-

ence on vegetation, 26, 83—Coal, iron in, 66, 54—Coal, manufacture, 5, 355—Coal, manufacture of alcohol from, 7, 1, 17, 169—Coal, manufacture, utilisation of bye products from, 23, 203—Coal, manufacture, utilisation of waste products of, 16, 31, 44, 55, 68, 91, 95, 106—Coal, of Metropolis, 34, 223—Coal, oxygen in, 80, 56—Coal, part played by benzene in poisoning by, 89, 74—Coal, photography of, 24, 37—Coal, preparation of hydrogen sulphide from, 47, 145—Coal, product from, 27, 95—Coal, products, estimation of soil for, 42, 97—Coal, proposed substitutes for, 27, 86—Coal, purification, 1, 94; 2, 58; 5, 96, 112; 11, 23; 20, 192; 28, 175—Coal, purifier, 28, 262—Coal, purifying, 7, 215; 8, 229; 24, 218, 230—Coal, purifying and drying, 67, 216—Coal, removal of bisulphide of carbon from, 2, 77; 13, 8—Coal, soda in, 10, 74—Coal, sulphide of carbon in, 21, 95—Coal, sulphur in, 21, 204; 33, 210—Coal, sulphurous impurity in, 26, 267—Coal, sulphydric acid in, estimation, 83, 217—Coal, synthesis of trimethylamine and pyrrol from, 51, 15, 146—Coal, test for ammonia in, 22, 120—Coal, to burn oxygen or air in, 19, 154—Coal, to detect presence of atmospheric air in, 18, 177—Coal, to replace, 1, 273—Coal, valuation, 21, 228, 240—Cold, apparatus for manufacture, 24, 299—Combustible, given off in the Caspian Sea, analysis, 89, 78—Combustible, in a salt mine, 4, 188—Combustible, which escaped from lava on Mount Vesuvius, composition, 8, 20—Combustion for economic purposes, 13, 282; 14, 7—Combustion furnace, 1, 63—Companies versus tar-distilleries, 41, 289; 42, 12—Companies, City, 4, 151—Compressed, derivatives of residues of, 55, 272—Compressibility of certain solutions of, 56, 49—Consumers of City of London, address of chairman of Great Central Gas Consumers Company to, 5, 224—Consumption by different burners under different pressures, 25, 118—Crude, apparatus for determining sulphuretted hydrogen in, 15, 112—Cylinder, explosion, 59, 75, 90—Destruction of leather by, 36, 227—Discharge through, action of magnetic fluid on, 91, 68—Disengagement under remarkable circumstances, 14, 224—Dissociation by electric spark, 55, 252—Dissolved in a liquid, influence upon its surface tension, 46, 113—Distribution in an electric field, 81, 130—Drying apparatus, 99, 178—Engine (see Engine)—Engineers, German report on water supply to towns, 22, 107—Engineers, Society of, at Birmingham, 12, 6—Escaping from sources around Vesuvius, 12, 228—Estimation of sulphur in, 7, 73—Evolving apparatus, 26, 36—Examiner for the City of London, 19, 118—Experiments, opaque soap bubbles for, 61, 153—Explosion at Utrecht, 9, 192—Fittings, 21, 192—Flame, 21, 238—Flame, arrangement for automatic exhibition of, 74, 25—Flames, measurement of size, 23, 132—Flames, non-illuminating, luminosity of, 47, 299—Flames, regulating, 27, 16—Flames, self-acting apparatus for shutting off, 64, 202—For balloons (see Balloons)—For heating purposes, 21, 35—For inhaling, 25, 83—For lighthouse illumination, 25, 154—For lighting and heating, 7, 209—For producing a high temperature, 27, 16—From As₂O₃ and HNO₃, action on paraoxybenzoic acid, 62, 289—From America to London, 3, 192—From apples, 32, 227—From Bath springs, argon and helium in, 73, 247—From charcoal,

16, 60—From cyanogen apparently identical with argon, 81, 231—From farmyard manure, 49, 267—From iron, 16, 157—From lime-kilns, composition, 36, 279—From oil, manufacture, 68, 283, 296—From petroleum, 20, 249; 22, 203—From petroleum, apparatus for manufacture, 9, 47—From radium, 85, 196—From tar, manufacture, 23, 191—From uraninite, 71, 295; 72, 4, 271—From water, 4, 306—Furnace (see Furnace)—Generating apparatus, 60, 89; 93, 27—Generator, 28, 209; 95, 207—Generator for analytical operations, 95, 267—Generator in connection with a blowpipe, 36, 97—Generator, self-regulating, 71, 224—Generator, simple, 61, 244—Generator, simplex, 64, 220—Generators, 74, 257—Given off from fresh charcoal when immersed in water, 15, 15, 27—Good, what is, 20, 287—Heating burner, 42, 187—Heating by, 42, 238—Heating for locomotive engines, 27, 95—Heating, new development in, 99, 88—High pressure ozone, 94, 137—Holder for constant pressures, 82, 72—Holders, zinc, use of lime-water in, 51, 83—Hydrates, 62, 110—Hydrobromic acid, action on thiophosphoryl chloride, 73, 257—Hydrochloric acid, 22, 84, 96—Hydrochloric acid, action at elevated temperatures, 46, 161—Hydrochloric acid, action on amorphous silicon, 99, 190—Hydrochloric acid, action on compound ammonias, 27, 305—Hydrochloric acid, action on metals, 54, 305—Hydrochloric acid, action on sulphates, 81, 122—Hydrochloric acid, liquefied, 11, 266—Hydrochloric acid, metal separations by, 75, 52, 63, 76—Hydrochloric, generating vessel, 94, 36—Hydrocyanic acid, Schönbein Pagenstecher's test-paper to detect traces of, 87, 173—Hydrogen, action on amorphous phosphorus, 71, 245—Hydrogen, and carbon, obtaining, 8, 133—Hydrogen, electrode, constancy of, 100, 161—Hydrogen, generators for, 74, 257—Hydrogen, new process for producing, 52, 250—Hydrogen, obtaining, 8, 133—Hydrogen, occlusion by metals, 18, 55—Hydrogen, occlusion by meteoric iron, 15, 273—Hydrogen, preparation, 38, 274—Hydrogen, purification, 28, 293—Hydrogen, to reduce platinum salts, 28, 70—Hydrogen sulphide, action on metallic amines, 62, 290—Hydrometer, 31, 40—Hypochlorous, action of dry, on a mixture of iodine and acetic anhydride, 18, 129—Hyponitric, specific heat of, 45, 173—Illuminating, bicarbonate of ammonia in, 21, 192—Illuminating, determination of benzene in, 89, 14, 29; 96, 260; 97, 282, 293—Illuminating, effect on vegetation, 20, 154—Illuminating, estimation of ammonia in, 27, 34—Illuminating, from apples, 12, 302—Illuminating, manufacture, 25, 276—Illuminating, manufacture from wood, 43, 57; 44, 31—Illuminating power of, increasing, 5, 83; 7, 23; 11, 57—Illuminating power of, influence of india-rubber tubes on, 28, 72—Illuminating, presence of sulphur in, 42, 303—Illuminating, quantity of water contained in, 19, 310—In air, 74, 188—In cleveite, constituents of, 72, 181—In iron and steel in state of fusion, 12, 252—In London, quality, 23, 203—Inflammable, issuing from the silt-bed, Belfast, 30, 138—Inflammable, use of safety lamp for detection of, 66, 91—Influence of a current of, on decomposition of compounds, 16, 74—Inspectorship of the City, 19, 142—Instead of coal-gas for filling air-

balloons, 23, 167 — Involved in various chemical actions, measuring, 56, 152 — Laboratory without, 64, 229, 248 — Lamp, Bunsen, 62, 117 — Lamp, Douglas oil, 63, 85 — Lamp, oil, 62, 84 — Lamps, flames of, scintillation of, 40, 143 — Laughing, 23, 95, 200, 145 — Leakage, 26, 110 — Light, Clamond's incandescent, 56, 270 — Light head dresses, 7, 108 — Light, rapid diffusion through heavier gas, 27, 260 — Light, Welsbach incandescent, 55, 192 — Lights, portable, 6, 177 — Lighter, hydrostatico-galvanic, 23, 191; 25, 95 — Lighting, 26, 169 — Lighting apparatus, electric, 55, 177 — Lighting, chemistry of, 10, 224; 12, 6, 16 — Lighting, from liquid hydrocarbons, use of a tin bath in fabrication of, 15, 195 — Lighting, incandescent, 79, 72 — Lighting, incandescent, history of invention of, 85, 254 — Lighting method, T. du Motay's, 26, 104 — Lighting, new mode, 20, 118 — Lighting on the Continent, earliest discovery, 27, 93 — Lighting, work on, 52, 110 — Lime, possible use for a constituent of, 37, 126 — Liquefaction of, 37, 83 — Liquefaction by self-cooling, 81, 201 — Liquid portable, 28, 24 — Liquor, ammonia sulphate from, 23, 180, 191 — Liquor, determination of fraction of, 37, 83 — Liquefaction by ammonia in, 1, 68 — Liquor, testing and valuation, 38, 193 — Liquor, utilisation of waste substances in, 35, 91 — Liqueurs, production of ferrocyanogen from, 86, 274 — London, 20, 128; 26, 203 — London, chemical quality, 13, 155 — Making apparatus for domestic use, 26, 23 — Making, employment of limed coal in, 48, 174 — Managers, British Association of, 13, 252, 261, 282; 14, 7; 15, 280, 329 — Mantles, commercial incandescent, 79, 41 — Manufacture, 1, 176; 4, 12, 81, 289; 7, 95; 8, 61, 228; 28, 212; 49, 246 — Manufacture and apparatus connected therewith, 5, 251 — Manufacture for illuminating purposes, 7, 117; 9, 32 — Manufacture of alcohol from, 7, 1, 169 — Market value of, 57, 171 — Marsh, action of chromic acid on, 25, 227 — Marsh, action of electric spark on, 19, 81 — Marsh, and formic acid, synthesis, 27, 187 — Marsh, and olefant, analysis, 20, 71 — Marsh, cyanogen derivative of, 13, 281 — Marsh, from methylic alcohol, 27, 153 — Marsh, in coal-pits, apparatus for indicating, 26, 71 — Marsh, preparation, 49, 146 — Marsh, transformation into more condensed hydrocarbons, 18, 153 — Measurement of a homogeneous chemical change in a, 98, 230 — Measuring and absorption burette, 91, 280 — Measuring apparatus for, 56, 30 — Meter testing regulations for the North German confederation, 24, 265 — Meters, 22, 68 — Meters, inspection and testing, 21, 167 — Metropolitan, 22, 33, 201; 25, 201; 28, 216; 31, 186; 32, 227 — Metropolitan, quality of, 21, 177; 24, 33; 25, 32; 26, 34 — Metropolitan, Regulation Act, failure of, 11, 120 — Metropolitan, supply, 23, 34; 27, 33, 207 — Mine, estimation of carbon monoxide in, 100, 191, 197 — Mixtures, detection of ozone, nitrogen peroxide, and hydrogen peroxide in, 58, 65 — Mixtures, explosive force exerted by, 23, 131 — Moist, estimation by, 70, 175 — Molecules, heat equilibrium among, 27, 157 — Molecules, size of, 22, 130 — Movement in "vacuum discharges," 45, 143 — Muratic acid, condensation in alkali works, 8, 35 — Natural, 19, 249 — Natural, at Heathfield, analysis, 87, 150 — Natural, danger from the use of, 60, 283 — New, 16, 114 — New, argon, 71, 40; 77, 297 — Nitrogen, in pure oxygen, 21, 45 — Nitro-

gen, oxidation, 75, 137 — Nitrogen, preparing, 59, 135, 171 — Nitrous, production during fermentation of beet-root juice, 17, 71 — Nitrous oxide, action of, 28, 58 — Occluded in sodium bromide, examination of a sample, 87, 85 — Occlusion of residual, by glass walls of vacuum tubes, 95, 134 — Of Fontaine Ardente of St. Barthélemy, composition, 21, 250 — Of Glasgow, 23, 12 — Oil (see Oil-gas) — Olefant, analysis, 20, 71 — Olefant, and Dutch liquid, 19, 204 — Olefant, production of levo- and dextro-rotating tartaric acids by starting with, 27, 83 — Olefant, transformation into complex organic acids, 2, 110, 221 — Oxygen, action on cobalticyanide of potassium, and on chromous salts, 84, 243 — Oxygen, and nascent hydrogen, behaviour, 49, 125 — Oxygen, constant production, 48, 205 — Oxygen, generating, 14, 10 — Oxygen, illumination, 25, 205 — Oxygen, manufacturing, 5, 96; 7, 34 — Oxygen, metallic copper as an absorbent for, 45, 287 — Oxygen, preparation of pure, 19, 100 — Oxygen, prepared from potassium chlorate, cause of chlorine present in, 47, 83 — Oxygen, production, 20, 58, 248 — Oxyhydrogen, 25, 274 — Ozone, high percentage, 94, 137 — Passage through homogeneous solid bodies, 10, 57 — Periodical evolution in protoplasm of the living Arcella, 21, 47 — Permanent, amount obtained in distillation of coal for oils, 13, 23 — Petroleum, 6, 289 — Petroleum, production, 21, 227 — Phosgen, action on aromatic hydrocarbons, 22, 48 — Phosphuretted hydrogen, preparation, 20, 12 — Photogenic, 7, 96, 277 — Pipes, to discover leaks in, 2, 24 — Pipette, 57, 251 — Poisoning by, 26, 119 — Presence of benzene vapour in, 59, 37 — Pressures, use of radiometer in observing, 96, 97 — Producer, analysis for the power engineer, 96, 101 — Producer, five years' experience in measuring and testing, 95, 119 — Producer, quantitative relation between the specific heats of, and its molecular constitution, 93, 145 — Prolonged action of low heating on detonating, 73, 18 — Proof fabric, 24, 227, 289, 301 — Pump, automatic, 89, 213 — Purification, 4, 25; 11, 10; 13, 71; 19, 167; 41, 155; 47, 179, 191 — Purification, apparatus for checking, 61, 181 — Purification, preparation of material for, 11, 263 — Purifiers, revivification of oxides of iron employed in, by means of steam, 21, 215 — Purifiers, titrating ammonia in waters from, 80, 37 — Purifying, 7, 215; 8, 33, 167 — Purifying, valuation of spent oxides from, 29, 30 — Quantity of moisture in, after desiccation by phosphorus pentoxide, 58, 37 — Refuse, composition, 7, 169 — Regulator, 21, 120; 27, 142; 33, 61 — Regulator for heating purposes, 23, 71 — Regulator, thermostatic, 26, 265 — Regulators for thermostats, 91, 277 — Removal of sulphide of carbon from, 11, 65 — Residual, influence on the movement of the radiometer, 34, 23 — Retorts, 27, 94 — Retorts, heating, 28, 72 — Retorts, malleable iron, 24, 46 — Rochebelle, nitrogen and argon in, 74, 87, 97 — Rules and regulations for Karlsruhe, 22, 203 — Self-acting, not requiring a gas-holder, and not liable to explosion, 24, 74 — Sewer (see Sewer) — Showing spectrum of helium, 71, 211 — Solubility and viscosity of its solvent, 70, 45 — Specific gravity of, continual indicator for, 1, 111 — Springs, Pennsylvania, 35, 155 — Stoves (see Stoves) — Sulphuretted hydrogen, action on oxide of iron, 19, 178 — Sulphuretted hydrogen, apparatus, 21, 167; 53, 231 — Sulphuretted hydrogen, evolution

of, 47, 166 — Sulphuretted hydrogen, generation, 27, 161 — Sulphuretted hydrogen, purification, 48, 147 — Sulphurous acid, action on recently precipitated insoluble sulphurets, 26, 264 — Sulphurous acid, and salts, compounds, 90, 58 — Sulphurous acid, applications, 26, 216 — Sulphurous acid, liquefied, determination of boiling-point, 27, 70 — Supply, 30, 198 — Supply of the City, 17, 24; 19, 23 — Supply, Metropolitan, 23, 34; 27, 33, 207; 29, 38; 31, 51; 32, 31; 33, 19 — Supply of Vienna, 23, 132 — Tar, distillation, 41, 289 — Thermometer (see Thermometer) — Thermometry, 81, 300; 84, 267 — Tubes, introduction of two, into narrow-necked flasks, 63, 201 — Under pressure, obtaining a continuous current, 21, 173 — Undiscovered, 76, 91, 97 — Use of ammoniacal liquor to remove sulphur from, 12, 277, 301 — Vacuum end-on tubes, re-examination of spectra, 60, 223 — Voltmeter, 71, 146 — Volumeter and gravivolumeter, 65, 45 — Volumeter, new form, 67, 73 — Water (see Water-gas) — Water carried as, 47, 61 — Waters (see Waters) — Well, examination of, 21, 299 — Which issued from one of the shafts of the Abercrom Colliery, composition, 39, 27 — Work furnaces (see Furnaces) — Works, extraction of cyanides in, 84, 223 — Works, gas and coke from, for brick-making, 22, 36 — Works residuum, 20, 132 — X and helium, 73, 13 Gas-tight corks (see Corks) — India-rubber tubing (see Tubing) Gases, absorbent power of, influence of condensation of vapour of water in experiments on, 18, 45 — Absorption, 3, 29; 58, 256; 61, 133 — Absorption and dialytic separation by colloid septa, 14, 88 — Absorption by charcoal, 7, 242; 18, 121; 28, 240; 39, 77; 96, 93 — Absorption by charcoal and coke, 90, 109 — Absorption of mixed, in water, 9, 70 — Absorption by charcoal, effect of temperature on, 25, 284 — Absorption by metals, 16, 32, 63 — Absorption by solids, 44, 3 — Acid, injury to vegetation by, 40, 144; 41, 111; 42, 36 — Action in coagulation of albumen, 28, 238 — Action of bacteria on, 43, 112 — Action of electric effluve on property of, to discharge electrified bodies, 74, 233 — Action of electric fluid on, 29, 240 — Action of incandescent electric conductor upon surrounding, 97, 34 — Action of light on, 21, 90 — Action of magnetism on, 21, 45 — Action of salts of protoxide on, 13, 166 — Action on barium-ammonium, 89, 13 — Action on glass in the neighbourhood of heated metals, 90, 180 — Action on radiant heat, 3, 266 — Analogies between escape of, from supersaturated solutions, and decomposition of certain explosives, 31, 60 — Analytical examination of high percentage, 94, 256 — And corrosive fluids, valve for, 29, 116 — And fats, absorption of radiant heat in, 43, 247 — And liquids, diffusion of, 82, 161 — And liquids, diffusion of, motion produced by, 41, 58 — And liquids, general law applicable to, 65, 122 — And liquids near the critical temperatures, 42, 9 — And liquids, static diffusion of, 81, 289 — And vapours, analysis of mixtures of air and combustible, 96, 234 — And vapours, characteristics of the organic chlorinised, 43, 105 — And vapours, dissociation and polymerisation of, 77, 23 — And vapours, electroconductivity of, 54, 200 — And vapours, indices of refraction and measurement of their dispersion, 22, 35 — And vapours, mono-molecular unit of volume for, 35, 124 — Apparatus for analysis, 27, 70; 45,

273; 48, 156—Apparatus for application of spectral analysis to recognition of, 75, 170—Apparatus for direct determination of weight and volume, 72, 25—Apparatus for drying and absorbing, 74, 357—Apparatus for finding density, 3, 79—Apparatus for generation, 57, 213, 241, 249—Apparatus for preparation in chemical laboratories, 26, 24—Applicable in generating heat and light, and in bleaching, manufacture of, 4, 40—Atomic volume and limit-density of, 51, 165—Behaviour of metals with, 67, 113—Blast-furnace, calorific power, determination by calorimetric bomb, 91, 163—Calcining and extracting from ironstone and other materials, 11, 22—Calcium as an absorbent of, 94, 305; 95, 13, 25, 42, 51—Calculation of coefficients of expansion of, 76, 74—Carburetted, action on charcoal, 21, 153—Carburetted, for purposes of illumination, 7, 35—Cathodic rays in, 67, 101—Chimney, apparatus for analysis, 64, 74—Chimney, estimation of unburnt products in, 89, 61—Chlorinised, characters of organic, 43, 105—Coal, condition of impurities in, of high and low illuminating power, 30, 4—Combination of, influence of moisture on, 51, 202—Combinations of, 44, 192—Combustibility of, limits of, 38, 233—Combustible, absence in the fumes emitted by the Caldeira de Furnas, at San Miguel, 26, 50—Combustible, analysis, 39, 111—Combustible, chemical, researches of, 20, 238—Combustible, composition of limiting explosive mixtures of, 72, 288—Combustible, in air of Paris, 82, 105—Combustible, in atmosphere, 82, 35—Combustible, inflammability of, 78, 62—Combustible, of air, 82, 58, 70—Combustion of, 37, 142—Combustion by incandescence, 97, 263—Compound, specific heats of, 71, 91—Compound, spectrum of the spark in, 6, 282—Compressed or liquefied, cocks for receivers destined for, 74, 292—Compressibility, 21, 262; 39, 64; 45, 140—Compressibility and expansion, 22, 34; 24, 85; 27, 269—Compressibility at high pressures, 39, 115; 40, 156—Compressibility at high temperatures, 20, 69—Compressibility at pressures of less than one atmosphere, and determination of molecular weights, 91, 293—Compressibility between one atmosphere and half an atmosphere of pressure, 91, 74—Compressibility under strong pressure, 42, 209—Compression, 20, 71; 26, 240—Condensation at surface of glass, 51, 85—Condensation by solid bodies, 28, 213—Condensation nuclei produced in, by action of Röntgen rays, 78, 281—Condensation of hitherto supposed permanent, 37, 63—Condensation of liquefiable matters held in suspension in, 28, 97, 293—Condensation by porous bodies, 54, 212—Condensation on surface of glass, 42, 49—Conditions determinative of chemical change, and of electrical conduction in, 85, 241, 253—Constants of, 76, 158—Containing nitrogen and carbon, spectra of cathode light in, 88, 198—Containing oxychloride of carbon, analysis, 21, 107—Convection of heat in, 35, 8—Cooling and conduction of heat in, 23, 156—Delicacy of spectroscopic reactions in, 55, 209—Densities of, 67, 183, 198, 211; 69, 25; 77, 95; 96, 175; 98, 53, 68—Density at high temperatures, 41, 134; 92, 10—Dependence of the diffusion-coefficient of, upon temperature, 43, 21—Desiccation of, 61, 191—Detection and determination of small quantities of carbon disulphide in, 50, 67—Determining molecular weight, 92, 10—Detonating, combustion in differ-

ent states of dilution, 50, 93—Development of, 66, 109, 150—Dialysis of, porosity of caoutchouc relative to, 14, 175—Dielectric constant of, 39, 121—Difference in, arising from various metals, etc., under action of heat, 10, 276—Diffusibility of, 68, 109—Diffusion, 15, 115; 27, 201; 72, 122—Diffusion of, doubts in regard to law of, 31, 6—Diffusion of ions into, 79, 289—Diffusion through caoutchouc, 14, 153—Diffusion through caoutchouc sheets, 69, 277—Diffusion through india-rubber and biscuit ware, 11, 209—Diffusion through porous bodies, 8, 81—Dilatation, 1, 10—Dilatation at high temperatures, 92, 10—Discharging electrified bodies, 75, 11—Disengaged by action of cupric salts on steels, 99, 276—Disengagement from supersaturated solutions, 14, 260—Dispersion, 22, 35; 29, 196—Dissociation in metallurgical furnaces, 13, 201—Dissolved, examination of water for, 60, 109—Dissolved in molten cast-iron, steel, and wrought-iron at welding heat, 27, 117—Dissolved in natural waters, apparatus for determination, 20, 20—Dissolved in potable waters, 8, 45—Dissolved in water, estimation, 36, 237; 68, 302—Dissolved, influence on electrode potential in system of silver, silver-acetate, aq., 100, 301—Dried, combustion in, 51, 150—Dry, combination of, 67, 298—Drying, 13, 95; 25, 191—Drying and purifying, triplicate apparatus for, 86, 85—Drying by cooling, 88, 287—Effect of great pressure and cold on six non-condensable, 4, 118—Effect of temperature variations on luminous discharge in, for low pressures, 100, 150—Efflux of, 43, 195—Electric discharge in attenuated, 39, 231—Electric method for heating, 69, 207—Electro-conductivity of, 54, 200—Enclosed in coal-dust, 68, 187—Enclosed in coals from the South Wales basin, and the gases evolved by blowers and by boring into the coal itself, 31, 181—Erosive action, 40, 142—Escaping from leaden sulphuric acid chambers, oxygen in, 27, 306—Estimation of the rapport of two specific heats of, 22, 94—Evolution from homogeneous liquids, 57, 233—Evolved by heating mineral substances, meteorites, etc., 78, 305, 317; 79, 34—Evolved during action of potash on tantalite, 94, 266—Evolved during conversion of grass into hay, 47, 200—Evolved from actinium, 92, 143—Evolved from Bessemer converter, 24, 150, 173—Evolved on Island of St. Paul, 32, 156—Exchanges between living beings and the atmosphere, 69, 61—Expansion of, 20, 285; 21, 178; 22, 34, 155; 24, 85; 27, 269—Experiments on application of the measurement of, to quantitative analysis, 17, 260—Explosive, influence of light on, 64, 197—Explosive, phenomena in, 46, 77—Flowing through pipes, determination of friction with, 51, 220—Fluoric, formed in manufacture of superphosphates, utilisation, 84, 222—Force by moving, 22, 95—Formed by explosion of nitro glycerin, 24, 240—Freeing from dust, 6, 284—From coal, 82, 24—From combustion of gunpowder, mechanical and physical actions exerted by the incandescent and strongly compressed, 35, 134—From mineral eliasite, 72, 283—From mineral waters, 87, 38—From mineral waters, examination, 72, 295—From mineral waters of Baznoles de l'Orme, 75, 11—From Mont-Dore Springs, 81, 252—From Mont Pelée, composition, 87, 59—From radium bromide, helium in, 88, 100—From uraninite, 72, 271—Furnace, apparatus for determination of, 47, 227—Generated by gunpowder explosion, pressure of, 24,

158—Generator, produced by means of "Lixido" air, 84, 155—Given off by fruit, 20, 82—Given off by plants under agency of light, 5, 98—Heat equilibrium of, under influence of external forces, 35, 8—Heated, voltaic conductivity of, 43, 232—Hydrates of, formation, 57, 161, 202—Hydrates of, novel, 57, 249; 62, 110—Hydrocarbon, luminosity of flames of, 71, 181, 190, 203—Ignition at end of strip of metal, 97, 228—Ignition-temperatures of, 99, 139—In arable soil, 21, 47—In atmospheres of planets, permanence of, 80, 161—In blood, 26, 205—In cooke, 25, 98—In crystalline rocks and minerals, 75, 169—In lignite coal and mineral resin from Devonshire, 35, 249—In metals, extraction of, 97, 46—In meteorites, 35, 77—In milk, 1, 239—In minerals, 75, 169—In pipes, friction of, 63, 3—In sea-water, 20, 306—In soft water, estimation, 9, 187—In sun, 90, 103—In vine, 13, 178—In water, solubility of, 25, 311; 71, 255; 81, 13—Inactive, and radio-active elements, relations between, 100, 37—Induced radio-activity in, due to radium, 83, 191—Inert, 99, 148—Inflammable nature of, evolved in diffusion of beetroots, 48, 194—Influence of non-electrolytes and electrolytes on solubility in water, 96, 32—Influence on putrefaction, 31, 282—Interaction of highly purified, 75, 153—Intrinsic nature of, 24, 276—Ionisation by α -particles of radium, 95, 118—Ionisation by secondary rays, 99, 232—Ionisation, recording, 90, 23—Isomeric, in propylene and their sulphates, 69, 253—Kinetic theory of, 45, 140—Laws of, 33, 108—Limit-density and atomic volume of, 51, 165—Limit of chemical reactions and that of product PV in, 84, 242—Liquefaction, 2, 16; 24, 277, 289; 39, 87; 50, 249, 273; 51, 174; 66, 233—Liquefaction, in relation to state of dryness of these gases, 19, 299—Liquefiable, elastic force of, 22, 167—Liquefied, densities of, 53, 297; 81, 203—Liquefied in sealed tubes, manipulation, 84, 279—Liquefied, reclamation of priority of, 48, 34—Liquefied, researches on, 51, 27—Liquefied, substances dissolved in, conductivity, 88, 268—Liquefying, electrolytic method, 58, 127—Magnetic rotatory power at ordinary pressure and temperature, 39, 195—Manufacture, application and combustion of, 6, 140—Mazza separator for, 88, 68, 76—Measurement as a branch of volumetric analysis, 20, 103—Measurement of speed of evolution, 83, 226—Migration and syphonnet of, 34, 184—Mixture of, 77, 71; 78, 184—Moist, expansion of, 25, 285—Molecular mobility, 8, 79, 91—Molecular rotation, 27, 320—Mono-molecular unit for, 35, 124—Motion through pipes and tubes, 22, 119—Near their critical temperatures, 42, 80—New, 78, 11, 21, 31, 46—Newly discovered, 80, 267—Newly discovered, probable presence in sun, 90, 104—Nitrous, action on dicyclopentadiene, 98, 33—Nitrous, obtained from nitric acid and starch, and those of the vitriol chambers, 38, 220—Nitrous, use in sanitation and disinfection, 44, 83—Non-combustible, luminosity of benzol when burnt with, 37, 36, 61, 72, 101—Not dissociated by moderate heat, determining percentage of ozone in, 89, 201—Occluded by oxides of metals, cause of retention and release of, 79, 19, 27, 42, 52, 68—Occluded, contained in a complex manganese brass, 99, 25—Occluded in, and derived from, the pit coals of the Saar district, 27, 94—Occluded in braunkohlen, 26, 119—Occluded in charcoal at low temperatures, absorption and thermal

- evolution, 90, 73—Occluded in coal, 24, 271—Occluded, in common metals, 99, 101—Occluded in meteoric iron, examination of, 25, 202—Occluded in Saar coals, 27, 81—Occluded in steel, 97, 46—Occlusion by oxides of metals, 68, 240, 250—Occlusion in electrolysis of copper sulphate, 58, 255—Occlusion in pig iron, steel, and wrought-iron, 27, 141—Of atmosphere, 78, 265, 278, 290, 312—Of atmosphere, radio-activity of, inert, 88, 100—Of atmospheric air, separation and spectra of least volatile, 84, 37, 51—Of different densities, acoustic analysis of mixtures of, 73, 47—Of different specific gravities, analysis, 71, 113—Of Grotto del Cane, analysis, 35, 21—Of helium and argon type, 71, 271—Or liquids, transfer for currents of, 52, 310—Over mercury, preservation, 54, 227—Over water, measurement, 18, 1, 123—Oxidation with palladinised copper oxide, 73, 32, 52, 78—Oxygen and other, influence of silent discharge on, 68, 151—Passage through colloidal membranes, 28, 125—Penetration into glass sides of Crookes tubes, 73, 198—Penetration through glass, 100, 24—Permanent, coefficient of expansion, 25, 202—Permanent, determination of molecular weight of, 89, 297—Permanent, motion through pipes, 21, 214—Permeation of H_2 platinum by, 76, 168—Physics of, 78, 24—Porous materials to replace cocks in working with, 97, 60—Pressure of, influence on plants, 67, 215—Preventing escape in laboratories, 29, 27—Preventing injurious effects of, 7, 59—Produced by bacteria from certain media, collection and examination, 82, 276—Produced by explosion of dynamite on various characteristics of meteorites, researches with, 36, 100—Pure, apparatus for preparation, 88, 148—Pure, rapid development, 62, 273—Qualitative analysis of mixed, 13, 117—Rapid analysis of mixtures of, 44, 289—Rare, in natural gaseous mixtures, determination, 93, 56—Rarefied, 83, 35—Rarefied, action of magnetism on, 21, 70—Rarefied, colours exhibited by, in spectrum analysis, 21, 129—Rarefied, conduction of heat through, 100, 325—Rarefied, discharge, 43, 210—Rarefied, elasticity, 46, 107—Rarefied, electric discharge in tubes containing, 37, 237—Rarefied, enclosed in capillary tubes and illuminated by an induced current, action of magnets on, 31, 250—Rarefied, of Giessler's tubes, magnetic action on, 33, 74—Rarefied, relations of pressure, volume, and temperature, 69, 273, 298—Rarefied, separation and striation of, 67, 95—Rate of evolution from homogeneous liquids, 99, 174, 183—Rate of explosions in, 64, 70; 67, 39—Reduction of metallic solutions by, 52, 3—Refraction in, 87, 301—Refraction of, 20, 35; 29, 186; 37, 102—Relations between velocity of the propagation of sound in, and their molecular weight, 28, 20—Retained by occlusion in aluminium and magnesium, 41, 273; 42, 318—Rotatory magnetic polarisation of, 42, 24—Smoke, analysis, 46, 12—Solid solutions of indifferent, in uranium oxides, 92, 47, 111—Solubility, law of, 59, 193—Solubility of solids in, 41, 103, 133; 74, 194—Solution by molten iron, etc., 21, 119—Solution of solids and liquids in, 78, 297, 309—Sound in, 22, 96—Sparsely soluble, influence of non-electrolytes and electrolytes on solubility of, in water, 95, 163—Specific gravity, 63, 24—Specific heat, 21, 70—Specific heat under constant volume, 23, 167—Specific heats, 86, 264; 99, 18—Specific heats at constant volume, 58, 271; 62, 263—Specific heats at elevated temperatures, 45, 22—Specific heats at high temperatures, 47, 233, 246; 82, 254—Specific heats of elementary, and their atomic constitution, 75, 21—Spectra of, 4, 140; 21, 57—Spectra of, cause of interrupted, 23, 32—Spectra of, exhibited in Geissler tubes, 25, 142—Spectra of flames of, 10, 117—Spectral analysis of, 71, 281—Speed of propagation of explosive phenomena in, 44, 105; 45, 77, 162—Submitted to action of ultra-violet light, chemical changes induced in, 95, 248—Sulphur, controlling escapes of, 36, 49—Sulphur, prevention of escape of, during charging of pyrites furnaces, 39, 226—Syphonment and migration of, 34, 181—Tendency to obtain permanently active properties under the influence of electricity, 26, 106—Theory of, 31, 228—Thermal conductivity, 100, 10—Thermal properties of, 78, 200—Transferring to vacuum tubes, 72, 39—Transmission of sound by, 49, 277—Transmission through fluids of different densities, 48, 76—Transparency for X-rays, laws of, 75, 95—Unburned, from gas-stoves, etc., 62, 193—Under high pressures, experiments on, 32, 145—Under high pressure, spectra of, 20, 106—Unequal conductivity for heat, 23, 142—Velocity of ions produced in, by Röntgen rays, 81, 157—Viscosity as affected by temperature, 82, 1—Viscosity at high exhausts, 43, 85—Volatile, and air, separation without liquefaction, 90, 90—Volatile, of atmospheric air, spectrum of, 83, 1, 13—Volcanic, 16, 250—Volcanic, of Santorin, 23, 167—Volumes of, submitted to same temperature and pressure, 20, 71—Volumes of, reduction to zero of the measured, 45, 246—Waste, arising from combustion of coal, obtaining ammonia from, 5, 124—Waste, of Claus-Chance sulphur process, 97, 85

- Glucosamine, 53, 119—Hydrochlorate of, 76, 314—Iso- (*see* Isoglucosamine)
- Glucosane, 70, 72, 282—Monochloro- (*see* Monochloroglucosane)
- Glucosate of copper (*see* Copper)—Of sodium (*see* Sodium)
- Glucosazone, d -phenyl- (*see* d -Phenyl-glucosazone)
- Glucose, 23, 74; 40, 240, 299; 54, 332—Acid fermentation of, 53, 225—Action of alkalis on, 70, 209—Action of

- benzhydrazide on, 77, 155—Action of chlorides and haloids on, 24, 85
 Action of sodium arsenate on, 94, 264—Action on selenic acid, 93, 44—Added to wines, detection, 55, 201—Aldehyds, and ketones, reactions for, 74, 284—Alkaloids produced by action of ammonia upon, 52, 47—And carbonates of cerium, oxidation, 85, 263—And lactose, new reactions for, 52, 118—And mercury, determination, 38, 154—And milk sugar, reaction of, 52, 324—And nitrogen derivatives, mutarotation of, 100, 231—And sugar, distinctive character between, 12, 209—And uric acid, decomposition by alkalies, 45, 87—Anhydrous, mixed with cane-sugar, detection, 47, 252—Application of cupric solutions for detection of, 48, 49—Application of sulpho-diazobenzoyl acid for detection of, 48, 149—Bismuth test for, 14, 21
 Butyric fermentation of, alcohols contained in products of, 29, 273—Constitution, 83, 142—Containing sugars, 23, 139—Conversion of cane-sugar into, 24, 252—Crystalline, 98, 226—Derivatives, constitution, 98, 209; 100, 241—Derived base from, 83, 239—Detection, 57, 251—Detection and determination, 34, 154—Detection of small quantities of maltose in presence of, 87, 243—Detection when mixed with cane sugar, 5, 213—Determination, 55, 10; 70, 161, 221; 74, 318—Determination, new carbonated cupric liquid for, 37, 142—Determining, Pavy's method, 39, 197, 240—Estimation, 25, 338—Estimation by Fehling solution, sodium monosulphide as an indicator in, 89, 71—Estimation by stannous chloride, 85, 71—Existence and diffusion of, 78, 88—Fermentation by yeast-juice, 100, 208—Fermentation by yeast-juice, influence of phosphates on, 91, 292—Formation by leaves, 12, 292—In beer, estimation, 7, 170—In blood, detection, 67, 110—In blood, determination, 39, 162—In cane-sugar, detection, 46, 24—In sugars, estimation, 22, 120—Indigo test for, 2, 15—Manufacture, 8, 61; 20, 34—Molecular modifications, 72, 234—Mutarotation, 89, 231—Mutarotation as influenced by acids, bases, and salts, 87, 203—Nitro- (see Nitro-glucose)—Of methylene (see Methylene)—Oxidation products of, 67, 204, 204—Reaction for, 38, 145; 67, 253—Reagent for, 60, 209—Reagent for reducing, 37, 263, 264—Reduction of copper solutions by, 44, 262—Report on, 50, 116—Researches with, 71, 269—Solubility in alcohol, 3, 86—Specific rotatory power of, 46, 292—Sugar, and dextrine, added to wines, detection of, 55, 201—Sugar, colour from, 26, 217—Sugar, manufacture of, 77, 106—Synthesis, alleged, 56, 231—Synthesis from, of an octamethylated disaccharide, 92, 232—Testing glycerine for, 19, 71, 167—Tetramethyl (see Tetramethyl)—Transformation into dextrine, 44, 94—Transformation into sorbite, 62, 49—Transformation of amylaceous matter into, 2, 209—Transformation of starch into, 1, 287; 39, 104—Trimethyl (see Trimethyl)
- Glucose anilide, 98, 229
 Glucose anilides, 56, 258
 Glucose hydrazine, 98, 229
 Glucose oxime, 98, 229
 Glucose phenylhydrazones and their mutarotation, 83, 154
 Glucoses, commercial, analysis for estimation of dextrose and dextrin in, 83, 227—Conversion into monomelic and hexatomic alcohols, 23, 210—Estimation of water in, 52, 280—Pentac- (see Pentagluco-); Stereo-isomeric, 90, 32
 Glucosic fermentation (see Fermentation)
 Glucoside, a new, 83, 149—Coloured blue by iodine, 90, 183; 94, 43—Cyanogenetic, 91, 159—Di- (see Digluco-); From seeds of *erysimum*, 82, 267—From *Tephrosia purpurea*, 99, 82—From *Viola arvensis*, 50, 188—From willow bark, 81, 201—Group, synthetical researches on, 84, 107—Hydrocyanic, obtained from black elder, 92, 94—Isomeric, hydrolysis by acids and enzymes, 91, 87—*l*-Mandelonitrile (see *l*-Mandelonitrile)—Of Boldoa fragrans, 49, 266—Of iris, 68, 185—Phenolbromo- (see Phenolbromoglucoside) — Trimethyl α -methyl- (see Trimethyl)
- Glucosides, 80, 284—Action of sulphuric acid on, 2, 167—Alkylated, 91, 202—Alkylated, addition of alkyl halides to, 94, 59—Cyanogenetic, in feeding stuffs, 97, 191—Determination, 75, 25—Electrolytic researches on, 37, 263—Mandelonitrile (see Mandelonitrile)—Now, 96, 20, 137—Of a complicated structure, formation, 42, 259—Sandalina oil as a product of the decomposition of, 86, 13—Synthesis of, 5, 238; 20, 81, 83, 202, 206; 88, 218—Synthetical, preparation, 83, 222—Tartaric synthesis, 49, 287—Tetramethyl methyl (see Tetramethyl)
- Glucosidic acetates (see Acetates)
 Glucosines, 76, 314
 Glucotannoids, 87, 119
 Glue, 22, 47, 179; 24, 277; 46, 267; 57, 13; 90, 194—Analysis of, 79, 194; 81, 65—And gelatine, 20, 287, 300—Bone- (see Bone-glue)—Elastic, 20, 212—Ether, 25, 275—Fluid, 20, 212—For rendering paper waterproof, 49, 267—Gilder's preparation, 20, 47—Liquid, 18, 87—Liquid, from saccharate of lime, 27, 20—Liquid, impermeable, 28, 227—Manufacture, 7, 155—Marine, 28, 277—Or composition suitable for covering caulking of ships, 4, 251—Peptone and glue, behaviour of biliary acids with, 53, 24—Preparing, 6, 201—Rapid drying, 24, 181—Test for, 15, 9, 21, 58—Testing, 21, 264—To hold against fire, 26, 60—Valuation of hides for, 68, 173—Vegetable, 24, 169—Waterproof, 2, 168; 28, 109—Weavers, composition, 24, 168
 Glues, liquid, 1, 132
 Gluetina, 58, 50
 Gluge, O., Chloride of calcium, 39, 97, 170
 Glutaconate, dicarboxyl- (see Dicarboxyl-glutaconate)—Ethyl carboxy- (see Ethyl)—Of ethyl (see Ethyl)
 Glutaconic acid (see Acid)
 Glutamine, 35, 85; 48, 204—In juices and extracts of plants, 48, 118
 Glutaminic acid (see Acid)
 Glutarate, ethyl bromocarboxy- (see Ethyl)—Ethyl carboxy- (see Ethyl)—Ethyl methylphenyleyan- (see Ethyl)—Ethyl sodiocarboxyl- (see Ethyl)
 Glutaric acid (see Acid)
 Gluten, 42, 109—And determination in dry state, 35, 31—And starch, separation, 8, 252—Bread (see Bread)—In flour, estimation, 48, 63—In wheat, pre-existence, 67, 85—Of wheat flour, action of physical and chemical agents on, 92, 11—Preparing for food, 8, 252—Richness of wheat in, 59, 277
 Glutine, 14, 96—Chemistry of, 48, 280
 Glutinous or other viscous substances to be used in dressing textile fabrics, and for other such like processes, or in brewing or distilling, 4, 175—Substances, drying, 13, 122
 Glutz, L., Amidosulphophenol, 22, 215—Chlorosulphalic acid preparation, 17, 10—Oxysulphobenzid, 19, 280—Persulphoacetic acid and pseudo-sulphocyanogen, 21, 239—Phenyllic acid and derivatives, 17, 10—Sulphocyanogen compounds, 21, 216
 Glutz and Schmitt, M.M., Sulphuric acid and ethyl sulphocyanate, 19, 69
 Glycæmia, 34, 109
 Glyceæum, a proposed basis for ointments, 16, 167
 Glyceramin, trimethyl (see Trimethyl)
 Glycerammonium, trimethyl- (see Trimethylglycerammonium)
 Glycerates, ditolyl- (see Ditolylglycerates)—Ethylic and methylic, effect of mono-, di-, and tri-chloroacetyl groups on rotatory power of, 77, 80—Phospho- (see Phosphoglycerates)
 Glyceric acid (see Acid)—Aldehyde (see Aldehyde)—Combinations, 22, 155—Ether (see Ether)—Ethers (see Ethers)—Liquid, vibratory forms of bubbles of, 40, 190
 Glyceride, iso- (see Isoglyceride)
 Glycerides, dissociation by water, 61, 13—Fatty, stability of, 60, 42—Higher, 89, 175; 90, 223, 235—Of lead, (see Lead)—Of monobasic acids in *Cen*, 81, 140—Reaction with alcoholic alkalies, 64, 179, 201
 Glycerin, 17, 73; 21, 156, 168; 43, 293; 45, 12; 58, 293; 67, 46; 75, 264—Action of alkalis on, 87, 274—Action of aluminic iodide on, 35, 237—Action of arsenious anhydride on, 49, 258—Action of electrolytic oxygen on, 32, 84; 33, 138—Action of phosphorus trichloride on, 88, 35—Action of soda on, 43, 95—Action of sulphide of sodium on, 27, 234—Action of trichloride of phosphorus on, 86, 221—Action on ethereal solutions, 48, 227—Action on starch at high temperature, 35, 8—Analysis, 62, 249—Analysis, organic, 37, 304—And allyl compounds, 24, 145—And aromatic series, 28, 108—And chromic acid, combustion, 55, 2, 34, 46—And epichlorhydrine, identity of dichlorhydrine obtained from, 20, 275—And heat, splitting into two of hydrate of chloral by joint action of, 26, 300—And its uses in medicine, surgery, and pharmacy, 8, 274—And lignine, detection, 50, 175—And metallic oxides, compounds, 35, 197—And pancreatic digestion, 40, 191—And sodium, compound, 25, 156, 108—And water, freezing-point of, 23, 155—Applications, 2, 95, 319; 35, 1—Aqueous, analysis, 47, 36—Arsenic in, 86, 312—Arsenic in, determination, 79, 171—As a medium for colluria, 2, 306—As a tanning material, 25, 300—Barometer (see Barometer)—Bath, 18, 259—Behaviour of starch with, 45, 130—Behaviour of uric acid with, 49, 256—Behaviour with certain ethereal solutions, 50, 34—Behaviour with Fehling's solution, 52, 321—Catalytic, phenomena produced with, 14, 255—Chemical examination of commercial, 55, 297—Compounds, 21, 239; 22, 71—Constitution, 20, 47—Conversion into acetone, 27, 117—Crystallisation, 15, 26, 174; 19, 34—Crystallised, 33, 39, 57, 126—Crystals, 31, 73—Derivatives, 21, 227; 25, 179, 311; 29, 51; 34, 153—Detection, 81, 233—Detection of butyric acid in, 21, 58—Determination, 42, 175; 53, 15; 58, 208; 59, 108; 64, 201; 75, 11—Determination by oxidation, 58, 71—Determination of arsenic in, 79, 171—Diformin from, 44, 295; 45, 188—Dispersion, 20, 107—Distillation and boiling-point, 23, 115—Employment to prevent efflorescence of salts on dried carmine of indigo, 5, 171—Entanglement by water-vapour, 88, 172—Estimation, 59, 134, 170; 82, 308; 87, 274, 299, 304—Estimation by alkaline permanganate, 63, 111—Estimation by bichromate of potash and sulphuric acid, 76, 64—Estimation by means of iodic acid in presence of sulphuric acid, 87, 54—Etherification, 91, 221—Etherification of phosphoric acid by, 81, 155; 89, 34—Ethyl- (see Ethylglycerin)—Evaporation, 44, 251—Examination, 30, 42—Extraction, 49, 69—For preservation of zoologi-

- cal and anatomical preparations, 20, 120 — Free, in normal blood, 91, 59 — History, etc., 19, 287 — In beer, 42, 304; 44, 821; 47, 73 — In commercial glycerins, determination, 59, 108; 64, 201 — In crude glycerins, determination, 63, 232 — In soap lyes, 48, 160; 91, 17 — In wine, 31, 180; 33, 128; 40, 312; 44, 40; 47, 24 — In wine, determination, 41, 273; 69, 235 — In wine, estimation, 86, 305 — Its quality as it exists in commerce, 23, 155 — Liquid, Plateau's, 30, 186 — Metallic derivatives, 22, 178 — New, 48, 87 — New property of, 31, 135 — Nitrication with nitrous acids, 78, 258 — Nitro- (see Nitroglycerin) Occurrence, preparation and technical application, 22, 154 — Of aromatic series, 28, 44 — Oil, 13, 252 — Ointments, 4, 6 — Oxidation, 225, 167 — Pharmaceutical applications, 10, 187 — Physiological effects of, 43, 83 — Preparation of platinum-black by means of, 33, 261 — Production, 41, 283 — Production from propylene, 28, 44 — Products of fermentation of, produced by microzymas, 20, 164 — Purification, 20, 216; 26, 107 — Pyro- (see Pyroglycerine) — Reaction of phosphoric acid on, 77, 237; 78, 60 — Reactions and detection, 45, 36 — Reducing action, 46, 245 — Reproduction, 25, 178 — Retarding action, 36, 88 — Sensitive reactions for identification of, 99, 101 — Soap, 20, 215 — Soaps, liquid, 14, 200 — Solubility in chloroform, 21, 87 — Solubility of glue in, 22, 276 — Solubility of plumbic chloride in, 29, 161 — Solvent property of, 26, 264 — Sugar in, detection, 8, 227 — Spurious, 6, 212 — Synthesis, 78, 71 — Test for, 37, 246 — Testing for sugar, dextrin, gum, and glucose, 19, 71, 167 — Testing purity, 15, 202 — To prevent formation of incrustations in steam boilers, 29, 197 — Transparency of thin films of, 81, 267 — Use as a heating liquid, 72, 37 — Use in preserving solutions of sulphuretted hydrogen, 60, 235 — Uses and abuses of, 19, 120 — Yielded by the fats, measuring, 63, 251
- Glycerine diformine, 44, 295
- Glycerine diiodhydrine, product of decomposition, 82, 36
- Glycerine ether, 24, 300 — And monoallylic, 25, 130 — Salicylic, 36, 242
- Glycerine ethers, 28, 70 — Aromatic, action of chlorides of phosphorus on, 84, 264 — Chloronitric and bromonitric, 21, 201 — Phosphoric, 89, 70
- Glycerine fluohydrines, 65, 191
- Glycerin iodopropionic acid (see Acid)
- Glycerin monochlorhydrin, isomer of, 37, 238
- Glycerin monosalicylate, 86, 209
- Glycerin nitrates, 97, 311
- Glycerin oxalines, 28, 70
- Glycerins, analysing, 27, 306 — From allylic alcohols, 71, 234
- Glycerinate of sodium (see Sodium)
- Glycerinates, bibasic, preparation, 57, 131
- Glycerinea, solutio atropiæ, 2, 210
- Glycerinic acid (see Acid)
- Glycerioarsenic acid (see Acid)
- Glycerole, new, 14, 177 — Of aconitine (see Aconitine) — Oxidation, 78, 187
- Glycerol ethers, action of phosphorus trichloride on aromatic, 88, 251
- Glycerol monobromhydrin, 47, 39
- Glycerolates of copper (see Copper)
- Glycerophosphate of lime (see Lime) — Of quinine (see Quinine)
- Glycerophosphates, 77, 72 — Of quinine (see Quinine) — Piperazine (see Piperazine)
- Glycerophosphites and glycerophosphorous acid, 84, 242
- Glycerophosphoric acid (see Acid)
- Glycerophosphorous acid (see Acid)
- Glyceriphosphoric acids (see Acids)
- Glycide, chlorhydric, and acid chlorides, and anhydrous acids, compounds, 13, 6; 14, 81 — Dichlor- (see Dichlor-glycid)
- Glycide aryl ethers, action of ammonia on, 100, 254
- Glycide ethers and aldehydes in naphthalene series, 97, 47 — And their relations with glyceric ethers, 2, 238
- Glycidic acid (see Acid) — Ethers (see Ethers)
- Glycine, oxyphenyl (see Oxyphenyl)
- Glycobiastol, 20, 212
- Glycocholl, 48, 270 — Characters of, 31, 250 — Formation by nitracetic acid, 40, 56 — Preparation, 79, 228 — Silver (see Silver) — Synthesis of, 29, 102 — Transformation of uric acid into, 17, 179
- Glycocholl sulphates, copper (see Copper)
- Glycocholls, 48, 106 — Action of heat on, 36, 254
- Glycocine, constitution, 69, 237; 73, 106
- Glycoeyamine, 87, 152
- Glycoen, 17, 34 — Action of diastase on, 39, 64 — And glycocholl in the muscular tissue of Pecten irradians, 32, 66 — And starch, transformation by diastase, 42, 95 — Determination, 47, 259; 68, 38 — Estimation, 82, 12 — Formation in the liver, 36, 183 — From yeast, 86, 252 — In invertebrate animals, 13, 152 — In liver of an executed criminal, 52, 166 — Oxidation product of, with bromide, silver oxide, and water, 34, 153 — Preparation and estimation, 80, 268 — Preparation and quantitative determination, 51, 36 — Products of decomposition by sulphuric acid, 21, 263
- Glycogenesis in infusoria, 41, 70
- Glycolic acid (see Acid)
- Glycol, 51, 274; 73, 105 — Action of organic chlorides on, 1, 167, 204 — Action of trichloride of phosphorus on, 86, 221; 87, 192 — Amy- (see Amyglycol) — And aldehyds, combination, 57, 141 — And acetylic compounds, 21, 287 — Anetho- (see Anethoglycol) — Aromatic, 22, 21, 168, 202 — Binaphthalene (see Binaphthalene) — Binaphthylene (see Binaphthylene) — Bi-primary, 83, 167 — Butyl- (see Butylglycol) — Butylen (see Butylen) — Butylic, 34, 63 — Chlorhydric, action on toluidine, 20, 22 — Etherification, 30, 166 — Ethylene (see Ethylene) — Ethylenic, specific heat and heat of fusion, 83, 155 — Ethylenic, vaporisation and hydration, 83, 179 — Hexamethylenic, and derivatives, preparation and properties, 87, 94 — Hexanediol-1:6-heptamethylene (see Hexanediol-1:6-heptamethylene) — Hexylic, 10, 42 — In products of alcoholic fermentation of sugar, 57, 62 — Octyl- (see Octylglycol) — Of anethol (see Anethoglycol) — Of ethylene (see Ethylene) — Of methylene (see Methylene) — Pentamethylenic, synthesis, 90, 69 — Phenyl- (see Phenylglycol) — Preparation, 31, 51; 81, 143 — Propyl- (see Propylglycol) — Propylenic residues from preparation of, 66, 222 — Solidification, 51, 143 — Succinic, dissymmetric bimethylated, 95, 34 — Tetramethylenic, and its diacetic, 83, 167
- Glycolamidic acids (see Acids)

10, 121 — Action on ammoniated bases, 43, 247 — Action on batteries, 50, 284 — Action on benzol and analogous hydrocarbons, 14, 237, 249 — Action on bromine, 24, 75 — Action on carbides isomeric with anthracene, and on their hydrides, 30, 108 — Action on certain fluids, 7, 271 — Action on clays, 55, 296 — Action on cyanamid, dicyanodiamid, and melamin, 36, 153 — Action on different substances, 2, 35 — Action on ethyl sulphuric acid, 82, 253 — Action on ethylene, 69, 87, 103, 111, 125; 71, 273, 286, 298 — Action on ethylic β -amidocrotonate, 62, 306; 71, 97 — Action on formation of anilide of arsenic acid and on arseniate of aniline, 8, 20 — Action on glycoolls, 36, 254 — Action on gravitating masses, 29, 1 — Action on heptene, 55, 132 — Action on hydrates of lithium hydroxide, 97, 264 — Action on hydriodic acid, 16, 12 — Action on hydrogen peroxide, 55, 135 — Action on hydroxycarboxylic acids, 89, 81, 294; 96, 29 — Action on α -hydroxycarboxylic acids, 92, 202; 97, 105 — Action on iodic anhydride, 99, 35 — Action on iodine, 40, 87 — Action on iodobenzene dichloride, and on the meta- and para-nitro- and para-chloro-derivatives, 95, 129 — Action on iron carbonyls, 95, 97, 109 — Action on matter, 7, 170 — Action on methyldiphenylamine, 29, 155 — Action on mixtures of phosphorus sesquisulphide and sulphur in carbon disulphide solution, 89, 130 — Action on nitrate of aniline, 3, 271 — Action on nitrosyl chloride, 62, 307 — Action on oxochlorides of silicon, 25, 70 — Action on papain, 82, 71 — Action on para-iodoacetophenone dichloride, para-iodoacetanilide dichloride, and on the dichlorides derived from ortho-, meta-, and para-iodotoluene, 95, 78 — Action on pepsine, 80, 244 — Action on peroxide salts of iron, 19, 211, 228 — Action on phenylxylen, 30, 206 — Action on protoplasmic life, 24, 37 — Action on quercite, 35, 65, 88, 138 — Action on salts of tetramethylammonium, 57, 198 — Action on selenate of ammonium, 38, 133 — Action on silver nitrite, 23, 116 — Action on silver sulphite and on double alkaline sulphites, 100, 328 — Action on sodium salt of ethyl acetacetate, 96, 267 — Action on solutions of hydrated salts, 25, 31, 133 — Action on sugar, 26, 48 — Action on sulphate of strontia, 19, 190 — Action on tartaric acid, 19, 143 — Action on zircons, 19, 156 — And cold, lectures on, 17, 3, 15, 20, 42, 51, 66, 77, 92, 103, 116 — And cold, mode of development, 17, 203 — And electricity, 14, 262, 289 — And electricity, new relation between, 27, 85 — And light, modifications of elaeomargaric acid produced by, 34, 272 — And oxygen, combustion of organic matters under the double influence of, 34, 0 — And solar light, comparative effects, 55, 116 — And sound, phenomena of, 1, 177 — Animal (*see* Animal) — Apparatus for production of intense, 13, 45 — Application to cider, 56, 200 — Application to mechanical labour, 21, 84 — As a mode of motion, 8, 230, 241 — As a science of kinetics, 20, 13, 25, 53, 63 — Association with chemical force, 1, 191 — Capacity of constituents of soils, 39, 94 — Chalk as a source of, 31, 61 — Change of colour produced by, in certain chemical compounds, 24, 177, 188 — Chloride of ammonium volatilised by, 13, 294 — Colouration, 34, 108, 132 — Conductibility by amalgams, 5, 53 — Conducting power of mercury for, 14, 33 — Conduction, 24, 158 — Conduction in crystals, 28, 208 — Conduction

in dry and moist soils, 38, 90 — Conduction in highly rarefied air, 42, 309 — Conduction in soils, 36, 142 — Conduction through rarefied gases, 100, 325 — Conductivity of different soils, 50, 248 — Contraction of caoutchouc by, 19, 276 — Convection in gases, 35, 8 — Decomposition of ammonia by, 48, 302 — Decomposition of ammonium dichromate by, 97, 92 — Decomposition of cupric oxide by, 50, 213 — Decomposition of disulphide of carbon by, 19, 287 — Decomposition of lithium carbonate by, 87, 311 — Decomposition of metallic carbonates by, 27, 211 — Decomposition of potassium chlorate by, 52, 248; 53, 145 — Decomposition of white cast-iron by, 50, 116 — Developed by combustion of coal, 20, 105 — Developed by shock, distribution of, 30, 51 — Developed during reactions between bodies in the solid and gaseous state, 85, 179 — Developed in combination of acids and bases, 23, 1 — Development of, 16, 108, 210 — Diffusion of, 53, 297 — Diffusion by leaves, 39, 21 — Dilatation of petroleum by, 19, 167 — Dilatation of solid bodies by, 18, 30 — Disengaged by combination of boron and silicon with chlorine and oxygen, 21, 227 — Disengaged by combination of hydrogen with metals, 31, 8 — Disengaged in combinations of oxygen and nitrogen, 29, 112 — Dissociation of molecules by, 24, 123 — Distribution in spectrum, 40, 21 — Due to magnetisation, 45, 173 — Dynamical theory of, 6, 103 — Effect on elasticity of caoutchouc, 21, 239; 22, 95 — Effect on electro-motive force of galvanic battery, 19, 226 — Effect on iodide of silver, 30, 288; 31, 4 — Effects on alkyl iodides, 97, 10 — Emission and absorption of, 20, 192 — Employment of, 30, 8 — Engine (*see* Engine) — Equilibrium among gas molecules, 28, 157 — Evolution by emission of sound from solid bodies, 20, 167 — Evolution by friction between fluids and solids, 26, 95 — Evolution by salts of radium, 87, 159; 88, 223 — Evolution during hydration of clay-slate, clay, and coal, 30, 290 — Evolved by combustion of coal, 24, 35 — Evolved by union of H and O in closed vessels, 35, 241 — Evolved during reaction between free oxygen and potassium pyrogallate, 84, 256 — Evolved from sulphuric acid and water, 36, 246 — Evolved when boron combines with chlorine and oxygen, 21, 70 — Evolved when a liquid is brought in contact with a finely divided solid, 86, 21 — Evolved when silicon combines with chlorine and oxygen, 21, 82 — Expansion of, 29, 153 — Experiments on chemical elements in relation to, 78, 16 — Explosion by, 85, 147 — Factors of, 85, 55 — Formation of lithium hydride, 74, 270 — Given off by combustion of organic compounds, 20, 250 — Given off by the moon's rays, 20, 273 — In vacuo, action upon metals, 40, 152 — Influence of temperature on chemical development of, 29, 102 — Influence on magnetisation, 36, 89 — Influence on plants, 49, 246; 50, 248 — Influence on regeneration of sulphide of iron, 19, 273 — Insulation, 92, 51 — Internal, of earth as source of motive power, 12, 190, 262 — Internal, of earth, employment, 13, 4 — Latent, 1, 275 — Latent and sensible, 21, 192 — Latent, as explanation of well-known phenomena, 1, 251 — Latent, of fusion of solid ammonia, 85, 179 — Latent, of vapours, 35, 208 — Liberated by action of oxygen on hydrochloric acid, 23, 99, 180 — Liberated by chemical reactions in

various states of bodies, 30, 63 — Liberated by combustion of formic acid, 28, 10 — Liberated by mixture of water with sulphuric acid, 36, 250 — Liberated by mutual reaction of alkalis and water, 28, 22 — Liberated during compression of solid bodies, 50, 70 — Liberated in reaction between water, ammonia, and the alkaline earths, baryta, strontia, and lime, 27, 256 — Liberated on addition of bromine to non-saturated substances, 76, 23 — Light without, 2, 60 — Loss by imperfect combustion, 70, 248 — Measurement of, 29, 154 — Measurement of the coefficient of expansion by, 57, 210 — Mechanical equivalence of, and the British Association, 26, 92 — Mechanical equivalent of, 20, 298; 22, 70; 23, 52, 105; 40, 312 — Mechanical equivalent of, apparatus for determining, 85, 298 — Mechanical equivalent of, apparatus for measuring, 86, 22 — Mechanical equivalent of, Rumford's determination of, 29, 119 — Mechanical theory of, 20, 225; 35, 162, 231 — Mechanical theory of, application to study of volatile liquids, 33, 74 — Mechanical theory of, probable consequences of, 35, 231 — Molecular dissociation by, of compounds in solution, 24, 199, 209, 220 — Nature of, 8, 205 — Obscure refraction of, 40, 98 — Observations on, 20, 107 — Obtaining, 9, 32 — Of combination in reference to the solid state, 28, 57 — Of combination of copper with zinc, 80, 253 — Of combination, Q, minimum value of total, 84, 256 — Of combustion (*see* Combustion) — Of dissolution of various substances in different liquids, 58, 240 — Of earth's interior, influence on tunnels through high mountains, 40, 215 — Of etherification (*see* Etherification) — Of fusion, determination, 36, 195 — Of fusion, latent, 71, 34, 314 — Of ground, 44, 238 — Of heavenly bodies, measuring, 38, 26 — Of hydration, 49, 216 — Of solution and heat of dilution in complex solvents, relation between, 41, 10 — Of solution of salts, 27, 246 — Of solution of solid and liquid ammonia at about 75°, 85, 179 — Of sun, instrument for measuring, 33, 4 — Of volatilisation and heat of fusion of elements, calculation, 84, 208 — Produced by sulphate of soda with water, 30, 120 — Production by a chemical action, 27, 204; 37, 202 — Production by percussion, 15, 324 — Production, singular case of, 35, 145 — Propagation in the soil by conduction, 36, 174 — Quantity developed in interrupted and galvanic currents, 20, 96 — Radiant, 8, 43 — Radiant, absorption in gases and fats, 43, 247 — Radiant, action of gases and vapours on, 3, 266 — Radiant, action on gaseous matter, 43, 63, 84 — Radiant, and light, 25, 218 — Radiant, employment of a double wire rheometer in experiments on, 14, 210 — Radiated at low temperatures, emission, absorption, and reflection of, 21, 286 — Radiated from polished and unpolished surfaces, difference between, 12, 275 — Radiation, 22, 191 — Radiation from the moon, 21, 94 — Radiation from the moon, its absorption by our atmosphere, and its variation in amount with her phases, 27, 187 — Rays, absorption by humours of eye, 2, 207 — Rays, passage through inclined diathermanous plates, 26, 268, 296 — Red, cement to resist, 19, 156 — Reflected by moon's surface, 20, 238 — Reflection of, 21, 238 — Reflection from fluor-spar, 20, 214 — Refraction of dark, 39, 262 — Relation to electricity, 24, 251, 274 — Service of, earlier history of, 20, 184 — Sensibility of earth nut oil to, when

- electrified, 58, 259—Set free by mixing two liquids, 22, 110—Set free by reaction of the hydrides and water, 27, 153—Slow decomposition of ammonium chromate, dichromate, and trichromate by, 97, 274—Solar, and light, comparative effects of, 55, 116—Solar, cause of, 31, 180—Solar, experiments with, 33, 221—Solar, industrial application, 41, 295—Solar, industrial application in Algeria, 37, 227—Solar, reflection at surface of Lake Leman, 23, 43—Solar, utilisation, 42, 209—Specific, and atomic weight, relation between, 1, 286; 25, 39; 81, 133; 87, 100; 89, 165—Specific, determination, 21, 238—Specific, in relation to chemical combination, 5, 151—Specific, of air, 20, 46; 23, 108—Specific, of aluminium, 65, 97—Specific, of aniline, influence of temperature on, 70, 231—Specific, of aqueous solutions of chemical compounds, 22, 154—Specific, of atoms, 66, 116—Specific, of bodies, 30, 168—Specific, of boron, 29, 52; 67, 240—Specific, of carbon, 25, 262; 30, 186; 67, 265; 71, 233—Specific, of copper sulphate solutions, 92, 237—Specific, of gases, 22, 96—Specific, of a gaseous mixture of bodies in chemical equilibrium, 83, 191—Specific, of hydrogen peroxide, 73, 24—Specific, of liquid sulphurous acid, 70, 121—Specific, of liquids, 9, 293; 64, 224—Specific, of metals, 89, 165—Specific, of mixed fluids, 23, 59—Specific, of occluded hydrogen, 26, 237—Specific, of saline solutions and mixtures of liquids, 22, 191—Specific, of solid and liquid bodies, 10, 26; 22, 71, 72—Specific, of solid bodies, deductions relative to compound nature of so-called simple bodies, 8, 90—Specific, of solids, 9, 293—Specific, of solutions, determining, 92, 35—Specific, of tellurium, 57, 32—Sterilisation by, 75, 166—Theory of, according to the vibratory hypothesis, 14, 210—Theory of General Favé on, 35, 242—Theory of, probable consequences of, 34, 172—Unequal conductivity of gases for, 23, 142—Waste, of gas-work furnaces utilisation, 22, 59—Waste, utilisation of, 19, 84, 108
- Heats, latent, of vaporisation, measurement of, 71, 35—Latent, of vaporisation of organic compounds, determination, 83, 72—Of combustion (*see Combustion*)—Specific, 46, 269—Specific, and coefficients of any substance, relation between, 22, 93—Specific, apparatus for determining, 43, 204—Specific, at a constant volume in simple and compound bodies, 42, 72—Specific, calorimetric researches on, 54, 322—Specific, determination of ratio, at constant pressure and at constant volume for air and steam, 86, 266—Specific, determination of relation of two, by compression of a limited gaseous mass, 29, 50—Specific, of a gas, relation of two, 34, 206—Specific, of gases at constant volume, 58, 271; 62, 263—Specific, of gases at elevated temperatures, 45, 22—Specific, of gases at high temperatures, 47, 233, 246—Specific, of metals, 68, 58, 60, 82, 93, 105—Specific, of minerals, 54, 270—Specific, of paraffins, ratio of, 68, 39—Specific, of saline solutions, 36, 111
- Heated air (*see Air*)—Gases (*see Gases*)—Metals (*see Metals*)

- Hexabromethane, preparation, **78**, 47.
- Hexabromide, carbotrithio- (see Carbotrithiohexabromide)—Of benzene (see Benzene)—Of benzine (see Benzine)—Of silicon (see Silicium)—Of tungsten (see Tungsten).
- Hexachlorethane, preparation, **79**, 59.
- Hexachlorhydrine mannite, **62**, 56.
- Hexachloride, benzol- (see Benzohexachloride)—Modifications of chlorobenzene, **65**, 48—Of benzamide (see

- Benzamide. Of benzine (*see* Benzine).
 Of benzonitrile (*see* Benzonitrile).
 Of chlorobenzene (*see* Chlorobenzene).
 Of silicon (*see* Silicon). Of tungsten (*see* Tungsten).
- Hexachlorides of benzene (*see* Benzene).
 Hexachlorobenzene paraffin, **72**, 173.
 Hexachlorophenol, preparation, **70**, 37.
 Hexadiene, 1:1 Dimethyl- Δ 2:5-cyclo- (*see* 1:1-Dimethyl- Δ 2:5-cyclohexadiene).
- Hexafluoride of selenium (*see* Selenium).
 Of sulphur (*see* Sulphur). Of tungsten (*see* Tungsten).
- Hexaglyoxal, hydro- (*see* Hydrohexaglyoxal).
- Hexagonal blende (*see* Blende).
- Hexahydroacetophenone, **90**, 11.
 Hexahydroanthrone, **91**, 65.
 Hexahydroaromatic ketones (*see* Ketones).
 Hexahydrobenzene, 3-Bromo-1:1-dimethyl- (*see* 3-Bromo-1:1-dimethylhexahydrobenzene). 1:1-Dimethyl- (*see* 1:1-Dimethylhexahydrobenzene). Preparation, **83**, 65.
 Hexahydrobenzoic acid (*see* Acid)—Aldehyde (*see* Aldehyde).
 Hexahydrobenzoylacetate, ethyl (*see* Ethyl).
 Hexahydrobenzylideneamphors, rotatory power of, **93**, 116.
 β -Hexahydrocarvacrol, ketone derived from, **97**, 50.
 Hexahydronaphthalen and octahydronaphthalen, **35**, 242.
 Hexahydroxybenzoic acid (*see* Acid).
 Hexahydrophenylacetylene and hexahydrophenylpropionic acid, **100**, 316.
 Hexahydrophenylpropionic acid (*see* Acid).
 Hexahydromellitic acid (*see* Acid).
 Hexahydroterephthalic acid (*see* Acid).
 Hexahydrothymols, menthone derivatives, **91**, 100.
 Hexahydrozoic acid (*see* Acid).
- Hexahydroxylamine cobaltic salts (*see* Salts).
- Hexalobenzene, **66**, 141.
 Hexamethylamine, **71**, **88**; **72**, 185.
 Hexamethylammoniumcadmium chloride formation, **87**, 223.
 Hexamethylbenzine, formation by decomposition of acetone, **39**, 9—Synthesis, **42**, 132.
- Hexamethylene, **56**, 20; **71**, 107—And derivatives, **77**, 207—2:6-Diketo-4-isopropyl- (*see* 2:6-Diketo-4-isopropylhexamethylene)—Refraction and magnetic rotation, **81**, 115—Vapour pressures, specific volumes, and critical constants of, **80**, 239.
 Hexamethylenamine, **57**, 12—And derivatives, **74**, 246—Combinations, **71**, 107—Salts, **74**, 306.
 Hexamethylenedibromide, **69**, 252.
 Hexamethylenecotetracarboxylic acid (*see* Acid).
 Hexamethylenetetra-carboxylic acid (*see* Acid).
 Hexamethylenetetramine, **72**, 107. Action on ethers of chlor- and bromoacetic acids, **83**, 23—Compound of the group of, **86**, 256.
 Hexamethylthane, **93**, 270.
 Hexamethyltriimidodiphenylmethane, ammoniated bases from, **71**, 108—Derivatives, **71**, 101, 113; **72**, 198.
 Hexamminetriiodicobaltic salts (*see* Salts).
- Hexanaphthene and derivatives, **75**, 79.
 Hexane, bromocyclo- (*see* Bromocyclohexane). Bromo-1-methylcyclo- (*see* 1-Methyl-4-benzylcyclohexanol). Cyclo- (*see* Cyclohexane)—Diphenoxy- (*see* Diphenoxycyclohexane). Normal, **72**, 277—Paramethylcyclo- (*see* Paramethylcyclohexane).
- Hexane-3:3-dimethyl, cyclo- (*see* Cyclohexane-3:3-dimethyl).
- Hexanediol, orthocyclo- (*see* Orthocyclohexanediol).
- Hexanediol-1:6-heptamethylene glycol asymmetric derivatives, **96**, 83.
- Hexanerosanilines, cyclo- (*see* Cyclohexanerosanilines). Tetraoxycyclo- (*see* Tetraoxycyclohexanerosanilines).
- Hexanitroxanilide, **68**, 108.
- Hexanol, cyclo- (*see* Cyclohexanol)—Methylcyclo- (*see* Methylcyclohexanol). 1-Methyl-4-dibenzylcyclo- (*see* 1-Methyl-4-dibenzylcyclohexanol). Dimethylcyclo- (*see* Dimethylcyclohexanol). 1-Methyl-4-benzylcyclo- (*see* 1-Methyl-4-benzylcyclohexanol).
- Hexanone, benzylidene metamethylcyclo- (*see* Benzylidene)— α -Chlorocyclo- (*see* α -Chlorocyclohexanone). Cyclo- (*see* Cyclohexanone). 4-Isopropylidene cyclo- (*see* 4-Isopropylidene). Methylcyclo- (*see* Methylcyclohexanone). β -methyl- δ -alcoylcyclo- (*see* β -Methyl- δ -alcoylcyclohexanones). Methylcyclo- (*see* Methylcyclohexanones).
- Hexaphenylethane, **91**, 88; **95**, 166.
- Hexaphenylmethane, formation, **83**, 70.
- Hexarhodanate salts of molybdenum, **100**, 108.
- Hexatonic alcohol (*see* Alcohol).
- Hexatriene derivatives, synthesis, **95**, 307—Diphenyl- (*see* Diphenylhexatriene)—Magnetic rotation, **95**, 233.
- Hexenone, dimethylcyclo- (*see* Dimethylcyclohexenone). Methylcyclo- (*see* Methylcyclohexenone). Trimethylcyclo- (*see* Trimethylcyclohexenone).
- Hexoses, keto- (*see* Ketohexoses)—Magnetic rotation, **85**, 8.
- Hexoxen from mannite, **38**, 141.
- Hexyl group, **9**, 209.
- Hexylacetone, cyclo- (*see* Cyclohexylacetone).
- Hexylalcohol from heracleum oil, **26**, 11—Normal, and normal α -naphthyl acid, **35**, 162—Of heracleum oil, heptylic acid from, **26**, 230.
- Hexylamine, cyclo- (*see* Cyclohexylamine).
- Hexylcarbinol, methyl- (*see* Methylhexylcarbinol).
- Hexylchloral, **35**, 262.
- Hexyl ether, ethyl- (*see* Ethyl).
- Hexylhydride, **22**, 84—From mannite, **72**, 75.
- Hexyl iodide, hexylenbromide and monobromohexylen from mannite, oxidation products of, **38**, 273.
- Hexylketone, methyl β -methyl- (*see* Methyl).
- Hexylmethane, tricyclo- (*see* Triethylcyclohexylmethane).
- Hexylurea, pseudo- (*see* Pseudo-hexylurea).
- Hexylene formation, **9**, 305—From mannite, **72**, 75—From mannite, oxidation products of, **38**, 210—Hydruet of, conversion of acetone into, **25**, 317—Mannitic, derivatives, **48**, 71—New variety, **26**, 72, 265; **27**, 219—Normal, and derivatives, **29**, 276.
- Hexylenhydride, conversion of acetone into, **25**, 178.
- Hexylic acid (*see* Acid)—Alcohol (*see* Alcohol)—Glycol (*see* Glycol).
- Heycock, C. T., and F. H. Neville. Application of Raoult's depression of melting-point to alloys, **59**, 175—Constitution of copper-tin series of alloys, **88**, 2—Determination of some high temperatures and freezing-points, **71**, 33—Freezing-point curves of alloys containing zinc, **75**, 160—Freezing-points of alloys, **68**, 304—Freezing-points of silver and gold, **72**, 254—Freezing-points of triple alloys, **69**, 36—Gold-aluminum alloys, **80**, 281—Isolation of a compound of gold and cadmium, **66**, 289—Lowering the freezing-points of cadmium, etc., when alloyed with other metals, **66**, 289—Molecular condition of metals, **62**, 280—Molecular weights of metals, **61**, 189—X-ray photographs of solid alloys, **75**, 260.

- Hydrate, benzenesulph- (see Benzenesulphhydrate)—Butylchloral (see Butylchloral)—Butylchloralcyan- (see Butylchloralcyan)—Carbo- (see Carbohydrate)—Carbonic, **70**, 103—Chlor- (see Chlorhydrate)—Chromic, molecular transformations of, **72**, 12—Colophonic, **20**, 38; **21**, 56—Crystalline, of ferric oxychloride, **61**, 277—Cupric, action on solutions of metallic salts, **74**, 96; **75**, 60—Cupric, action on solutions of silver nitrate and basic argentic cuprate, **76**, 95—Cupric, stability, **45**, 176—Diazonium (see Diazonium)—Dinitroquinone mono- (see Dinitroquinone)—Estimation in presence of alkali carbonate, **84**, 202—Ferric, action of heat on, in presence of water, **13**, 91—Ferric, action of time on, **45**, 164—Ferric, and ferric chloroxide, **17**, 286—Ferric, colloidal compounds derived from, **50**, 45, 260—Ferric, colloidal, and ferric ethylate, **49**, 125—Ferric, isomeric modification, **46**, 93—Ferric, novel, **43**, 72—Ferric, observations on, **17**, 302—Ferrous, oxidation of, **97**, 121—Fluo- (see Fluohydrate)—Isomerism, **91**, 58—Mercurous, **55**, 150—Metallic, action on solutions of salts of other metals, **84**, 11, 36—Nickelo-nickelic, **75**, 65—Of acetylene (see Acetylene)—Of alumina (see Alumina)—Of ammonia (see Ammonium)—Of ammonium (see Ammonium)—Of barium (see Barium)—Of baryta (see Baryta)—Of bromal (see Bromal)—Of chloral (see Chloral)—Of chlorine (see Chlorine)—Of chloroform (see Chloroform)—Of chromium (see Chromium)—Of cobalt (see Cobalt)—Of copper (see Copper)—Of dimethylsparteium (see Dimethylsparteium)—Of ether (see Ether)—Of ethylene (see Ethylene)—Of hydrazine (see Hydrazine)—Of iron (see Iron)—Of magnesia (see Magnesia)—Of manganese (see Manganese)—Of methane (see Methane)—Of methylsparteium (see Methylsparteium)—Of neutral aluminium sulphate, **50**, 272—Of phenyl (see Phenyl)—Of potash (see Potassium)—Of quinine (see Quinine)—Of saline oxide of chromium, **79**, 218—Of silicon (see Silicon)—Of soda (see Soda)—Of sodium (see Sodium)—Of sodium peroxide, **71**, 23—Of strontium (see Strontium)—Of terpin (see Terpin)—Of thallic oxide, crystalline, **60**, 113—Of thorium (see Thorium)—Of thorium bromide (see Thorium)—Of thorium chloride (see Thorium)—Of trimethylsparteium (see Trimethylsparteium)—Of uric acid, **70**, 37—Phenyl sulph- (see Phenyl)—Pyrosulphochromic, **68**, 73—Rubidium peroxide (see Rubidium)—Silicononyl (see Silicononyl)— $\text{SO}_4\text{H}_2\text{H}_2\text{O}$, cryoscopic of, **69**, 120—Sodic, crystallised, **16**, 98—Sulphuric, is it volatile at ordinary temperature of air? **63**, 151—Theory of solution, application to electrolytes, **91**, 254—Theory of solutions, **62**, 185, 194; **66**, 277—Tolnol sulpho- (see Tolnol)—Vanadium trichloride (see Vanadium)
- Hydrates, **33**, 203—Action of hydrogen peroxide on, in presence of ferrous salts, **85**, 138—And double compounds in solution, **71**, 256—Argentio, **15**, 31; **16**, 66—Argentous, **15**, 31—Baric and calcic, reactions of disulphide of carbon with, **21**, 56, 81—Bearing on temperature coefficients of conductivity of aqueous solutions, **93**, 274—Carbo- (see Carbohydrates)—Cobaltous and ferrous, crystalline, **60**, 143—Cryo- (see Cryohydrates)—Dehydration by time method, **35**, 215—Dioxy- (see Dioxyhydrates)—Ferric, constitution, **40**, 228—Ferric, crystalline, **57**, 241—Ferric, researches on, **46**, 256—Formed by chloride of calcium, **43**, 290—Formed by hydracids, **37**, 102—Formed by pressure and release, **46**, 57—Gaseous, composition, **85**, 227; **86**, 316—In concentrated aqueous solutions of electrolytes, **89**, 157—In solution, **95**, 163; **96**, 32—In solution, effect of temperature of water of crystallisation as evidence for theory of, **91**, 133—Metallic, **2**, 326—Metallic, action of Rochelle salt on, **57**, 223—Metallic, action of tartrates on, **69**, 125—Metallic, energy of, deduced from hydrolysis of the salts, **84**, 280—Method for obtaining definite, **97**, 171—Of acetal (see Acetal)—Of acetal (see Acetal)—Of acetone (see Acetone)—Of alcohol (see Alcohol)—Of alkaline (see Alkaline)—Of arsenic (see Arsenic)—Of arsenic acid, **53**, 11; **97**, 239—Of barium chloride, **56**, 260—Of barium oxide, **98**, 120—Of barium peroxide, **81**, 170, 191—Of baryta (see Baryta)—Of bromal (see Bromal)—Of calcium oxide, **87**, 216—Of carbon (see Carbon)—Of chloral (see Chloral)—Of chloride of magnesium, **81**, 213—Of chloride of manganese, **81**, 209—Of chromium chloride, **93**, 305—Of chromium sesquichloride, **61**, 61, 198—Of cobalt chloride, **64**, 286—Of compounds containing a carbonyl group, **94**, 60—Of dioxides (see Dioxides)—Of fatty acids, **97**, 310—Of gases (see Gases)—Of glucinum (see Glucinum)—Of heavy metals (see Metals)—Of hydrocyanic acid, **19**, 273—Of hypophosphoric acid, **53**, 60—Of iron (see Iron)—Of isopropyl alcohol, **76**, 68—Of methylic alcohol and acetone, **89**, 244—Of molybdic acid, **91**, 75—Of monobasic acids, **27**, 283, 322—Of nickel sulphate, solubility curves of, **88**, 302
- Of nitric acid, isolation of two predicted, **66**, 297—Of platonic acid and platinate of barium, **22**, 47—Of platincyanide of magnesium, **78**, 160—Of potassium (see Potassium)—Of quaternary bases, **96**, 269—Of simple ethers, **62**, 74—Of sodium, potassium, and lithium hydroxides, **67**, 249—Of sodium peroxide, preparation, **83**, 71—Of solid soda, thermic examination, **84**, 84—Of stannic, manganic, and silicic oxides, **44**, 71—Of strontium oxide, **98**, 120—Of sulphuric acid, crystalline, **29**, 206—Of titanium trihaloid salts, **91**, 10—Of zinc chloride, **54**, 95—Production in supersaturated solutions, influence of a mechanical action on, **36**, 22— $\text{R}(\text{HO})_2$, **87**, 228—Saline, formation, **64**, 273—Stability as indicated by equilibrium curves, **96**, 33—Sulph- (see Sulphhydrates)—Sulpho- (see Sulphohydrates)—Sulphohydrated, composition and constitution, **87**, 47
- Hydrated aluminium chloride (see Aluminium)—Crystals (see Crystals)—Hydrophane (see Hydrophane)—Oxides (see Oxides)—Platincyanides (see Platincyanides)—Salts (see Salts)
- Hydration and oxidation under combined influence of free oxygen and light, **80**, 243—And viscosity in solution, **100**, 241—Heat of, **49**, 216, 220—Of anhydrite (see Anhydrite)—Of cyanides (see Cyanides)—Of oxides (see Oxides)—Of potassium carbonate (see Potassium)—Of precipitates (see Precipitates)—Of salts (see Salts)—Of tolane (see Tolane)—Reactions of, **84**, 292
- Hydraulic blowpipe (see Blowpipe)—Cement (see Cement)—Experiments, **15**, 153—Invention, **24**, 253—Lime (see Lime)—Motor (see Motor)—Press (see Press)—Silica (see Silica)—Washings, sands of, in California, probable existence of microscopic diamonds with zircons and topaz, **27**, 212
- Hydrazide, benzyl- (see Benzylhydrazide)—Dextrobenz- (see Dextrobenzhydrazide)—Glycol- (see Glycolhydrazide)
- Hydrazides, acid, **68**, 270
- Hydrazine, action on imidoethers, **71**, 17—Action on β -oxalocyl and β -oxyphenol ethylenic acetones, **90**, 117—Action on two isomeric methylbutyrylacetylacetates, **83**, 239—Action on unsaturated γ -diketones, **91**, 230—And its salts, determination, **72**, 79—Bromotolyl- (see Bromotolylhydrazine)—Compounds, **41**, 23; **46**, 78—Compounds, aromatic, **35**, 40; **36**, 53—Compounds of fatty series, **40**, 157—Dinitration, **87**, 287—Estimating, **77**, 152; **78**, 83; **82**, 192—Formation, **64**, 284; **71**, 95—Free, **73**, 86—Nitrotolyl- (see Nitrotolylhydrazine)—Orthonitrophenyl- (see Orthonitrophenylhydrazine)—Oxidation, **97**, 54, 63—Phenyl- (see Phenylhydrazine)—Salts, **58**, 39—Use in qualitative analysis, **89**, 203
- Hydrazine carbonic acid (see Acid)
- Hydrazine hydrate, action of calcium oxide on, **100**, 219—Action on bis-diazoacetic ester, **98**, 234—Action on isatin and phenols, **64**, 274—Action on phenols, **80**, 48—Methylating, **77**, 152; **78**, 83—Preparation and properties, **72**, 105—Production of certain properties, **73**, 86—Vapour density of, **89**, 223
- Hydrazine platincyanide, **93**, 19
- Hydrazine sulphate, use in analysis, **88**, 257; **90**, 247
- Hydrazines, action of chloroform and alcoholic potash on, **61**, 23—Action on chloranilic and bromanilic acids, **80**, 220—Action on glyoxylic acids, **74**, 27—Action on phenolic carbonates, **81**, 276—And ketones, action of halogens on, **98**, 187; **99**, 246—Aromatic, conversion into diazonium salts, **97**, 176—Aromatic, oxidation,

- 97, 100 Naphthyl- (see Naphthylhydrazines)—New series, 72, 205—Of benzene (see Benzene)—Of quinoline (see Quinoline)—Oxidation, 96, 281—Phenyl- (see Phenylhydrazines)—N-Tribromosubstituted, preparation and properties, 99, 234—Triethylenediphenyl (see Triethylene-diphenyl)
- Hydrazoic acids (see Acids)
- Hydrazine compounds of fatty series, 24, 218
- Hydrazoanilin, 12, 93
- Hydrobenzenes, benzoyl-derivatives, 88, 245—Derivatives, 87, 245—Dibenzoyl- (see Dibenzoylhydrazobenzene)—Properties, 85, 143—Transformation into benzidine, 86, 46
- Hydrobenzole, new compound isomeric with benzidine, 8, 29
- Hydrobenzocamphenes, oxidation products, 57, 141, 141
- Hydrozodicic acid (see Acid)
- Hydrazoic acid (see Acid)
- Hydrazomethane, 100, 172
- Hydrazene, azobenzene-diphenyl- (see Azobenzene-diphenylhydrazene)—And azo compounds differentiated by bromine, 81, 11—Benzaldehyde-diphenyl- (see Benzaldehyde-diphenylhydrazene)—Camphorquinone-diphenyl- (see Camphorquinone-diphenylhydrazene)—Isomeric forms of, 63, 123—Of glucose (see Glucose)—Oxalacetic, decomposition in aqueous and acid solution, 80, 10
- Hydrazones, 91, 277—Action of formic aldehyde on, 74, 120—Formation, 85, 100—Isodynamic, solubility as a measure of change undergone by, 91, 277—Of α -diketones and reducing sugars, thermo-chemistry of, 93, 166—Of α - β -diphenylalloxan, dynamic isomerism among the coloured, 96, 100—Phenyl- (see Phenylhydrazones)—Stereoisomeric, 86, 245—Stereoisomeric, of ethylpyruvate, 82, 243—Thermo-chemistry of, 92, 155
- Hydric acid (see Acid)—Peroxide (see Peroxide)—Sulphide (see Sulphide)
- Hydride, arsenious, action on acids, 35, 170—Of antimony (see Antimony)—Of arsenic (see Arsenic)—Of boron (see Boron)—Of butyrosalicil (see Butyrosalicil)—Of cesium (see Cesium)—Of calcium (see Calcium)—Of copper (see Copper)—Of cyanogen (see Cyanogen)—Of dicamphene (see Dicumphenone)—Of ethylene (see Ethylene)—Of geranium (see Geranium)—Of heptyle (see Heptyle)—Of hexylen (see Hexylen)—Of iron (see Iron)—Of lithium (see Lithium)—Of magnesium (see Magnesium)—Of nitrogen (see Nitrogen)—Of palladium (see Palladium)—Of phosphorus (see Phosphorus)—Of potassium (see Potassium)—Of rubidium (see Rubidium)—Of salicyl (see Salicyl)—Of selenium (see Selenium)—Of silicon (see Silicon)—Of silver (see Silver)—Of sodium (see Sodium)—Of strontium (see Strontium)—Salicylic acids from, 20, 252—2:7:9:10-Tetramethylantracene di- (see 2:7:9:10-Tetramethylantracene)—Tetraphenylantracene di- (see Tetraphenylantracene)
- Hydrides, action of ammonia on, 100, 208—And bases, quinoic, 78, 304—Metallic, electric non-conductivity of, 87, 168—Of alkaline (see Alkaline)—Of boron (see Boron)—Of halogen (see Halogen)—Of hydrocarbons (see Hydrocarbons)—Of nitrogen (see Nitrogen)—Of phenanthrene (see Phenanthrene)—Pyridic, synthesis of, 50, 24, 116
- Hydrin, d -Benzaldehyde- (see d -Benzaldehyde- (see Chlor- (see Chlorhydrin)— α -Chloro- (see α -Chlorohydrin)—Cinnamaldehyde- (see Cinnamaldehyde- (see hydrin)—Diiod- (see Diiodhydrin)—Propylenechlor- (see Propylenechlorhydrin)
- Hydrindamines, phenylchloroacet- (see Phenylchloroacetylhydrindamines)
- Hydrindamine, benzyl- (see Benzylhydrindamine)
- Hydrindamine, bromocamphorsulphonates, 81, 128—Resolution of, 86, 288
- Hydrindamine camphorsulphonates, isomeric, 83, 100
- Hydrindamine mandelates, isomeric, 83, 115
- Hydrindamine, dl Methyl- (see dl Methylhydrindamine)—Salt, isomeric, containing pentavalent nitrogen, 80, 24
- d - l -Hydrindamine salts, 83, 116
- d and l Hydrindamines, cis π camphates of, 89, 19
- Hydrindamines, d - and l -methyl- (see d - and l -Methylhydrindamines)
- Hydrindene, amidomethyl- (see Amidomethylhydrindene)—Derivatives, formation from ortho-phenylenediacetonitrile, 97, 81
- Hydrindonaphthene and tetrahydronaphthalene, derivatives, 56, 19
- Hydrindone, methyl- (see Methylhydrindone)—Synthesis, 67, 35
- α -Hydrindone and derivatives, 69, 252; 73, 9; 74, 304
- β -Hydrindone, action of bromine on, 98, 241
- Hydrindonium hydroxide, trimethyl- (see Trimethylhydrindonium)
- Hydrindonoximine, conversion, 68, 276
- Hydrine, butylene monochlor- (see Butylene)—Chlor- (see Chlorhydrine)—Dichlor- (see Dichlorhydrine)—Dichlorobromo- (see Dichlorobromohydrine)—Diiodo- (see Diiodohydrine)—Epibrom- (see Epibromhydrine)—Epichlor- (see Epichlorhydrine)—Epibrom- (see Epibromhydrine)—Monochlor- (see Monochlorhydrine)—Tribrom- (see Tribromhydrine)—Trichlor- (see Trichlorhydrine)
- Hydrides, alkylido- (see Alkylidohydrides)—Chlor- (see Chlorhydrides)—Chloro- (see Chlorohydrides)—Ciano- (see Cyanohydrides)—Iodo- (see Iodohydrides)—Of halogen (see Halogen)—Tribrom- (see Tribromhydrides)
- Hydriodate, glycolic, 16, 208—Of ammonia (see Ammonia)—Of butylene (see Butylene)
- Hydriodates of acetylene (see Acetylene)—Of allylene (see Allylene)—Of aromatic bases, 48, 95
- Hydriodic acid (see Acid)—Ether (see Ether)
- Hydriodide, diiodococaine (see Diiodococaine)
- Hydriodides and hydroxylamine, 73, 196
- Hydriozohalides derived from oxalic acid, 92, 268
- Hydroacetophenone, hexa- (see Hexahydroacetophenone)
- Hydroalcoholic mixtures, variations of densities, 88, 47
- Hydroanthracenic derivatives, 93, 305
- Hydroanthrone, hexa- (see Hexahydroanthrone)
- Hydroaromatic alcohols (see Alcohols)—Ketones (see Ketones)—Series, alcohols of (see Alcohols)—Series, aromatic compounds obtained from, 89, 93; 93, 264—Substances (see Substances)
- Hydroazo-compounds, 38, 141
- Hydrobenzamide, 76, 95—Chlorated, 79, 206
- Hydrobenzene, 5-Chloro-3-keto-1:1-dimethyl- Δ -4-tetra- (see 5-Chloro-3-keto-1:1-dimethyl- Δ -4-tetrahydrobenzene)—Chloroketodimethyltetra- (see Chloroketodimethyltetrahydrobenzene)—Di- (see Dihydrobenzene)—1:1-Dimethylhexa- (see 1:1-Dimethylhexahydrobenzene)—Dimethyl- Δ -3-tetra- (see Dimethyl- Δ -3-tetrahydrobenzene)—Hexa- (see Hexahydrobenzene)—Tetra- (see Tetrahydrobenzene)
- Hydrobenzenes, di- (see Dihydrobenzenes)
- Hydrobenzoin and isohydrobenzoin, action of dilute sulphuric acid on, 34, 270—And isohydrobenzoin, chlorides of, 35, 263—And isohydrobenzoin, substances formed from, by action of dilute sulphuric acid on, 37, 102—100 (see Isohydrobenzoin)—Transposition of, 94, 83
- Hydrobenzoxazole, anilido- (see anilido-hydrobenzoxazole)
- Hydrobenzoylacetate, ethyl hexa- (see Ethyl)
- Hydrobenzylidenecamphors, hexa- (see Hexahydrobenzylidenecamphors)
- Hydrobromate, 20, 119
- Hydrobromate, bromocupric, 69, 301—Of hydrogen phosphide, dissociation, 47, 142—Of tribromated ethylen, transformation of pyrotartaric acid into, 35, 169
- Hydrobromates of aromatic bases, 48, 95
- Hydrobromic acid (see Acid)—Acid gas (see Gas)—Ether (see Ether)—Gas (see Gas)—Solutions of cupric bromide, absorption spectra of, 69, 275
- Hydrocamphen, 43, 47—Liquid isomer of, 67, 209
- Hydrocarbid, formation of a highly condensed, 81, 95—Identity of a, 67, 158—New, 46, 302; 91, 59—Non-saturated, 38, 101—Sulph- (see Sulphhydrocarbid)
- Hydrocarbid, decaacyclene, aromatic, synthesis, 88, 251
- Hydrocarbides, action of platinum wire on, 38, 287—Acyclic chlorised, action of bromide of aluminium on, 34, 12—And chloroaluminic ferments, compounds, 91, 211—Aromatic, action of chloride of chloroacetyl on, in presence of chloride of aluminium, 76, 23—Aromatic, action of sulphur and selenium on organomagnesium compounds of mono- and dihalogen, 89, 251—Aromatic, condensation of chloral with, 92, 81—Aromatic, new series, 28, 170—Bromisation of mixed, 85, 108—Condensed, preparing, 34, 174—Dihalogen aromatic, organomagnesium derivatives in the radical, 90, 57—From coal-tar, autoxidation, 88, 67—Gaseous and liquid, formation, 74, 37—Generation by means of metallic carbides, 83, 118—Iodisation of mixed, 85, 119—Mixed with air in small proportions, palladium wire for the determination of, 37, 10—Nonsaturated, autoxidation, 86, 306—Nonsaturated, obtaining, 83, 203—Nonsaturated, preparation, 82, 60—Of peats, 47, 142—Polycyclic, synthesis, 87, 130—Raised to a red heat, action of watery vapour on, 37, 262—With amyllic radicals, active, 71, 101
- Hydrocarbon, 24, 157—Blowpipe and furnaces, 48, 35—Chains of fatty series, 78, 12—Crystalline, 43, 235—Decomposition of a normal saturated, 79, 11—Derivative, valerylene, 32, 252—Flame spectrum, origin of, 46, 293—Flames, luminosity, 66, 99—Formation, 65, 294—Formed on distillation of fatty acids in presence of superheated steam, 32, 50—From phenylglycol, 39, 171—From styrolen alcohol, 38, 273—Gases, luminosity of flames of, 71, 181, 190, 203—Groups, reciprocal displacement in Friedel and Crafts' reaction, 97, 107—In vegetable fats, 27, 304—Isomeric with anthracene, 26, 252, 277—Light, Bowditch's, 10, 192, 216—New, 15, 6, 174; 28, 21; 44, 144—Obtained from rosin oil by heating with sulphur, 40, 156—Of hexylic series, 10, 130—Of stilben series, 29, 128—Oils (see Oils)—Radicles, does magnesium form compounds with? 63, 101—Terpenoid, 39, 195—Vapours, Spontaneous ignition, 43, 194—

- Vapours, volumetric determination, 64, 293
- Hydrocarbon phenyl-naphthyl, synthesis of, 40, 3, 69
- Hydrocarbons, 20, 12; 22, 299; 33, 251
- 94, 99—Abscessions from aromatic sulpho-acids, 53, 226—Accompanying diterebenthyl in resin oils, 57, 180—Action of chloride of chromic acid on, 22, 96—Action of heat on, 14, 237, 249—Action of metallic chlorides on, at high temperature, 33, 199—Action of nitric acid upon, 3, 155—Action of nitrosylchloride upon, 40, 24—Action of phosphorus perchloride on, 53, 263—Action of potassium on, 14, 249—Action of sulphur chloride on, 80, 239—Action of volatile metallic chlorides on, at high temperatures, 35, 271—And halogen derivatives in phenol solutions, 93, 151—And oxygen, interaction of well-dried mixtures, 93, 149—And picric acid, compounds, 15, 174—And potassium, compounds, 15, 214—And rock salt, curious association in nature, 58, 87—Aromatic, 64, 310; 93, 210; 98, 266—Aromatic, action of chlorochromic acid on, 21, 23—Aromatic, and their derivatives, refraction equivalents of, 21, 173—Aromatic, chlorination in presence of aluminium-mercury couple, 83, 223—Aromatic, colour-reactions by, 40, 26—Aromatic, converted into phenols, 16, 12—Aromatic, derived from fenone, 100, 72—Aromatic, distillation by steam, 36, 212, 242—Aromatic, formation by dry distillation, 35, 217—Aromatic, introducing bromine into, in presence of aluminium bromide, 36, 20—Aromatic, new series, 23, 251, 310; 25, 46; 27, 117—Aromatic, nitrates of, 35, 185—Aromatic, of Caucasian mineral oil, 54, 97—Aromatic, organo-metallic derivatives of dihalogen, 87, 287—Aromatic, production, 52, 12—Aromatic, reduction, 26, 59—Aromatic, reduction by iodophosphonium, 22, 201—Aromatic, refractive and magnetic rotatory powers of, 81, 9—Aromatic, synthesis, 72, 49; 90, 328—Bromo- (see Bromohydrocarbons)—Calculated boiling-points by Gerhardt's theory, 13, 109—Chemistry of, 25, 175—Combination with picric acid and other nitro-compounds, 68, 275—Combustion, 51, 24—Commercial, synthesis of illuminating, 71, 27—Composition heat of, 42, 12—Condensed, direct transformation of marsh gas into, 18, 150—Condensed, synthesis of, 25, 167—Constitution, 20, 45—Conversion into ketons, 17, 83—Crystall form of halogen derivatives of open-chain, with reference to Barlow-Pope theory of structure, 97, 93—Cycloid, 61, 310—Decomposition at high temperatures, 51, 307; 84, 7—Deodorising, 8, 229; 9, 202—Derivatives, transformation of monochlorated and monobromated into mono-iodated, 87, 47—Derived from dipentene dihydrochloride, 67, 80—Detection, 61, 279—Detection of oxygen in, 2, 36, 47—Determination, 34, 110—Distillation, 18, 51; 41, 209—Distillation of dense, at high temperature, 19, 182—Empyreumatic, 26, 70—Explosive combustion, 93, 149; 94, 251; 97, 196, 212—Fluid, 49, 197—Formation, 6, 115—Formation, molecular heat of, 96, 188—From American petroleum, 75, 159—From camphor, 47, 303—From coal-tar, 10, 82; 13, 253—From oil of cumin, 13, 13—From rosin spirit, 43, 42—Gaseous, action of the induction spark on, 15, 196—Gaseous and liquid, production, 37, 274—Gaseous, combustion heat of, 68, 139; 70, 222—Gaseous, decomposition, 96, 58—Gaseous, diluted with air, limits of combustibility, 81, 299—Gaseous, production, 37, 274—Higher, critical constants and molecular complexity, 85, 47—Homologous, and paraffins found in lava from Etna, 35, 150—Hydrides of, 18, 187—Illuminating power of, 51, 126—In crude benzol, 14, 18—Inactive, new class of compounds of, 70, 211; 71, 250—Indifferent, produced in destructive distillation of Boghead coal, 5, 151—Isolated from products of action of aluminium chloride on naphthalene, absorption spectra of, 97, 308—Isomeric, 9, 283—Isomeric, sulpho acids of, 19, 286—Isomerism of, 17, 181—Light, in benzols, estimation, 52, 170—Liquid, apparatus for testing explosibility of, 9, 119—Liquid, production, 37, 274—Liquid, use of a tin bath in the fabrication of lighting gas from, 15, 195—Nitration, 65, 50—Nomenclature of, 15, 188—Non-saturated, action of nitrous acid on, 39, 34—Non-saturated, constitution, 22, 299—Obtained by action of sodium on turpentine hydrochloride, 38, 305—Obtained from homologues of cinnamic acid, 36, 211—Obtained from Pinus sylvestris, 37, 5—Of acetylene series, hydration by cadmium, zinc, and magnesium salts, 100, 208—Of aromatic series, action of iodine on, 27, 21—Of aromatic series, analysis of, 53, 29—Of benzene series, electrolytic oxidation, 90, 232; 92, 66—Of benzene series, oxidation, 95, 68; 98, 241—Of ethylene (see Ethylene)—Of formula $(C_2H_8)_n$, 46, 120—Of series C_nH_{2n} , action of oxidising agents on, 40, 44—Of series C_nH_{2n+2} , preparation of organo-metallic bodies of, 29, 118—Of series C_nH_{2n+2} , 12, 261—Of zinc, (see Zinc)—Oxidation, 21, 274—Oxidation by ozone at low temperatures, 93, 291—Oxidation in presence of phosphorus, 97, 264—Petroleum (see Petroleum)—Polychlorated, action of sulphuric acid on, 20, 46—Produced by action of acids upon manganiferous specular white cast-iron, 36, 266—Reciprocal actions of, 15, 4—Relation between boiling- and melting-points in, 81, 1—Saturated, 70, 258—Solid and liquid, obtaining from coal, peat, etc., 4, 68—Solid, found in petroleum distillates, fluorescent relations of, 26, 272—Solid, from coal-tar, 15, 322—Sulpho-acids of, 19, 22, 286—Terpene family of, isomerism in, 27, 82—Thermal decomposition, 98, 20—Thermo-chemical constants of, 95, 301—To prepare, 98, 186—Unsaturated, 77, 186—Unsaturated, in Canadian petroleum, 94, 180, 191, 200—Unsaturated, magnetic rotation, 71, 123—Vegetable, synthesis of, 65, 178—Volatile, detection, 56, 64—Volatile, researches on, 12, 279; 13, 38, 50, 63, 74, 87, 98, 109—Volatile, spontaneous polymerisation at ordinary temperatures, 53, 281
- Hydrocarbonate of lime (see Lime)—Of magnesium (see Magnesium)—Of sodium (see Sodium)
- Hydrocarbonate saccharate, 21, 215
- Hydrocarbonates, acetic derivatives from, 20, 130
- Hydrocarbostyryl and chinolin, synthesis of homologues of, 41, 251
- Hydrocarbonation of peat (see Peat)
- Hydrocarvaerol, β -hexa- (see β -Hexahydrocarvaerol)
- Hydrocarvone, cyanodi- (see Cyanodi-hydrocarvone)
- Hydrocele, analysis of the liquid of, 51, 37
- Hydrocellulose, 44, 216; 82, 255; 89, 117, 235—Production, 40, 32—Transformation into pulverulent pyroxyles, 40, 89
- Hydrocerussite, artificial reproduction, 57, 262; 58, 220
- Hydrochinon and substances related thereto, 27, 22
- Hydrochinon phthalein, and chinizarine, 27, 304
- Hydrochlorate and chromous chloride, 51, 310—Cobalt chloride (see Cobalt-chloride)—Of ammonia (see Ammonia)—Of ammonium (see Ammonium)—Of aniline (see Aniline)—Of antimony (see Antimony)—Of bismuth (see Bismuth)—Of chloride of uranyl, 83, 125—Of cocaine (see Cocaine)—Of creatinine (see Creatinine)—Of cupric chloride, 58, 220, 232, 245—Of glucosamine (see Glucosamine)—Of morphine (see Morphine)—Of phenylethylamine (see Phenylethylamine)—Of quinine (see Quinine)—Of sodium (see Sodium)—Of terebin (see Terebin)—Of urea (see Urea)—Sulphuric, 47, 142
- Hydrochlorates and chlorides, 45, 164—Of alkalies of fatty series, action of alkaline sulphocyanides on, 35, 106—Of amides (see Amides)—Of antimony trichloride, 58, 244—Of benzidine (see Benzidine)—Of chlorides (see chlorides)—Of terebenthene (see Terebenthene)
- Hydrochloric acid (see Acid)—Acid gas (see Gas)—Ether (see Ether)—Gas (see Gas)
- Hydrochloride of aniline (see Aniline)—Of narcine (see Narcine)—Of phenylhydrazine (see Phenylhydrazine)—Of thiocarbamide (see Thiocarbamide)—Of turpentine (see Turpentine)—Of urea (see Urea)
- Hydrochloroferriic colloid (see Colloid)
- Hydrocinehonidine, 46, 185
- Hydrocinehonine, 77, 117; 83, 121
- Hydrocinnamic acid (see Acid)
- Hydrocinnamide, 77, 139; 78, 60
- Hydrocotarnine, 31, 181; 32, 298; 35, 249
- Hydrocumaric acid (see Acid)
- Hydrocumarine, cumaric acid, and hydrocumarinic acid, 23, 46—Cumaric acid and hydrocumaric acid, 23, 262
- Hydrocumarinic acid (see Acid)
- Hydrocyanate of morphia (see Morphia)
- Hydrocyanates of alkaloids (see Alkaloids)
- Hydrocyanic acid (see Acid)—Gas (see Gas)—Glucoside (see Glucoside)
- Hydrocyanide of ammonia (see Ammonia)
- Hydrocyanides of diketones (see Diketones)
- Hydrocyanrosaniline, 13, 135
- Hydrodiisoeugenol, De- (see Dehydrodiisoeugenol)
- Hydrodisulphide, 98, 24—Constitution, 98, 24
- Hydrodynamical experiments, 45, 108, 129, 140; 46, 122, 149—Phenomena, 44, 313
- Hydroelectric current (see Current)—Piles (see Piles)—Sulphate of copper pile, 29, 92
- Hydroelectricity and hydromagnetism, 39, 104
- Hydroferrocyanic acid (see Acid)
- Hydrofluocerite, composition, 20, 46
- Hydrofluoric acid (see Acid)—Anhydride (see Anhydride)
- Hydrofluorides of weak organic bases, 98, 318
- Hydroflossilic acid (see Acid)
- Hydrofururan, benzodi- (see Benzodihydrofururan)— α -Trichloromethyltetra- (see α -Trichloromethyltetrahydrofururan)
- Hydrogazometer, 82, 71
- Hydrogen, absorption by melted copper, 15, 31—Absorption by metals, 60, 25—Absorption by metallic nickel, 99, 132—Absorption by palladium, 31, 55; 76, 274—Absorption by platinum black, 28, 213—Absorption by rhodium, 90, 271—Absorption by rhodium and palladium, 92, 163—Acid compounds of, combination-heats of, 51, 203—Acids (see Acids)—Action of chromic acid on, 25, 227—Action on acetylen, 20, 130—Action on antimony sulphide, 81, 202—Action on antimony trisulphide in

presence of arsenic, 87. — Action on arsenic sulphides, 82, 119. — Action on arsenic sulphides in presence of antimony, 87, 226. — Action on bismuth protosulphide, 83, 71. — Action on carbolic acid, 94. — Action on fatty oil, 33, 133. — Action on nitrobenzene, 4, 7. — Action on nitrogenous derivatives of turpentine, 55, 188. — Action on oxide of iron, 21, 285; 22, 33. — Action on perchloride of manganic, 21, 188. — Action on perchloride of phosphorus, 3, 17. — Action on realgar and inverse reaction, 83, 191. — Action on selenide of mercury, 82, 71. — Action on silver nitrate, 28, 277; 29, 273. — Action on silver sulphide, 87, 13. — Action on sodium, 88, 8. — Action on strontium amalgam, 85, 228. — Action on sulphide of mercury, 85, 172. — Action on sulphide of silver, 78, 13; 80, 13. — Active, 26, 107. — Adhesion to metals, 19, 261. — Affinity for chlorine, oxygen, and nitrogen, 25, 34. — Affinity to the metalloids, 27, 290. — Allotropic conditions of, 41, 80. — And carbon monoxide, preparation of ethylene from, 99, 13. — And air, compressibility at high temperatures, 26, 106. — And alkaline metals compounds, 29, 217. — And allyl-alcohol, combining, 23, 22. — And antiseptic, 47, 237. — And bromine, effect of light on combination of, 77, 111. — And carbon compounds, expansion by heat, 19, 262. — And carbon, determination, 77, 215. — And carbon, determination by combustion in a current of oxygen, 77, 178. — And carbon, estimation, 77, 140. — And carbon, union of, 73, 151; 74, 158; 84, 61; 94, 230; 98, 265. — And carbon and oxygen, chemical equilibrium between, 21, 141, 160, 214. — And carbon and oxygen, thermochemical relations of, 93, 37; 98, 46, 52. — And carbon disulphide combination, 80, 83. — And carbonic acid gas, 20, 287. — And carbonic oxide, absorption by melted copper, 15, 31. — And carbonic oxide, affinity of oxygen to, 36, 230. — And carbonic oxide, combustion under great pressure in oxygen, 13, 62. — And carbonic oxide, condensation by electric effluvia, 27, 233. — And carbonic oxide, decrease of the chemical force of, for reduction of protoxide of iron by admixture of foreign or other gases, 25, 142. — And carbonic oxides, affinity manifested in the slow oxidation of, under influence of platinum black, 35, 118. — And chlorine, course of period of chemical induction in, 91, 49. — And chlorine, combination in darkness, 27, 46. — And chlorine interaction, 99, 81. — And chlorine interaction, influence of gaseous oxides of nitrogen on rate of, 100, 251. — And chlorine interaction, retarding effect of oxygen on rate of, 99, 247. — And chlorine, union, 83, 31; 85, 103; 86, 44; 89, 152, 296; 90, 271; 93, 90. — And cyanogen, combination, 27, 256; 40, 88. — And fluorine, combination heat of, 60, 97. — And iron, 22, 155. — And iron and zinc, combination, 2, 15, 7. — And marsh-gas, fractionated combustion, 40, 188. — And metals, combination, heat disengaged by, 31, 8. — And metals of rare earth group, combination, 82, 203. — And methane, fractional combustion of a mixture, 88, 8. — And nickel, finely divided, direct reduction of aromatic halogen derivatives of, 89, 110. — And nickel, relations between, 98, 234. — And nitric acid, action between, 78, 243. — And nitrogen, compounds of, 75, 141. — And nitrogen, condensation by electric effluvia, 27, 233. — And nitrogen, direct union, 48, 187, 202, 279. — And nitrogen, liquefaction, 37, 311. — And oxygen and silicon compounds,

8, 171, 182. — And oxygen, combination, 44, 315; 67, 195. — And oxygen combination, influence of finely-divided platinum on, 81, 292. — And oxygen, combination under influence of the silent discharge, 45, 186. — And oxygen compounds, combination-heat of, 50, 235. — And oxygen, condensation, 20, 71. — And oxygen, heat evolved by union in closed vessels, 35, 241. — And oxygen, occlusion by lead, 65, 195. — And oxygen, occlusion by platinum-black, 72, 5. — And oxygen, properties of, 23, 60. — And oxygen, ratio of atomic weights of, 79, 268. — And oxygen, relative densities of, 57, 73; 65, 200, 206. — And oxygen, relative values of weights of, 58, 7, 17, 30, 52. — And oxygen, union, 85, 158. — And palladium, 19, 209. — And platinum, reduction with, 97, 312. — And selenium, combinations, 69, 61. — And selenium, combinations, influence of pressure on, 70, 50. — And silicon, compounds, 8, 171. — And silver, 83, 35. — And sodium hyposulphite, reaction between, 42, 182. — And solution of nitrate of silver, 28, 289, 302. — And sulphur, combination, 75, 191. — And vapours of phosphorus, reducing properties of, 25, 213. — And water-vapour mixtures, action on molybdenum, 83, 11. — And zinc combinations, 2, 217, 270. — Anomalous behaviour in solutions of lead salts, 97, 81. — Antimoniretted, 1, 94. — Antimoniretted and arseniuretted, how to distinguish, 15, 150. — Apparatus, 22, 216. — Apparatus for determination, 34, 163. — Arseniuretted, 3, 300; 27, 196. — Arseniuretted, action on mercuric chloride, 78, 256. — Arseniuretted and antimoniretted, action of concentrated sulphuric acid on, 12, 11. — Arseniuretted and antimoniretted, action of iodine on, 18, 69. — 20, 240. — Arseniuretted, poisoning by, 8, 307; 28, 315. — At both poles, electrolytic action with evolution of, 35, 39. — Atmospheric, 86, 294. — Atmospheric, origin, 82, 243. — Atom, valency of, 91, 189. — Atom, weight of, 34, 284. — Atomic weight, 68, 269; 77, 224; 89, 261, 297; 91, 176, 219; 93, 55; 97, 56, 58, 64, 76; 98, 256; 99, 60, 100, 278. — Atoms in CH_4 , have each of the four, the same function, 10, 3. — Atoms, mechanical determination, 64, 297. — Atoms of bromotoluols, 28, 293. — Behaviour of pure chlorine towards, 86, 34. — Behaviour with the alkalis, 38, 174. — Boiling-point, 50, 179. — Bottle, 19, 227. — Carburettes, 1, 46. — Chloroeyan- (*see* Chloroeyanhydrogen). — Combined, in reduced copper, 87, 311. — Combined with metals, density, 29, 220. — Compound, new, 42, 220. — Compound spectrum of, 63, 13. — Compounds, action on thionyl chloride, 74, 306. — Compounds, ignition in contact with fuming nitric acid, 22, 130. — Compressibility between atmosphere and half and an atmosphere of pressure, 89, 8. — Condensation by charcoal, 90, 145. — Condensed, diamagnetism of, 36, 61. — Conditions under which mercury causes evolution of, 99, 187. — Decomposition of sulphuric acid by, 26, 117. — Density, 64, 84. — Derivatives of phenanthrene, synthesis by naphthoic acid, 79, 276. — Desiccated by liquid air, weight of, 81, 193. — Determination, 13, 209, 217; 54, 97. — Determination by means of palladium chloride, 73, 274. — Diluted with air, limits of combustibility, 81, 209. — Disengagement during action of zinc upon copper sulphate, 35, 76. — Displacement of mercury by, 74, 263. — Displacement of metals by, 74, 47. — Dissolution in metals, 31, 196. — Electro-chemical properties of, 11, 74. — Electrolytic, reducing action on arsenious and arsenic acids, 99, 157. — Estimation, 21, 120. — Estimation,

volumetric, 81, 105. — Evolution at positive electrode, 13, 192. — Evolution during vegetation of mould, 33, 75. — Expansion of spectral rays of, 46, 149. — Experimental researches on, 39, 105. — Ferruretted, 5, 158. — Flame, 20, 177; 22, 192; 79, 276. — Flame, colouration by phosphorus, 7, 270. — Flame, colouration by phosphorus and its compounds, 11, 9. — Flames and coal-gas, nitrogen acid amongst the products of combustion of, 38, 240. — Flocculation on sun, nature of, 100, 161. — Formation, 61, 237. — Fractional combustion, 88, 244. — Free, absorption under the influence of the electric effluvia, 34, 93. — Free, and ethylene, combination, 47, 148. — Free, in atmospheric air, 79, 22. — Free, in terrestrial atmosphere, 82, 70. — From igneous rocks, 83, 65. — Gas (*see* Gas). — Gaseous, compressibility of, 58, 183. — Generation, 7, 94. — Ignition by powdered zinc, 38, 276. — In air, 77, 46; 88, 47. — In ammonia bases, 24, 145. — In atmosphere, proportion of, 87, 11, 59. — In benzol, position, 22, 144. — In blood, 70, 50. — In juices of plants, 33, 75. — In manufacture of steel, 30, 30. — In organic analysis, estimation, 7, 291. — In organic substances, determining, 96, 198. — In periodic system, 84, 154, 233. — In volatile organic liquids, estimation, 74, 50. — Introduction into organic compounds, 4, 164. — Iron reduced by, 40, 89. — Jet, how to ignite with no possibility of exploding generator, 81, 134. — Liberated from metallic surfaces, potential of, 95, 164. — Lines, new, 41, 116. — Lines, reversal of, 47, 122. — Liquefaction, 37, 3, 11; 49, 136, 148, 158, 235; 70, 115; 71, 139; 73, 219; 77, 216, 257; 82, 266. — Liquefaction and solidification, 37, 23, 83. — Liquefaction, apparatus for, 85, 298. — Liquefied, temperature obtained by release of, 51, 213. — Liquid, 77, 227; 79, 205; 81, 137, 148. — Liquid, and solid fluorine, combination, 87, 178. — Liquid, application to production of high vacua, 79, 73. — Liquid, boiling-point, 79, 61, 133; 83, 97, 109. — Liquid, boiling-point and density, 77, 261, 282. — Making pure, 98, 173. — Melting-point, 80, 159. — Metallic, 21, 218. — Metallic, application in analytical chemistry, 54, 74. — Metallic nature of, 87, 74. — Musical flame, 25, 71. — Nascent, 41, 176, 208, 284; 46, 256; 47, 143; 77, 83, 180. — Nascent, action on aldehydes, 7, 244. — Nascent, action on cinnamic acid, 6, 107. — Nascent, action on oil of bitter almonds, 28, 83. — Nascent, behaviour with oxygen gas, 49, 125. — Nascent, condensation, 20, 201. — Nascent, evolution of antimony from stibnite by, 34, 147. — Nascent, excitement of oxygen by, 40, 300. — Nascent, non-existence of, 40, 171. — Nascent, reduction of sulphuric acid by, 5, 337; 6, 311. — Non-existence of combinations with iron and zinc, 2, 181. — Occluded, and atomic weight of aluminium, 41, 285. — Occluded and nascent, analogies between the action of the copper-zinc couple and, 37, 245. — Occluded by copper, estimation, 33, 218; 37, 271. — Occlusion by metallic cobalt, 80, 297, 309. — Occlusion by palladium, 77, 317. — Occlusion by palladium, condition of, as indicated by the specific heat of the charred metals, 26, 286. — Occlusion by zinc dust, 51, 146. — Occlusion by zinc dust, source of, 52, 205. — Occlusion, specific heat of, 26, 237. — Of phosphuretted hydrogen, direct substitution of the alcohol radicals for, 23, 180. — Of water, ammonia from, 41, 155, 195, 272. — Ozonised, 4, 74. — Passage through a palladium sep-

tum, 69, 273; 98, 254.—Permeability of iron by, 9, 200.—Phenolic, bromo-substitution of, 52, 24.—Phosphuretted, 3, 80, 205; 4, 151; 19, 204, 285.—Phosphuretted, action on animal organism, 39, 102.—Phosphuretted, action on copper, copper suboxide, and ammoniacal salts of copper, 80, 11.—Phosphuretted, action on copper sulphate, 78, 279.—Phosphuretted, action on oxide, hydrate, and carbonate of copper, 80, 123.—Phosphuretted, action on salts of alkalis, 3, 327.—Phosphuretted, action on zinc ethyl, 22, 209.—Phosphuretted, derivatives, 23, 274.—Phosphuretted, preparation of calcium phosphide for production of, 99, 108.—Phosphuretted, rings of, 10, 202.—Phosphuretted, spontaneously inflammable, obtained from iodo-phosphonium, 27, 117.—Potential, liberated from metallic surfaces, 95, 164.—Preparation, 16, 217; 26, 216.—Process for industrial and economical production of, 46, 161.—Production on large scale, 24, 241.—Proper place for, 73, 283, 305.—Pure, 5, 84.—Pure, in air, quantity, 87, 11.—Purification, 40, 156.—Rays, widening of, 43, 106.—Reaction upon sulphuric acid, 76, 325.—Reactions of, 61, 205.—Reactions of sulphate and sulphide of lead with, 6, 308.—Reduced iron, preparation, 2, 305.—Reducing action in presence of palladium, 58, 103.—Reduction of metallic oxides by, 41, 92.—Reduction of oxides by, 19, 179.—Reduction of silicon by, 89, 274.—Reduction of sulphuric acid by, 28, 13.—Refraction and dispersion, 100, 297.—Refractivity of, 77, 1.—Relation to palladium, 19, 52.—Researches on, 29, 286; 38, 113.—Rubean (*see* Rubean-hydrogen).—Seleniuretted and sulphuretted, comparison between properties of, 85, 107.—Silicated, 6, 272; 19, 132.—Silicified, 39, 35.—Solid, 30, 132; 84, 281, 293.—Solid, densities of, 89, 205, 217.—Solid, formation at low temperature, 89, 145.—Solidification of, 80, 73.—Spectra, 79, 159.—Spectrum, 60, 208.—Spectrum at low pressure, 25, 111.—Spectrum, composite, 62, 288.—Spectrum, compound, 63, 13.—Stratifications of, 85, 85, 97.—Sulphuretted, 13, 168; 44, 44.—Sulphuretted, absorption of small amounts of, 57, 142.—Sulphuretted, action of ammonium metal on, 84, 279.—Sulphuretted, action of different bodies on, 19, 288.—Sulphuretted, action on acetylacetone, 84, 60.—Sulphuretted, action on arsenic acid, 58, 208.—Sulphuretted, action on bromide of boron, 75, 200.—Sulphuretted, action on certain metallic and metalloidal oxides, 94, 70.—Sulphuretted, action on granite, 30, 185.—Sulphuretted, action on manganese compounds, 21, 192.—Sulphuretted, action on methylethylketone, 88, 35.—Sulphuretted, action on nickel chloride, 46, 40.—Sulphuretted, action on nickel sulphate in acetic solutions, 46, 17.—Sulphuretted, action on peroxide of iron, 21, 46.—Sulphuretted, action on peroxide of lead, 83, 72.—Sulphuretted, action on saline solutions of nickel, 45, 174.—Sulphuretted, action on salts of cobalt, 61, 253.—Sulphuretted, action on salts of zinc, 3, 14.—Sulphuretted, action on silicates, 79, 300.—Sulphuretted, action on solution of nickel sulphate in the cold, 45, 239.—Sulphuretted, action on zinc sulphate, 59, 53.—Sulphuretted, analytical use in dry way, 40, 89.—Sulphuretted, and anhydrous aluminium chloride, compounds, 86, 24.—Sulphuretted, and arsenic pent-oxide, interaction in presence of hydrochloric acid, 92, 236.—Sulphur-

etted, and seleniuretted, comparison between properties of, 85, 107.—Sulphuretted, and sodium hyposulphite, reaction between, 42, 185.—Sulphuretted, and sulphurous acid, reaction between, 15, 318.—Sulphuretted, apparatus, 15, 240; 20, 167, 187, 321; 41, 243; 43, 191; 70, 95, 160; 74, 25.—Sulphuretted, apparatus, adapter to be used in connection with, 15, 259.—Sulphuretted, apparatus for application of, without smell, 34, 286.—Sulphuretted, apparatus for ascertaining quantity contained in crude gas, 15, 112.—Sulphuretted, apparatus for generating, 58, 69, 123.—Sulphuretted, apparatus for obtaining, 31, 103.—Sulphuretted, as a reagent, 25, 287.—Sulphuretted, behaviour of alkaline solutions of alumina with, 40, 11.—Sulphuretted, behaviour of iodine towards, 19, 297.—Sulphuretted, behaviour of nitro-compounds with, 39, 185.—Sulphuretted, behaviour with salts of heavy metals, 41, 279.—Sulphuretted, contaminated with arseniuretted hydrogen, 24, 109.—Sulphuretted, decomposition of insoluble carbonates by, 34, 51.—Sulphuretted, detection, 58, 208.—Sulphuretted, effects of, 12, 230.—Sulphuretted, estimation of copper by, 20, 118.—Sulphuretted, experiments with, 19, 44.—Sulphuretted, for purifying cobalt and nickel salts, 57, 55.—Sulphuretted, formation from water and sulphur, 21, 120.—Sulphuretted, free from arsenic, preparation, 50, 47.—Sulphuretted, gas apparatus, 53, 231.—Sulphuretted, gas generators, 74, 257.—Sulphuretted, gas purification, 48, 110, 147.—Sulphuretted, generating pure, 57, 81.—Sulphuretted, generator, 33, 67; 61, 125.—Sulphuretted, in mineral waters, 1, 107; 35, 185.—Sulphuretted, in qualitative analysis, substitution of, 71, 105.—Sulphuretted, in tobacco smoke, 1, 299.—Sulphuretted, method of generating pure non-arsenious, 58, 48.—Sulphuretted, mixed with carbonic acid, estimating, 74, 300.—Sulphuretted, obtaining a regular stream of, 21, 226.—Sulphuretted, poisoning by, 15, 35.—Sulphuretted, precipitability of iron by, 53, 300.—Sulphuretted, precipitation of zinc by, in presence of bisulphate of potassium, 34, 94.—Sulphuretted, preparation, 20, 187; 40, 154, 167; 88, 220.—Sulphuretted, preparation in chemico-legal investigations, 40, 32.—Sulphuretted, production in alcoholic fermentation, 87, 97.—Sulphuretted, purification, 64, 102.—Sulphuretted, purification for chemico-legal investigations, 48, 119.—Sulphuretted, reaction for, 50, 35.—Sulphuretted, reagent for, 55, 247.—Sulphuretted, reduction of sulphuric acid to, 6, 311.—Sulphuretted, solution, preservation, 57, 173; 62, 180; 66, 110.—Sulphuretted, solution, preservation in laboratory, 15, 218.—Sulphuretted, separation of copper and zinc by, 47, 244.—Sulphuretted, temperature of decomposition, 24, 109.—Sulphuretted, to burn oxygen or air in, 19, 154.—Sulphuretted, used for detection of arsenic, purification, 88, 213.—Sulphuretted, water, preservation, 64, 177.—Sulphuretted, water, super-saturated, 38, 275.—Sulphuric, action on arsenic acid, 57, 54.—Titanuretted, 11, 144.—Valency of, 86, 50.—Vegetation in, 67, 303.—Volatilisation of silicon in, 89, 286.—Watery vapour, etc., relations between spectra of, 56, 186, 201, 223, 232.—Weights of, 76, 304; 92, 172, 213.

Hydrogen antimonide, arsenide, and phosphide, characteristic reaction of, 90, 197.

Hydrogen binoxide, 1, 12; 6, 304.—Pro-

paration of an ethereal solution of, 4, 57.

Hydrogen boride, 63, 236.

Hydrogen bromide, action in presence of ether on carbohydrates, 77, 282.—Action on carbohydrates, 83, 92.—Determining, 47, 216.—Elimination from bromo-gem-dimethylsuccinic acid, and from bromotrimethylsuccinic anhydride, 88, 201.

Hydrogen carbide derived from amylene by subtraction of H₄, 11, 201.

Hydrogen carbides, 64, 73.—Action of fuming sulphuric acid on, 33, 64.—Action of heat on, 13, 201, 214.—Action of hydrate of potassa on sulphuretted derivatives of, 20, 153.—Action of oxychloride of carbon on, 21, 107.—Combustion and formation heats of solid, 53, 297.—Formation, synthetic method, 37, 274.—New class, 69, 270.—Oxidation, 19, 273; 31, 300.—Produced by action of acids on cast iron and steel, 30, 41.—Union with hydrides and halogens, 33, 54.

Hydrogen chloride, action of dry, on serpentine, 72, 293.—Action on ethyl-alcohol, 73, 82.—Action on oxides of calcium, barium, and magnesium, 71, 34.—And potassium chlorate, interaction, 68, 267.—Atomic weight, 68, 267.—Density, 95, 236.—Determining in solutions containing hydrogen sulphide, 47, 216.—Drying, 77, 198.—Hydrates of, 67, 129.—Magneto-rotation of, 68, 302.—Solution, influence of cane sugar on conductivity of, 83, 223.

Hydrogen chlorocyanide, 22, 59.

Hydrogen cyanide, addition to benzyldeneacetophenone, 90, 253.—Addition to carbon compounds, reactions involving, 88, 9; 90, 251, 253; 93, 291; 94, 264.—Addition to unsaturated compounds, 90, 302.—Additive compounds of unsaturated cyclic ketones with, 89, 152.—Anhydrous, preparation, 77, 124.—Constitution, 82, 45; 85, 161.—In fodder-plants, 87, 270.

Hydrogen dioxide, analytical methods involving use of, 75, 81.—And sulphides, interaction, 98, 256.—And sulphur dioxide, production of ozone in interaction between, 99, 307.—Detection and separation, 62, 227.—Estimation, comparative accuracy of titrimetric and gasometric methods, 80, 194, 204.

Hydrogen fluoride, acidimetry of, 71, 98.—Vapour density of, 59, 104.

Hydrogen iodide, determining in solutions containing hydrogen sulphide, 47, 216.—Oxidation, 59, 73.

Hydrogen ions, conception of, in catalysis, salt formation, and electrolytic conduction, 98, 317.—In solution, determining concentration of, 86, 10.

Hydrogen monochloracetate, hydrolytic decomposition by water and by alkali, 95, 116.

Hydrogen monosulphide, action on tellurous and telluric solutions, 87, 209.

Hydrogen orthophosphates, calcium (*see* Calcium).

Hydrogen oxide higher than the dioxide, supposed formation, 84, 273.

Hydrogen oxides, sulphuretted, 94, 255; 98, 281.

Hydrogen oxygen cell, potential of, 90, 203.

Hydrogen peroxide, 14, 107; 23, 203; 38, 113; 39, 163, 221; 40, 34, 44; 46, 221.—Action of blood on, 87, 113.—Action of chromic acid on, 87, 32.—Action of heat on, 55, 135.—Action of metals of platinum group on, 13, 207.—Action of sulphuric acid on, 2, 107.—Action on anhydrides, 91, 199, 40.—Action on barium oxide, 81, 168.—Action on benzoic acid, 53, 297.—Action on blood, 83, 208.—Action on carbohydrates, 77, 233; 79, 210; 82,

- Hydonaphthylamine, β -deca- (see β -Decahydonaphthylamine) — Dextro-ac-tetra- (see Dextro-ac-tetrahydonaphthylamine) — Dextrotetra- (see Dextrotetrahydonaphthylamine)
- Hydro- α -naphthylamine, deca- (see Decahydro- α -naphthylamine) — ar-Tetra- (see ar-Tetrahydro- α -naphthylamine)
- Hydro- β -naphthylamine, ar-tetra- (see ar-Tetrahydro- β -naphthylamine)
- Hydonaphthylglycols, tetra- (see Tetrahydonaphthylglycols)
- Hydronicotinic, 49, 10
- Hydronitric acid (see Acid)
- Hydropapaverine, tetra- (see Tetrahydropapaverine)
- Hydroparacoumaric acid (see Acid)
- Hydroparatolquinaldine, tetra- (see Tetrahydroparatolquinaldine)

- Hydrotolquinon derivatives, 38, 253
- Hydrotolulphide, constitution, 98, 24
- Hydroumbelloneoxime, hydroxylaminodi- (see Hydroxylaminodihydroumbelloneoxime)
- Hydrous, not hydrated, 17, 47
- Hydroxanthranol, 64, 152—Di- (see Dihydroxanthranol)
- Hydroxide, chromic, behaviour towards oxalic acid and certain other organic acids, 90, 254—Cupric, in alkaline electrolytes, electromotive behaviour, 100, 287—Cupric, solubility in ammoniacal sulphate solutions, 99, 705—Ferric, conversion into ferric oxide, 49, 203—Ferric, modifications, 51, 155—Ferric, properties of colloidal, 92, 257—Manganous, 88, 194, 208—Of aluminium (see Aluminium)—Of ammonium (see Ammonium)—Of barium (see Barium)—Of calcium (see Calcium)—Of copper (see Copper)—Of lithium (see Lithium)—Of magnesium (see Magnesium)—Of potassium (see Potassium)—Of sodium (see Sodium)—Of tetramethylammonium (see Tetramethylammonium)—Of trimethylhydrindonium (see Trimethylhydrindonium)—Of trimethylplatinimethyl (see Trimethylplatinimethyl)—Of zinc (see Zinc)—Of zirconium (see Zirconium)
- Hydroxides, chloro- and bromo-naphthalenediazonium, interchange of halogen for hydroxyl in, 87, 20—Estimation, 74, 110, 197—Inorganic, action of silver nitrate and mercuric nitrate on, 97, 60—Metallic, amphoteric, 97, 82—Metallic, compounds with iodine, 74, 259—Metallic, dehydration by heat, 56, 207—Metallic, obtaining electrochemically, 74, 181—Obtained from acridine, methylacridine, and phenanthridine methiodides, constitution, 93, 243—Of alkaline (see Alkaline)—Of ammonia (see Ammonia)—Of aluminium (see Aluminium)—Of benzenediazonium (see Benzenediazonium)
- Hydroxilation by direct oxidation, 48, 183, 194
- Hydroximidodisulphates, potassium nitrate (see Potassium)
- Hydroximosulphates, isomerides of, 93, 76
- Hydroxy acids (see Acids)—Derivatives of benzaldehyde and acetophenone, 100, 31—Groups, influence on velocity of saponification, 99, 248
- Hydroxyacetophenone, ortho- (see Orthohydroxyacetophenone)
- Hydroxyaldehydes, aromatic, action of nitric acid on ethers of, 99, 295
- Hydroxyamidodisulphates, decomposition by copper sulphates, 82, 23
- Hydroxyamines, acyl- (see Acylhydroxyamines)
- Hydroxyanthraquinones, methyl ethers of, 96, 316
- Hydroxy-aquo-tetrammino-cobaltic salts (see Salts)
- Hydroxyazo-compounds, constitution, 92, 234; 95, 116; 97, 166; 100, 230, 252—Para- (see Parahydroxyazo-compounds)
- Hydroxybenzoic acid (see Acid)
- Hydroxybutyric acid (see Acid)
- Hydroxycamphene, 83, 213—Conversion into halogen derivatives of camphor, 85, 93
- Hydroxycamphorcarboxylic acid (see Acid)
- Hydroxycarboxylic acids (see Acids)
- Hydroxydibromocamphor-sulphonate acid (see Acid)
- Hydroxydimethylglutaric acid (see Acid)
- Hydroxydinicotinate, di- (see Dihydroxydinicotinate)
- Hydroxydiphenyl, di- (see Dihydroxydiphenyl)
- Hydroxydiphenylamine, para- (see Parahydroxydiphenylamine)
- Hydroxyheptamethylene, dimethyldi- (see Dimethyldihydroxyheptamethylene)
- Hydroxyl, 19, 143, 156—Derivatives in mixtures of organic compounds, 99, 115—Displacement of halogens by, 95, 116—Group in derivatives of anhydroacetonebenzil, proofs of presence of, 100, 241—Group, reagent for, 57, 222—Groups, quantitative determination, 95, 302—Of carbinols, replacement by radical, 94, 304—Radicles, estimation, 89, 19—Replacement by bromine, 91, 291
- Hydroxylamidoanthraquinone, 87, 131
- Hydroxylamine, 13, 182; 47, 277; 80, 231—Action, 89, 22; 90, 10, 117—Action on anhydrides of bromonitrocamphane, 83, 222—Action on dithiobenzoylacetone, 81, 225—Action on halogen derivatives of methylphenylketone, 87, 47—Action on komanic acid, 50, 117—Action on nitriles, acetylenic amides, and etheral salts, and on corresponding β -ketonic compounds, 96, 12—Action on orthobenzoylquinone diazides, 95, 309—Amidoid derivatives of, 44, 48—Amidous derivatives of, 34, 153—And sulphate of nickel, combination, 82, 87—Benzol derivatives of, 25, 202—Colour reaction of, 85, 68—Decomposition by alkaline cupric solutions, 35, 208—Decomposition in presence of hydrogen ferrocyanide, 94, 160—Detection, 72, 258—Determination, 74, 203—Determination, alkalimetric, 100, 208—Determination, volumetric, 36, 254—Determination, volumetric, by means of trivalent titanium, 91, 59—Di- (see Dihydroxylamine)—Diacetone- (see Diacetonehydroxylamine)—Electrolysis, 81, 56—Estimating, 77, 152; 78, 83; 88, 277—Estimating volumetrically, 87, 47; 91, 176—Free, experiments, 70, 111—Hydrolysis, 81, 56—Of zinc (see Zinc)—Oxidation, 84, 220—Phenyl- (see Phenylhydroxylamine)—Production from nitric acid, 48, 223—Products of reduction of copper salts by, 87, 142—Reaction of alkyl iodides with, 79, 124—Reactions, 48, 236, 304—Salts, action of potassium permanganate on, 91, 163—Synthesis, 21, 24, 94; 79, 150—Use in qualitative analysis, 89, 203
- Hydroxylamines, action on imidechlorides and anilidoxides, 77, 225—Alkylated, formation, 79, 124, 237
- Hydroxylamine- α - β -disulphonates, 93, 76; 94, 276, 285
- Hydroxylamin chlorhydrates, 24, 265; 25, 22
- Hydroxylamine chlorhydrate and acetone, equilibrium between, 91, 293
- Hydroxylamine platino-cyanide, 93, 19
- Hydroxylamine sulphate, 75, 181—Acid, 71, 72—Preparation, 74, 260—Volumetric determination, 74, 293
- Hydroxylaminetrisulphonates, 89, 17
- Hydroxylamino, diazo- (see Diazohydroxylamino)
- Hydroxylaminodihydroumbelloneoxime, reduction, 95, 91
- Hydroxylates, di- (see Dihydroxylates)
- Hydroxylauric acid (see Acid)
- Hydroxylcaprylic acid (see Acid)
- Hydroxylenes, phenol (see Phenol)
- Hydroxylation of pyridin-derivatives in lateral chain, 53, 228
- Hydroxyl urea, 19, 241, 298

- Hydroxymethylolacetic acid (*see* Acid)
 Hydroxymethylenephenylacetate of menthyl (*see* Menthyl)
 Hydroxynaphthalene, di- (*see* Dihydroxynaphthalene)
 Hydroxy-nitrates, silver mercurous-mercuric (*see* Silver)
 Hydroxy-nitrosotramminocobaltic salts (*see* Salts)
 Hydroxy-orthobutic acid (*see* Acid)
 Hydroxyoxamides, **86**, 278—Reactions of, **83**, 273
 Hydroxy-pentamminocobaltic salts (*see* Salts)
 Hydroxyphenylazoimide, meta- (*see* Metahydroxyphenylazoimide)—Ortho- (*see* Orthohydroxyphenylazoimide)
 Hydroxyphenylethane, α -phenyl- α -4- (*see* α -Phenyl- α -hydroxyphenylethane)
 Hydroxyphenylethylamine, para- (*see* Parahydroxyphenylethylamine)
 Hydroxyphthalic acids (*see* Acids)
 Hydroxy-pyrazolone 5-phenyl-1- (*see* Phenyl-1-hydroxy-5-pyrazolone-3)
 Hydroxypridine, benzylidene (*see* Benzylidenehydroxypridine)—Di- (*see* Dihydroxypridine)
 Hydroxypyrene derivatives, **86**, 11
 Hydroxystearic acid (*see* Acid)
 Hydroxytetramminoplatinum, di- (*see* Dihydroxytetramminoplatinum)
 6-Hydroxy- α -trimethylglutaric acid (*see* Acid)
 Hydroxytrimethylsuccinic ester (*see* Ester)
 Hydrozincite discovered at Aronzo (Para), **25**, 143
 Hyduret of hexyl (*see* Hexylen)
 Hydrilic acid (*see* Acid)
 Hygiene and Demography, International Congress, **63**, 32, 74; **69**, 236; **71**, 63; **77**, 72, 166—And public health, lectures on, **39**, 185—And therapeutics, **24**, 86—Congress International d', **38**, 49—Industrial, prize for, **31**, 167; **85**, 72; **95**, 108—Nature's, **37**, 19
 Hygiene congress at Brussels, **34**, 170—Researches, **63**, 201—Signification of drinking water, **46**, 149—Vinegars (*see* Vinegars)—Waters (*see* Waters)
 Hygienico-chemical methods of investigation, **21**, 343
 Hygrometer, **20**, 44, 177; **25**, 123; **92**, 205—Acting by absorption, **21**, 274—Electrical dew-point **87**, 245—Gravimetric recording, **87**, 245—Hair, **22**, 84—In the exsiccator, **50**, 188—New condensation, **45**, 275—Sensitive, **90**, 242—Value of so-called chameleon barometer as, **31**, 88
 Hygrometers, new models, **52**, 47
 Hygrometric condition of the air and rainfall, influence of leafy trees and conifers on, **36**, 100—Method, **84**, 302
 Hygrometry, **25**, 58
 Hygroscopic moisture in nitrocellulose, **70**, 247—Moisture of soil, significance for vegetation, **53**, 49
 Hynd, A., and J. C. Irvine (*see* Irvine, J. C.)
 Hyndman, H. H. F., "Radiation" (review), **78**, 195
 Hyoscyanine, **20**, 301—Crystalline, **45**, 164—In *Hyosyamus muticus* of India, **78**, 324—In lettuce, **64**, 317—Preparation and constitution, **20**, 181; **22**, 179; **23**, 120
 Hyosyamus muticus grown in Egypt, alkaloids of, **82**, 299
 Hyperbolograph, **53**, 309
 Hyperborates, **79**, 106, 218—Fluo (*see* Fluohyperborates)
 Hyperidic acid (*see* Acid)
 Hypersthenite, crystalline form, **21**, 179
 Hypertitanates, **79**, 106, 218
 Hypertitanic acid (*see* Acid)
 Hyperuranic acid (*see* Acid)
 Hypervanadic acid (*see* Acid)
 Hypionic fluorides (*see* Fluorides)
 Hypobromic acid (*see* Acid)
 Hypobromite, estimation of urea by means of, **35**, 81, 114, 122, 125—Of alkaline (*see* Alkaline)—Of baryta (*see* Baryta)—Of soda (*see* Soda)—Of sodium (*see* Sodium)
 Hypobromites, action on amides, **87**, 90—Of alkaline (*see* Alkaline)
 Hypobromous acid (*see* Acid)
 Hypochlorates and hypobromites, comparisons of actions on nitrogen compounds, **38**, 240—C₁₀H₁₀HCl, isomerism of, **31**, 280
 Hypochloric acid (*see* Acid)
 Hypochloride of alumina (*see* Alumina)
 Hypochlorine, **42**, 240
 Hypochlorite, calcic, **46**, 120, 148—Calcic, from bleaching powder, **31**, 113; **32**, 2—Of lime (*see* Lime)—Of magnesia (*see* Magnesia)—Of soda (*see* Soda)—Of sodium (*see* Sodium)—Of zinc (*see* Zinc)—Production, relation of stability to electro-chemical efficiency in, **92**, 294
 Hypochlorites and ammonium salts, interaction, **61**, 117—And chlorates, formation, **81**, 19—And chlorides and chlorates, analysis of a mixture, **73**, 157, 169—And kaolin in paper, **9**, 144—Concentrated solutions of, electrolysis, **82**, 107—Electrolytic production, **79**, 110—Of alkaline (*see* Alkaline)—Purification of water supplies by use of, **100**, 321—Transformation into chlorates, **88**, 149
 Hypochloronitric acid (*see* Acid)
 Hypochlorous acid (*see* Acid)—Anhydride (*see* Anhydride)—Gas (*see* Gas)
 Hypogaeic acid (*see* Acid)
 Hypogallie acid (*see* Acid)
 Hypiodides, **75**, 97; **76**, 17, 27—Estimation, **81**, 236
 Hypiodous acid (*see* Acid)
 Hypionibic acid (*see* Acid)—Compounds, **11**, 71
 Hypionitric acid (*see* Acid)—Anhydride (*see* Anhydride)—Gas (*see* Gas)
 Hypionitrite, mercurous, and silver hypionitrite, decomposition by heat, **95**, 177; **96**, 302—Of silver (*see* Silver)—Preparation from nitrite through oxyamidousulphonate, **78**, 313
 Hypionitrites, **47**, 93; **49**, 45; **60**, 25; **68**, 266; **78**, 314—Formation, **55**, 243; **56**, 236—Formation from nitric oxide, **51**, 188—Of mercury (*see* Mercury)
 Hypionitrous acid (*see* Acid)
 Hypophosphate of silver (*see* Silver)—Of soda (*see* Soda)—Of Thallium (*see* Thallium)
 Hypophosphates, thio- (*see* Thiohypophosphates)
 Hypophosphite of bismuth (*see* Bismuth)—Of copper (*see* Copper)—Of iron (*see* Iron)—Of mercury (*see* Mercury)—Of platinum (*see* Platinum)—Of quinia (*see* Quinia)—Of soda (*see* Soda)—Platinous, **43**, 234
 Hypophosphites, physiological part of, **38**, 33—Preparation, **2**, 175, 186
 Hypophosphoric acid (*see* Acid)
 Hypophosphorous acid (*see* Acid)
 Hyposulphate of soda (*see* Soda)
 Hyposulphates, **21**, 179—Rotatory power of, **29**, 93
 Hyposulphite, action of iodine on, **21**, 103, 141, 164—Decomposition, **77**, 95—Of baryta (*see* Baryta)—Of copper (*see* Copper)—Of lead (*see* Lead)—Of lime (*see* Lime)—Of potassium (*see* Potassium)—Of soda (*see* Soda)—Of sodium (*see* Sodium)—Sodic, and iodine, preparation of titrated solutions of, **89**, 311—Solution, titration, **83**, 207—Solutions, time for precipitation, **91**, 162
 Hyposulphites, **26**, 28, 210, 295, 285—Action of acids on, **59**, 277—Action of peroxide of hydrogen on, **85**, 36—Analysis, **26**, 314—Sulphides and sulphites in same solution, analysis of, **27**, 23—Sulphides, sulphonydrates, and polysulphide coexisting in solution, estimation, **83**, 154—Conversion into sulphates, **50**, 58—Decomposition, **56**, 47—Detection, **86**, 60—Determination, **39**, 135—Double, **4**, 8—Estimation, **37**, 224—In diseases of silkworms, **8**, 108—
 In sulphuretted springs, **31**, 218—Metallic, hyposulphates, and hypophosphates, phenylhydrazino compounds of, **80**, 147—Of alkaline (*see* Alkaline)—Of aromatic amines, **85**, 36—Reactions of, **7**, 8; **56**, 58—Sensitive test for, **22**, 167
 Hyposulphuric acid (*see* Acid)
 Hyposulphurous acid (*see* Acid)
 Hypothesis, atomic, **25**, 309
 Hypovanadic acid (*see* Acid)
 Hypoxanthine, 2-phenyl- (*see* 2-Phenylhypoxanthine)
 Hysterical chemistry (*see* Chemistry)
 Hysteresis, magnetic, loss in straight iron strips, **75**, 297—Magnetic, variations with frequency, **90**, 266

 imide) — Metahydroxyphenylazo- (*see*
 Metahydroxyphenylazoimide) —
 Methylcamphor- (*see* Methylcamphor-
 imide) — Of silicon (*see* Silicon) —
 Orthohydroxyphenylazo- (*see* Ortho-
 hydroxyphenylazoimide) — Phenyl-
 azo- (*see* Phenylazoimide) — Phthal-
 (*see* Phthalimide) — Silicodiphenyl-
 di- (*see* Silicodiphenyldiimide) —
 Silicophenyl- (*see* Silicophenylimide)
 — Succin- (*see* Succinimide)
 Imides, acid, abnormally coloured com-
 plex salts of, **95**, 179 — Action of
 mixed organo-magnesium compounds
 on, **94**, 195 — Aromatic, of camphoric
 acid, **96**, 278 — Arylsulphonylparadi-
 azo- (*see* Arylsulphonylparadiazoi-
 mides) — Azo- (*see* Azoimides) —
 Conversion of nitriles into, **36**, 243;
39, 34; **48**, 214—Naphthylazo- (*see*
 Naphthylazoimides) — Of bibasic
 acids, **46**, 280 — Organic, complex
 compounds of, **95**, 299 — Paradiaz-
 (*see* Paradiazimides) — Substituted,
 formation, **65**, 311
 Imidodithiocarbonic ethers (*see* Ethers)
 Imidonaphthol, diphenyl- (*see* Di-
 phenyldimidonaphthol)
 Imidosulphates, potassium nitrohydrox
 (*see* Potassium)
 Imidosulphite of ammonium (*see* Am-
 monium)
 Imidosulphites, **84**, 6
 Imidosulphonates, **66**, 290; **74**, 269
 Imidosulphonic acid (*see* Acid)
 Iminazolone, iso- (*see* Isoiminazolone)
 Imine, decamethylene- (*see* Decamethy-
 lenimine) — Ethylidine- (*see* Ethyl-
 idenimine)
 Iminephenylamine, phenylamidoethane-
 oxy-methanephenyl- (*see* Phenylamido-
 ethaneoxymethanephenylaminephenyl-
 amine)
 Iminobenzene, paradiazo- (*see* Paradiazo-
 iminobenzene)
 Iminocamphor, aryl derivatives of, **99**,
 246
 Imino-chlorides, action on organo-mag-
 nesium derivatives, **93**, 187
 Imino-compounds, alicyclic, transforma-
 tion of aliphatic nitriles into, **99**,
 82 — Formation and reactions, **90**,
 301; **94**, 263; **95**, 140, 283; **96**, 242;
97, 81; **99**, 19, 104, 177; **100**, 240,
 264
 1-Imino-2-cyanocyclopentane, formation
 from adiponitrile, **100**, 264
 Iminoethers, action on organomagnesium
 derivatives, **93**, 187 — Aliphatic, pre-
 paration from amides, **83**, 180 — And
 allied compounds corresponding with
 substituted oxamic esters, **89**, 293 —
 Corresponding with ortho-substituted
 benzenoid amides, **87**, 294 — N-Sub-
 stituted, molecular rearrangement,
87, 113 — Synthesis, **85**, 164; **87**, 87
 Iminosulphates, hydrox- (*see* Hydrox-
 iminosulphates)
 Iminothiocarbonates of alkyl (*see* Alkyl)
 Iminothiocarbamic acid (*see* Acid)
 Immerheiser, C., and L. Medicus, Fer-
 mentability of dextrines, **66**, 150 —
 Quantitative determination of lead,
66, 224
 Immersion lenses (*see* Lenses)
 Immortals, inspiration from, **84**, 59
 Impedance of solutes in solvents as mani-
 fested by osmotic pressure, **95**, 164
 Impedance and admittance, **74**, 8
 Imperial Academy of Sciences of
 Vienna, **72**, 289 — Agricultural Col-
 lege, **21**, 191—College of Chemistry
 and Pharmacy, **76**, 135; **80**, 111; **82**,
 148; **84**, 124; **86**, 124; **88**, 124; **90**,
 136; **92**, 132; **94**, 124; **96**, 124; **98**,
 148—College of Science and Tech-
 nology, **98**, 135; **100**, 135—Institute,
65, 306; **76**, 241, 254—Institute, ex-
 hibit of Irish minerals and building
 stones at, **87**, 107—Institute, scien-
 tific and technical department, **74**,
 217, 241—Observatory at Paris, **21**,
 84, 94—Russian Technical Society,
56, 80
 "Imperialine," a novel alkaloid, **60**, 73
 Impersonation, a warning, **99**, 71
 Imponderable ether (*see* Ether)
 Imponderables, energies of, with refer-
 ence to the measurement and utiliza-
 tion of them, **28**, 5, 15, 28, 54, 67,
 78, 92, 104, 109, 130, 153, 176, 100,
 199, 223, 236, 273, 284, 309, 319; **29**,
 3—Theory of, **12**, 35
 Impostors, notice to, **49**, 179
 Inactive elements (*see* Elements)—Gases
 (*see* Gases)—Borneols (*see* Borneols)
 Inactose of neutral sugar, **57**, 170
 Incandescence, **28**, 110—Of ammonio-
 phosphate of magnesia and pyro-
 phosphate of magnesia (*see* Mag-
 nesia)—Of copper (*see* Copper)—Pro-
 duction of phenomena of, **24**, 168
 Incandescent bodies, investigation of,
77, 210—Carbon (*see* Carbon)—Fuel
 (*see* Fuel)—Gas burners (*see* Gas)—
 Illuminants (*see* Illuminants)—Iron
 (*see* Iron)—Lamps (*see* Lamps)—
 Lighting (*see* Lighting)—Mantel (*see*
 Mantel)—Mantles (*see* Mantles)—
 Platinum (*see* Platinum)—Solids (*see*
 Solids)—Substances action in trans-
 mission of electricity, **28**, 81
 Ince, Joseph, "Latin Grammar of
 Pharmacy" (review), **89**, 46—Theory
 of the Universal Codex, **15**, 184
 Ince, W. H., Formation of phenylindoles,
59, 219—Phenyltribrommethane, **52**,
 315—Preparation of adipic acid, **71**,
 34
 Ince, W. H., and W. R. Dunstan (*see*
 Dunstan, W. R.)

- Incense resin, 32, 277
 Incheley, O. and W. E. Dixon, Cilio-scribe, 89, 308
 Incorporated paper (see Paper)
 Incineration, apparatus and method for, 86, 238—New method, 24, 97—Of filters (see Filters)—Of flour (see Flour)
 Incinerations, organic, combustion of carbon in, 47, 195
 Incombustible colours (see Colours)—Paper (see Paper)
 Incrustation from stone gallery of St. Paul's Cathedral, 84, 1—In steam boilers and in tanks for containing oil for some preventing, 4, 189—Of an old dome, 32, 220
 Incrustations in boilers, 20, 164, 286; 57, 121—Of boilers, 14, 144, 215; 22, 72; 29, 14; 31, 251; 32, 9; 35, 151, 152, 188, 195—Of steam boilers, 20, 144, 26, 17
 Indecimene, 92, 245
 Indel, 63, 189
 Indazolic derivatives, formation, 89, 22; 90, 23—Derivatives, preparation by means of orthoketonic hydrazo compounds, 99, 180
 Indene derivatives, formation, 61, 203—Synthesis of, 69, 80; 81, 120
 Index, refractive (see Refractive)—Subject-matter, of mining and metallurgy, 84, 292—To chemical literature, international, 68, 192, 317—To literature of explosives, 66, 233
 Indexing chemical literature, 54, 175, 183; 56, 265, 272; 58, 200; 60, 224; 63, 216; 64, 289; 66, 145; 69, 177; 70, 113; 72, 111; 84, 203, 210—Literature of chemical elements, 49, 187
 India, agricultural chemistry of tea plantations in, 31, 256—Artificial production of ice in, 21, 215—Chemistry in, 26, 165, 230—China plant in, 7, 192, 200—Drugs indigenous of, 45, 13—Fibre-yielding plants of, 1, 293, 304—Hyoscyamine in the *Hyoscyamus muticus* of, 78, 234—Lime deposits from, 27, 205—Photographs of eclipse in, 18, 226, 227—Plumbago in, 5, 154—Production of nitre in, 18, 4—South, composition of certain soils, 71, 261—Water analysis in, 26, 64, 80, 171, 185, 246
 Indian agricultural service, 94, 184—And American podophyllum, chemical investigation of constituents of, 77, 113; 78, 26—Bael, 3, 172—Barberry (see Barberry)—Chemical department, 70, 98, 153—Corn (see Corn)—Dyestuff, Delphinium zall, colouring matters of, 77, 126—Dyestuff, Kamala, constitution, 68, 108—Dyestuff, Waras, constituents of, 78, 20—Ink, 59, 47—Ink, substitute for, 10, 180—Institute of Science (see Bangalore)—Isinglass, 21, 132—Laterite, composition, 87, 256—Madar as a substitute for cotton, 6, 27—Madder plant and applications, 7, 75—Magnesite industry, 99, 249—Red, colour, 3, 224—Steel (see Steel)—Tea (see Tea)—Taniferous drugs, 70, 210—Usar land, alkaline salts in, analysis, 87, 130—Well-waters, excessively saline, 85, 297—Wood, analysis, 46, 187
 India-rubber, 63, 214; 81, 288—Action of different metals, &c., on, 64, 169—And gutta-percha, compounds with other substances, 5, 355—And gutta-percha, preparing and treating, 7, 82—And india-rubber solutions, viscosity of, 93, 317—And sulphur, improvements in re-working compounds of, 1, 31—Cord, frequency of transverse vibrations of stretched, 81, 58—Corks, to cut and bore, 26, 190—Cutters, 56, 270—Effect of alternating electromotive force on insulating properties of, 83, 275—Hard, 4, 251—Hornised, 3, 295—Improvements in working and treating, 14, 191—Juices, 2, 277, 289, 313—Manipulating, 23, 215, 228—Manufacture and application for insulating telegraph conductors, 2, 105—Manufactured analysis, 81, 19—Oxidation, 11, 88—Solution for elastic tissues, 28, 24—Sponge, 18, 166—Structure of crude, 98, 317—Subjected to a constant pull, slow stretch in, 91, 58—Synthesis, 88, 137—Treatment, 5, 159—Tubing, gas-tight, 50, 117—Vulcanisation, 1, 290—Vulcanisation and decay, 62, 192—Vulcanised, 4, 97; 53, 168—Vulcanised, analysis, 81, 5—Vulcanised, reddish-coloured, 27, 185—Vulcanised, re-working waste, 7, 23
 Indian, 82, 176; 84, 280; 95, 235; 96, 243; 99, 235, 236—In urine, detection, 38, 277; 58, 199; 59, 206
 Indicator, acidimetric, 38, 275; 86, 174—Acidimetry, 58, 49; 79, 192; 81, 251—Alkalimetric, 37, 228; 38, 275; 40, 277; 43, 161—Alkalimetric, tropæolin as a, 39, 163—Alkalimetry, 58, 49—Continual, of specific gravity of gas, 1, 111—For acidimetry and alkalimetry, 58, 49; 79, 192—Frequency (see Frequency)—In alkalimetry, 37, 275; 67, 66; 79, 192—In alkalimetry, methyl orange as, 44, 288—Preparation of litmus as an, 40, 277—New, 74, 25; 89, 262—Suitable for use with hundredth-normal alkali solution, 99, 23—Telephonic (see Telephonic)—Volumetric, eupitonic acid as a, 42, 36—Which shows the neutral concluding-point in alkalimetry and acidimetry, 48, 119
 Indicators, 51, 296; 52, 18, 29; 64, 213; 70, 225, 239, 249; 77, 142—Action of vegetable alkaloids on, 84, 60—Colour (see Colour)—Coloured, and salts, neutrality of, 74, 285—Lecture experiments with, 77, 131—Limited sensitiveness of, 58, 196—Study of, 73, 287—Use of litmus, methyl-orange, etc., as, 47, 123, 135, 184; 49, 32, 119—Used for titrating with standard sulphide solutions, 58, 236
 Indices of refraction in certain isomeric compound ethers, 28, 44—Refractive, determining, 69, 105—Refractive, without the use of dividing instruments, 32, 54
 Indies, East (see East Indies)
 Indigo, 18, 60; 35, 105; 44, 53, 67, 74; 69, 73—Action of ferric salts on, 52, 110—Analysis of, 36, 233; 96, 244—Artificial, 29, 132; 42, 7, 267; 43, 37, 305—Artificial, history of commercial manufacture, 86, 211—Artificial, manufacture, 45, 187—Artificial preparation, history of, 42, 289—Assay, 50, 49—Blue, 21, 168, 180; 39, 119, 129, 143—Blue, fixation of alumina as a discharge on, 45, 113—Blue, formation, 56, 36—Blue from Polygonum tinctorium, etc., 37, 223—Blue in natural and synthetic indigos, estimation, 81, 37—Blue, products from, 11, 69; 65, 124—Blue, reduction, 18, 7—Blue, reduction of isatine to, 22, 59—Blue, steam, 35, 115—Blue, synthesis, 38, 200, 255—Carmines, 21, 220, 232—Carmines, titration of hydrosulphide by, 43, 80—Chemistry of, 90, 19—Constituents of natural, 95, 01, 128—Constitution, 40, 204, 205—Constitution of colouring-matter of, 89, 238—Decolouration by hydrosulphurous acid and persulphide of hydrogen, 34, 250—Derivatives, 53, 276; 68, 26—Determination, 64, 202—Determination of indigotin in commercial, 94, 9; 95, 34—Determination of nitric acid by, 35, 45, 57; 39, 285—Dye detection of pure, 54, 38—Dyes, testing, 57, 171—Dyeing and printing with, 28, 34—Dyeing, new process for, 13, 146—Estimation, 9, 254; 19, 250—Extract, 22, 180, 192; 31, 162—Extract, manufacture, 31, 29; 33, 221—Fixation on cotton, 48, 84—Fixation on tissues, 36, 82—Formation, 79, 23—Formation from malonic ether of anthranilic acid, 84, 243—Green, 64, 58—Impurity in, 20, 128—In dyed woollens, determination, 55, 260—In presence of per- and proto-salts of iron, 36, 279—In purulent discharges, 10, 169—Isomer of, 99, 216—Java, constituent, 90, 33—Java, isatin in, 95, 91—Molecular magnitude of, 39, 229—Molecular weight, 94, 242—On textile fabrics, determination, 55, 35—Oxime, 79, 192—Phenol a probable source of, 29, 110—Plant, fermentation, 89, 296—Purpurin, 39, 262—Red in natural and synthetic indigos, estimation, 81, 37—Red in urine, detection, 62, 285—Simultaneous action of potassium ferricyanide and acetates on, 38, 10—Solubility, 19, 131—Solvents for, 26, 231—Specific gravity and quantity of pigment in, 24, 313—Stem ash, 59, 244—Sulphate, action of ozone on, 26, 105—Synthesis of, 44, 226—Synthesis, history of, 85, 243—Synthetic, 82, 89, 104, 127, 152—Tannin (see Tannin)—Test for glucose, 2, 35—Testing, 25, 175; 51, 207, 255—Thio- (see Thioindigo)—To estimate nitric acid in potable water, 27, 307—Use of the term by Newton, 42, 37—Valuation of, 5, 42; 8, 284; 67, 97—Vat, 28, 250—Vats, fermentation in, 50, 12; 62, 48—White, behaviour with potassium pyrosulphate, 40, 301—Yellow, 54, 34—Yielding plants, determination of indogotin in, 96, 244
 Indigos, natural and synthetic, estimation of indigo blue and indigo red in, 81, 37
 Indigofera, diastatic functions of, 79, 23
 Indigofera arrecta and I. Sumatrana, analysis of dried leaves of, 96, 244
 Indigoid colouring matters derived from phenylisoxazolone, 99, 156
 Indigotic group, compounds of, 45, 187
 Indigotine, 23, 22—Acids, tri- and tetrasulphonic, 66, 258—And potassium permanganate, reaction between, 97, 312—Artificial preparation, 44, 72—Crystallised, 25, 58—Derivatives, 12, 93, 220; 36, 62; 40, 88—Determination, 63, 201; 94, 149—Determining in commercial indigo and indigo-yielding plants, 94, 9; 96, 244—Di- (see Di-indigotin)—Extraction of colouring matters of, 47, 129—In indigos of commerce, determination, 44, 81—Isomeric transformation into indirubine, 85, 143—New solvent for, 23, 214, 252—Oxidation product of, 94, 44—Polymerised state of ordinary, 85, 143—Synthesis, 24, 288
 Indirubin, 39, 262—Extraction of colouring matters of, 47, 129—Isomeric transformation of indigotine into, 85, 143—Reduction, 99, 236
 Indium, 8, 123, 280; 9, 167, 303; 10, 219; 14, 157; 18, 19; 19, 298; 25, 247, 253, 266; 28, 227; 33, 142; 90, 45; 91, 111—And gallium alloys, 51, 165—And iron, separation, 97, 217—As transfer of the halogens, 55, 176—Atomic weight, 26, 2; 83, 101; 91, 228; 93, 55; 95, 227; 99, 60; 100, 278—Compounds, 97, 244—Contribution to knowledge of, 11, 154, 289—Electrolytic behaviour, 47, 200—Equivalent of, 10, 84, 95, 240—Extraction from roasting of blende, 15, 228—Extraction from zinc-blende, 22, 312—In American blends, 28, 28—In fine dust of zinc ovens, 14, 68—In Norwegian minerals, 42, 85—Microchemical detection, 86, 60—Place in classification of elements, 83, 47—Preparation, 17, 8; 20, 227—Spectroscopic detection, 44, 82
 Indium chlorides, 58, 183
 Indium fluoride, 91, 70
 Indogenides, iso- (see Isoindogenides)
 Indol, 20, 122—As a reagent for nitrites, 69, 137—Constitution, 21, 95—

- Dihydro- α -methyl- (*see* Dihydro- α -methylindole)—Iso- (*see* Isoindol) — Methyl- (*see* Methylindole) — Synthesis, **21**, 70; **36**, 41; **37**, 21
- Indoles and indol carbonic acids, recognition of, **74**, 109 — Phenyl- (*see* Phenylindoles)
- Indolic bases, reactions of, **80**, 47—Substances, colour reactions with sugars, **99**, 192
- Indoline and its compounds, preparation, **42**, 24
- Indones, reactions with derivatives of malonic acid, **80**, 48
- Indophenol, **47**, 40
- Indophenols, absorption of light by, **83**, 118—Absorption spectra, **83**, 82, 142 —Method of distinguishing colouring matters applied to, **83**, 216—Series of, **71**, 37
- Indoxazen derivatives, formation, **68**, 267
- Indoxyl, nitroso- (*see* Nitrosoindoxyl)
- Indoxyllic acid (*see* Acid)
- Indrisson, T., Experiments with emanation from bromide of radium, **90**, 95
- Induced conductors (*see* Conductors)—Radio-activity (*see* Radio-activity)
- Inductance and resistance in telephone and other circuits, **99**, 310—Measurement of mutual, **95**, 284—Of two parallel wires, **98**, 10—Small, standard of, **89**, 177
- Inductances, measurement of small, **87**, 115; **89**, 177—Measurement of small, apparatus for, **91**, 256—Use of variable mutual, **96**, 233, 255
- Induction, action of temperature on period of, **89**, 152—Apparatus, chemical actions produced by means of discharges from, **33**, 95—Application of, **49**, 266 — Balance, **39**, 247 — Balance effect, **47**, 304 — Balance, theory of, **41**, 57—Coefficients, comparing, **45**, 99—Coefficients, variation of, **57**, 159—Coil (*see* Coil)—Coil, apparatus (*see* Apparatus)—Coils (*see* Coils)—Currents, **16**, 73—Currents, action of condenser on, **28**, 293 —Currents, analysis of, **16**, 312—Currents, dialysis of, **17**, 96—Currents, direction of, obtained by electrical discharges, **22**, 22—Disturbances in telephonic cables, **39**, 288—Electric, of Hooper's insulated wires, compared with gutta-percha insulated wires, for telegraph cables, **16**, 169—Electric, Huyghen's gearing in illustration, **61**, 262—Electric, through solid insulators, **100**, 0—Electro-magnetic, **50**, 22; **69**, 240; **77**, 81—Electro-magnetic, machines for telegraphy, **9**, 244—Experiments, **51**, 237—Lines round two parallel coils of wire, **40**, 21 — Machine, Holtz's, **20**, 107 — Magnetic (*see* Magnetic)—Phenomena of, **33**, 42 — Produced by variation of intensity of the electric current in a spherical solenoid, **48**, 213—Solar, elementary force of a, **50**, 224—Spark, **30**, 20—Spark, action on gaseous hydrocarbons, **15**, 196 — Spark, action on toluol, **50**, 80 — Spark, permanent stratification produced by, **9**, 200, 295 — Sparks, **22**, 35 — Sparks of high temperatures, production, **51**, 311 — Static, by Ruhmkorff's coil, **30**, 64
- Inductive power, specific, **36**, 151
- Induline dyes (*see* Dyes) — Group, **46**, 300 — New blue dye material, **22**, 225
- Industrial accidents (*see* Accidents) — Activity, **39**, 150 — Alcohols (*see* Alcohols) — Arts (*see* Arts) — Association, North Austrian, **23**, 261 — And Technological Museum, Sydney, **43**, 293 — Chemistry (*see* Chemistry) — Copper (*see* Copper) — Fellowships, **99**, 310 — Statistics of Bavaria (*see* Bavaria) — Furnaces (*see* Furnaces) — Products, decomposition by means of sodium peroxide and metallic sulphides, **98**, 61, 76 — Review, **47**, 22 — Reviews and patents, **54**, 40; **58**, 151; **60**, 120 — Society of Mulhouse (*see* Mulhouse)
- Industries, chemical, electricity in, **71**, 64 — Chemical, English, statistics concerning the training of chemists employed in, **86**, 176 — Chemical, of Germany, personal accidents in, **45**, 103 — Chemical, recent discoveries in the great, **64**, 250 — Trades, and Arts Exhibition, **73**, 149
- Industry, Chemical, at Dusseldorf Exhibition, **43**, 119 — Chemical, at Paris Exhibition of 1878, **38**, 23, 47, 71, 141, 166, 265—Chemical, at Paris Exhibition of 1889, **61**, 266; **62**, 297 — Chemical, German, Association for promoting the interests of, **39**, 172—Chemical, in relation to agriculture, **98**, 257 — Chemical, new, **39**, 107 — Chemical, Vienna, **28**, 158, 171 — Coal-tar (*see* Coal-tar) — Science, protection of inventions in, **36**, 174
- Inert gases (*see* Gases)
- Inertia, electric (*see* Electric) — Least moment of, of an angle-bar section, **99**, 155 — Measuring moments of, **98**, 304 — Oscillating table for determining moments of, **87**, 68
- Insoline, **14**, 90

 Institutes, technical (*see* Technical)
 Institution, Central, 61, 50—Of Civil Engineers, 16, 277; 37, 228; 48, 290—Of Naval Architects, 63, 261
 Instruction, chemical (*see* Chemical)—Scientific, Royal Commission on, 32, 17, 149
 Instrument for maintaining a constant temperature, 18, 5
 Instruments and methods of research, 100, 57—*see* Brass—Camera for recording the readings of scale of, 95, 222—Dividing (*see* Dividing)—Electric (*see* Electric)—Electric measuring (*see* Electric)—Electrical (*see* Electrical)—For measurement of large and small alternating currents, 89, 248—Geometrical (*see* Geometrical)—Measuring (*see* Measuring)—Optical, aberrations of a symmetrical, 100, 299—Optical, 16, 264—Optical, measure of magnifying power in, 38, 272—Optical, new theory of field of view and magnification of, 28, 40—Recording, parallel motion suitable for, 61, 106—Scientific, 19, 131—Stringed, 30, 246—Testing, 55, 45—Verification at Kew, 33, 49—Wind, 31, 193
 Insulators, specific inductive power of, 32, 20
 Insulating compositions, bitumen in, 88, 316—Conducting wires used for telegraphic purposes, 4, 68—Stem (*see* Stem)—Substances, electric resistance of, 48, 260—The thermic radiations, 48, 225
 Insulation of heat (*see* Heat)—Tests, use of Price's guard wire in, 81, 57
 Insulator, 27, 218
 Insulators for telegraphic wires, 5, 251—Of electricity, 20, 167
 Insurance, small-pox, 85, 108
 Integrating apparatus, 70, 11
 Integration, chemical, 56, 136, 142
 Interferometer, 26, 240
 Interference and diffraction, 89, 57—Apparatus (*see* Apparatus)—Fringes (*see* Fringes)—Phenomena in rays of long path, 41, 292
 Internal energy (*see* Energy)—Heat (*see* Heat)
 International Association for Testing Materials, 84, 147; 93, 224—Congress (*see* Congress)
 Interrupters, new arrangement, 9, 395
 Intestinal calculi (*see* Calculi)
 Intoxication, chronic alcoholic, 7, 82
 Intra-elemental forces (*see* Forces)
 Intramolecular changes (*see* Changes)—Rearrangement in inactive substances, 97, 274
 Inulase, 67, 278
 Inuline, 43, 178; 67, 145, 215, 280—Alcoholic fermentation, 67, 278—And its acetic derivatives, 20, 23, 203—Modification which it undergoes by combined action of heat and water, 22, 251—Monograph on, 20, 203, 240; 21, 71, 131
 Inuloid, 23, 22
 Inundation of sea-water, injury to agricultural land on coast of Essex by, 80, 191
 Invalids, articles of diet for, 46, 209—Liebig's soup for, 1, 240
 Invention, curious, 61, 26—History of, as applied to dyeing and printing of fabrics, 1, 227—Hydraulic, 24, 253—Lacative, 51, 286
 Inventions, amendment of law of patents for, 35, 60, 85—And discoveries, rewards for, 58, 243—Chemical, field for, 2, 264—Modern, not always new, 7, 180—Patents for, 88, 147—Society of Arts Exhibition, 1, 290; 3, 212, 228—Exhibition, 52, 178
 Inventors, suggestion to, 15, 216
 Inversion, Welden, chemistry of, 97, 235
 Invert-sugar (*see* Sugar)
 Invertase, 62, 95—In plants of gramineae, 81, 142
 Invertebrata, 64, 153—Physiology of, 65, 312
 Invertebrate animals (*see* Animals)—Muscle (*see* Muscle)
 Invertine, 37, 275; 79, 277—In grapes, 82, 279
 Investigations, colorimetric, 52, 13—Scientific, report of the committee for recommending increased facilities for, 20, 104
 Inwards, R., instrument for drawing parabolas, 65, 249
 Iodacetamide, 23, 95
 Iodacetanilide dichloride, para- (*see* Paraiodacetanilide dichloride)
 Iodacetate of ethyl (*see* Ethyl)
 Iodoacetone, 51, 166
 Iodal, 5, 139; 44, 107—Compared with chloroform and chloral, 21, 64
 Iodaldehyd, 53, 60, 301—Preparation, 54, 27, 114
 Iodalkylates of sparteine (*see* Sparteine)
 Iodantipyrine, 81, 203—And mercuric salts, compounds, 81, 227
 Iodate, estimation of lead as, 38, 145—Ethyl- (*see* Ethyliodate)—Mercuric, 33, 253, 272—Of calcium (*see* Calcium)—Of potassium (*see* Potassium)—Of soda (*see* Soda)—Per- (*see* Periodate)
 Iodates, action of oxalic acid on, 40, 168—And iodides, 38, 201—And periodates, 20, 83—And telluric acid compounds, 83, 62—Chromo- (*see* Chromoiodates)—Determination of halogens in, 92, 58—Effect of heat on, 69, 272—Electrolytic, preparation, 81, 182—Electrolytic production, 79, 110—Estimation, 81, 236; 89, 95—New reagent for, 28, 264—Of alkalies (*see* Alkalies)—Of cobalt (*see* Cobalt)—Of nickel (*see* Nickel)—Of phosphorus (*see* Phosphorus)—Of potassium (*see* Potassium)—Per- (*see* Periodates)
 Iodated borates (*see* Borates)—Cotton (*see* Cotton)—Lactones (*see* Lactones)—Water (*see* Water)
 Iodation in vacuo, 96, 293
 Iodbenzyl, 20, 118
 Iodhydric acid (*see* Acid)
 Iodhydric, di- (*see* Diiodhydric)
 Iodic acid (*see* Acid)—Anhydride (*see* Anhydride)
 Iodide, acetyl (*see* Acetyl)—Aluminic, action on glycerin, 35, 237—Amorphous mercurous, colour of, 78, 50—And aniline, compounds, 57, 219—Argentio, 15, 215; 16, 37—Aurous, preparation by action of iodine on gold, 90, 274—Carbontetra- (*see* Carbontetraiodide)—Chromous, 43, 263—Coatings, production, 56, 67—Copper as, 76, 243—Cupric, 59, 57—Cuprous, 65, 178; 96, 47—Dextromethyl ethyl-*n*-propyl tin (*see* Dextromethyl)—Di- (*see* Diiodide)—Ethylphthal- (*see* Ethylphthaliodide)—Ethylpropylperidonium (*see* Ethylpropylperidonium)—Heptanediol-1:7-di- (*see* Heptanediol-1:7-diiodide)—Hexyl- (*see* Hexyliodide)—Isoamyl- (*see* Isoamylidide)—Isobutyl- (*see* Isobutylidide)—Isobutylic, reactions of tertiary, 41, 77—Magnesium methyl (*see* Magnesium)—Mercuric, action on ketones in alkaline solution, 98, 314—Mercuric, action on sulphuric acid and mercury sulphates, 91, 256—Mercuric, and free monomethylamine, compounds 94, 12—Mercuric, condensation of camphor with, 98, 314—Mercuric, form in which it goes into solution, 88, 11—Mercuric, influence on formation of sulphonium iodides, 96, 231—Mercuric, isomorphism with zinc and cadmium iodides, 94, 71—Mercuric, preparation of crystalline, 82, 24—Mercuric, solubility in water, 51, 24, 37—Mercuric, temperature of transformation of two varieties, 81, 22—Mercuric, vapours emitted by, 80, 34—Mercurous, 71, 260; 81, 10—Mercurous, action of alcohol on, 73, 12—Mercurous, action of heat on, 73, 95—Mercurous, action of iodide of potassium in solution on, 80, 177—Mercurous, action of light on, 52, 188—Mercurous, preparation of crystalline, 82, 24—Mercury diammonium (*see* Mercury)—Mercury di- (*see* Mercury)—Method of copper assay, 74, 52—Methylchlor- (*see* Methylchloriodide)—Methylmorphine (*see* Methylmorphine)—Of alkyl (*see* Alkyl)—Of allyl (*see* Allyl)—Of aluminium (*see* Aluminium)—Of ammonium (*see* Ammonium)—Of amyl (*see* Amyl)—Of antimony (*see* Antimony)—Of arsenic (*see* Arsenic)—Of barium (*see* Barium)—Of benzyl (*see* Benzyl)—Of bismuth (*see* Bismuth)—Of butyl (*see* Butyl)—Of butylalcohol (*see* Butylalcohol)—Of cadmium (*see* Cadmium)—Of calcium (*see* Calcium)—Of capryl (*see* Capryl)—Of copper (*see* Copper)—Of cyanogen (*see* Cyanogen)—Of dimercure ammonium (*see* Dimercure ammonium)—Of ethyl (*see* Ethyl)—Of ethylene (*see* Ethylene)—Of glucinum (*see* Glucinum)—Of gold (*see* Gold)—Of hydrogen (*see* Hydrogen)—Of iron (*see* Iron)—Of isopropyl (*see* Iso-

propyl)—Of lead (*see* Lead)—Of magnesium (*see* Magnesium)—Of mercuriammonium (*see* Mercuriammonium)—Of mercury (*see* Mercury)—Of methyl (*see* Methyl)—Of methylene (*see* Methylene)—Of molybdenum (*see* Molybdenum)—Of monomercurammonium (*see* Monomercurammonium)—Of nitrogen (*see* Nitrogen)—Of phosphorus (*see* Phosphorus)—Of potassium (*see* Potassium)—Of propionyl (*see* Propionyl)—Of propyl (*see* Propyl)—Of propylene (*see* Propylene)—Of silicon (*see* Silicon)—Of silver (*see* Silver)—Of sodium (*see* Sodium)—Of starch (*see* Starch)—Of strontium (*see* Strontium)—Of sulphur (*see* Sulphur)—Of tin (*see* Tin)—Of titanium (*see* Titanium)—Of tungsten (*see* Tungsten)—Of zinc (*see* Zinc)

Phenol bin. (*see* Phenol)—Phenylamine magnesium (*see* Phenylamine)—Potassic, industrial preparation with waters used for lixiviating kelp of crude soda, 31, 230 — Potassium-mercuric, preparation, 70, 100 — Potassium mercur. (*see* Potassium)—Potassium mercuric, estimation of alkaloïds by, 45, 114, 120—Propylene chloro- (*see* Propylene) — Proto-, of iron (*see* Iron)—Silver photo- (*see* Silver)—Thallous, form taken by when going into solution, 90, 117—Thallous, red and yellow varieties, 90, 56—Tin chloro- (*see* Tin)—Titanic, 16, 25 — Tolandi. (*see* Tolandiodide)—Trichloroacet. (*see* Trichloroacetate)—Triethylbenzylammonium, 35, 240

Iodide chloride, preparation, 97, 251

Iodide chlorides, aromatic, 53, 143

Iodide isopropyl, 63, 142

Iodide sulphides of fatty series, action of alkyl iodides on mercuric, 81, 10

Iodides, 21, 203; 36, 201—Action of boric acid on, 88, 269—Action of ether on, 27, 22—Action of light on soluble, 42, 147—Action on sulphurous acid, 82, 28; 83, 83—Alcoholic, action of phenylhydrazine on, 80, 72; 85, 137—Alcoholic, and phenylhydrazine, combinations, 79, 155 — Alcoholic, primary, action on silver fulminate, 50, 272—Amidochloro- (*see* Amidochloroiodides)—Analysis, application of iodide acid to, 75, 196—And arsenic, separation, 73, 28, 38—And chlorides, double, 30, 205—And copper, separation, 73, 28, 38—And iodine, separation, 88, 269—And mercurous nitrite, interaction, 74, 289—And sulphur, compounds, 97, 218—Brom. (*see* Bromides)—Colours of, 88, 217—Conversion of organic chlorides into, 18, 21; 19, 69—Detection, 73, 134—Detection of chlorides in presence of, 52, 107—Dextro-benzylphenylallylmethylammonium, 80, 252—Estimation, 52, 104—Estimation in presence of chlorides and bromides, 85, 287—Fluo-, of alkaline earth metals, 89, 106 — In urine, demonstration of, 64, 213—Lævo-benzylphenylallylmethylammonium (*see* Lævo-benzylphenylallylmethylammonium)—Mercuric, changes of colour at different temperatures, 87, 237 — Metallic, action of light on soluble, 72, 175—Metallic, and sulphurous anhydride, compounds, 81, 251—Normal, 27, 117—Of alkalies (*see* Alkalies)—Of alkaline (*see* Alkaline)—Of alkali (*see* Alkali)—Of ammonium (*see* Ammonium) — Of amyl (*see* Amyl) — Of cobalt (*see* Cobalt)—Of copper (*see* Copper)—Of isopropyl (*see* Isopropyl)—Of manganese dioxide (*see* Manganese)—Of mercuriammonium (*see* Mercuriammonium)—Of mercury (*see* Mercury)—Of methyl (*see* Methyl)—Of nitrogen (*see* Nitrogen)—Of organic bases, 17, 81—Of phenylhydrazine (*see* Phenylhydrazine)—Of phosphorus (*see* Phosphorus)—Of stannopropyls,

39, 218—Of sulphonium (*see* Sulphonium)—Of sulphur (*see* Sulphur)—Of tetraalkylammonium (*see* Tetraalkylammonium)—Of tetramethylammonium (*see* Tetramethylammonium)—Organic, conversion into bromides, 22, 46—Per- (*see* Periodides)—Poly- (*see* Polyiodides)—Preparation, 14, 24—Purity of commercial, 12, 163—Silicon chloro- (*see* Silicon)—Soluble, determination of, 65, 191

Iodati, liquor ferri, 4, 117

Iodiferous non-nitrogenous organic bases, discovery of a new class, 70, 10

Iodination of anthracene (*see* Anthracene)

Iodine, 25, 312; 33, 244, 253; 43, 259; 64, 184; 87, 185 — Absorption by plants, 81, 110—Absorption of essential oils, 60, 236, 261, 281, 282 — Action of, 87, 287 — Action of chromium trioxide on, 26, 245 — Action of chromyl dichloride on, 28, 148 — Action of heat on, 40, 87 — Action of light on solutions of, in bisulphide of carbon, 25, 238—Action of ozone on, 37, 183—Action on acids of ethylene series, 90, 328—Action on acetonitrile, 69, 230 — Action on neointine and caffeine, 86, 210—Action on albumenous matters, 76, 175—Action on alkalis, 80, 23; 81, 152—Action on antipyrine, 81, 203 — Action on arseniuretted and antimoniuretted hydrogen, 13, 69; 20, 240 — Action on camphor, 37, 4 — Action on caoutchouc, 28, 110—Action on chlorine, 39, 41—Action on concentrated solution of cyanide of potassium, 2, 71 — Action on ether and compound ethers, 33, 250 — Action on guanidin carbonate and nitroguanidin, 38, 40—Action on hydrocarbons belonging to aromatic series, 27, 21—Action on hyposulphite, 21, 103, 141, 164 — Action on iodic acid, 74, 293 — Action on methylated spirit, 45, 221—Action on mixture of sulphite and thiosulphite, 66, 292—Action on mono- and dinitrodiphenylthiocarbamide, 48, 95—Action on naphthaline at high temperatures, 45, 109—Action on oil of turpentine, 41, 34—Action on oxide of salts of silver, 1, 241—Action on phenols, 98, 316—Action on phenols and allied compounds, 68, 87, 99, 131, 153, 166, 181, 195, 203, 214, 227—Action on pilocarpines, 52, 58 — Action on platonitrites, 35, 241—Action on potassium selenocyanide, 49, 82—Action on silver compounds of succinimide, 20, 251—Action on stannous chloride, 74, 49—Action on styrolene and saffrol, 82, 169—Action on sugar, 10, 253 — Action on thiobenzamide, 21, 23 — Action on tin, 5, 210 — Action on turpentine, 3, 34, 47 — Action on uric acid, 29, 92 — Addition method, execution of, 68, 281 — Addition to acetylenic acids, 95, 248 — Adsorption by carbon, 96, 232 — Affinities of, 62, 271 — Analysis of commercial samples, 53, 67—And acetic anhydride, action of dry hypochlorous gas on a mixture of, 18, 129 — And acetone, determination of reaction between, 100, 264 — And anhydrous acetic acid, action of hypochlorous acid on a mixture of, 20, 118 — And bromine, 7, 253; 87, 23 — And bromine compounds, effect of low temperatures on colour, 82, 90 — And bromine in mixture, estimation, 3, 101 — And bromine, replacement of chlorine by, 74, 27 — And bromine, separating, 40, 168; 68, 108; 80, 6—And bromine and chlorine compounds, heat of solution, 35, 263 — And bromine and chlorine, detection in same mixture, 41, 110, 280; 67, 141, 162 — And bromine and chlorine, estimation in presence of one another, 49, 2; 80, 167 — And bromine and

chlorine, separation, 2, 325; 65, 253, 276 — And bromine and chlorine, separation and estimation of, 77, 67, 276 — And cadmium, combination, electromotive forces developed during, 54, 10—And carbolic acid, 16, 324 — And chlorine, separating, 40, 168; 51, 84; 68, 108; 80, 6, 82, 108 — And hypophosphorous acid, velocity and mechanism of reaction between, 96, 241 — And iodides, separation, 88, 269 — And iodide of potassium, combinations, 3, 51 — And metallic hydroxides, compounds of, 74, 269 — And mercury and zinc, reaction of, 16, 289 — And metals, separation, 6, 171 — And potassium chlorate, interaction, 66, 277 — And starch, compound, 28, 248 — And starch test-paper, 85, 276 — And sodic hyposulphite, preparation of titrated solutions of, 89, 311 — And sugar, compound, 2, 89 — And sulphur and iodides of sulphur, relations, 86, 5 — And water, and potassium chlorate, interaction, 62, 97 — As reagent for starch, 34, 72 — Assay, 21, 143 — Atom, configuration of, 81, 142; 86, 253 — Atomic volume, 45, 183 — Atomic weight, 87, 181; 90, 94; 91, 37, 220; 93, 55, 183; 95, 208; 99, 69; 100, 259, 274, 278, 236, 310 — Bacterial action, 74, 184 — Behaviour at elevated temperatures, 41, 151 — Behaviour of essential oils to, 5, 62, 117, 131, 148, 186, 211 — Behaviour of narscin towards, 19, 286 — Behaviour of natural sulphides with, 38, 168 — Behaviour of salts of silver towards, 20, 131 — Behaviour of silver chloride with, 48, 284—Behaviour of starch and dextrose towards, 24, 265—Behaviour towards a solution of permanganate of potassa, 20, 48—Behaviour towards hydrosulphuric acid, 20, 166 — Behaviour towards sulphuretted hydrogen, 19, 207—Behaviour with arsenious acid, 30, 275—Behaviour with realgar and an arseniodosulphide, 55, 60—Blue adsorption compound given by, with the basic acetate of lanthanum, 91, 119—Cell, electromotive force of, 71, 121 — Colours exhibited by, 22, 96—Compound, absorption by aluminium, 49, 1—Compounds, heat of formation and combustion, 81, 251—Compounds, new class of cyclical, 71, 44 — Compounds obtained with metanitriline, 90, 35, 70—Compounds of aromatic ketones, 79, 117 —Containing water, analysis of, 20, 214—Contamination with cyanide of iodine, 23, 309 — Density at high temperatures, 41, 195—Derivatives of benzin, preparation, 41, 58—Derivatives of phenols, 38, 9—Detection, 14, 147; 29, 28; 48, 296; 50, 268; 62, 252—Detection and estimation, 1, 155; 51, 101; 54, 112—Detection by spectrum analysis, 12, 243—Detection in presence of chlorine, 62, 153, 160—Detection of minute quantities, 20, 102; 33, 54—Detection, toxicological, 58, 208—Determination, 70, 20 — Determination by means of chloride of silver, 15, 228—Determination in a mixture of iodides, bromides, and chlorides, 49, 14 — Determination in presence of chlorine, 30, 65 — Determination in presence of chlorine and bromine, 28, 22—Determination of hydroxylamine by means of, 74, 203—Determination of soluble compounds of, 74, 52, 186—Determination of solutions of alkaloïds by, 74, 24—Discovery of, 99, 193—Estimation, 3, 68; 20, 200; 24, 97; 55, 292; 57, 45—Estimating by means of alkaline hyposulphite, 14, 2—Estimation by volumetric analysis, 19, 241—Estimation in presence of chlorine and bromine, 57, 135—Estimation of commercial, 18, 205—

Extraction from kelp, 38, 146—Extraction from Peruvian nitrate of soda, 3, 14—Extraction from sea-weeds, 13, 17—Extraction from sea-weeds, preparation of ashes for, 42, 202—Fixation by starch, 65, 73, 191, 68, 88, 108, 69, 192, 71, 203—For detecting iodine, 22, 23—Free, determination by action of metallic silver, 100, 308—Free, gas-volumetric determination of, 74, 100—Free, in a mineral water, 54, 300—From pieces of sea-weed, 43, 100—From substances containing it, 22, 300—Green, 20, 200—Green, constitution, 71, 100—Green, soluble, 21, 71—History of, 10, 200—Hypo-ecopic character of, 71, 100—In antiseptic soaps, determination, 94, 188—In atmosphere, 2, 118, 138—In bromine, detection, 42, 312—In cod-liver oil, 35, 95; 45, 175; 48, 233—In Curacao gum, 42, 42—In form of cuprous iodide, separation from a mixture of chlorides, bromides, and alkaline iodides, 88, 203—In haloid salts, determination, 61, 270, 204; 67, 200—In inorganic compounds, determination, 33, 107—In kelp liquors, mineral waters, etc., estimation, 26, 173—In metallic bromides, detection, 42, 312—In mineral phosphates, 15, 20, 200—In mineral waters, determination, 36, 90—In mother-liquors, estimation, 21, 44—In native phosphates of lime, detection, 26, 312—In organic compounds, detection, 59, 281—In organic matter, detection, 28, 226—In organic matters, detection and estimation, 80, 100—In organic substances, detection, 26, 60—In organic substances, determining, 36, 133; 76, 150—In protein combinations, determination, 100, 91—In resins of aniline colour factories, estimation, 18, 50—In saline waters, 76, 293—In sea-water, 38, 100—In sea-waters and fresh waters, 80, 285—In solution in carbon disulphide, absorption spectrum of, 47, 100—In solution, state of, 61, 67—In tannins, estimation, 4, 700—In urine, detection, 25, 200; 26, 21; 43, 100; 74, 200—In urine, detection and determination, 50, 68, 170—In water, composition, 74, 180—In water, soluble, 97, 100—Liberation from hydrochloric acid, 99, 200—Long continued action of electric discharge on, 61, 100—Manufacture, 61, 100; 74, 200; 85, 35; 172; 37, 200—Manufacture from Chili salt-cake, 22, 200—Manufacture, improvements in, 6, 180—Method of separating, 5, 100—Molecular action in atmosphere of, 20, 280—Multi-valent, derivatives of, 95, 78, 120—New solvent for, 27, 233—Number, determination of, 72, 82—Number of atoms, better, 74, 100, 200—Oleum, 3, 100—Ortho-iodine magnesium (see Ortho-iodine)—Oxidation, 51, 200—Oxidation of phosphorus acid by, 98, 200—Oxidation with ozone, 100, 200—Oxycids of, 55, 200—Oxygen acids of, 61, 97—Ozoniferous aldehyds for detection of traces of, 74, 7—Polyvalent, derivatives of, 94, 220—Preparation, 4, 100; 68, 200—Production, 22, 128; 23, 200—Pure, 87, 100—Pure, preparation, 77, 100; 90, 200—Pure, production, 89, 311—Purification and estimation, 88, 200—Reaction with mercuric oxide, 86, 100—Reaction with sulphurous acid, 39, 100—Reactions upon organic compounds at elevated temperatures, 50, 100—Reactions with potassium ferrocyanide, 33, 100—Recovering from iodide of mercury, 21, 46—Recovery from organic iodide residues, 47, 200—Refraction and dispersion equivalents, 14, 140—Salts, alkaline halogen, separation

of iodine from, 89, 12—Separation from alkaline halogen salts of iodine, chlorine, and bromine, 89, 12—Solubility in petroleum, 19, 213—Solubility in sulphate of ammonia, 6, 170—Soluble in organic compounds, 16, 169—Solution in aqueous potassium iodide, 89, 176—Solution in bisulphide of carbon, action of light on, 25, 228—Solution, standard, 66, 286—Solutions, absorption spectra of, 63, 50—Solutions, different colours of, 88, 307—Solutions, electrical conductivity in ethyl alcohol, 100, 150—Solutions for sulphur determinations, 75, 218—Solutions in water, 20, 60—Solutions, standardising, 64, 252—Solutions, titration, 57, 251—South American, production, 39, 172—Spontaneous disengagement in a mineral water, 11, 132—Starch, 16, 37—Starch paper test for, 63, 95—State of solution of, 70, 197—Sublimation of, 68, 257—Substitution for metals in salts, 3, 225—Substitution products, preparation, 20, 285—Testing for, 50, 210—Tincture, alteration and means of preventing it, 5, 247—Titration of stannous salts with, 77, 141—Titrations, back reactions in, 93, 225—Use for volumetric determination of alkaloïds, 74, 24—Value for fatty matters, determination of, 79, 39—Value of sunlight on the high Alps, 70, 90—Values of oils and fats, 60, 282—Vapour, comparative colour in gases at atmospheric pressures and in a vacuum, 78, 325—Vapour, density of, 42, 60, 82; 43, 60, 61, 95, 257, 270; 44, 194—Vapour, dichroism of, 24, 75—Vapour, dissociation in, 43, 259—Vapour, light emitted by, 25, 275—Vapour pressures of, 53, 177—Vapours, absorption spectrum of, 21, 238—Volatilised in the manufacture of superphosphate, collecting, 30, 166—Voltmeter, 71, 241—Water in, determining, 66, 144—Wine, a natural, 4, 302

Iodine-containing compounds, colour of, 86, 188

Iodine bromide, behaviour with water, 36, 247

Iodine chloride, 23, 22—Action on aromatic amines, 37, 162—Action on monochlorobenzene, 79, 106—Action on picric acid, 16, 7—Addition to ethylene monobromide, 49, 190—Addition to monochlorated ethylene, 49, 168—Behaviour with water, 86, 247

Iodine chlorides, action of water on, 35, 126—Formation, 35, 84

Iodine cyanide and amides, 36, 231

Iodine dioxide, 99, 175

Iodine fluoride, 32, 232

Iodine monochloride, 27, 202—Reaction with alkalis, 81, 236

Iodine pentafluoride, 87, 233

Iodine pentoxide, analysis, 100, 259

Iodine perchloride and bichloride of sulphur, compound of, 1, 215

Iodine phenols, 85, 119

Iodine-phenyl ethereal derivatives, 84, 72

Iodine quadrachloride, 4, 187

Iodine tetrachloride, 21, 106

Iodine trichloride, 35, 142, 185—Action of perchlorous anhydride on, 54, 205—Action on carbon bisulphide, 37, 224—Action on carbon disulphide, 28, 254—Specific gravity, 35, 219

Iodinium and iodo compounds, preparation, 97, 251

Iodised apatites (see Apatites)—Flames (see Flame)—Potassium (see Potassium)—Sulphur (see Sulphur)

Iodising bodies of aromatic series, 63, 183

Iodites, hypo- (see Hypoiodites)

Iodo, di- (see Diiodo)

Iodo-derivatives, action of chlorine on organic, 94, 220

Iodoacetonitrile, synthesis of, 98, 48

Iodoacetophenone dichloride, para- (see Paraiodoacetophenone)

Iodoanisic acid (see Acid)

Iodoantimonide of mercury (see Mercury)

Iodoarsenical-mercurial liquid, Donovan's, therapeutic applications of, 14, 177

Iodobenzene, hexa- (see Hexa-iodobenzene)

Iodobenzene dichloride and meta-, para-, nitro, and para-chloro derivatives, action of heat on, 95, 129

Iodobenzene-monosulphonic acids (see Acids)

Iodobenzoic acid (see Acid)

Iodobenzol parasulphuric acid (see Acid)

Iodobutyric acid (see Acid)

Iodocamphor, benzoyl- (see Benzoyliodocamphor)—Di- (see Diiodocamphor)

Iodochloride of phenyl (see Phenyl)

Iodochromate of potassium (see Potassium)

Iododinaaphthoxanthonium, tri- (see Tri-iododinaaphthoxanthonium)

Iodo fatty acids (see Acids)

Iodoform, action of perchloride of phosphorus on, 21, 250—And phosphorus, 25, 286—And strychnine, compound of, 44, 226—And tertiary aromatic amines, compounds obtained with, 78, 328—As an antiseptic, 55, 309—Chemical properties, 79, 306—Crystalline form, 78, 313—Decomposition by light, 76, 183—Detection and estimation of small quantities, 81, 35—Determination, 62, 284; 68, 186—Formation, 21, 252—Formation of acetylene at the expense of, 49, 104—Formation of methyl iodide and methylene iodide at the expense of, 49, 158—In animal fluids, detection, 48, 170—In solution, decomposition, 79, 71—Methyl (see Methyl)—Methylstanni- (see Methylstanni-iodoform)—Of silicon (see Silicon)—Origin, 20, 285—Preparation, 59, 72; 78, 257—Reactions, coloured, 88, 37—Reactions for detection, 47, 178—Silici- (see Silici-iodoform)

Iodoformed lint (see Lint)

Iodohydrins, alkyl- (see Alkyl-iodohydrins)—Derived from styrolene, 96, 292—Mechanism of phenyl transpositions in, 97, 72—Of naphthalene series, migration of naphthyl group in, 98, 258

Iodomercurate of alkaline (see Alkaline)—Of aluminium (see Aluminium)—Of ammonia (see Ammonia)—Of ammonium (see Ammonium)—Of barium (see Barium)—Of copper (see Copper)—Of magnesium (see Magnesium)—Of manganese (see Manganese)—Of potassium (see Potassium)—Of sodium (see Sodium)—Of thorium (see Thorium)

Iodomercurates, 96, 270—Of barium (see Barium)—Of calcium (see Calcium)—Of lithium (see Lithium)—Of monomethylamine (see Monomethylamine)—Of pyridine (see Pyridine)—Of sodium (see Sodium)—Of strontium (see Strontium)

Iodomethylates of quinine (see Quinine)

Iodo- α -methylspartein, di- (see Diiodo- α -methylspartein)

Iodometric determinations, influence of organic bodies on, 58, 197—Determinations, starch paste for, 69, 241—Nitrates (see Nitrates)—Proceeding, observations on, 43, 231—Studies, 57, 62

Iodometry and sulphurous acid, 58, 49—Preparation of a durable starch solution for, 47, 166—Sodium thiosulphate as a type material for, 70, 282

Iodonitrites, plato- (see Platoiodonitrites)

Iodonitrophenols, 26, 307

Iodonitrosulphophenol from orthonitrophenol, 29, 197

Iodonium bases, 70, 52, 69—Compounds of type $IR^+R''^-$, 81, 142; 86, 253

Iodopentamminocobaltic salts (see Salts)

Iodopentane, di- (see Diiodopentane)

Iodophenol, di- (see Diiodophenol)

- Iodophenols, 31, 38; 58, 36
 Iodopierate, ethylen (*see* Ethylen)
o-Iodopropionate of ethyl (*see* Ethyl)
 β -Iodopropionate, ethylic, action on sodium derivatives of ethylic isopropylmalonate, 74, 119
 Iodopropionic acid (*see* Acid)
 Iodoresorcin, tri- (*see* Triiodoresorcin)
 Iodosalicylic acid (*see* Acid)
 Iodoso and iodoxybenzaldehyds, 74, 107
 Iodoso-compounds, 78, 249
 Iodosulphide of arsenic (*see* Arsenic)—Of phosphorus (*see* Phosphorus)
 Iodosulphobismuthate of lead (*see* Lead)
 Iodosulphobismuthite of copper (*see* Copper)
 Iodo-toluene dichloride, meta- (*see* Meta-iodotoluene)—*O*-tho- (*see* Ortho-iodotoluene)—Para- (*see* Para-iodotoluene)
 Iodotoluylic acid (*see* Acid)
 Iodosus acid (*see* Acid)
 Iodophosphonium for reducing aromatic hydrocarbons, 22, 201—Phosphuretted hydrogen from, 27, 117
 Iodopropylen, chlor- (*see* Chloriodpropylen)
 Iodylised compounds, substitution of fluorine for oxygen in, 87, 44
 Iodyrite from Lake Valley, New Mexico, 53, 218
 Ion, bismuth (*see* Bismuth)—Cadmium (*see* Cadmium)—Etlallium (*see* Thallium)
 Iona pebbles, 26, 237
 Ionian cult. 100, 159
 Ionic conductivities (*see* Conductivities)—Separation, 93, 303—Theory, absorption spectra of nitrates in relation to, 99, 245—Velocities, measurement in aqueous solution, 83, 58
 Ionisation and chemical combination 89, 294—And radiology, international congress for study of, 92, 47—By phosphorus and phosphorescence, 93, 305—By solution, mechanism of, 94, 225—Effect of temperature on, 99, 23—Hydrate theory of thermochemistry of electrolytes in relation to, 96, 32—In aqueous solutions of lead acetate and cadmium acetate, 100, 302—Nature of, 96, 68—Of air by ultra-violet light, 97, 275—Of various gases by secondary γ -rays, 99, 232—Positive, produced by hot platinum in air at low pressure, 87, 310—Produced by an α -particle, 100, 9
 Ionium, 97, 75
 Ionograph, 90, 23
 Ionomania, 96, 98
 α -Ixonone, semicarbazone of, 79, 251
 Ions, acid, displacement of, 93, 151—Atoms, and molecules, relations of colours of, 73, 48, 260, 271—Colour of, 84, 146—Colour of, as a function of the atomic weights, 73, 28, 108, 221—Comparative efficiency as condensation nuclei of positively and negatively charged, 79, 301—Complex, influence in electrolysis by alternating currents, 89, 143—Diffusion into gases, 79, 289—In aqueous solution, relative rates of migration, 100, 47—Lead (*see* Lead)—Metallic, concentration in albuminous solutions of nitrate of silver, 91, 143—Motions in a liquid undergoing electrolysis, 50, 245—Nomenclature, 84, 162, 279—Of alkali salt vapours, velocities at high temperatures, 93, 130—Of hydrogen (*see* Hydrogen)—Of pure water, 93, 10—Of rare earths, abnormal mobility of, 97, 132—Of saline vapour, re-combination, 93, 127—Produced in gases by Röntgen rays, velocity of, 81, 157—Re-combination of, 88, 107—Relations between composition and their rapidity of translation, 59, 61—Transport of, 99, 83—Velocities of, experiments, 63, 247
 Iotsitch, T., Action of zinc on alcoholic solutions of halogenised ketones, 87, 276
 Iowa coal (*see* Coal)
 Ipatief, V., Action of zinc powder on dibromides, 85, 300—Reaction of sodium malonate of ethyl on dibromides, 86, 10
 Ipatiew, W., and W. Werchowsky, Displacement of metals from aqueous solutions of their salts by hydrogen at high temperature and pressure, 100, 60
 Ipecacuanha, acetic acid as a menstruum for exhausting, 2, 271—And emetine, 20, 209—Estimation of alkaloids in, 26, 95—Report as to purity of commercial powders of, 10, 175—Srup, detection of tartar emetic in, 49, 126—Valuation of, 68, 11
 Ipomaeic acid (*see* Acid)
 Ireland, W., Cyanophylen, 19, 251—Cyanotoluylen, 20, 275
 Ireland, chemical schools, 8, 157—Bog butter from, 41, 205—Fuel supply of, 9, 71—Geological and Zoological Societies of, 27, 302—Infusorial earth in, 86, 283—Royal College of Science for, 26, 69; 28, 138, 294; 44, 157; 46, 137; 50, 141; 56, 128; 57, 128; 58, 147; 60, 146, 161; 62, 151; 64, 140; 66, 136; 68, 124; 70, 135; 72, 124; 74, 136; 76, 134; 78, 122; 80, 110; 82, 146—Royal College of Surgeons in, 10, 148; 12, 145; 28, 138; 56, 130; 60, 148; 62, 153; 64, 142; 66, 138; 68, 126; 70, 137; 72, 126; 74, 138; 76, 136; 78, 124—Royal Geological Society of, 25, 31, 105, 200
 Iridescent glass (*see* Glass)—Lamina (*see* Lamina)
 Iridochloronitrite, potassium (*see* Potassium)
 Iridoplatinum anodes used in electrolysis of alkaline chlorides, resistance of, 89, 138
 Iridium, 1, 23; 64, 123; 100, 304—And gallium, separation, 47, 209—And gold, separation, 82, 70—And platinum, separation, 92, 29—And rhodium, separation, 86, 72—Apparatus, 95, 233, 238—Application for staining glass and china, 20, 286—Atomic weight, 19, 302; 39, 74; 61, 301; 93, 55; 99, 69; 100, 150, 278—Base, new salt of an, 40, 300—Bibliography of, 51, 32—Chloro salts and atomic weight, 61, 301—Compounds, 24, 280; 51, 61; 72, 12—Ebullition, 93, 93—Fusion, casting, dephosphorising, and plating, 51, 1, 19, 31, 71, 214—In Canada, 15, 207—In meteorites, 87, 92—In platinum ores, 84, 216—Melting, Holland's process, 45, 168—Metallurgy of, 51, 208—Platin- (*see* Platin-iridium)—Purification, 80, 95, 223—Salts, action of hot sulphuric acid on, in presence of ammonium sulphate, 93, 178—Salts, very sensitive reactions of, 47, 240—Solubility of carbon in, 74, 61—Specific gravity, 32, 281
 Iridium chloride and phosphorus chloride, double, 61, 265
 Iridium cyanides, 5, 323
 Iridium dioxide, preparation, 61, 228
 Iridium nitrites, double, 86, 17
 Iridium osmides, Analysis, 88, 3—Reproduction, 46, 280
 Iridium phosphide, 48, 285
 Iridium sesquichloride, anhydrous, 81, 23
 Iridium sesquiselenide, preparation, 89, 34
 Iridium sulphate and potassium sulphate, double, 47, 257; 94, 47—Violet, 47, 293
 Iridodisulphates, ammoniacal, 99, 190
 Iridosmine, fusing, 22, 225
 Iridoscope, 13, 141
 Iris and ciliary muscle, minute structure of, 15, 287—Glucoside of, 68, 185—Observed on the lake of Genève, 26, 95—Paper, 61, 205
 Irish bog butter, 41, 205; 42, 47—

Minerals and building stones, exhibits at Imperial Institute, 87, 107
 —Schools, chemical lectures at, 12, 145—Universities, 32, 133
 Irish Sea, composition of the water of, 21, 182
 Iritis, preparation for dilatation of pupil in, 2, 210
 Iron, 4, 276; 64, 150; 85, 101, 113; 89, 173—Action of acetylene on, 74, 1—Action of boron on, 75, 91—Action of carbonic acid of waters on, 75, 35—Action of cold in rendering it brittle, 23, 101, 109—Action of gaseous hydrochloric acid on, 53, 130—Action of haloid compounds of phosphorus on, 74, 84—Action of nascent hydrogen on, 29, 213—Action of nitric acid on, 64, 23—Action of silicon chloride on, 92, 280—Action of steam on, 99, 176—Action of sulphuric and hydrochloric acids on, 27, 82—Action of temperature on magnetic and electric properties of, 75, 249—Action of water on, 21, 262, 285; 22, 34; 78, 202—Action of water-gas on, 64, 269—Action on acetylene and ethylene, 82, 94—Action on carbonic acid gas at a red heat, 26, 117—Action on water, 82, 58—Allotropic conditions of, 12, 191, 196, 228—Allotropic transformation of, 69, 120, 217—Alloy to unite to brass, 25, 263—Alteration of hardness by magnetism, 2, 192—Alumina in, estimation, 62, 11, 25—Aluminium in, 57, 249, 261; 64, 73, 194—Aluminium in presence of, determination, 54, 252—Aluminium sulphate free from, 42, 191, 202—Amalgam, 5, 53; 39, 84—Amalgamation, 15, 21—Analysis, 39, 281; 49, 214; 54, 38, 200; 55, 141; 86, 28—Analysis, errors in, 75, 91—Analysis, international standards for, 59, 68; 60, 247; 62, 218, 227, 248; 68, 151—And albumen, medicinal compounds, 8, 67—And alloys, effect of liquid air temperatures on mechanical and other properties of, 91, 13—And alumina, separation, 2, 208; 21, 54; 28, 324; 67, 204; 89, 63—And aluminium, separating, 48, 148; 57, 125; 62, 19; 74, 296; 76, 65; 87, 312; 89, 44, 95—And aluminium alloys (*see* Aluminium-iron)—And aluminium groups, analysis, 98, 6, 16, 32, 41, 55, 71, 81, 92, 107, 160, 171, 181, 194, 208, 219, 228, 239, 251, 264, 273, 291, 300, 311—And ammonium compound, 5, 154—And antimony alloys, density and specific heat, 74, 85—And atmospheric nitrogen, combination, 73, 35—And beryllium, separation, 80, 285—And brass dust, separating, 19, 60—And cadmium, separation, 80, 16—And cadmium and zinc, amalgamation, 3, 63—And carbonic oxide, compounds, 63, 301; 64, 20; 83, 228—And cement, objects made of, 25, 215—And cerium, separation, 10, 195—And chrome, separation, 36, 100—And chromium, separation, 11, 101; 59, 232; 70, 310; 76, 65; 80, 285—And chromium, separation by fused potassium nitrate, 89, 183—And cobalt, separation, 28, 216; 36, 40; 44, 78; 56, 64; 57, 125; 58, 208; 63, 194; 64, 165; 76, 65, 248, 279; 88, 232; 89, 280—And cobalt, manganese, chrome, etc., amalgams of, 39, 84—And copper and antimony, determination, 46, 285—And copper and platinum alloys, 55, 81—And copper, determination, 65, 225—And copper group metals, separation of bismuth from, 74, 162—And copper, incandescence, 52, 261—And copper, limits of sensitiveness of reactions for, 45, 35—And cupric sulphate solution, reaction between, 80, 303—And gold, separation, 72, 100—And hydrogen, 22, 155—And hydrogen, combinations, 2, 181, 215, 272—And

indium, separation, 97, 217. — And iron ores, estimation of phosphorus in by molybdate of ammonia, 2, 227. — And its minerals, sulphur in, 17, 227. — And its oxides, action of carbon monoxide on, 88, 88. — And manganese and aluminium alloys, 66, 140, 155. — And manganese separation, 40, 55, 55, 57, 125, 59, 231, 62, 197, 76, 68, 77, 281, 79, 193, 87, 217, 98, 108. — And manganese separation, acetic acid in, 40, 273. — And nickel alloys, 2, 309, 54, 31, 55, 69, 124, 79, 117. — And nickel alloys, allotropic transformation, 81, 280. — And nickel, separation, 28, 210, 36, 40, 38, 20, 44, 56, 61, 57, 128, 58, 208, 59, 232, 63, 104, 64, 108, 75, 108, 76, 65, 248, 279, 88, 232, 89, 280. — And nickel, separation with ammonia, 81, 103. — And other bases, employment of acetate of sodium for separation, 11, 105. — And other metal work, protection, 88, 210. — And other metallic oxides, dissolving, 74, 0, 100. — And other metals, amalgamation, 34, 35. — And other metals, coating with lead, 78, 204. — And phosphorus separation, 40, 150, 100. — And phosphorus and carbon, mutual relations when together in cast-iron and steel, 82, 221, 233. — And platinum alloys, 31, 172. — And puddled steel, 7, 100. — And silicon alloys, 60, 273. — And silver, separation, 72, 100. — And soda pyrophosphate, 33, 112. — And steel, 4, 110. — And steel alloys, 91, 241. — And steel alloys, chromium and tungsten in, 41, 31. — And steel analysis, 45, 270, 66, 228, 67, 149, 101, 175, 247, 250, 205, 307, 75, 257, 220, 283. — And steel, analysis of metals in, 35, 167. — And steel, chromium in, estimation, 82, 202. — And steel, determination of phosphorus in, 47, 253. — And steel, in presence of acids on, 27, 170. — And Steel Institute, 34, 123, 35, 136, 39, 106, 73, 198, 75, 215, 76, 36, 85, 215, 87, 191, 88, 96, 91, 23, 53, 92, 100, 287, 93, 32, 188, 97, 214, 300, 98, 108, 149, 99, 32, 100, 120. — And Steel Institute, Andrew Carnegie Research Scholarship of, 100, 204. — And Steel Institute, presidential address, 79, 246, 257, 271. — And steel manufacture, improvements in, 4, 11. — And steel sheets, browning, 7, 40. — And steel soldering, 23, 60, 72, 107, 27, 300. — And steel welding, 23, 133. — And sulphocyanogen compound, solubility, 16, 180. — And thallium, separation, 7, 194. — And tin alloys, 3, 14. — And tin, separation, 69, 200. — And titanio acid, separation, 21, 120. — And titanium, alloys, 4, 11, 7, 35. — And titanium, separation, 89, 63. — And tungsten alloy, 18, 170. — And tungsten-steel, analysis, 51, 297. — And uranium, separation, 36, 100, 38, 270. — And vanadium, estimation in presence of one another, 98, 800. — And vanadium, separation, 37, 113. — And water, separation and estimation, 83, 280. — And zinc alloy, 19, 214, 20, 700. — And zinc poisoning by, 11, 288. — And zinc, separation, 55, 230, 57, 125, 59, 232, 87, 312, 90, 215, 91, 247. — And zirconium, separation, 79, 97, 112, 80, 283, 89, 93. — Anode, experiments on, 60, 270. — Anode, solution in solution of acetate of sodium and acetic acid, 80, 221. — Antimonuret, 22, 83. — Application for precipitation of copper from solutions and other purposes, 8, 223. — Arsenic in, determination, 51, 115, 53, 300. — As a natural constituent of wines, 36, 16. — As applied to rolling stock of railways, 23, 80. — Assay, 17, 23, 38, 28, 214. — At elevated temperatures, 54, 210. — Atomic weight, 81, 174, 93, 55, 99, 100, 108. — Bar, singular heating

of, 38, 219. — Bars, effects of magnetisation in changing dimensions, and increasing intensity of hollow iron cylinders, 30, 38, 70, 104, 139. — Basic oxides and oxides in, 43, 100. — Basic salt of, 21, 113. — Behaviour under weak periodic magnetising forces, 94, 214. — Black, varnish on, 20, 17. — Blast furnaces for, 24, 181. — Boilers (see Boilers). — Bronze for, 36, 90. — Burnt, 23, 183, 24, 200, 25, 141. — Burnt, regeneration of, 28, 200. — Carbon. — *See* Carbon-iron. — Carbon chemically combined with, determining, 20, 65. — Carbon in, 5, 252, 22, 234. — Carbon in, analysis, 5, 210. — Carbon in, determining, 22, 101, 48, 3, 51, 30, 54, 48, 60, 101, 64, 100, 69, 277, 71, 318, 72, 83, 73, 76, 183, 80, 121, 146, 242, 260. — Carbon in, estimating, 7, 254, 17, 207, 21, 120, 44, 173, 52, 153, 94, 200. — Carburation by carbonic oxide, 10, 71. — Carburation by contact or cementation, 10, 57, 252. — Carburation by the diamond, 63, 100. — Carburation, limits of, 31, 200, 32, 90. — Carburets (see Carburets). — Carburetted, graphite in, 22, 35, 317. — Cast, 5, 237. — Cast, action of carbonate of soda on, 3, 107. — Cast, action of sea-water on, 43, 121, 56, 281. — Cast, alteration of constituents, 51, 233. — Cast, aluminium in, detection, 63, 172. — Cast, analysis, 3, 201, 5, 170, 7, 87, 16, 7, 94, 108, 55, 131. — Cast, and aluminium, detection of small quantities, 63, 100. — Cast, and blast-furnace boiler dust, possible new elements in, 76, 90. — Cast, and nickel, properties of mixtures of, 2, 293. — Cast, and steel, constitution and application to manufacture of gun-barrels, 7, 50. — Cast, and steels, new facts on, 11, 55. — Cast, borings, sampling, 55, 231. — Cast, bursting of, 27, 270. — Cast, carbon in, 5, 5, 210, 8, 39, 11, 305, 30, 141. — Cast, carbon in, determination, 19, 152, 48, 168, 50, 57. — Cast, carbon of white, 31, 207. — Cast, change by action of a mineral sulphur water, 28, 83. — Cast, chemical analysis, 55, 141. — Cast, chemical constitution, 2, 256, 3, 20. — Cast, chemical nature, 18, 114, 20, 101, 22, 101. — Cast, coating with copper and brass, 21, 246, 273. — Cast, cold galvanisation of, 21, 288. — Cast, composition, 3, 20, 276, 320, 331, 345, 361, 375. — Cast, composition of a carbonaceous substance in grey, 5, 87. — Cast, constitution, 7, 100, 8, 84, 97. — Cast, converting into steel, 13, 30. — Cast, copper in, 34, 78. — Cast, coppering, 45, 22, 60. — Cast, crystallised, 25, 287. — Cast, crystals extracted from, by means of ether or petroleum, 39, 251. — Cast, decomposition by heat, 50, 116. — Cast, depositing copper on, 21, 47. — Cast, displacement of carbon during fusion, 71, 20. — Cast, effect of severe cold on, 25, 40. — Cast, elimination of phosphorus from, 8, 59. — Cast, experiments to dephosphorise, 39, 105. — Cast, for engines and machinery, 22, 170. — Cast, gases in, 12, 252. — Cast, graphite of, 3, 578. — Cast, heated under pressure, separation of graphite in, 100, 180. — Cast, influence of silicon on properties of, 53, 54. — Cast, liquid, total desulphurisation, 70, 246. — Cast, malleable, 24, 241, 42, 295. — Cast, manganese in, determination, 28, 138, 38, 70. — Cast, manganese in, estimation, 33, 90, 50, 112. — Cast, manganese, influence of fluxes on composition, 9, 85. — Cast, manganese, specular white, hydrocarbons produced by action of acids on, 36, 200. — Cast, manufacture, 21, 275. — Cast, mutual relations of iron, phosphorus, and carbon, when together in, 82, 221,

213. — Cast, phosphorus in, detection, 7, 87. — Cast, phosphorus in, determination, 56, 100. — Cast, phosphorus in, estimation, 18, 253. — Cast, pots, enamelling, 76, 230. — Cast, purification, 33, 113. — Cast, purification from phosphorus, 33, 301. — Cast, refining, 7, 283. — Cast, remelting, 53, 283. — Cast, "roaching" of, 22, 69. — Cast, silicon in, 13, 145, 178, 217. — Cast, silicon in, allotropic condition of, 11, 278. — Cast, silvering, 19, 274. — Cast, special kinds, 22, 34. — Cast, stoves (see Stoves). — Cast, sulphur in, detection, 7, 87. — Cast, sulphur in, determination, 23, 61, 132, 143, 204, 29, 144. — Cast, sulphur in, estimation, 21, 101, 25, 11, 35, 74, 70, 257, 81, 54. — Cast, welding, 11, 105. — Cement for, 19, 287. — Cementation, 7, 285, 87, 252. — Cementation, analysis of gases produced in, 11, 91. — Cementation by carbonic oxide, 10, 105, 206. — Cementation by cast-iron heated below its fusing point, 11, 152. — Cementation by silicon, 85, 2000. — Chemical action of liquid sulphurous acid on, 81, 212. — Chemical analysis, 55, 141. — Chemistry and manufacture, 5, 227, 206, 6, 73. — Chrome (see Chrome). — Chromiferous, 18, 250. — Chromium in, 49, 170. — Chromium in, determination, 77, 187. — Chromium in, estimation, 42, 283, 57, 153. — Chromium in, process for finding traces, 11, 136. — Chromium in presence of, detection, 1, 253, 205, 301. — Chromium, soil from Andaman Islands, 63, 85. — Cinders and phosphoric acid, separation, 22, 170. — Cleveland, manufacture of steel from, 40, 251. — Cleveland, phosphorus in, 38, 13, 20. — Coating electrotype plates with, 11, 100. — Coating with copper and brass, 21, 273. — Coating with metallic oxide, 37, 220. — Cobalt in presence of, detection, 47, 93. — Cobaltisation, 35, 166. — Combustion in compressed oxygen, 10, 46. — Combustion tubes, 50, 152. — Compounds, new class, 92, 100. — Conducting-power for heat, 26, 82. — Constitution, 7, 50. — Corrosion, 97, 31, 49, 99, 8, 14, 33, 39. — Crystalline structure at high temperatures, 100, 297. — Crystallisation, 19, 136, 22, 94, 82, 28. — Crystallised, 25, 141. — Crystallography of, 94, 47, 71. — Crystals, titaniferous, 30, 240. — Cyanogen (see Cyanogen). — Cylinders (see Cylinders). — Demidoff's, 37, 25. — Dephosphorisation, 41, 228, 247, 45, 209, 53, 156. — Deposit, analysis, 34, 108. — Detection in precipitate produced by ammonia, 52, 100. — Determination, 31, 113, 65, 225. — Determination by Marguerite's process, 51, 179. — Determination by permanganate in a hydrochloric solution, 48, 102. — Determination, colorimetric method, 51, 250, 65, 107, 73, 250. — Determination, electrolytic, 74, 01. — Determination, Glaser method, 65, 51. — Determination, potassium permanganate process for, 29, 240. — Determination, use of nitroso-*B*-naphthol for, 62, 19. — Determination, volumetric, 10, 228, 16, 218, 28, 71, 46, 285, 48, 248, 68, 74. — Determination with dichloride of copper, 21, 235. — Dialysed, 28, 46. — Dissolved in dilute acids, oleaginous matter formed, 4, 4. — Early Scottish specimen, 70, 43. — Ebullition and distillation, 93, 140. — Effect of temperature on hysteresis loss in, in a rotating field, 99, 287. — Effects of cold on, 23, 62, 69, 109, 124. — Elastic cement for, 35, 116. — Elasticity of, 23, 107. — Electric smelting in connection with, 91, 141. — Electro-chemical colouring of, 4, 5. — Electro-deposition of, 17, 170, 18, 133, 20, 102, 31, 117. — Electro-deposition of copper and brass on, 22, 1. — Electro-magnetic behaviour of

discontinuous masses of, 22, 144—
Electromotive force and electric resistance, variation with temperature, 84, 217—Electro-plating with, 21, 84—
Electrothermics of, 93, 220—
Electrotypes, 28, 118—Electrotyping with brass, 20, 323—Enamelled, 99, 300—Enamelling, 5, 140; 22, 274—
Estimation, 8, 163, 182; 50, 308; 51, 13; 93, 260—Estimation as ferric oxide, 38, 157—Estimation by hypsulphite of soda, 6, 184—Estimation by mixture of iodide and iodate of potassium, 85, 232—Estimation by permanganate in presence of hydrochloric acid, 100, 164, 177—Estimation by permanganate in presence of hydrogen chloride, 99, 247—Estimation by potassium bichromate, 48, 245—Estimation by potassium permanganate, 50, 278—Estimation by potassium permanganate after reduction with titanous sulphate, 97, 218—
Estimation by stannous chloride, 85, 71—Estimation in phosphates, 70, 207—Estimation in presence of phosphoric acid, 65, 68, 78, 89, 98—
Estimation in presence of titanium, 96, 148—Estimation in presence of zirconium, 89, 311—Estimation in state of peroxide by means of hypsulphite of soda, 21, 47—Estimation, interference of manganous salts with bichromate, 77, 133—Estimation of tartaric and malic acids by means of, 18, 73—Estimation, possible source of error in Penny's process, 22, 313—Estimation, quantitative, 22, 256—Estimation, volumetric, 9, 253; 20, 45; 22, 71, 72, 313; 24, 264; 34, 65; 49, 117, 217—Evaporation in evacuated glass vessels, 99, 110—
Experiments on, 55, 48; 61, 97—
Extraction, 8, 241—Extraction from furnace cinders, 9, 107—Extraction from puddling and reheating furnaces, 8, 212—Extraction, patent for, 19, 44—
Ferrous, determination, 97, 122—
Ferrous, determination, relative values of Mitscherlich and hydrofluoric acid methods, 82, 211—
Ferrous, estimation of small quantities by potassium permanganate in presence of hydrogen chloride, 100, 251—Filings in tea, 28, 259, 287, 302—Filings, removal of grease from, 47, 107—Finely-divided, conduct towards nitrogen, 44, 54—
Foil, 11, 156—Forge, estimation of silicon in, 88, 136—Formation of peroxides in the case of, 89, 203—Formation of silicon sulphide in desulphurisation of, 100, 10, 14—Foundries, Chinese, and rice-pan casting, 50, 40—Fragments instead of shot in rinsing bottles, 30, 19—French versus English, 2, 108—Furnace (see Furnace)—Galvanisation of cold, 21, 288—Galvanised, for armour-plated ships, 5, 103—Galvanising, 60, 38—
Gases in, occlusion of, 27, 141—
Gases occluded in, 40, 11—Gilding, 27, 268—Gold deposited on, 77, 129—
Granulated, in place of lead for rinsing bottles, 30, 176—Graphite in, determination, 18, 21—Group elements', melting-points, 97, 28—
Harden ng, 7, 34, 47—Hoops, composition of scales from, 13, 6—Hydrogen reduced, preparation 2 302—
Hydrogenised, 31, 119—Improved by puddling, 25, 24—Improvements in treatment of, 1, 238—In alloys, determination, 50, 210—In animal economy, biological part of, 50, 128—
In ash of plants and animals, 74, 306—In blood, 25, 209; 30, 42—In the blood, determination, 11, 224; 61, 229—In the blood of a non-vertebrated animal, 26, 70—In bone-black, 65, 222; 67, 311—In char, 30, 261, 282—In chlorophyll, 49, 265; 50, 32—In chrome-iron ores, 21, 266—
In clay, 4, 257—In clay, determining, 5, 220—In clay-iron ore, con-

taining pyrites, 30, 221—In coal-gas, 66, 54—In colouring matter of blood, absence of, 30, 252—In copper alloys, determination of small percentages, 97, 10—In cryolite, determination, 60, 85—In ferric compounds, volumetric estimation, 97, 50—In ferric state, estimation by reduction with sodium thiosulphate and titration with iodine, 80, 89—In ferric state, iodometric estimation, 90, 64—In ferro-alloys, determination, 59, 207—
In food, 25, 296—In grain and other food-plants, determination, 59, 116—In Homer's period, 22, 108—In iron-stones, 30, 243—In Japan, 3, 299—
In a magnetic field, effect of electrical oscillations on, 94, 23—In milk, 19, 237—In mineral phosphates, 76, 212—In mineral waters of Rouen, proportion of, 41, 262—
In minerals, detecting minute quantities, 59, 231—In nitric acid, behaviour, 26, 95—In ores, determination, 47, 107; 56, 279; 73, 123—
In ores, determining, errors in, 46, 40; 49, 214—In organic tissues, to detect, 61, 24—In phosphates, estimation, 28, 208—In pyrites of Iowa coal, 25, 71—In salts of nickel, traces of, 36, 166—In tea, 28, 256, 275—In Turkey-red oils, detection, 59, 84—In urine, detection, 45, 234—
In urine, determination, 76, 194—
In waters, colorimetric method of determining, 30, 246, 257—Incandescence, 52, 261—Incandescent, non-transparency of, 36, 204—Indifference of oxygen towards, in presence of water, and effect of admission of carbonic acid, 93, 232, 304—Industry, 22, 72; 47, 307—Influence of acids on, 27, 176; 29, 89—Influence of silicon on, 54, 320—Influence on barley, 69, 26—Lead in presence of, colorimetric determination, 100, 117—Limits of sensitiveness of some reactions for, 45, 35—Liquid, saturated with carbon at the temperature of the electric furnace, increase in volume at moment of solidification, 91, 97—Made red-hot by hammering, 16, 52—Magnetic condensation of soft, 30, 251—Magnetic impenetrability of, 39, 276—Magnetisation, 90, 22—Magnetisation, limits of, 20, 132, 166—Magnetism of, influence of musical vibrations on, 21, 238—Malleable, 1, 216, 311—Malleable, connection between mechanical qualities of, and amount of phosphorus in, 19, 58, 95, 117—Malleable, preparing from pig-iron which contains phosphorus, 26, 59—Malleable, refining, 7, 285—Malleable, welding, 11, 105—
Manganese in, determination, 18, 232; 38, 70; 53, 74; 63, 204; 88, 241—
Manganese in, estimation, 32, 100; 33, 35—Manganese in, estimation, persulphate method, 90, 237—Manufacture, 4, 91, 103; 5, 227, 296; 6, 73, 167; 7, 59, 106, 118; 8, 217; 11, 22, 33; 19, 72; 24, 216; 25, 222—
Manufacture, Chenot's process, 24, 169—Manufacture, electric furnaces applied to, 100, 10—Manufacture in Scotland, analysis of iron ores used in, 35, 17, 27, 51, 110, 238—Manufacture of steel from, 17, 20—Manufacture, treatment of pyrites for, 7, 189—Manufacture, use of titaniferous minerals in, 8, 224, 233—Memoir on, 8, 93—Metallic, action of water and saline solutions on, 78, 202—Metallic, ancient, 37, 104—Metallic, and nickel, 64, 84—Metallic, examination, 67, 110—Metallic, found at Santa Catarina, 35, 145—Metallic, in slags, 57, 171—Metallic, obtained by electric current, 21, 274—Metallic, used in medicine, 2, 268—Metallic, which has served to dissociate CO, 23, 135, 146, 159—
Metallurgy of, 17, 96, 153—Metal-

lurgy, discovery in, 1, 231—Metals which accompany, 35, 226—
Meteorite, 24, 239; 89, 34—Meteorite, arragonite on the surface of, 34, 87—
Meteorite, combined carbon in, 25, 285; 27, 59—
Meteorite, description and analysis of Franklin County, 21, 298—
Meteorite, effect of heating to redness and whiteness in vacuo, 26, 110—
Meteorite, estimating proximate base, enstatite in, 21, 179—
Meteorite, examination of gases occluded in, 25, 202—
Meteorite, existence of diamonds in, 67, 8—
Meteorite, from Augusta Co., Virginia, 24, 88, 176—
Meteorite, in North Mexico, 24, 288—
Meteorite, nitrogen in, 5, 41—
Meteorite, nodule of chromite in, 43, 283—
Meteorite, occlusion of hydrogen gas by, 15, 273—
Meteorite, of Breitenbach, enstatite in, 21, 179—
Meteorite of Collina di Brianza, 21, 12—
Meteorite, of Ovifak, 26, 12—
Meteorite, of Santa Caterina, constitution and structure, 37, 61—
Meteorite, rich in nickel, 34, 238—
Meteorite, selenium in, detection and estimation, 71, 249—
Meteorite, sulphhydrocarbid obtained from a mass of, 32, 313—
Meteorite, that fell in Dickson Co., Tenn., in 1835, 32, 221—
Meteorites (see Meteorites)—Minerals, estimation of sulphur in, 17, 291—
Mines in Algeria, 26, 36—
Molten, lead floating on, 17, 48—
Molten, transparency, 55, 104, 116, 103, 175—
Molybdenum in, estimation, 82, 204—
Mordant, 28, 46—
Mordant, analysis of, 11, 102—
Mordants, examination, 28, 22—
Mordants, fixation on calicos, 30, 53—
Mould spots, 84, 136—
Native, examination of samples, 64, 84—
Native, in rocks in Greenland, 26, 31—
Native, of Greenland, 39, 9—
Native, of the Canon Diablo, 65, 215—
New element in, 76, 118, 171, 182—
Nickel (see Nickel)—Nickeliferous, in meteoric stones, estimation, 20, 254—
Nickelisation, 35, 166—
Nitrogen in, 41, 231—
Obtaining from its ores, 20, 69—
Of Ovifak, 67, 314; 71, 13—
Ore, 12, 254—
Ore, Canadian, 4, 292—
Ore, chrome, analysis, 56; 35, 39—
Ore, chrome, analysis, 73, 1—
Ore, chrome, assaying, 33, 53—
Ore, chrome, determination of chromium in, 44, 43—
Ore, chrome, estimation of chromium in, 77, 141—
Ore, chrome, estimation of oxide of chromium in, 24, 305—
Ore, chrome, in Australasia, 57, 1—
Ore, chrome, of Japan, 44, 217—
Ore, chrome, opening up, 64, 293—
Ore, chromic, 35, 105—
Ore fields in South of Russia, 33, 12—
Ore from Andorra, 27, 34—
Ore, magnetic, analysis, 27, 107—
Ore, Marbella, 36, 245, 255—
Ore, phosphorus in, 38, 39; 62, 220—
Ore, separation of silica in, 41, 234—
Ore, Spanish, 4, 164—
Ore, titaniferous from Norway, 83, 181—
Ore, titanium in, 1, 274, 276—
Ores, alumina in, determination, 27, 31—
Ores, analysis, 18, 11; 23, 215, 228; 35, 203; 52, 321; 53, 52, 65, 79; 56, 183, 197, 202, 214, 226, 234, 246—
Ores and phosphoric acid, separation, 22, 170—
Ores and their various modes of occurrence, 27, 5—
Ores, arsenic in, 51, 115—
Ores, assay of, 25, 160—
Ores, assay of, stannous chloride as a reducing agent in technical, 31, 63—
Ores, Belgian, value, compared with those of foreign origin, 36, 121—
Ores, blast-furnaces for smelting, 24, 241—
Ores, Canadian, smelting by electrothermic process, 94, 35—
Ores, Canadian, titaniferous, 2, 41—
Ores, chrome, analysis, 6, 30—
Ores containing alumina, determination of silica in, 94, 308—
Ores, determination of reducibility of, 78, 4—
Ores, extraction of vanadium from, 55, 74—
Ores, furnace for, 25, 215—
Ores, in

Eastern part of France, 25, 107 — Ores, manganese in, determination, 53, 74; 75, 51 — Ores, manganese in, estimation, 27, 88 — Ores, Norwegian, composition and metallurgy, 16, 250 — Ores, Norwegian titaniferous, composition and metallurgy, 18, 252 — Ores of Province of Languedoc, 20, 45 — Ores of Yorkshire, etc., 13, 151 — Ores, opening up of specular, 79, 157 — Ores, phosphorus in, determination, 36, 232; 49, 208 — Ores, phosphorus in, estimation, 42, 87 — Ores, reduction of ferric chloride to ferrous chloride in analysis of, 29, 412 — Ores, separating and utilising phosphoric acid from, 26, 4 — Ores, silica in, determination, 98, 31 — Ores, sulphur in, 54, 38 — Ores, sulphur in, determination, 54, 38 — Ores, sulphur in, estimation, 54, 158 — Ores, titaniferous, determination of titanic acid in, 28, 93 — Ores, treatment of, 75, 24 — Ores used in iron manufacture in Scotland, analyses of, 35, 17, 27, 51, 110, 238 — Ores, utilisation of, 53, 74 — Ores, valuation by permanganate of potash, 8, 54 — Ores, zinc in, determination, 63, 25 — Organisms in Lancashire waters, 89, 8 — Oxidation, 21, 119; 23, 98 — Oxidised, from condenser of H.M.S. Spartan, analysis, 45, 133 — Passive, 87, 35 — Passive state of, 57, 180 — Passivity, 2, 238; 23, 509; 30, 1200; 153, 1885; 40, 204; 41, 202 — Permeability by hydrogen, 9, 299 — Phosphoric acid in presence of, estimation, 26, 60 — Phosphoric crude, treatment in open hearth furnaces, 54, 275 — Phosphorus in, 17, 254; 38, 14; 29, 39, 145 — Phosphorus in ancient, 40, 148 — Phosphorus in crude, determination, 55, 248 — Phosphorus in, determination, 45, 195, 284; 47, 253; 49, 208; 53, 233, 235; 55, 230; 58, 65; 60, 20; 62, 28; 65, 52; 68, 324; 67, 101 — Phosphorus in, determination, sources of error in, 96 — Phosphorus in, estimation, 13, 170; 19, 71; 37, 68, 80; 42, 87; 46, 23; 52, 279; 56, 67; 83, 122 — Phosphuret, 25, 299 — Phosphurets, 26, 309 — Pig, analysis, 21, 71 — Pig, carbon in, estimation, 21, 107 — Pig, chemical constitution, 9, 157 — Pig, chromium, 35, 122 — Pig, condition in which silicon exists in, 29, 107 — Pig, containing manganese, 35, 44 — Pig, graphite in, determination, 73, 31 — Pig, manganese in, estimation, 37, 14, 85; 54, 174, 200 — Pig, manufacture, 20, 107; 21, 96 — Pig, phosphorus in, 62, 220, 231 — Pig, phosphorus in, estimation, 20, 144; 54, 174, 200 — Pig, phosphorus in hematite, estimation, 91, 89 — Pig, production, and blast-furnaces, 24, 264 — Pig, refining for cast-steel, 22, 108 — Pig, rusted, loss of carbon in, 63, 73 — Pig, separating carbon from, 58, 199 — Pig, silicon in, estimation, 22, 144; 46, 236 — Pig, supply for Bessemer process, 27, 25 — Pig, titanium in, 8, 224, 233 — Pig, titanium in, determination, 42, 299 — Pig, titanium carbide in, 55, 156 — Pig, vanadium in, 8, 204, 277 — Pig, which contains phosphorus, preparing malleable iron from, 26, 59 — Pipes, action of coal gas on, 2, 93 — Pipes, lining, 77, 100 — Plates, action of water on thin, 39, 35 — Powder or mixture for refining and steelifying, 1, 176 — Precipitability by sulphuretted hydrogen, 53, 300 — Precipitated galvanically, 21, 179 — Precipitation, influence of ammonia and its salts on, 4, 150 — Preparation of pure, 20, 101 — Preservation from action of salt, 34, 174 — Preservation

in sea, 10, 35 — Preservation in soft water, 10, 237 — Preserving, 5, 358 — Protection from rust, 13, 24 — Puddled, origin of fibre in, 33, 221 — Puddling, 11, 32 — Puddling, when it contains copper, 3, 182 — Pulverised, containing copper, 23, 119 — Pyrophoric, 5, 130 — Quevenne's, estimating impurity in, 2, 114 — Reaction with, peculiar to thioglycolic acid, 40, 253 — Reagent for, 20, 228 — Reducibility of, 56, 258 — Reduced by hydrogen, 40, 89 — Reduced, detection of plumbago in, 1, 11 — Reduced, impurities in, 24, 73 — Reduction, 92, 52 — Refining and purifying, and converting into steel, 5, 200 — Refining, Elk-Schaeffer process, 19, 2300 — Relation between magnetic and chemical properties of complex salts containing, 98, 83 — Relation to cobalt, 59, 93 — Removal of phosphorus from, 25, 237, 244 — Rod affected by the gases of a Siemens furnace, composition of a substance formed on, 36, 22 — Rust, composition, 21, 42 — Rust, possessing magnetic properties, 66, 230, 239 — Rusting, 17, 182; 18, 119; 87, 293, 311; 88, 23, 288; 92, 244, 266; 93, 197, 264; 95, 129, 163; 98, 20; 99, 106 — Rusting, chemical reactions involved in, 87, 270 — Rusting, preventing, 7, 215; 42, 271, 286 — Rustless, 40, 180 — Safes, alum in, 14, 24 — Salts, 65, 226; 66, 172 — Salts, complex, in which the iron is masked, 97, 14 — Salts, determination, 67, 196 — Salts, for steeling copper-plates for engravers, 36, 11 — Salts, manufacture, 3, 221 — Salts, proto- and per, determination of indigo in presence of, 36, 270 — Salts, pyrogallol in presence of, 30, 81, 187 — Salts, reaction of salicylic acid with, 40, 143 — Salts, reactions of, 3, 257 — Salts, volumetric estimation of free acid in presence of, 93, 10 — Samples, and materials employed in their manufacture, chemical examination, 6, 123, 133, 154 — Sand, magnetic, from the Kyles of Bute, 39, 102 — Sand, from New Zealand, 1, 116, 159, 231; 3, 299 — Sand, titanite, 11, 9 — Sanitary properties of, 46, 93 — Separation, 66, 182; 84, 256 — Separations with alkaline salts, 79, 193 — Sheet, 4, 39 — Sheet, pasting labels on, 21, 216 — Sheet, thin, 13, 24 — Ships (see Ships) — Silicon in, determination of, 18, 232 — Silicon in, 4, 75 — Silicon in crude, determination, 61, 121 — Silicon in, determination, 17, 100, 115; 18, 232; 40, 40, 63; 42, 31; 49, 233; 56, 49, 82, 215, 231, 244; 53, 300 — Slag of fine blue colour, analysis, 28, 272 — Soap (see Soap) — Soft, application of the pre-existence of Ampère's currents in, 41, 58 — Magnetic condensation of, 30, 251 — Soldering, 27, 268 — Solid, floating on the molten metal, 21, 287 — Solubility of graphite in, 97, 45 — Solution, preparing, 62, 274 — Spathic, analysis, 18, 72 — Specific heat at high temperature, 91, 255 — Spectra of, 28, 82 — Spectrum, wavelengths of lines in, 83, 300 — Specular, 16, 66 — Spongy, 50, 300 — Steel making, sulphur in, estimation, 58, 41, 50, 95 — Sudden loss of magnetic properties of, 57, 178 — Sulphur in, 38, 145; 58, 255 — Sulphur in, determination, 18, 15; 21, 147; 29, 134; 58, 63, 71, 95; 59, 107; 75, 47, 109; 90, 230, 326 — Sulphur in, estimation, 17, 22, 267; 21, 10; 28, 229; 46, 199, 272; 54, 158; 58, 41, 59, 95; 72, 299 — Sulphur in, estimation by means of a plate of silver, 18, 15 — Sulphur in presence of, estimation, 81, 60 — Surfaces, method of producing magnetic oxide on, 39, 212 — Tanks (see Tanks) — Temperature of transformation of, 70, 258 — Temper-

ing, 69, 301 — Test, 54, 289; 58, 178, 105 — Tinned, utilisation of scraps of, 20, 275 — Tinning, 21, 276 — Tinning without apparatus, 23, 21 — Titaniferous, of abnormal composition, 29, 253 — Titanium carbide in crude, 64, 225 — Titration, 58, 158 — Titration with sodium hyposulphite, 47, 210 — Trade, 38, 243 — Transformation into steel, 30, 30 — Transformation produced in, 68, 318 — Treating substances containing, 8, 21 — True sense of the word, 35, 177 — U.S. Board to test, 31, 270 — Vaporisation of, 78, 23 — Vapours evolved on heating, 49, 241; 50, 303 — Variations in length caused by magnetisation, 51, 261 — Varnish for, 4, 56; 19, 104 — Vats (see Vats) — Vessels, concentration of sulphuric acid in, 80, 295 — Vessels, protection from instant corrosion, 20, 81 — Villari critical point in, 61, 155 — Villari critical points in, effect of change of temperature on, 61, 287 — Volatilisation, 27, 131 — Volatility, 64, 50 — Water-pipes, corrosion of, 22, 23 — Welding, 23, 132, 168, 228, 263 — Wine of, 10, 162, 174, 220 — Wire, analysis, 33, 289 — Wire, effect of acid on interior of, 29, 118 — Wire in claret, 28, 242 — Wire, molecular change in, 19, 180 — Wire nets with asbestos covers, 74, 257 — Wire, peculiarity resulting from presence of phosphorus in, 9, 189 — Wire, rupture by a blow, 24, 287 — Wires and rods, propagation of longitudinal waves of magnetic flux along, 93, 67 — Wires, magnetic torsion of, 55, 259 — Wrought, carbon in determination, 50, 57 — Wrought, cause and prevention of deterioration, 2, 183 — Wrought, coppering, 45, 22 — Wrought, estimation of manganese in, 27, 14 — Wrought, estimation of slag in, 65, 308 — Wrought, for engines and machinery, 22, 179 — Wrought, making, 39, 35 — Wrought, manufacture, 1, 203, 239; 21, 96 — Wrought, pure, 26, 88 — Wrought, refining, 7, 285 — Wrought, sulphur in, determination, 29, 134 — Iron acetate, 20, 35 — Behaviour, 48, 114, 119 — Iron acetonitrates, 1, 215 — Iron albuminate, 7, 145 — As therapeutic agent, 6, 127 — Iron ammonio salts, 14, 266 — Iron arseniate, artificial production of a crystalline, 41, 173 — Iron arseniuret, 22, 83 — Iron benzoate, 3, 259 — Iron boride, preparation, 71, 88 — Iron borides, preparation and properties, 96, 83 — Iron carbide and chromium carbide, preparation of double, 78, 316 — And molybdenum carbide, preparation of double, 78, 316 — And tungsten carbide, double, 78, 303 — Magnetic, 57, 42 — Preparation, 75, 202 — Iron carbides, calorimetric study of, 31, 217 — Of Greenland, native, 40, 99 — Iron-carbon system, chemical equilibrium of, 85, 71 — Iron carbonate, 1, 110; 7, 112, 113 — Iron c-ironyl, 64, 291; 96, 754 — And action of light and heat on, 95, 97, 109 — Physical and chemical properties, 93, 1, 14, 24 — Iron chloride, 11, 152 — And thallium chloride, double, 17, 165 — Dissociation, 23, 300 — Molecular weight, 69, 168 — Iron chlorides, 44, 106, 295 — Volatilisation in analysis, 80, 39 — Iron chloroborate, 67, 288 — Iron chromate, 44, 216, 295 — Estimation of chromium in, 35, 107 — Iron chromates, 71, 37, 160 — Iron citrate, alkaloid in various specimens, 10, 163; 12, 183 — And bismuth, 25, 299 — And magnesia, 9, 176

- Iron cystinate in contaminated waters, reaction of diazobenzene sulphonate of sodium on, 83, 35
- Iron ethylchloride and Peruvian balsam, 19, 275
- Iron ferrocyanide, oxydasic phenomena produced by colloidal, 98, 280
- Iron fluoride and sodium fluoride, double, 20, 107
- Iron fluorides, anhydrous and crystalline, 66, 305
- Iron fluosilicate, crystalline, 34, 184
- Iron gallate, 37, 216
- Iron graphites, 71, 49
- Iron hydrate, magnetic, 17, 141
- Iron hydrates, native, 17, 55
- Iron hydride, 6, 107, 167
- Iron hypophosphite, syrup of, 17, 140
- Iron iodide and quinine, crystallised, 9, 135 — Syrup, 1, 24, 47; 16, 255 — Syrup, alteration, 82, 71 — Syrup, estimation, 85, 122 — Syrup, preservation, 17, 69
- Iron methylates, crystallised, 96, 218
- Iron molybdate, 3, 223
- Iron muriate, Dale's patent magnetic, presence and effect of arsenic in, 2, 49
- Iron nitrate, 17, 242, 266; 21, 166 — Commercial, analysis, 38, 157
- Iron nitride, 3, 297; 12, 21; 68, 152; 82, 300 — Heat of formation and constitution, 82, 312
- Iron nitrosulphides, 73, 72
- Iron oxalate, 3, 48, 359; 4, 300; 5, 104, 44, 262
- Iron oxamate, 3, 253
- Iron oxide, 2, 263 — Action of hydrogen on, 21, 285; 22, 34 — Action of sulphuretted hydrogen gas on, 19, 178 — And alumina, determination, 61, 108 — And alumina in phosphates, 40, 203; 76, 150 — And alumina in phosphates, determination, 53, 51, 85, 87 — And alumina, separation, 57, 221; 66, 37; 80, 30 — And copper oxide, native compounds of, 28, 82 — And oxide of uranium, separation, 24, 233 — And sulphuric acid, 2, 263 — As carrier of oxygen of air to combustible matters, 5, 0 — Colloidal, 42, 23 — Determination, 61, 108; 62, 73, 84; 63, 251 — Enclosed in calcite and quartz at the Mwyndy Mines, 34, 10 — Estimation of naphthalene in spent, 96, 202 — Hydrated, 4, 331; 23, 276 — Hydrated, action of sulphuretted hydrogen gas upon, 19, 178 — Ignited, process for dissolving, 74, 9, 100 — In commercial phosphates, 40, 203 — In phosphate rock, determination, 74, 112, 146 — In phosphates, 53, 51, 85, 87 — Known as forge-scales, 25, 156 — Magnetic, 43, 59; 44, 93 — Magnetic, allotropic varieties, 37, 142 — Magnetic, and its salts, 20, 70, 156 — Magnetic, crystals of, formed during the roasting of spathic minerals, 35, 10 — Part taken by, in absorptive action of soils, 16, 253
- Iron oxides, 36, 10 — And ferrites, genetic and constitutive relations in magnetic properties, 100, 107 — Considered as a means of conveying oxygen of air to combustible matters, 1, 13 — Employed in gas purifiers, re-activation by means of steam, 21, 215 — Manufacture, 3, 221 — Reduction, 72, 211 — Reduction by carbonic oxide and carbonic anhydride, influence of water vapour on, 91, 58 — Spent, analysis and valuation, 36, 188 — Which have served to dissociate CO, change by, 33, 135, 146, 159
- Iron oxysulphocarbonate in water of the Rhone, 82, 315
- Iron peptonate, 52, 04
- Iron perchloride, action of hydrosulphuric acid on, 1, 84 — Action on bases in opium, 37, 158 — Affinity in solutions of, 19, 297 — Arsenical, empoisonment of Thames with, 2, 112 — Contract for, 1, 144 — Deodorisation of River Thames by, 1, 254 — Deodorising sewage of London by, 1, 266 —
- Hydrolysis of, 98, 294 — Official solution of, 76, 146 — Organic solutions of, 82, 94 — Preparation, 6, 253 — Preparation of neutral, 21, 143 — Quantity of arsenic in, 2, 100 — Reduction by platinum, 4, 284 — Solution, making of constant strength, 11, 31 — Use as disinfectant of sewage, 1, 218
- Iron peroxalate, photo-chemical reaction of, 45, 236
- Iron peroxide, action of sulphuretted hydrogen on, 21, 46 — And oxide of copper, separation by ammonia, 1, 110 — And oxides of nickel and cobalt, separation, 1, 4 — As a generator of nitric acid, 32, 157 — Crystallisation, 85, 122 — Electro-chemical colouring and deposition on plates of steel and iron, 4, 5 — Magnetic, 1, 11, 95, 119; 7, 100, 200 — Salts, 25, 69 Salts, action of heat on, 19, 21, 228
- Iron persulphate, new use for, 3, 31
- Iron phosphate, 17, 278 — Analytical properties, 70, 142 — In manures, 28, 232 — Reduction of carbonic acid and carbonic oxide by, 29, 93
- Iron phosphates, estimation of fluorine in, 11, 104 — In superphosphates, estimation, 19, 229, 266 — Native, analysis, 29, 111
- Iron phosphide, analytical properties, 70, 142 — In minerals, reduction, 17, 228 — Preparation, 81, 154
- Iron phosphides, 100, 327
- Iron protochloride, 4, 75
- Iron protiodide, 5, 10
- Iron protoperoxide, decrease of chemical force of hydrogen and carbonic oxide for reduction of, by the admixture of foreign or other gases, 25, 142
- Iron protosulphate, 4, 156 — And ammonia, quantity of water in, 26, 59 — Preservation, 20, 57
- Iron protosulphide, distinguishing from magnetic sulphide of iron, 17, 70
- Iron protoxide, double salts of, 26, 216
- Iron pyrites, 65, 53 — Amount of sulphuric anhydride formed in roasting, 36, 242 — And grey cobalt, 22, 287 — Arsenic in, 44, 216 — Assaying, 24, 182 — Copper in, 12, 231 — Cupreous, silver from, 31, 165 — Decomposition, 75, 259 — Decomposition of water by, 37, 49 — Gaseous products of the combustion of, 51, 148 — Relation between the hemihedral crystalline form and the thermoelectric condition of, 23, 156 — Sulphur in, determination, 42, 317 — Sulphur in, estimation, 5, 45 — Utilisation, 32, 41
- Iron pyrophosphate, 6, 223; 13, 142 — Apparatus for decomposition, 11, 174 — Preparation, 1, 160
- Iron quadroxalate, 2, 251
- Iron salicylate, production, 36, 121
- Iron selenides, 82, 35
- Iron sesquichloride and sodium sesquichloride, double, 16, 87 — Volatility at common temperatures, 16, 207, 219, 233
- Iron sesquioxide and alumina, separation, 18, 154 — And alumina and phosphoric acid, separating, 31, 214 — And lime, separation, 2, 291, 328 — And magnesia, separation, 2, 328 — And phosphoric acid, separation, 4, 75; 40, 292 — Anhydrous, reduction with pure carbon in vacuo, 27, 313 — Anomaly of, as prepared from meteoric iron, 31, 118, 210 — Carbonate of, 1, 110 — Colloidal, 91, 105 — Hydrated, as antidote for arsenious acid, 2, 114 — Phosphate of, 4, 158, 175 — Phosphates of, 30, 205; 33, 45 — Sulphate of, action of hydrochloric acid on, 86, 95; 87, 74
- Iron sesquiphosphide, crystalline, 73, 245
- Iron sesquisalts, decomposition, 21, 53
- Iron sesquisulphate as a test, 16, 223
- Iron sesquisulphide, 30, 139
- Iron silicide, 32, 113 — And its presence in industrial ferrosilicons, 82, 219 —
- Preparation, 79, 215 — Remarkable specimen, 39, 9
- Iron silicides, 32, 173; 83, 182
- Iron stearate, 2, 90
- Iron subsulphide, crystalline, 58, 200
- Iron sulphate, application in agriculture, 50, 256 — As a disinfectant, 13, 100 — As manure, 51, 60 — As manure for potatoes, 71, 15 — Precipitated by alcohol, 27, 21 — Use in agriculture, 56, 84 — Value as a manure, 48, 276
- Iron sulphide and aluminium sulphide, combinations, 95, 226 — And copper sulphide, double, 1, 103; 5, 122 — And potassium sulphide, double, 20, 70; 21, 285 — Heat of combustion, 94, 47 — In meteoric irons, nature of, 29, 206 — Magnetic, distinguishing from protosulphide of iron, 17, 70 — Regeneration of, influence of heat on, 19, 273
- Iron sulphides, preparation, 18, 46 — Sulphur in, estimation, 75, 121
- Iron sulphuret crystals, double, 20, 167
- Action of air on, 21, 46
- Iron superphosphate, syrup of, 1, 170; 6, 317
- Iron tannate, 37, 216
- Iron trichloride, action on carbon bisulphide, 37, 224
- Irons, 61, 132 — Cast, 56, 181; 96, 108 — Cast, graphite and graphitic carbon in, 97, 35 — Cast, determination of manganese in, 38, 70 — Cast, manganese (see Manganese) — Deformation and rupture, 83, 317 — Determination of critical points of, 89, 34 — Determination of silicon in, and aluminium in commercial, 69, 13 — Determination of sulphur in, 90, 230 — Hematite (see Hematite) — Meteoric, 20, 82; 58, 106, 110 — Meteoric, analysis, 19, 5, 20 — Meteoric, in United States, 19, 263 — Meteoric, nature of sulphide of iron in, 29, 206 — Meteoric, products of oxidation compared with terrestrial magnetites, 28, 202 — Pig, estimation of carbon in, 28, 198, 282 — Pig, estimation of silicon, graphite, manganese, aluminium, and calcium in, 29, 57, 91, 110, 112, 120 — Pig, sulphur in, estimation, 28, 248, 266, 276
- Ironclads, optical compass for, 42, 48
- Ironstone clay (see Clay) — Cleveland, phosphorus in, 38, 14, 29 — Cleveland, zinc, nickel, and cobalt in, 8, 136 — Of the Weald, 75, 207
- Ironstones, clay (see Clay)
- Irradiation, 27, 219
- Irrigation canal from the Rhone, 29, 145 — Practical, 26, 119 — Water in, action, 44, 40 — Water in, changes and effects, 46, 176

- Lead, 64, 111—Accumulator (*see* Accumulator)—Action of aerated water on, 29, 61—Action of concentrated sulphuric acid on, 41, 236; 42, 314—Action of dilute saline solutions on, 25, 294; 35, 10—Action of distilled water on, 66, 168—Action of drinking water on, parts played by salt in, 30, 82 — Action of hydrochloric acid on, 50, 126—Action of petroleum on, 58, 30—Action of silicon on, 74, 73—Action of sulphuric acid on, 7, 44; 30, 107—Action of vegetable acids upon, 47, 290, 300—Action of water on, 4, 172; 18, 206; 28, 15, 312, 314; 29, 145, 164, 287; 35, 110; 46, 145, 170; 78, 209 — Action of waters from Setif on, 84, 243 — Action of waters of Seine and Oureq on, 29, 61—Action on water, 28, 15, 312, 314—Alloys, spontaneous decomposition, 26, 204 — Alloys, determination of bismuth in, 16, 25 — American, Norwegium in, 42, 76—Analysis, volumetric method, 73, 18 —And aluminium alloys, determination of fusion-points, 94, 170—And antimony alloys, 40, 43—And antimony and tin, separation, 6, 248 — And antimony in form of sulphide, estimation, 91, 289—And antimony in tin-foil, 78, 101—And antimony, separation, 8, 164; 71, 104 — And arsenic, separation, 71, 104 — And bismuth, separation, 25, 85, 100; 58, 129; 65, 28, 137; 75, 27 — And cadmium, separation, 69, 284, 292—And calcium alloys, 94, 96 — And copper, action of sea-water on, 35, 192—And copper and antimony alloys, experiments with, 45, 105 — And copper and arsenic, separation, 77, 172—And copper and tin, soluble compounds of, in newly distilled alcoholic spirits, 4, 117—And copper and zinc smelting works, injurious constituents of smoke of, 46, 208—And copper, estimation of small quantities, 33, 11—And copper, separation, 59, 222; 69, 7—And its salts with regard to health, 42, 247 —And manganese alloy, 22, 194 —And manganese, research on, 87, 300 —And mercury, separation, 4, 218; 72, 65—And platinum alloy, 22, 263 —And potable waters, 50, 128—And silver alloys, distillation, 95, 46 — And silver and zinc, separation and determination, 65, 184—And silver, relative stability of corresponding compounds of, 99, 252—And silver, separation, 3, 12; 7, 59; 66, 296; 91, 223—And sodium alloys, 62, 314; 63, 8, 10, 83—And sulphur oxides, reactions between, 75, 241, 260—And tin alloys, 5, 121—And tin alloys, action of vinegar on, 40, 46—And tin alloys, analysis, 73, 25—And tin alloys, chemical resistance to vapour of water, 11, 80 — And tin alloys, determination, 59, 72—And tin alloys, heat of, 54, 261 — And tin alloys, physical properties, 4, 316—And tin, antimony, and arsenic alloys, analysis, 73, 25—And tin, zinc, and cadmium, alloys, 60, 268—And tin, separation, 71, 104—Aqueeduct pipes, local decomposition in, 4, 139—Argentiferous, and silver, separation, 24, 45—Argentiferous, electrolytic disargenteration of, 74, 37, 40—Assay, 21, 137; 30, 293—Atomic weight, 67, 133; 93, 55, 196; 98, 64, 78; 99, 69; 100, 278—Bath, convenient form, 41, 224—Behaviour towards water, 14, 129—Bismuth in commercial, detection, 48, 193—Bismuth in, detection, 49, 36—Black (*see* Black lead)—Bottles for hydrofluoric acid, 67, 216—Chamber process, 16, 12—Chamber, sulphuric acid in, 49, 13—Chambers, determination of oxygen in gases which escape from, 27, 306; 29, 62—Chambers of sulphuric acid works, 25, 58—Characterisation of, 90, 3—Chemical change produced by immersion in distilled water, 85, 130—Coating iron and other metals with, 78, 304—Compounds in commercial tartaric and citric acids, detection, 66, 169—Compounds, combination heats of soluble, 48, 194—Contribution to knowledge of, 11, 226—Corrosion by New River Company's water, 34, 282—Covering brass or copper with, 6, 163—Crystals, 6, 179—Desilvering, 22, 108 —Desilvering, Rozan's process for, 39, 30—Desilverisation by zinc process, 22, 240, 314; 42, 281—Detection and estimation of small quantities in presence of other metals, 1, 24—Detection in presence of ammonium citrate, 46, 184—Detection in tinning of utensils, 51, 49—Detecting metallic silver in presence of, 61, 12—Determination, 36, 96; 64, 242; 68, 205—
- Determination by phosphomolybdic method, 62, 226—Determination, colorimetric, in presence of iron, 89, 311; 100, 117—Determination, electro-analytical, as peroxide, 100, 269 —Determination, electrolytic, 69, 78 —Determination, indirect titrimetric, 100, 208—Determination, quantitative, 68, 224; 73, 24—Determination, quantitative, by persulphates in acid solution, 92, 70—Determination, quantitative electrolytic, 69, 219—Determination, quantitative, in chemical analysis, 5, 144—Determination, volumetric, 42, 89; 46, 48; 47, 248; 58, 61; 67, 128, 137; 73, 90—Determination, volumetric, by means of potassium ferrocyanide, 59, 73—Electro-chemistry of, 94, 314 — Electro deposition, 41, 209—Erosion by insects, 10, 168 — Estimation, 79, 12, 34, 58, 182—Estimation and separation by electrical means, 79, 122—Estimation as iodate, 38, 145—Estimation by electrolysis of the sulphate and the chlorides, 32, 51—Estimation by precipitation in a metallic state, 17, 2—Estimation in state of sulphurets, 1, 119—Estimation of small quantities of silver in large amount of, 88, 309—Estimation, technical, 67, 178—Estimation, volumetric, 8, 207; 15, 306; 45, 167; 68, 211—Estimation, volumetric quantitative, 25, 276—Extraction from its ores, 21, 276—Extraction from residues of production of zinc, 58, 37—Finely-divided, use for examination of drying oils, 47, 203—Floating on molten iron, 17, 48—Fume, 40, 163 — Glasses or frits used in preparation of pottery glazes, solubility, 82, 230—Harmlessness of, 49, 256—Impurities in, and their influence on its technical use, 8, 213, 224—In aerated water, 31, 77—In alcoholic spirits, 4, 117—In alloys, quantitative estimation, 98, 1—In artificial serums, 76, 82—In brain, 30, 99—In brains of two factory operatives, 55, 222—In calcareous deposits of kettles, 3, 41—In carbon group, attempt to explain occurrence of, 90, 271—In complicated organic salts, determination, 97, 192—In diet, continued ingestion of, 45, 164 —In distilled water, 32, 82—In filtering paper, 1, 155, 168—In food, 47, 305—In ores, determination, 30, 187; 87, 40, 52, 66; 98, 105—In pigments, substitution of zinc for, 68, 35—In platinum points in lightning conductors, 33, 251—In potable water, detection, 83, 40—In samples of tin, determination, 44, 215—In silver coins, 3, 318, 343—In slags, 76, 192 —In sulphates and chromates, electrolytic estimation, 81, 226—In tin, detection, 12, 155—In tin alloys, determination, 58, 109—In tin lining of vessels, rapid process for detection, 31, 196—In tin paper, 46, 68 —In tinned articles, 31, 268—In urine, detection, 68, 5—In urine, determination of small quantities, 43, 233—Manufacture, new process, 18, 6 —Metallic, action of water on, 78, 209 —Metallic, detection, 66, 169 —Metallic, quantity met with in litharge, 20, 249—Metallurgy of, 6, 138; 21, 192; 25, 165; 67, 201; 69, 195 —Nickel in, 10, 193—Occlusion of hydrogen by, 65, 195—Orange (*see* Orange-lead)—Ore, explosions in veins of, 12, 193—Ores, analysis, 92, 15 —Ores and solutions, treating, 7, 299 —Ores and zinc ores, Ellerhausen's process for treatment of mixed, 83, 98—Ores, assaying, 27, 70; 63, 30, 73, 145—Ores, smelting or reducing, 11, 202—Ores, treating by hydrochloric acid, 10, 264—Oxidation, new product of, 37, 122—Pans, concentration of sulphuric acid in, 25, 207 — Pipes, action of house sewage on,

- 20, 283—Pipes, action of water on, 45, 7, 14, 110—Pipes coated inside with tin, 24, 276—Pipes, incrustation with sulphide of lead, 39, 33—Pipes, influence of water on, 24, 23—Pipes, protected, 13, 143—Pipes, pure water from, 8, 157—Plates, formation of secondary elements of, 46, 159—Poisoning, 30, 64; 34, 196—Poisoning, Huddersfield case, 46, 38, 145—Possessing, immunity of some low forms of life, 71, 223—Poisoning, milk as a preservative against, 21, 250—Producing white pigments from, 22, 43—Purifying, 5, 130—Radio (see Radio-lead)—Radio-active, 25, 89; 90, 92—Radio-active, and Grignard's reaction, 96, 13—Radio-active, as a primarily active substance, 87, 241—Radio-active, extracted from pitchblende, 94, 90—Red (see Red lead)—Refining and softening, 11, 200—Refining, 22, 12, 24—Salt, a curious, 77, 233—Salt corresponding to cobalt yellow, 2, 331—Salts, 27, 233—Salts and copper salts, behaviour with soda lye, 46, 120—Salts, anomalous behaviour of hydrogen electrode in solutions of, 97, 81—Salts, decomposition by alkalies, 45, 208—Salts, double, 47, 270—Salts, halogen, action of ammonium hydrate on, 52, 43—Salts, halogen, mixed, 78, 23, 49; 79, 287, 311—Salts in detection of phosphorus, 48, 292—Salts, manufacture, 4, 288—Salts of monoalkylphosphoric acids, 89, 203—Salts, reaction of acetates on, 27, 130—Salts, retention by filter-paper, 53, 260—Sheet, action of water on, 29, 92—Sheet, application of thin, instead of lint in wounds, 22, 700—Shot fired against an iron target, melting of, 22, 191; 24, 133—Shot, fusion when in contact with an iron target, 23, 108—Slags, 57, 4, 18, 32, 43, 57—Soft, analysis of, 20, 108—Solvent action of saline solutions on, 25, 283; 35, 82—Spongy, reducing action, 47, 277—Sub- or oxy-sulphate of, 4, 174—Sulphur in commercial, determination, 72, 35—Surfaces exposed to action of water, protection, 8, 167—Trade, 38, 242—Tubing, silvring, 2, 84—Tubing, tin-lined, 22, 168—Versus tin for water pipes, 19, 104—Volumetric separation and determination, 69, 6—White (see White lead)—Works, method of obtaining metallic particles contained in fumes or vapours from, 1, 94
- Lead-free ammonium salts of tartaric and citric acids, 77, 119—Reagents (see Reagents)
- Lead acetate, acetic acid in, 23, 102; 29, 100; 41, 110—And lead sulphate, crystalline compound of, 90, 160—Basic, behaviour of nitrates of potash and lead towards a solution of, 14, 34—Basic, solubility of lead sulphate in, 50, 67—Decahydrated, 61, 190—In acetic solution, action on chloride of benzylidene and chloride of benzyl, 80, 147—Influence on determination of inverted sugar, 72, 186—Ionisation in aqueous solutions of, 100, 302—Neutral, action of carbonic acid on a solution of, 47, 155—Precipitation of hop-bitter by, 57, 53—Transformation of sulphate of lead into, 1, 71
- Lead aluminium alloys, 89, 261
- Lead antimonuret, 22, 83
- Lead-antimony alloys, determination of antimony and arsenic in, 97, 271
- Lead arsenate, a new insecticide, 74, 17—And calcium arsenate, 95, 104
- Lead arsenate, solubility in dilute acetic acid, 42, 165
- Lead arseniuret, 22, 83
- Lead linoxide, use in analysis, 78, 328; 89, 20
- Lead bromosulphobismuthate, preparation and properties, 85, 200
- Lead carbonate, dissociation, Watts' principle applied to, 91, 201—Estimation of tannic acid by, 50, 175—For crystal glass, 25, 203—From coffins, 1, 288—Manufacturing, 1, 20
- Lead chlorate, decomposition, 81, 201
- Lead chloride, action of carbon monoxide on, 52, 183—Action of hydrochloric acid on, 43, 195—And ammonium chloride and lead oxychloride, 47, 128—Electrical properties, 37, 247—Electrolysis of fused, 91, 10—Solubility of, 27, 130
- Lead chlorobromides, 43, 216; 80, 144
- Lead chloroselenides, 81, 251
- Lead chlorosulphide, 65, 107
- Lead chlorosulphobismuthate, preparation and properties, 85, 263
- Lead chromate, 21, 240, 252—Action of nitric acid on, 27, 319—Colouring power, 100, 12—Combustions, 71, 152—Detection and determination of lead sulphate in, 27, 319—Elementary analysis with use of, 74, 110—In crystals, preparing neutral, 56, 180—In elementary analysis, 57, 221—Normal and basic, 35, 108—Poisoning by cotton dyed with, 60, 74—Potash in, 21, 253—Yellow, 17, 61
- Lead cyanate, formation of urea by hydrolysis of, 88, 302
- Lead diiodide, coefficients of expansion of, 43, 109
- Lead ethoxide, formation, 98, 34
- Lead ferrocyanide, 84, 170
- Lead fluosilicate, manufacture, 6, 129
- Lead glycerides, 44, 13
- Lead hyposulphite, decomposition, 61, 162
- Lead iodide, 46, 290—Action of sulphite of soda and of sulphurous acid on, 28, 196—Action on metallic acetates, 25, 70; 26, 12—And alkaline iodides, compounds of, 44, 36—And potassium iodide, double, 77, 191—Compounds with other iodides, 71, 136—Detecting adulteration of, 34, 154
- Lead iododisulphobismuthate, preparation and properties, 85, 263
- Lead ions, univalent, in aqueous solutions, 97, 81
- Lead nitrate and sodium nitrate, mixtures of solutions of, 97, 93—Behaviour towards solution of basic acetate of lead, 14, 34—Crystallising pan for, 27, 247—Isomorphous crystals of, 94, 260
- Lead nitrite, red-lead from, 21, 264
- Lead nitrosulphates, existence of, 51, 188
- Lead oxamate, 3, 253
- Lead oxide, action of potassa upon, 45, 243—Action on ammonium hydrochlorate, 53, 311—Action on phenol at elevated temperatures, 30, 9—Action on toluene, 61, 241; 62, 248—Analysis of silicates by means of, 37, 112—And silver oxide, compounds of, 64, 272—And sulphate, interrelation of sulphide with, 70, 42—And sulphur oxide, reactions between, 75, 241, 260—Free from copper and iron, 3, 183—From Algeria, 22, 58—Hydrated, 63, 270—Preparation of pure, 2, 305—Velocity of reduction by carbon monoxide, 96, 315
- Lead oxides, properties of, 68, 221
- Lead oxychlorides, 47, 128
- Lead oxysulphate, 4, 174
- Lead perchloride, 15, 19
- Lead periodate, 87, 287
- Lead peroxide, potassium (see Potassium)
- Lead peroxide, 1, 34—Action of sulphurated hydrogen on, 83, 72—Aluminium persulphate as substitute for in colorimetric estimation of manganese, 84, 239—Analysis, 60, 97—Conductivity, 65, 87—Detection in litharge, 1, 204—Detection of chromium by, 1, 287—Determination, 45, 257—Determination of value, 44, 226—Electrolytic constitution, 87, 283—Electrolytic, influence of physical nature of anode on constitution of, 89, 278—Formation, 85, 20—In lucifer matches, 1, 60, 72—In minimum, estimation, 85, 229—Manufacture, 74, 144—Valuation of commercial, 47, 71
- Lead phosphate, 62, 25; 100, 107—Analysis, 21, 84—Solubility in dilute acetic acid, 42, 165
- Lead polysulphide, 81, 299
- Lead-potassium sulphate, existence of, 91, 191
- Lead protoxide, action on alkaline iodide, 44, 60
- Lead pyrogallate, 27, 233
- Lead selenides, 81, 257; 95, 298
- Lead silicate, manufacture, 6, 120
- Lead silicates, 100, 205, 328—In relation to pottery manufacture, 83, 236
- Lead suboxide, 86, 75, 102; 96, 315
- Lead sucrates, 11, 116
- Lead sulphate and baryta sulphate, separation, 1, 132—And galena, analysis, 67, 60—And lead acetate, crystalline compound, 90, 160—And lead oxide, interaction of sulphide with, 70, 43—And stannic sulphate, compounds, 94, 243—Bibasic from Arigo, 28, 9—Decomposition by ammoniacal gas, 15, 137—Estimating, 69, 278—In chromate of lead, detection and determination, 27, 319—Manufacturing, 1, 20—New volatile compounds of, 69, 270—Reactions with hydrogen and carbonic oxide, 6, 307—Solubility, 100, 24—Solubility in acetates, 28, 264—Solubility in acids, 5, 52—Solubility in ammonium acetate solutions, 94, 26—Solubility in basic lead acetate, 50, 67—Solubility in concentrated solutions of ammonium acetate, 96, 30—Solubility in concentrated solutions of sodium and potassium acetate, 99, 236—Solubility in pure water at 15° C., 11, 50—Transformation into lead acetate, 1, 71
- Lead sulphide, action of light on, 12, 171—And its oxidation products, chemical equilibria in reactions between, 96, 23—As a decolorising agent, 11, 19—Incrustation of lead pipes with, 39, 33—Reaction on metallic chlorides, 47, 305—Reactions, 71, 203—Reactions with hydrogen and carbonic oxide, 6, 307—Transparency of, 21, 239
- Lead sulpho-antimonuret found at Arnsberg, 34, 206
- Lead superoxide, electrolytic, 87, 93
- Lead tetracetate, 68, 253; 73, 103
- Lead tetrachloride, 39, 161
- Lead tetrachlorides, derivatives of, 79, 6, 15, 32, 43
- Lead thiocyanate, action on chlorocarbonates, 83, 284—Action on chlorocarbonic esters, 73, 206
- Lead-tin-bismuth, state of equilibrium of ternary system, 78, 95
- Lead vanadate, extraction of vanadium from, 90, 269
- Lead vanadates, 23, 230, 246
- Lead vanadiates from laurium, 44, 83
- Leadbetter, T. J., Presence of chlorine in coal, 2, 218
- Leadballs and shot, fusion when coming in contact with an iron target, 23, 108—Balls from rifles, experiments with, 26, 229—Chamber crystals as a source of nitrous acid, 25, 191—Chambers, continuous combustion of sulphur in, 15, 325—Earrings (see Earrings)—Electrodes, 16, 243—Hot-water cisterns (see Cisterns)
- Leadhillite, composition, 36, 183—Of Matlock, 37, 112
- Leadhills minerals, 59, 156
- Leaf of a plant, distribution of acidity in, 84, 208—Wood, influence of, compared to conifers on rain and moisture in air, 37, 204
- Leafy trees and conifers, influence on rain-fall and hygrometric condition of air, 36, 100
- Leahy, Capt., and W. R. Hodgkinson (see Hodgkinson, W. R.)

- Leah, Bevan, Ethyldibromobutanetetracarboxylate and synthesis of tetrahydrofuran- α -dicarboxylic acid, 80, 203—Homologues of butanetetracarboxylic acid and of adipic acid, 70, 267
- Leah, B., and W. A. Bone (*see* Bone, W. A.)
- Lean, B., and F. H. Lees, interaction of ethylene dichloride and ethylic sodiomalonate, 76, 79
- Lean, B., and W. H. Perkin, jun., "Introduction to Chemistry and Physics" (review), 75, 69; 85, 106
- Lean, B., and W. H. Whatmough, Preparation of pure iodine, 77, 56
- Lean, George, and W. C. Anderson (*see* Anderson, W. C.)
- Lean, W., and J. Norman Collie (*see* Collie, J. N.)
- Leaper, O. J., Fatal explosion of a gas cylinder at Dublin, 59, 96—"Outlines of Organic Chemistry" (review), 66, 269—"Synoptical Tables of Inorganic and Organic Chemistry" (review), 61, 156
- Leared, A., "Causes and Treatment of Imperfect Digestion" (review), 13, 274
- Leask, H., and W. L. Carpenter (*see* Carpenter, W. L.)
- Leather, J. W., Excessively saline Indian well-waters, 85, 297—Sampling of soils, 85, 296
- Leather, J. W., and R. Anschütz (*see* Anschütz, R.)
- Leather, J., 268—Artificial, 4, 174; 8, 168—Bronze for, 20, 288, 300—Cements or adhesive solutions for joining together surfaces or articles of, 5, 135—Chamois (*see* Chamois)—Cloth, manufacture, 7, 215—Coating for, 4, 8—Compressed, 23, 35, 215—Destruction by gas, 36, 179, 227—Enamel, 10, 38—Enamelled, polishing, 4, 98—Fancy, 10, 38—Fancy, dyeing, 15, 294, 310—Fastened on metal, 28, 84—Gilding of, 10, 39—Ground, agricultural value of, 45, 88—Imitation, 28, 72—Impermeable varnish for, 5, 335—Industry, fermentation in, 68, 199—Industries, 73, 24—Manufacture in Russia, 54, 61—Mineral, 42, 121—Nitrogen in, 47, 155—Oiled, 10, 39—Powder, charred, 100, 280—Presence of soluble weighting ingredients in, 67, 101—Preservation, 55, 69—Properties of, and blacking, 100, 108—Russian, 10, 38—Split, 10, 38—Tanning, 4, 288—Trades' chemists, international conference of, 76, 184—Treatment for purpose of rendering it more durable and impermeable to water, 8, 168—Varnish for, 5, 335—Weighting, 65, 62
- Leathers, acid, 70, 293—Tawed or kid, 10, 38
- Leavenworth, W. S., "Inorganic Qualitative Chemical Analysis" (review), 95, 154
- Leaves, action of mercurial vapours on, 55, 225—Analysis, 10, 306—And fruits and flowers of certain plants, alcohol and acetic fermentation of, 34, 142—Asphyxia of, 12, 293—Caroba (*see* Caroba)—Coca (*see* Coca)—Colouring matters of, 8, 32; 51, 166—Diffusion of heat by, 39, 21—Extraction of green matter of, 51, 142—Foliage, chemistry and physiology of, 67, 223—Functions of, 11, 224; 12, 169, 212; 14, 224, 237—Gaseous thermo-diffusion produced in, 29, 72, 229—Green colouring matter of, 1, 228; 35, 242—Green, effect of light on, 85, 22—Green matter in, 12, 69—Non-chlorophyllous colours of, 56, 279—Of castor oil plant, 1, 51—Of certain vegetables, new acid product contained in, 36, 153—Of *Ilex Cassine*, analysis, 52, 172—Of *Vaccinium myrtillus*, quinic acid in, 2, 204—Physical functions of, 41, 48—Respiration, 12, 202—Respiration in darkness, 54, 237—
- Skeleton, 12, 47, 95; 15, 36—Solution of starch in, 55, 12—Sumach (*see* Sumach)—Variegated, 36, 237—Vine (*see* Vine)—Yellow autumnal colouring matter of, 73, 86—Yew (*see* Yew)
- Leavitt, S., and E. H. Keiser (*see* Keiser, E. H.)
- Lebaigue, E., Action of oxide of bismuth on solutions of sesquioxides, 3, 147—Determination of sugars by polarised light, 46, 291—Oxyfluoride of bismuth, 4, 83
- Lebague, M., Analysis of some extracts of meat, 21, 71
- Lebeau, Paul, Action of fluorine on selenium, 95, 275—Action of fluorine on selenium in presence of glass, 96, 35—Action of lithium-ammonium on antimony and properties of lithium antimonide, 85, 107—Action of reagents on amorphous silicon, 85, 217—Analysis of emerald, 72, 245—Analysis of selenium hexafluoride, 96, 95—Anhydrous fluoride of glucinum and oxyfluoride of glucinum, 77, 288—Borocarbide of glucinum, 77, 266—Cementation of iron by silicon, 85, 200—Compounds of silicon with cobalt, and a new silicide of the metal, 86, 197—Constituents of industrial ferrosilicons, 83, 179—Copper silicide and a new method of formation of a silicon soluble in hydrofluoric acid, 93, 80—Decomposition of lithium carbonate by heat, 87, 311—Decomposition of a mixture of calcium carbonate and an alkaline carbonate under action of heat in a vacuum, 90, 34—Dissociation of alkaline carbonates, 89, 59—Equilibrium produced between copper, silicon, and manganese, 87, 94—Existence of bromine chloride, 94, 241—Formation of isomorphous mixtures of lime and lithia, 90, 44—Glucinum carbide, 72, 209—Hydrogen silicides, 99, 72—Iodide of glucinum, 77, 266—Iron silicide, and its presence in industrial ferrosilicons, 82, 219—Lithium antimonide, and preparation of alloys of this metal, 85, 96—New cobalt silicide, 83, 154—New compound, fluoride of bromine, 93, 33—Physical properties of propane, 91, 304—Preparation and properties of arsenides of strontium, barium, and lithium, 80, 59—Preparation and properties of calcium arsenide, 79, 95—Preparation of alloys of glucinum, 77, 44—Preparation of arsenides, alkaline stibnides, and alloys of alkaline metals, 81, 130—Preparation of glucinum by electrolysis, 77, 172—Preparation of iron silicide, 79, 215—Preparation of pure glucina, 73, 3—Properties of pure glucina, 74, 292—Reduction of magnesia by carbon, 95, 226—Silicon in unstable ferrosilicides, 85, 12—Study of an industrial cuprosilicide, 92, 297—Treatment of the emerald, 73, 3—Treatment of the emerald by the electric furnace, 77, 285—Two silicides of manganese, 87, 70—Use of ammonium metals in organic chemistry, 91, 222, 269

 — Action on mixtures of phosphorus sesquisulphide and sulphur in carbon disulphide solution, 89, 130
 — Action on moist oxygen, 60, 253
 — Action on nitric acid, 29, 268 — Action on nitrocinamic acid, 33, 75
 — Action on organic acids in presence of uranium salts, 74, 55, 67, 79
 — Action on oxalic acid, 63, 229
 — Action on phosphorescent bodies, 43, 279 — Action on phosphorus, 61, 214
 — Action on platinum, gold, and silver chlorides, 78, 263 — Action on potassium ferrocyanide, 93, 243
 — Action on ruthenium peroxide, 64, 214 — Action on silver, 43, 274
 — Action on silver chloride, 16, 266; 19, 226; 64, 60; 65, 153, 307; 88, 263 — Action on silver salts, 15, 122 — Action on soluble iodides, 42, 147 — Action on soluble metallic iodides, 72, 175 — Action on solution of iodine in bisulphide of carbon, 25, 228 — Action on solutions of ferrocyanide of potassium treated with peroxide of hydrogen, 82, 290
 — Action on solutions of oxalic acid, 36, 279 — Action on standard tannin solutions, 42, 44 — Action on sulphide of carbon, 19, 238 — Action on sulphide of lead, 12, 171
 — Action on tissues of mono- and dicotyledonous plants, 22, 154 — Action on triphenylmethyl, 90, 256
 — Action on uranium, 20, 213 — Action on uranyl acetate, 93, 280 — Action on vanadium compounds, 30, 267 — Affects the resistance of selenium and sulphur cells, 51, 310 — Albo-carbon, 45, 106 — And carbonic acid, action on aqueous solutions of iodide of potassium and on onoscopic paper, 36, 110 — And colour, unit of measurement of, 65, 250 — And electricity, 24, 97 — And heat, modifications of elemomargaric acid produced by, 34, 272 — And oxygenated salts, simultaneous action on violet subchloride of silver, 13, 5, 78 — And radiant heat, identity, 25, 218 — And water, action in liberating the perfumes of plants, 73, 164 — Artificial, 20, 143 — Artificial, consumption of materials used for production, 10, 59 — Artificial, distinction of colours by, 38, 26 — Artificial, modern methods compared, electric-incandescent, Welsbach and acetylene, 75, 73 — Artificial, Philipp carb-oxygen lamp, 22, 20
 — Artificial, photography by, 70, 186 — Artificial, spectra of, 3, 184, 261, 303 — Astigmatic beam of, experiments on shadows in, 87, 300 — Astronomical consequences of pressure of, 68, 45 — Black, 75, 227 — Black, condensation of, 73, 269 — Bottles for reagents sensitive to, 52, 107 — Calcium, use of, 21, 100, 230 — Cathode, spectra of, in gases containing nitrogen and carbon, 88, 198 — Chemical action of, 36, 230; 44, 214; 53, 180; 63, 272; 86, 258 — Chemical action on immediate vegetable principles, 10, 273 — Chemical activity measurement, 12, 235 — Chemical effects, 90, 10 — Chemical force, 34, 195 — Chemical influence of, 77, 248 — Chemical reactions produced by, 18, 267 — Circularly polarised, optical phenomena produced by crystals submitted to, 25, 295 — Colour of, 14, 34 — Coloured, experiments on plants with, 35, 210 — Coloured, influence on quantity of gas set free by plants, 20, 108 — Coloured, photometrical method of measurement and comparison of intensity of, 20, 82 — Decomposition of oxalic acid by, 6, 47 — Deleterious effect on potatoes, 4, 327 — Development from coal-gas, 66, 1, 14 — Deviation through symmetrically arranged prisms, 23, 108 — Diffused by the

sky, analysis, 63, 284 — Diffusion of, 66, 301 — Diffusion of, and illumination of transparent bodies, 30, 107 — Direction of rotation impressed upon substances by, 42, 222 — Dispersion of, 21, 57 — Dispersion of, influence of ponderable molecules on, 22, 95 — Dispersion, minimum, 21, 238 — Effect on combination of hydrogen and bromine, 77, 11 — Effect on green leaves, 88, 22 — Effect on phenol and anisole, 100, 68, 81, 94 — Electric (see Electric) — Electro-chemical energy of, 48, 280 — Electro-silicic, 35, 231 — Emission, attempt to refer some phenomena of, to mechanical principles, 12, 286 — Emission by phosphorus, cause, 21, 190 — Emitted by sodium burning in air, 5, 150 — Emitted by vapour of iodine, 25, 275 — Emitted by vapour of metals or metallic compounds, effect of increased temperature on, 5, 233 — Examination in certain cases of phosphorescence, 18, 30 — Experiments on, 17, 274; 20, 84 — Fixed, constant and white, mode of producing, 11, 297 — For magic lantern, 20, 192, 204 — Gas (see Gas-light) — Gases given off plants under agency of, 5, 98 — Homogeneous, of great intensity, 3, 263 — In dark alleys, economy of, 16, 77 — In luminous flames, source of, 18, 116 — In solar spectrum, distribution, 42, 234 — In spectrum, distribution, 42, 9 — Influence in chemical reactions, 52, 283 — Influence of colour on reducing action of, 30, 285 — Influence on diazo-reactions, 91, 266 — Influence on electrical conductivity of selenium, 33, 1, 113 — Influence on explosion of nitrogen iodide, 58, 64 — Influence on explosive gases, 64, 197 — Influence on fermentation, 97, 79, 87 — Influence on haloid salts of silver, 23, 252 — Influence on plants, 49, 246; 50, 248 — Influence on transformation of matter, 43, 235 — Influence on vegetation, 17, 120 — Intensity of, formulæ of, 42, 56 — Intensity of, measure for, 25, 178 — Intensity produced from combustion of gas and volume of gas consumed, relation between, 21, 96 — Intensity of, measurement of, 71, 136 — Interference between portions of, from independent sources, 85, 298 — Invisible, 20, 23 — Lime, 1, 152 — Lime, and sun, calorific spectrum of, 26, 82 — Lime, at South Foreland, 4, 270 — Lime, in barracks, 17, 157 — Lines produced in spectrum by passage through coloured vapours, 3, 304 — Luminous effects due to action on different bodies, 20, 262 — Luminous intensity, measurement of, 13, 25 — Magnesian, 2, 12; 9, 128, 171 — Magnesium, 16, 156; 52, 178 — Magnesium, rival for, 12, 108 — Magnetic rotation and refraction and dispersion of, 60, 48 — Magneto-electric, 7, 247, 284 — Mechanical actions of, 42, 234 — Monochromatic, 17, 231 — Monochromatic, gas-burner for producing, 55, 248 — Monochromatic, produced by sodium salts, application for ascertaining change of colour of tincture of litmus in alkalimetric assays, 27, 70 — Monochromatic, spectroscopic observations by, 45, 86 — Movement of small suspended particles by influence of, 84, 174 — New substance sensitive to, 48, 106 — New unit of, for photometry, 36, 103 — Obtaining, 5, 60; 9, 32 — Of comet b of 1881, analysis, 44, 275 — Of different colours, photometric comparison of sources, 44, 214 — Of different colours, velocity, 46, 288 — Opacity of yellow soda flame to light of its own colour, 3, 2 — Optical and chemical absorption, 23, 180 — Oxyhydrogen, 5, 222; 19, 226, 249;

21, 130; 25, 23, 59; 27, 245 — Oxyhydrogen, experiments at Beauvais, 22, 48 — Oxyhydrogen, in streets of Paris, 25, 23 — Oxyhydrogen, substance replacing magnesia in, 17, 286 — Parallel, rotatory polarisation in, 56, 180 — Passing through quartz, velocity, 22, 191 — Phosphorescent, 14, 204 — Phosphorescent, and cathodes, 44, 286 — Photography with dark, 73, 73, 110, 121, 133, 209 — Physiological action, 29, 257, 270, 279 — Platinum, 21, 35 — Polarisation, 23, 151 — Polarisation, elliptical, 29, 175 — Polarised, application to determine condition of a body under stress, 100, 161 — Polarised, 31, 267; 59, 70, 276 — Polarised, action exerted on, by solutions of cellulose in Schweitzer's reagent, 49, 124, 190 — Polarised, action of chief derivatives of amylic alcohol on, 27, 319 — Polarised, action of mannite and nitromannite on, 26, 157 — Polarised, action of oils with, 57, 142 — Polarised, application to microphotography, 21, 178 — Polarised, determination of sugars by, 48, 291 — Polarised deviations by solutions of inverted sugar, 39, 212, 234 — Polarised, effect of moisture in modifying refraction of plane, by glass, 50, 256 — Polarised, effect of starch, salicine, etc., on, 37, 271 — Polarised, experiments on glass in, 58, 253 — Polarised, for valuing cinchona barks, 24, 132 — Polarised, illumination of opaque bodies by, 29, 286 — Polarised, illumination of transparent substances by means of, 20, 158, 225 — Pressure sources of, 85, 37, 52, 61 — Primary effects of upon vegetation, 45, 252 — Principle of an accumulator, 73, 175 — Produced by a solar protuberance, spectrum of, 22, 11 — Producing for artificial illumination, 9, 32 — Production of coloured spectra by, 39, 282 — Propagation of, 42, 329 — Rate of decomposition of chlorine-water by, 60, 271 — Rays, wave-lengths of, photography of, 71, 118; 81, 267 — Red, action on hair, 86, 246 — Reduction of silver bromide by, 45, 222 — Reflection of, 36, 152; 75, 312 — Reflected by potassium permanganate, 37, 247 — Refraction of, 38, 152 — Refraction of, certain phenomena of, 20, 46 — Remarks upon, 7, 45 — Resistance of colouring matters fixed on tissues to, 58, 60; 59, 313 — Result, as a source of, 35, 188 — Reversed action in photography, 15, 128 — Sensibility of eye to differences of, 42, 60 — Sensitiveness of ferricyanide of potassium for, 23, 142, 156 — Sensitiveness of haloid salts of silver for, 23, 180 — Sensitiveness of permanganate to, 51, 83 — Sensitiveness of salts of silver to, 36, 152 — Sensitiveness of selenium and sulphur cells to, 52, 191 — Sodium, apparatus for obtaining a powerful, 93, 107 — Sodium, lamps for, 68, 185 — Sodium, production, 67, 248 — Solar, action on vegetation in northern regions, 40, 302 — Solar, and heat, comparative effects of, 55, 116 — Solar, chemical transformations induced by, 54, 116 — Solar, evolution of oxygen from green twigs exposed to, in water previously boiled, 35, 221 — Solar, measurement of chemical action of, 39, 33 — Spectrometric study of certain sources of, 38, 152 — Spectrum, abnormal, 40, 264 — Spectrum produced by a solar protuberance, reversal of two lines of sodium in, 22, 21 — Speed of, conditions relative to theoretic expression of, 43, 70 — Stratified, 31, 72; 33, 170 — Sulphide of carbon, 19, 215 — Transformation of sulphur under influence of, 21, 59 — Transmitted and diffused, phenomena of, 20, 82 — Transmitted by plates of polished crown-glass, 22, 96 — Transverse absorption of, 36, 150 — Ultra-violet, 100, 268 — Ultra-violet,

- action on glass, 91, 102—Ultra-violet, action on minerals, 89, 1—Ultra-violet, action on moist and dried mixtures of carbon monoxide and oxygen, 92, 207—Ultra-violet, action on moist and dry carbon dioxide, 93, 75—Ultra-violet, action on rare earth oxides, 88, 285—Ultra-violet, chemical action, 94, 245—Ultra-violet, chemical and electrical changes induced by, 94, 77—Ultra-violet, chemical changes in gases submitted to action of, 95, 248—Ultra-violet, formation of ozone by, 92, 144, 100, 107—Ultra-violet in laboratory and in practice, 95, 255—Ultra-violet, ionisation of air by, 97, 275—Ultra-violet, photomicrographic apparatus for, 93, 103—Ultra-violet, reactions, 97, 60—Ultra-violet, selective absorption of metals for, 58, 216—Uneven distribution in a diffraction grating spectrum, 86, 22—Velocity of, 17, 34; 27, 100—Velocity of, determination, 38, 107—Vibrations of matter and waves of the other in, 37, 104—Waves, electrical resonance of minute metal particles for, 85, 141—Waves, photographic action of stationary, 70, 254—White and coloured, velocity of, 43, 295—White, quantitative analysis of, 39, 253—White, re-composition of, 54, 250—Without heat, 2, 60—Zirconia, 18, 276; 19, 107, 213, 310—Zodiacal, and aurora borealis, 21, 82
- Lights, artificial, effects of colouration and extinction of colours produced by, 13, 31—Coloured, 56, 139—Electric, 42, 291—Electric, new system of, 38, 287
- Lichter, gas (*see* Gas)
- Lightfoot, J., Black dye from aniline, 6, 287—“Chemical History and Progress of Aniline Black” (review), 26, 68—Curious properties of camphor, and its use in detecting presence of grease, 7, 301—Dyeing and printing fabrics and yarns, 14, 50—From pigments and other colouring matters on textile fabrics and yarns, 3, 200—Properties of camphor, 8, 104—Test for purity of acetic acid, 4, 200
- Lightfoot-black, transferring from one fibre to another, 40, 59
- Lightness, 16, 220—Apparent resistance of white are in, 49, 253—Illumination, 1, 171—Illumination, electric, 53, 72—Illumination, gas for, 25, 154—With flashing lights, visibility of, 33, 100; 34, 9
- Lighting and ventilation, 10, 252—Apparatus, 47, 202—By means of flame, 78, 80—By products from resinous trees, 34, 163—Electric (*see* Electric)—Gas (*see* Gas)—Incandescent, 79, 2—New system, 51, 240—Pneumatic, 53, 203—Use of carburetted air for, 88, 10—With acetylene, 74, 12—With resin, 36, 23
- Lightning and lightning-rods and conductors, 25, 20—Ascending vertically, 42, 200—Bead, 34, 134—Bursting of trees and objects struck by, 28, 300; 29, 5—Causes which produce, 28, 6—Clouds and fogs, 68, 280, 290—Column, 45, 13—Conductor destroyed by lightning, 25, 312; 26, 94—Conductor for powder magazines, 32, 18—Conductors, 40, 10—Conductors, construction and maintenance, 30, 283—Conductors, efficacy of, 26, 193; 46, 243—Conductors, electric movements observed in connection with, 27, 205—Conductors, lead in platinum points in, 33, 251—Conductors, utility, 22, 33—Curious behaviour of, 40, 57—Curious effects of, 22, 155, 227—Deaths by, 12, 275—Destruction of a church by, 25, 91—Discharge, influence of sun and water pipes in determining direction, 25, 43—During storm of August 18, 1874, effect, 34, 134—Effects, 22, 155, 227; 26, 83; 37, 196—Effects produced by, at Troyes, 28, 108—Flash of, 15, 36—Flashes, duration, 23, 50, 245—Flashes, duration and multiple character, 27, 191—Flashes, photograph of, 59, 299—Gas-burner lighted by, 24, 108—Globe and diffused, near the ground, 43, 220—Injury from, 25, 100—Japanese mixture for producing, 20, 95—Photographs, 60, 10—Rods, 46, 66—Rods, modification of earth-conductors, 49, 224—Rods, new arrangement, 35, 86—Rods, price of factor of safety in, 57, 50—Sheet, spectrum of, 30, 28—Spectra, 24, 229; 30, 253; 32, 65; 35, 2; 40, 65—Spectrum, 9, 66; 24, 96; 30, 28—Trees damaged by, 10, 295—Without thunder, 21, 11; 43, 232
- Lightships and shore, electrical communications between, 55, 213
- Lignac, M. de (*see* de Lignac, M.)
- Lignification, chemistry of, 59, 106—Technical aspects of, 47, 111
- Lignine, detection, 50, 175—In woods, determination, 65, 21
- Lignite coal from Devonshire, gases in, 35, 240—From Louisiana, 30, 151—From Russia, 22, 151—From Viscovada, Italy, 21, 15—Oil, decomposition of tarry, at a red heat, 38, 35—Tar and petroleum, decomposition by superheating, 38, 210—Vanadiferous, from Argentine Republic, 66, 211
- Lignites, composition, 24, 312—Of middle and southern Italy, 21, 157—Volatile combustible matter in, 94, 508
- Lignocelluloses, action of chlorine on, 58, 215—Action of nitric acid on, 71, 226—Chemistry of, 72, 16—Colour reactions, 95, 299; 96, 400—Composition, 64, 62
- Lignon, M. and G. Lignossier, Determination of chlorine, 58, 281
- Lignone, preparation of fulminate of mercury with, 2, 328
- Lilienfeld's synthetic peptone, 82, 54
- Lille, Imperial Society of Sciences at, 21, 144
- Lilley, H. J., “Lecture Course in Elementary Chemistry” (review), 66, 171
- Lilley, H. T., “Bench Book for Test-tube work in Chemistry” (review), 62, 37
- Lim, C., Electrolysis of barium chloride, 64, 25
- Limb, C. and E. J. Maumené, Hydrates, 57, 171
- Lime, 90, 185—Action on available soil constituents, 96, 245—Action on natural earthy substances, 78, 316—Action on quinine, 52, 97—Action on silica in mortar, 40, 250—Analysis of substances containing, 59, 128—And alumina, separation, 2, 291; 25, 277—And baryta separation, 65, 120—And baryta and strontia, estimation, 19, 290—And baryta and strontia, separation, 63, 13, 44—And baryta and strontia, simultaneous separation and estimation, 88, 108—And carbonic acid, apparatus for continuous preparation by one operation, 22, 94—And carbonic acid, purification of saccharine beet-juice by means of, 20, 145—And caustic soda, 21, 150—And cement, 22, 22—And ferrous oxide, separation, 25, 277—And lithia, isomorphous mixtures of, formation, 90, 44—And magnesia, separation, 2, 110; 14, 33; 25, 277; 47, 101—And magnesia, separation when dolomites are to be analysed, 20, 167—And magnesia simultaneously present in solutions of chloride of sodium, estimation, 88, 310—And manganese, separation, 60, 262—And mortar, 22, 220—And phosphoric acid and magnesia, estimation, 30, 200—And phosphoric acid, separation, 7, 212; 25, 277—And protoxide of manganese, separation, 2, 266—And sesquioxide of iron, separation, 2, 328—And strontia, sesquioxide of iron, etc., separation, 2, 201—And sugar combinations, 25, 156—And sugar compound, 19, 250—And sulphuric acid, quantitative determination, 73, 285, 299—Anhydrous and hydrated, in concretes, estimation of free, 87, 109—Anhydrous, crystalline, 42, 48—Anhydrous, heat of formation, 79, 130—As dolomite in cultivated soils, 86, 148—Behaviour when burned, 16, 4—Bleaching, 29, 264—Bird (*see* Bird-line)—Caustic, action on pure solutions of sugar and raw beet-juice, 43, 36—Caustic, calcined, 60, 234—Caustic, in samples of crude burnt lime, 40, 220—Combined in soils, 59, 97—Crucibles (*see* Crucibles)—Crystallised, specimen, 83, 263—Cupriferos, fluorescence of, 57, 220—Decrease in body, and deficient ingestion of, 36, 101—Determinations, 1, 144; 90, 248—Discharge of negative electricity from, 95, 277—Effect on insoluble phosphates in soils, 85, 157—Elimination from natural waters by means of oxalic acid, 20, 201—Estimation, 20, 167; 86, 208—Ferriferous, fluorescence of, 58, 12—Flour, detection, 6, 13—Gas (*see* Gas)—Generation, Bishop's process, 37, 89—Hydraulic, assay with hot water, 62, 207—In bone-black, determination, 54, 166—In flour, detection, 6, 13—In manuring, 83, 132—In meteoric waters, 29, 250—In mineral phosphates, 76, 212—In mortars, proportion, 32, 82—In plants, 49, 104—In tan wares, 61, 37—In water, solubility, 37, 103—In waters, estimation, 77, 135—Juice, adulterated, 13, 108—Juice and scurvy, 15, 37—Juice, determination of nitric acid in commercial, 39, 206—Juice, testing, 20, 287, 300—Kila heated with gas, 23, 107—Kilns, composition of gas from, 36, 270—Light, 1, 152—Light and sun, calorific spectrum of, 26, 82—Light at South Foreland, 4, 279—Light in barracks, 17, 157—Lights in caisson of East River Bridge, 22, 208—Milk of, specific gravity, 54, 38—Precipitating plant, 27, 169—Precipitation by alkaline carbonates, 39, 264—Precipitation by ammonia, 35, 238—Precipitation with alkaline carbonates, 36, 275—Preparation of pure, 12, 181—Prepared at different temperatures, thermic properties, 79, 215—Products obtained by distillation of bran with, 78, 210, 223—Properties at its fusing-point, 85, 83—Ratio between solubility in presence of alkalis, and caustification of alkaline carbonates, 89, 208—Reagent for, extremely sensitive, 41, 102—Salts, behaviour of magnesian salts with, at various temperatures, 38, 153—Salts, influence on saccharimetry, 34, 6—Salts of bones, 32, 103—Salts, solubility in ammoniacal solutions, 2, 107—Separation and determination, 49, 259—Soap, 16, 317—Soda (*see* Soda)—Softening of water by means of, 25, 28, 35, 59—Solubility in saccharine solutions, 82, 283—Solubility in water, 37, 103; 98, 244—Suent, from gas purifiers, analysis, 33, 97—Tree, saccharine substance met with on, 25, 50, 118—Use as disinfectant of sewage, 1, 218—Water, action of silica on, 47, 199—Water, saturated, for preservation of eggs, 83, 208—Water, softening water by, 26, 301—Water, specific gravity, 55, 317—Water to fix fatty acids in water used to feed steam boilers, 36, 204—White soda, 78, 59
- Lime acetate, 47, 176—Acetic acid in commercial, 18, 250, 274—Analysing commercial, 18, 5—Distillation, 23, 213—Examination, 1, 40—Grey and

- brown, 25, 216, 228—Valuation, 53, 181
- Lime aluminates in water, solubility, 45, 187
- Lime bicarbonate, non-existence, 3, 141
- Lime bichromate as a substitute for animal charcoal in sugar industry, 25, 214
- Lime bisulphite, 20, 252, 264—Uses in pharmacy, 16, 192
- Lime borate from Peru, 4, 182; 26, 36—Manufacture of borax from, 20, 129—Natural, 1, 286—Substitution for lime in refining sugars, 35, 118
- Lime butyrate, distillation, 23, 213
- Lime carbonate, action of chlorine on, 1, 107—Action of sulphur on, 29, 208; 30, 52; 31, 107—Alkalinity, 22, 85, 150; 25, 147—And chloride of calcium, double salt of, 3, 207—And phosphato at high temperatures, mutual behaviour, 29, 263—At high temperature, deportment of, both with fluxes and alone, 5, 116—Crystalline form, 23, 23—Determination, 50, 172—Dissolving effect of carbonic acid on, 26, 58—Hydrated, 24, 34; 31, 185—In bone black, estimation, 22, 75—Precipitation from water, 47, 49—Solubility in water saturated with carbonic acid, 20, 118—Solution by carbonic acid, 26, 35
- Lime carminate, 27, 322
- Lime chlorate, 45, 200
- Lime chloride, 39, 150; 46, 255; 48, 281—Action of mineral acids on, 32, 62—Action of water on, 6, 113—Action on alcohols, 43, 274—Action on aniline, 18, 256—Action on compound ethers, 1, 119—Action on ethylic alcohol, 40, 46—And analogous bodies, 48, 182, 304—And manganese peroxide, behaviour on ignition with chromium oxide and sodium carbonates, 45, 60—And a metallic salt, preparation of anthraquinone by action of, on anthracene, 35, 154—Arsenic in, 52—As an insecticide, 5, 247—Battery, 40, 240—Chemical constitution, 29, 146—Composition, 26, 251—Constitution, 50, 94—For bites of venomous serpents, 71, 212—In water, detection, 46, 43—Nature of, 29, 72; 32, 10—Preparation, 8, 78—Preparation of chlorine from, 46, 255—Preservation, 3, 31—Products of action on the amines, 33, 95, 118—Spontaneous decomposition, 2, 243, 262; 7, 84—Technology of, 38, 232—Use as purifying material for acetilene, 83, 110—Valuation, 7, 107
- Lime citrate, 83, 36
- Lime formate, dry distillation, 28, 99—Production of methylic alcohol in distillation of, 28, 32
- Lime glycerophosphate, 80, 221
- Lime hydrocarbonate, saccharate of, 21, 240—Succinate of, applied to purification of sugar-cane juice, 23, 10—Succinate of, for sugar refining, 24, 108
- Lime hypochlorite, action on pronylic alcohols, 40, 276—Action on sulphur, 1, 200—Promised, 27, 34—Formation, 20, 48—Formation and composition, 85, 222
- Lime hypophosphite, 4, 312—Reaction on sulphite of, 3, 326
- Lime lactate, 27, 34
- Lime levulosate, 41, 92
- Lime manganate, 20, 230
- Lime oxalate, 9, 240—Crystallised, 15, 5
- Lime phosphate, 22, 228, 240—And lime carbonate, mutual behaviour at elevated temperatures, 29, 263—And sulphurous acid, combinations, 20, 267—As a mordant, 22, 239—Discovery of, 21, 276—Experiments on physiological and therapeutical properties of, 21, 299—Facts concerning history of, 18, 58—For dyeing and calico printing, 20, 84—Fossil, deposits of, in Departments of Ardennes and La Meuse, 34, 21—Hydrated gelatinous, and its industrial applications, 31, 208—In acetic acid, 22, 178—In glass, 36, 43—In subnitrate of bismuth, detection, 18, 124—In teak-wood, 5, 95—In urine, 4, 287—Native, composition, 25, 33—Native, discovery of a layer of, 21, 300—Natural, treatment for several purposes, 5, 152—Near St. Petersburg, 23, 180—Nodules of, agricultural employment, 2, 328—Of Ciply, Belgium, 30, 144; 31, 217—Process for sewage utilisation, 22, 148—Process for treating mineral and other substances containing, 42, 177—Reduced, in superphosphates, estimating, 19, 229—Solubility, 24, 306—Treating organic and other substances containing, 3, 221—Tri-basic, crystallisation, 21, 72
- Lime phosphates, 25, 119—Canadian and other, 21, 150—Deposits in Estremadura, 12, 21—Fossil, in province of Oran, 76, 140—Gelatinous, action of, 13, 143—In superphosphates, estimating, 19, 229, 266—Mineral, 1, 10—Native, detection of bromine and iodine in, 26, 312—Russian, 25, 300
- Lime phosphoglycerate, 77, 12; 78, 60
- Lime pyrolignite, crude, examination, 39, 264
- Lime pyrophosphate, preparation, 24, 312
- Lime rosolate, 26, 288
- Lime saccharate, abnormal behaviour, 20, 58—Liquid glue prepared from, 27, 20—Monobasic, 27, 283—Sexbasic, 25, 210
- Lime saccharocarbonate, 31, 185
- Lime silicate and alumina silicate, 95, 276—And soda silicate, soluble, 1, 286—Manufacturing, 5, 69—New, 26, 103
- Lime succrates, 11, 8, 56
- Lime sulphate, 21, 263; 59, 85—Absorption of ammoniacal gas by, 35, 155—Action on alkaline sulphates, 35, 44—And soda sulphate, crystallised double, 43, 6—And sulphur in animal charcoal, estimation, 21, 35—Hydrated, solubility in solutions of sea-salt, 89, 9—In beer, estimation, 38, 107—Reaction of hypophosphite of soda on, 3, 126—Reciprocal action, 11, 70—Solubility in chlorhydric acid, 7, 222—Solubility in solutions of sugar, 37, 134—Solvent action of glycerin on, 27, 208—Utilisation, 20, 287, 300
- Lime sulphite, preparation and uses of neutral, 2, 287
- Lime superphosphate, 2, 70; 4, 156; 25, 230—Formation, 29, 235—In the soil reversion of, 86, 170—Mineral phosphates used in making, 21, 150—Volumetric analysis, 12, 11
- Lime superphosphates, determination of phosphates in, 15, 82
- Limes, determination of alumina in, 50, 222—Oil of, composition of a distilled, 89, 176—Otto of, 35, 250—Phosphatic, process for enriching, 71, 185
- Limestone, carboniferous, in Ohio, 23, 107—Dolomitic, 20, 35—Fossiliferous, containing a magnesian silicate, 15, 193—In soils, rapid determination of active, 55, 224—Magnesian, extracting magnesia from, 20, 60—Silicates of shelly, 38, 80—Sub-carboniferous, examination of silica in, 92, 61—With cone-in-cone structure, 74, 115
- Limestones and dolomites, 26, 59—Argillaceous, determination of titanium in, 100, 323—Separation of silica in, 41, 234—Magnesian, hydraulicity of, 13, 6
- Limed coal (see Coal)
- Limetting, 65, 116—Constitution, 84, 288
- Limonene, action of chromyl chloride on, 29, 248—Derived alcohol of, 83, 131—Magnetic rotation, 85, 94—Oxidation with chromyl chloride, 96, 277
- Limonene nitroschlorides, dextro- (see Dextrolimonene)
- Limonene nitrosocyanides, 90, 21—And derivatives, 91, 196
- Limonite, 52, 32—Analysis, 53, 65
- Limonsin, M. S., Researches on protoxide of nitrogen in solution, 20, 60
- Limousin, M., Danger of use of badly vulcanised caoutchouc tubes in chemical operations, 50, 144—Determination of quantity of organic matter in water, 50, 237
- Linnach, L., and P. Gordan (see Gordan, P.)
- Limpach, L., and W. R. Hodgkinson (see Hodgkinson, W. R.)
- Limprecht, H., Action of bromine on silver salts of benzene sulphonic acids, 35, 40—Azoxy-, azo-, and hydroazo-compounds, 38, 141—Communications from Greifswald laboratory, 27, 305; 30, 84; 31, 109—Constitution of diazo-derivatives of benzenesulphonic acids, 36, 214—Derivatives of muconic acid, 22, 130—Dimethylanilinephthaloylic acid, 79, 144—Mucic acid and pyromucic acid, 27, 107—Phosphoric ethyl-ether, 12, 46—Pyromucic acid group, 20, 226—Reduction of nitro compounds with stannous chloride, 37, 161—Replacement of Br and SO₃H by H in benzenesulphonic acid, 35, 123—Tetraphenol, 21, 191—Toluylen oxide, 21, 286
- Limprecht, H., and O. Hesse (see Hesse, O.)
- Limprecht, H., and A. Jena, Benzoin, 22, 167
- Limprecht, H., and H. Schwanert, Benzoin, 23, 252—Combinations of tolan, 23, 262—Combinations of toluol group, 21, 82—Compounds of toluol group, 17, 213—Oxytoliden, 20, 226—Stilben series, 20, 108—Toluylen, isotoluylen, and stilben alcohols, 25, 22—Toluylen group, 19, 274—Toluylen oxide, 22, 167
- Linalol, essence of, 72, 73
- Linalol, constitution, 85, 180—Ethers, allylic, 90, 56—Group in plants, metamorphoses and migrations of compounds of, 82, 59

- Liqueurs, determination of sugar in, 58, 107—Examination, 47, 165—Manufacture, 53, 24—Yellow of naphthol 8 in, 75, 256
- Liquid and gaseous states of matter, 24, 1—Apparatus for keeping at a constant level, 1, 192, 204—Aqueous, estimation of chloroform in, 93, 80—At boiling-point, apparatus for treating with gases, 95, 103—At constant temperature, vapour pressure of, 70, 235—Carbonated cupric (*see* Cupric)—Combustible matters and mobile conductors, 75, 164—Combustible matters, distillation, 5, 355—Compounds, physical properties of, 54, 97—Compounds, specific volumes of, 8, 62; 46, 197; 50, 117—Corrosive, pipes for, 67, 26—Dutch, 19, 191, 204, 211—Fluorescent, 18, 30—Gastric (*see* Gastric)—Glyceric (*see* Glyceric)—Heterogeneous, Distillation, 40, 99—Iodoarsenical-mercurial (*see* Iodoarsenical-mercurial)—Molybdic (*see* Molybdic)—Of albuminous peristitis, 69, 61—Of Fromberg, 51, 166—Organic bodies, molecular refraction of, 54, 213—Place submitted to electro-magnetic actions, conditions of equilibrium, 50, 248—Rapidly evaporating a large quantity of, 37, 205—Specific gravity of, 63, 58—State, 89, 169, 181—State, change of bodies from solid to, 43, 255—Storax (*see* Storax)—Substances, crystalline, 93, 187—Substances, molecular volumes of, 58, 292—Substances, specific gravity of, 5, 40—Surface, impact with, 45, 79—Use of glycerin as a heating, 72, 37—Volume of a dissolved substance, 94, 302
- Liquids, absorption of carbonic acid gas by, verification of law of Henry and Dalton for, 16, 247—Agitation of, 42, 13—Albuminous, diffusion when in contact with distilled water, 24, 241—Alcoholic, coagulation-point, 41, 241—Alcoholic, names given to, 20, 191—Alcoholic, ozone for maturing and mellowing, 25, 118—Alcoholic, passage through porous bodies, 46, 254; 47, 117—Alcoholic, solubility and activity of soluble ferments in, 73, 12—And dissolved substances, optical rotatory power, 37, 263—And gases, diffusion, 82, 163—And gases, diffusion, motion produced by, 41, 58—And gases near their critical temperatures, behaviour, 42, 9—And gases, static diffusion, 81, 289—And solids, resistance to Röntgen rays, 73, 177—And solids, solution in gases, 78, 297, 309—And solids, vibratory forms, 38, 152—And solutions, viscosities of mixtures of, 81, 283—Animal (*see* Animal)—Apparatus for continuous extraction with ether, 93, 75—Apparatus for fractionated distillation, 68, 257—Apparatus for measuring, 65, 68, 125—Arrangement for measuring out, 71, 217—Ascent in very narrow spaces, 28, 234—Boiling, prevention of bumping in, 65, 179—Boiling-points, 4, 14, 20; 85, 233—Boiling-points of, correction from observed to normal pressure, 85, 234—Bumping, prevention, 20, 53, 299—Cohesion figures of, 9, 96; 18, 284; 19, 45, 59—Cohesion figures of, by submersion, 9, 292—Coloured, 2, 275—Comparing heats of evaporation of different, 72, 243—Compressed, expansion, 57, 12—Compressibility, 36, 54, 62—Compressibility, measuring, 63, 247—Compressibility under high pressures, 26, 58—Conductivity, measurement, 42, 6—Constitution, 41, 284—Containing alkaline iodo-mercurate bases, 92, 143—Corrosive, appliances for raising, 53, 97—To remove noxious vapours in evaporation of, 50, 211—Crystalline, 77, 286—Crystalline, transparent clear, 93, 46—Decoloration and disinfection, 5, 138—Decomposition, 69, 22, 33, 43—Decomposition of salts by, 43, 118—Detection of acetone in, 53, 96—Determination of boiling-points of very small quantities, 97, 371—Determination of coefficient of solubility of, 80, 243—Determination of temperature of solidification in, especially sulphur, 33, 241—Determining foreign bodies in, 68, 246—Determining strength, 59, 243—Dielectric, chemical action of electric discharge on, 77, 165—Distillation of superheated, 21, 256—Ebullition of, 4, 20—Ebullition of superposed, 37, 121—Electric conductivity, when no electrolysis takes place, 25, 45—Electric resistance, measuring, 32, 13; 53, 153—Estimation of organic matter with permanganate in acid, and in alkaline, 93, 295—Fermentation, 8, 109—Fermented, determination of succinic acid in presence of fixed acids in, 98, 245—Fermentable, sterilisation in the cold, 50, 177—Films of, diffusion of vapours through, 35, 162—Filtering, substitute for a funnel in, 71, 40—Filtration, 68, 25—Filtration through fibrous membranes, 50, 237—Floating and expansion of, on liquids, 20, 106—Fluorescent, for Geissler's tubes, 20, 72—Formation of drops from, 21, 214, 226—Gaseous, moveable stopper for, 1, 227—Holding solids in solution, critical point, 71, 76—Homogeneous, rate of evolution of gases from, 99, 174, 181—Illumination by means of neutral or polarised light, 20, 108—In antique vases, 75, 312—In vacuo, distilling and concentrating, 20, 239—In vacuo, laws obeyed by, 82, 231—Inflammable, 22, 36, 60—Instrument for sampling, 68, 174—Intermixture of two, with exclusion of air, 69, 109—Latent heat of volatilisation, 21, 71—Latent heats of evaporation, 83, 100—Law of diffusion, 62, 275—Magnetic rotatory
- polarisation of, 22, 108—Magnetic rotatory power of, 22, 38—Measuring by drops, 57, 39—Method for discriminating between non-racemic and racemic, 80, 264—Mixed, separation, 32, 270—Mixed, solvent properties in relation to the chemical characters and solvent properties of their compounds, 86, 251—Mixed, vapour pressures and boiling-points, 85, 233; 86, 290, 291—Mixed, volume of, 43, 140—Molecular association, 76, 299—Molecular complexity, 68, 136; 95, 79—Molecular formulae, 69, 57—Molecular volumes, 48, 194—Molecular weights, 52, 239, 251; 64, 54; 70, 269; 71, 221—Mutual solution of, 34, 284—Nature of, 54, 10, 203, 305—Non-explosive, explosions produced by, 51, 183, 195, 208—Normal, for volumetric analysis, 19, 303—Of different natures, change of temperature produced by mixture of, 15, 118—Of high dispersive power, 22, 282—Of organism, constancy of congelation point, 72, 281—Organic, absorption of gases by, 24, 194—Organic, absorption spectra, 47, 178—Organic, activity, 70, 46—Organic, apparatus for determining specific inductive capacity, 97, 262—Organic, estimation of carbon and hydrogen in volatile, 79, 50—Organic, molecular volume change during the formation of dilute solutions in, 72, 279—Organic, superficial tension, 81, 105—Osmosis of, across a membrane of pig-bladder, 83, 47—Passage of electricity through, 94, 91—Passage of Röntgen rays through, 73, 133—Petroleum spirit and allied, 42, 189—Poisonous, pipettes for measuring, 66, 166—Potable, purification, 74, 43—Rapid dialysis of, 68, 172—Reciprocal action of two, 86, 35—Reciprocal solutions of, 46, 256—Refrigerating or freezing, 14, 239—Rendering substances less pervious to, 7, 239—Rotatory power, action of temperature on, 67, 110, 194; 77, 10—Separation of three, by fractional distillation, 68, 255; 74, 258—Solidification by pressure, 55, 80—Solubility, 75, 299—Specific gravity, 27, 179; 45, 46; 47, 13—Specific gravity apparatus for, 36, 168, 194, 195, 204—Specific gravity, correction for buoyancy of air, 100, 313—Specific gravity, method of finding, 41, 203; 57, 138—Specific heats, 9, 293; 64, 224; 86, 302—Specific volumes, determining, 62, 279—Spirituos, alcoholometric method by distillation of alkalised, 34, 51—Spontaneous ascending movement in capillary tubes, 28, 195—Spreading out of, 21, 179—Standard, determination of chromium by, 35, 213—Stationary, measurement of potential of electrode in, 90, 231—Sterilisation, 77, 188—Stratification, 52, 320—Stretching, 62, 9—Superficial tension, 22, 35; 24, 35—Superficial viscosity, 27, 161—Supersaturation by their own vapours, 24, 313—Surface-tension of, and the supersaturation of saline solutions, relation between, 25, 281, 297—Thermal expansion, 67, 80—Thermal properties, 78, 200—Titration of hot, 62, 274—Utilisation of temperature of critical point of, 71, 64—Variation with temperature of number of nuclei formed in supercooled, 78, 59—Vibrations on surface of, 41, 48—Viscosity, 67, 168, 226—Viscosity and association in binary mixtures of, 100, 313—Viscosity and chemical nature, 69, 93, 123, 135—Viscous, 59, 266—Volatile, analysis, 64, 321—Volatile, heat of combustion, 81, 240—Volatile, sealing up in glass tubes, 63, 24—Volatile, vapour-tensions of mixtures of, 72, 167, 182,

- 100, 212, 231, 238, 250, 263—Volatilisation in gases, 36, 246—Volumes of, at their boiling points, 39, 241—Vertex rings in, 36, 132—Which are not miscible, simultaneous boiling of, 22, 191
- Liquidus curves of ternary system aluminium-copper-tin, 99, 295
- Liquor ammoniacal, 38, 103—Ammoniacal, apparatus for decanting and treating, 29, 123—Ammoniacal, Scotch, 47, 56—Ammoniacal, to remove sulphur from gas, 12, 277—Ammoniacal, treatment, 8, 217
- Liquors, alcoholic, action of oxygen on, 74, 184—Alcoholic strength of, 28, 24—Copper (*see* Copper)—Cupric, for estimation of sugar, 27, 21—Distilled, 95, 175—Fermented, analysis, 66, 112—Fermented, new alkaloid in, 19, 71—Fermented, preserving, 5, 27—Spirituos, examination, 59, 180
- Liquor bismuthi et ammoniæ citratis and metallic bismuth, 18, 74—Preparation, 12, 27; 13, 91
- Liquor ferri iodidi, 2, 89; 4, 117
- Liquor potassæ, 3, 188—As a solvent for gum resins, 11, 108
- Liquorice, 62, 274—Extract of, 10, 237—Juice, estimation of gum in, 47, 175—Root, improvements in making extracts from, 1, 70
